

## **Supplemental Listing Document**

If you are in any doubt as to any aspect of this document, you should consult your stockbroker or other registered dealer in securities, bank manager, solicitor, accountant or other professional adviser.

Application has been made to the Singapore Exchange Securities Trading Limited (the “**SGX-ST**”) for permission to deal in and for quotation of the Certificates (as defined below). The SGX-ST assumes no responsibility for the correctness of any statements made or opinions or reports expressed in this document, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this document. Admission to the Official List of the SGX-ST is not to be taken as an indication of the merits of SG Issuer, Société Générale, the Certificates, or the Company (as defined below).

**17,800,000 European Style Cash Settled Long Certificates**  
**relating to the ordinary shares of DBS Group Holdings Ltd**  
**with a Daily Leverage of 5x**

**issued by**

**SG Issuer**

**(Incorporated in Luxembourg with limited liability)**

**unconditionally and irrevocably guaranteed by**

**Société Générale**

---

**Issue Price: S\$0.45 per Certificate**

---

This document is published for the purpose of obtaining a listing of all the above certificates (the “**Certificates**”) to be issued by SG Issuer (the “**Issuer**”) unconditionally and irrevocably guaranteed by Société Générale (the “**Guarantor**”), and is supplemental to and should be read in conjunction with a base listing document dated 16 June 2023 including such further base listing documents as may be issued from time to time, as supplemented by an addendum dated 28 July 2023 and an addendum dated 8 March 2024 (the “**Base Listing Document**”), for the purpose of giving information with regard to the Issuer, the Guarantor and the Certificates. Information relating to the Company (as defined below) is contained in this document.

This document does not constitute or form part of any offer, or invitation, to subscribe for or to sell, or solicitation of any offer to subscribe for or to purchase, Certificates or other securities of the Issuer, nor is it calculated to invite, nor does it permit the making of, offers by the public to subscribe for or purchase for cash or other consideration the Certificates or other securities of the Issuer.

Restrictions have been imposed on offers and sales of the Certificates and on distributions of documents relating thereto in Singapore, Hong Kong, the European Economic Area, the United Kingdom and the United States (see “Placing and Sale” contained herein).

The Certificates are complex products. You should exercise caution in relation to them. Investors are warned that the price of the Certificates may fall in value as rapidly as it may rise and holders may

sustain a total loss of their investment. The price of the Certificates also depends on the supply and demand for the Certificates in the market and the price at which the Certificates is trading at any time may differ from the underlying valuation of the Certificates because of market inefficiencies. It is not possible to predict the secondary market for the Certificates. Although the Issuer, the Guarantor and/or any of their affiliates may from time to time purchase the Certificates or sell additional Certificates on the market, the Issuer, the Guarantor and/or any of their affiliates are not obliged to do so. Investors should also note that there are leveraged risks because the Certificates integrate a leverage mechanism and the Certificates will amplify the movements in the increase, and in the decrease, of the value of the Underlying Stock (as defined below) and if the investment results in a loss, any such loss will be increased by the leverage factor of the Certificates. As such, investors could lose more than they would if they had invested directly in the Underlying Stock.

The Certificates are classified as capital markets products other than prescribed capital markets products<sup>1</sup> and Specified Investment Products (SIPs)<sup>2</sup>, and may only be sold to retail investors with enhanced safeguards, including an assessment of such investors' investment knowledge or experience.

The Certificates constitute general unsecured obligations of the Issuer (in the case of any substitution of the Issuer in accordance with the Conditions of the Certificates, the Substituted Obligor as defined in the Conditions of the Certificates) and of no other person, and the guarantee dated 16 June 2023 (the "**Guarantee**") and entered into by the Guarantor constitutes direct unconditional unsecured senior preferred obligations of the Guarantor and of no other person, and if you purchase the Certificates, you are relying upon the creditworthiness of the Issuer and the Guarantor and have no rights under the Certificates against any other person.

Application has been made to the SGX-ST for permission to deal in and for quotation of the Certificates and the SGX-ST has agreed in principle to grant permission to deal in and for quotation of the Certificates. It is expected that dealings in the Certificates will commence on or about 25 April 2024.

As of the date hereof, the Guarantor's long term credit rating by S&P Global Ratings is A, and by Moody's Investors Service, Inc. is A1.

The Issuer is regulated by the Luxembourg Commission de Surveillance du Secteur Financier on a consolidated basis and the Guarantor is regulated by, *inter alia*, the Autorité des Marchés Financiers, the Autorité de Contrôle Prudentiel et de Résolution and the European Central Bank.

24 April 2024

---

<sup>1</sup> As defined in the Securities and Futures (Capital Markets Products) Regulations 2018.

<sup>2</sup> As defined in the MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products.

Subject as set out below, the Issuer and the Guarantor accept full responsibility for the accuracy of the information contained in this document and the Base Listing Document in relation to themselves and the Certificates. To the best of the knowledge and belief of the Issuer and the Guarantor (each of which has taken all reasonable care to ensure that such is the case), the information contained in this document and the Base Listing Document for which they accept responsibility (subject as set out below in respect of the information contained herein with regard to the Company) is in accordance with the facts and does not omit anything likely to affect the import of such information. The information with regard to the Company as set out herein is extracted from publicly available information. The Issuer and the Guarantor accept responsibility only for the accurate reproduction of such information. No further or other responsibility or liability in respect of such information is accepted by the Issuer and the Guarantor.

No person has been authorised to give any information or to make any representation other than those contained in this document in connection with the offering of the Certificates, and, if given or made, such information or representations must not be relied upon as having been authorised by the Issuer or the Guarantor. Neither the delivery of this document nor any sale made hereunder shall under any circumstances create any implication that there has been no change in the affairs of the Issuer, the Guarantor or their respective subsidiaries and associates since the date hereof.

This document does not constitute an offer or invitation by or on behalf of the Issuer or the Guarantor to purchase or subscribe for any of the Certificates. The distribution of this document and the offering of the Certificates may, in certain jurisdictions, be restricted by law. The Issuer and the Guarantor require persons into whose possession this document comes to inform themselves of and observe all such restrictions. In particular, the Certificates and the Guarantee have not been and will not be registered under the United States Securities Act of 1933, as amended or any state securities law, and trading in the Certificates has not been approved by the United States Commodity Futures Trading Commission (the "CFTC") under the United States Commodity Exchange Act of 1936, as amended and the Issuer has not been and will not be registered as an investment company under the United States Investment Company Act of 1940, as amended, and the rules and regulations thereunder. None of the Securities and Exchange Commission, any state securities commission or regulatory authority or any other United States, French or other regulatory authority has approved or disapproved of the Certificates or the Guarantee or passed upon the accuracy or adequacy of this document. Accordingly, Certificates, or interests therein, may not at any time be offered, sold, resold, traded, pledged, exercised, redeemed, transferred or delivered, directly or indirectly, in the United States or to, or for the account or benefit of, U.S. persons, nor may any U.S. person at any time trade, own, hold or maintain a position in the Certificates or any interests therein. In addition, in the absence of relief from the CFTC, offers, sales, re-sales, trades, pledges, exercises, redemptions, transfers or deliveries of Certificates, or interests therein, directly or indirectly, in the United States or to, or for the account or benefit of, U.S. persons, may constitute a violation of United States law governing commodities trading and commodity pools. Consequently, any offer, sale, resale, trade, pledge, exercise, redemption, transfer or delivery made, directly or indirectly, within the United States or to, or for the account or benefit of, a U.S. person will not be recognised. A further description of certain restrictions on offering and sale of the Certificates and distribution of this document is given in the section headed "Placing and Sale" contained herein.

The SGX-ST has made no assessment of, nor taken any responsibility for, the financial soundness of the Issuer or the Guarantor or the merits of investing in the Certificates, nor have they verified the accuracy or the truthfulness of statements made or opinions expressed in this document.

The Issuer, the Guarantor and/or any of their affiliates may repurchase Certificates at any time on or after the date of issue and any Certificates so repurchased may be offered from time to time in one or more transactions in the over-the-counter market or otherwise at prevailing market prices or in negotiated transactions, at the discretion of the Issuer, the Guarantor and/or any of their affiliates. Investors should not therefore make any assumption as to the number of Certificates in issue at any time.

References in this document to the “**Conditions**” shall mean references to the Terms and Conditions of the European Style Cash Settled Long/Short Certificates on Single Equities contained in the Base Listing Document. Terms not defined herein shall have the meanings ascribed thereto in the Conditions.

## RISK FACTORS

The following are risk factors relating to the Certificates:

- (a) investment in Certificates involves substantial risks including market risk, liquidity risk, and the risk that the Issuer and/or the Guarantor will be unable to satisfy its/their obligations under the Certificates. Investors should ensure that they understand the nature of all these risks before making a decision to invest in the Certificates. You should consider carefully whether Certificates are suitable for you in light of your experience, objectives, financial position and other relevant circumstances. Certificates are not suitable for inexperienced investors;
- (b) the Certificates constitute general unsecured obligations of the Issuer (in the case of any substitution of the Issuer in accordance with the Conditions of the Certificates, the Substituted Obligor as defined in the Conditions of the Certificates) and of no other person, and the Guarantee constitutes direct unconditional unsecured senior preferred obligations of the Guarantor and of no other person. In particular, it should be noted that the Issuer issues a large number of financial instruments, including Certificates, on a global basis and, at any given time, the financial instruments outstanding may be substantial. If you purchase the Certificates, you are relying upon the creditworthiness of the Issuer and the Guarantor and have no rights under the Certificates against any other person;
- (c) since the Certificates relate to the price of the Underlying Stock, certain events relating to the Underlying Stock may cause adverse movements in the value and the price of the Underlying Stock, as a result of which, the Certificate Holders (as defined in the Conditions of the Certificates) may, in extreme circumstances, sustain a significant loss of their investment if the price of the Underlying Stock has fallen sharply;
- (d) due to their nature, the Certificates can be volatile instruments and may be subject to considerable fluctuations in value. The price of the Certificates may fall in value as rapidly as it may rise due to, including but not limited to, variations in the frequency and magnitude of the changes in the price of the Underlying Stock, the time remaining to expiry, the currency exchange rates and the creditworthiness of the Issuer and the Guarantor;
- (e) if, whilst any of the Certificates remain unexercised, trading in the Underlying Stock is suspended or halted on the relevant stock exchange, trading in the Certificates may be suspended for a similar period;
- (f) as indicated in the Conditions of the Certificates and herein, a Certificate Holder must tender a specified number of Certificates at any one time in order to exercise. Thus, Certificate Holders with fewer than the specified minimum number of Certificates in a particular series will either have to sell their Certificates or purchase additional Certificates, incurring transactions costs in each case, in order to realise their investment;
- (g) investors should note that in the event of there being a Market Disruption Event (as defined in the Conditions) determination or payment of the Cash Settlement Amount (as defined in the Conditions) may be delayed, all as more fully described in the Conditions;
- (h) certain events relating to the Underlying Stock require or, as the case may be, permit the Issuer to make certain adjustments or amendments to the Conditions. Investors may refer to the Conditions 4 and 6 on pages 30 to 34 and the examples and illustrations of adjustments set out in the “Information relating to the European Style Cash Settled Long Certificates on Single Equities” section of this document for more information;
- (i) the Certificates are only exercisable on the Expiry Date and may not be exercised by Certificate Holders prior to such Expiry Date. Accordingly, if on the Expiry Date the Cash Settlement Amount is zero, a Certificate Holder will lose the value of his investment;

- (j) the total return on an investment in any Certificate may be affected by the Hedging Fee Factor (as defined below), Management Fee (as defined below) and Gap Premium (as defined below);
- (k) investors holding their position overnight should note that they would be required to bear the annualised cost which consists of the Management Fee and Gap Premium, which are calculated daily and applied to the value of the Certificates, as well as certain costs embedded within the Leverage Strategy (as described below) including the Funding Cost (as defined below) and Rebalancing Cost (as defined below);
- (l) investors should note that there are leveraged risks because the Certificates integrate a leverage mechanism and the Certificates will amplify the movements in the increase, and in the decrease, of the value of the Underlying Stock and if the investment results in a loss, any such loss will be increased by the leverage factor of the Certificates. As such, investors could lose more than they would if they had invested directly in the Underlying Stock;
- (m) when held for longer than a day, the performance of the Certificates could be more or less than the leverage factor that is embedded within the Certificates. The performance of the Certificates each day is locked in, and any subsequent returns are based on what was achieved the previous day. This process, referred to as compounding, may lead to a performance difference from 5 times the performance of the Underlying Stock over a period longer than one day. This difference may be amplified in a volatile market with a sideways trend, where market movements are not clear in direction, whereby investors may sustain substantial losses;
- (n) the Air Bag Mechanism (as defined below) is triggered only when the Underlying Stock is calculated or traded, which may not be during the trading hours of the Relevant Stock Exchange for the Certificates (as defined below);
- (o) investors should note that the Air Bag Mechanism reduces the impact on the Leverage Strategy if the Underlying Stock falls further, but will also maintain a reduced exposure to the Underlying Stock in the event the Underlying Stock starts to rise after the Air Bag Mechanism is triggered, thereby reducing its ability to recoup losses;
- (p) there is no assurance that the Air Bag Mechanism will prevent investors from losing the entire value of their investment, in the event of (i) an overnight fall in the Underlying Stock, where there is a 20% or greater gap between the previous day closing price and the opening price of the Underlying Stock the following day, as the Air Bag Mechanism will only be triggered when market opens (including pre-opening session or opening auction, as the case may be) the following day or (ii) a sharp intraday fall in the price of the Underlying Stock of 20% or greater within the 15 minutes Observation Period compared to the reference price, being: (1) if air bag has not been previously triggered on the same day, the previous closing price of the Underlying Stock, or (2) if one or more air bag have been previously triggered on the same day, the latest New Observed Price. Investors may refer to pages 50 to 51 of this document for more information;
- (q) certain events may, pursuant to the terms and conditions of the Certificates, trigger (i) the implementation of methods of adjustment or (ii) the early termination of the Certificates. The Certificates may be terminated prior to its Expiry Date for the following reasons which are not exhaustive: Illegality and force majeure, occurrence of a Holding Limit Event (as defined in the Conditions of the Certificates) or Hedging Disruption (as defined in the Conditions of the Certificates). For more detailed examples of when early termination may occur, please refer to the FAQ section under the "Education" tab on the website at [dlc.socgen.com](http://dlc.socgen.com).

The Issuer will give the investors reasonable notice of any early termination. If the Issuer terminates the Certificates early, the Issuer will, if and to the extent permitted by applicable law, pay an amount to each Certificate Holder in respect of each Certificate held by such holder equal to the fair market

value of the Certificate less the cost to the Issuer of unwinding any underlying related hedging arrangements, all as determined by the Issuer in its sole and absolute discretion. The performance of this commitment shall depend on (i) general market conditions and (ii) the liquidity conditions of the underlying instrument(s) and, as the case may be, of any other hedging transactions. Investors should note that the amount repaid by the Issuer may be substantially less than the amount initially invested, and at the worst case, be zero. Investors may refer to the Condition 13 on pages 36 to 38 of this document for more information;

- (r) there is no assurance that an active trading market for the Certificates will sustain throughout the life of the Certificates, or if it does sustain, it may be due to market making on the part of the Designated Market Maker. The Issuer acting through its Designated Market Maker may be the only market participant buying and selling the Certificates. Therefore, the secondary market for the Certificates may be limited and you may not be able to realise the value of the Certificates. Do note that the bid-ask spread increases with illiquidity;
- (s) in the ordinary course of their business, including without limitation, in connection with the Issuer or its appointed designated market maker's market making activities, the Issuer, the Guarantor and any of their respective subsidiaries and affiliates may effect transactions for their own account or for the account of their customers and hold long or short positions in the Underlying Stock. In addition, in connection with the offering of any Certificates, the Issuer, the Guarantor and any of their respective subsidiaries and affiliates may enter into one or more hedging transactions with respect to the Underlying Stock. In connection with such hedging or market-making activities or with respect to proprietary or other trading activities by the Issuer, the Guarantor and any of their respective subsidiaries and affiliates, the Issuer, the Guarantor and any of their respective subsidiaries and affiliates may enter into transactions in the Underlying Stock which may affect the market price, liquidity or value of the Certificates and which may affect the interests of Certificate Holders;
- (t) various potential and actual conflicts of interest may arise from the overall activities of the Issuer, the Guarantor and/or any of their subsidiaries and affiliates.

The Issuer, the Guarantor and any of their subsidiaries and affiliates are diversified financial institutions with relationships in countries around the world. These entities engage in a wide range of commercial and investment banking, brokerage, funds management, hedging transactions and investment and other activities for their own account or the account of others. In addition, the Issuer, the Guarantor and any of their subsidiaries and affiliates, in connection with their other business activities, may possess or acquire material information about the Underlying Stock. Such activities and information may involve or otherwise affect issuers of the Underlying Stock in a manner that may cause consequences adverse to the Certificate Holders or otherwise create conflicts of interests in connection with the issue of Certificates by the Issuer. Such actions and conflicts may include, without limitation, the exercise of voting power, the purchase and sale of securities, financial advisory relationships and exercise of creditor rights. The Issuer, the Guarantor and any of their subsidiaries and affiliates have no obligation to disclose such information about the Underlying Stock or such activities. The Issuer, the Guarantor and any of their subsidiaries and affiliates and their officers and directors may engage in any such activities without regard to the issue of Certificates by the Issuer or the effect that such activities may directly or indirectly have on any Certificate;

- (u) legal considerations which may restrict the possibility of certain investments:

Some investors' investment activities are subject to specific laws and regulations or laws and regulations currently being considered by various authorities. All potential investors must consult their own legal advisers to check whether and to what extent (i) they can legally purchase the

Certificates (ii) the Certificates can be used as collateral security for various forms of borrowing (iii) if other restrictions apply to the purchase of Certificates or their use as collateral security. Financial institutions must consult their legal advisers or regulators to determine the appropriate treatment of the Certificates under any applicable risk-based capital or similar rules;

- (v) the credit rating of the Guarantor is an assessment of its ability to pay obligations, including those on the Certificates. Consequently, actual or anticipated declines in the credit rating of the Guarantor may affect the market value of the Certificates;
- (w) the Certificates are linked to the Underlying Stock and subject to the risk that the price of the Underlying Stock may decline. The following is a list of some of the significant risks associated with the Underlying Stock:
  - Historical performance of the Underlying Stock does not give an indication of future performance of the Underlying Stock. It is impossible to predict whether the price of the Underlying Stock will fall or rise over the term of the Certificates; and
  - The price of the Underlying Stock may be affected by the economic, financial and political events in one or more jurisdictions, including the stock exchange(s) or quotation system(s) on which the Underlying Stock may be traded;
- (x) the value of the Certificates depends on the Leverage Strategy performance built in the Certificate. The Calculation Agent will make the Leverage Strategy last closing level and a calculation tool available to the investors on a website;
- (y) two or more risk factors may simultaneously have an effect on the value of a Certificate such that the effect of any individual risk factor may not be predicted. No assurance can be given as to the effect any combination of risk factors may have on the value of a Certificate;
- (z) as the Certificates are represented by a global warrant certificate which will be deposited with The Central Depository (Pte) Limited (“**CDP**”):
  - (i) investors should note that no definitive certificate will be issued in relation to the Certificates;
  - (ii) there will be no register of Certificate Holders and each person who is for the time being shown in the records maintained by CDP as entitled to a particular number of Certificates by way of interest (to the extent of such number) in the global warrant certificate in respect of those Certificates represented thereby shall be treated as the holder of such number of Certificates;
  - (iii) investors will need to rely on any statements received from their brokers/custodians as evidence of their interest in the Certificates; and
  - (iv) notices to such Certificate Holders will be published on the web-site of the SGX-ST. Investors will need to check the web-site of the SGX-ST regularly and/or rely on their brokers/custodians to obtain such notices;
- (aa) the US Foreign Account Tax Compliance Act (“**FATCA**”) withholding risk:

FATCA generally imposes a 30 per cent. withholding tax on certain U.S.-source payments to certain non-US persons that do not provide certification of their compliance with IRS rules to disclose the identity of their US owners and account holders (if any) or establish a basis for exemption for such disclosure. The Issuer or an investor’s broker or custodian may be subject to FATCA and, as a result, may be required to obtain certification from investors that they have complied with FATCA disclosure requirements or have established a basis for exemption from FATCA. If an investor does

not provide the Issuer or the relevant broker or custodian with such certification, the Issuer and the Guarantor or other withholding agent could be required to withhold U.S. tax on U.S.-source income (if any) paid pursuant to the Certificates. In certain cases, the Issuer or the relevant broker or custodian could be required to close an account of an investor who does not comply with the FATCA certification procedures.

FATCA IS PARTICULARLY COMPLEX. EACH INVESTOR SHOULD CONSULT ITS OWN TAX ADVISER TO OBTAIN A MORE DETAILED EXPLANATION OF FATCA AND TO DETERMINE HOW THIS LEGISLATION MIGHT AFFECT EACH INVESTOR IN ITS PARTICULAR CIRCUMSTANCES;

(bb) U.S. withholding tax

The Issuer has determined that this Certificate is not linked to U.S. Underlying Equities within the meaning of applicable regulations under Section 871(m) of the United States Internal Revenue Code, as discussed in the accompanying Base Listing Document under “TAXATION—TAXATION IN THE UNITED STATES OF AMERICA—Section 871(m) of the U.S. Internal Revenue Code of 1986.” Accordingly, the Issuer expects that Section 871(m) will not apply to the Certificates. Such determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on a Certificate Holder’s particular circumstances. Certificate Holders should consult with their own tax advisers regarding the potential application of Section 871(m) to the Certificates; and

(cc) risk factors relating to the BRRD

*French and Luxembourg law and European legislation regarding the resolution of financial institutions may require the write-down or conversion to equity of the Certificates or other resolution measures if the Issuer or the Guarantor is deemed to meet the conditions for resolution.*

Directive 2014/59/EU of the European Parliament and of the Council of the European Union dated 15 May 2014 establishing a framework for the recovery and resolution of credit institutions and investment firms (the “**BRRD**”) entered into force on 2 July 2014. The BRRD, as amended, has been implemented into Luxembourg law by, among others, the Luxembourg act dated 18 December 2015 on the failure of credit institutions and certain investment firms, as amended (the “**BRR Act 2015**”). Under the BRR Act 2015, the competent authority is the Luxembourg financial sector supervisory authority (*Commission de surveillance du secteur financier*, the CSSF) and the resolution authority is the CSSF acting as resolution council (*conseil de résolution*).

In April 2023, the EU Commission released a proposal to amend, in particular, the BRRD according to which senior preferred debt instruments would no longer rank pari passu with any non covered non preferred deposits of the Issuer; instead, senior preferred debt instruments would rank junior in right of payment to the claims of all depositors.

This proposal will be discussed and amended by the European Parliament and the European Council before being final and applicable. If the Commission proposal was adopted as is, there may be an increased risk of an investor in senior preferred debt instruments losing all or some of their investment in the context of the exercise of the Bail-in Power. The proposal may also lead to a rating downgrade for senior preferred debt instruments.

Moreover, Regulation (EU) No. 806/2014 of the European Parliament and of the Council of 15 July 2014 establishing uniform rules and a uniform procedure for the resolution of credit institutions and certain investment firms in the framework of a Single Resolution Mechanism (“**SRM**”) and a Single Resolution Framework (the “**SRM Regulation**”) has established a centralised power of resolution

entrusted to a Single Resolution Board (the “**SRB**”) in cooperation with the national resolution authorities.

Since November 2014, the European Central Bank (“**ECB**”) has taken over the prudential supervision of significant credit institutions in the member states of the Eurozone under the Single Supervisory Mechanism (“**SSM**”). In addition, the SRM has been put in place to ensure that the resolution of credit institutions and certain investment firms across the Eurozone is harmonised. As mentioned above, the SRM is managed by the SRB. Under Article 5(1) of the SRM Regulation, the SRM has been granted those responsibilities and powers granted to the EU Member States’ resolution authorities under the BRRD for those credit institutions and certain investment firms subject to direct supervision by the ECB. The ability of the SRB to exercise these powers came into force at the beginning of 2016.

Societe Generale has been, and continues to be, designated as a significant supervised entity for the purposes of Article 49(1) of Regulation (EU) No 468/2014 of the ECB of 16 April 2014 establishing the framework for cooperation within the SSM between the ECB and national competent authorities and with national designated authorities (the “**SSM Regulation**”) and is consequently subject to the direct supervision of the ECB in the context of the SSM. This means that Societe Generale and SG Issuer (being covered by the consolidated prudential supervision of Societe Generale) are also subject to the SRM which came into force in 2015. The SRM Regulation mirrors the BRRD and, to a large part, refers to the BRRD so that the SRB is able to apply the same powers that would otherwise be available to the relevant national resolution authority.

The stated aim of the BRRD and the SRM Regulation is to provide for the establishment of an EU-wide framework for the recovery and resolution of credit institutions and certain investment firms. The regime provided for by the BRRD is, among other things, stated to be needed to provide the resolution authority designated by each EU Member State (the “**Resolution Authority**”) with a credible set of tools to intervene sufficiently early and quickly in an unsound or failing institution so as to ensure the continuity of the institution’s critical financial and economic functions while minimising the impact of an institution’s failure on the economy and financial system (including taxpayers’ exposure to losses).

In accordance with the provisions of the SRM Regulation, when applicable, the SRB, has replaced the national resolution authorities designated under the BRRD with respect to all aspects relating to the decision-making process and the national resolution authorities designated under the BRRD continue to carry out activities relating to the implementation of resolution schemes adopted by the SRB. The provisions relating to the cooperation between the SRB and the national resolution authorities for the preparation of the institutions’ resolution plans have applied since 1 January 2015 and the SRM has been fully operational since 1 January 2016.

The SRB is the Resolution Authority for the Issuer and the Guarantor.

The powers provided to the Resolution Authority in the BRRD and the SRM Regulation include write-down/conversion powers to ensure that capital instruments (including subordinated debt instruments) and eligible liabilities (including senior debt instruments if junior instruments prove insufficient to absorb all losses) absorb losses of the issuing institution that is subject to resolution in accordance with a set order of priority (the “**Bail-in Power**”). The conditions for resolution under the SRM Regulation are deemed to be met when: (i) the Resolution Authority determines that the institution is failing or is likely to fail, (ii) there is no reasonable prospect that any measure other than a resolution measure would prevent the failure within a reasonable timeframe, and (iii) a resolution measure is necessary for the achievement of the resolution objectives (in particular, ensuring the continuity of critical functions, avoiding a significant adverse effect on the financial system, protecting public funds by minimizing reliance on extraordinary public financial support,

and protecting client funds and assets) and winding up of the institution under normal insolvency proceedings would not meet those resolution objectives to the same extent.

The Resolution Authority could also, independently of a resolution measure or in combination with a resolution measure, fully or partially write-down or convert capital instruments (including subordinated debt instruments) into equity when it determines that the institution or its group will no longer be viable unless such write-down or conversion power is exercised or when the institution requires extraordinary public financial support (except when extraordinary public financial support is provided in Article 10 of the SRM Regulation). The terms and conditions of the Certificates contain provisions giving effect to the Bail-in Power in the context of resolution and write-down or conversion of capital instruments at the point of non-viability.

The Bail-in Power could result in the full (i.e., to zero) or partial write-down or conversion of the Certificates into ordinary shares or other instruments of ownership, or the variation of the terms of the Certificates (for example, the maturity and/or interest payable may be altered and/or a temporary suspension of payments may be ordered). Extraordinary public financial support should only be used as a last resort after having assessed and applied, to the maximum extent practicable, the resolution measures. No support will be available until a minimum amount of contribution to loss absorption and recapitalization of 8% of total liabilities including own funds has been made by shareholders, holders of capital instruments and other eligible liabilities through write-down, conversion or otherwise.

In addition to the Bail-in Power, the BRRD provides the Resolution Authority with broader powers to implement other resolution measures with respect to institutions that meet the conditions for resolution, which may include (without limitation) the sale of the institution's business, the creation of a bridge institution, the separation of assets, the replacement or substitution of the institution as obligor in respect of debt instruments, modifications to the terms of debt instruments (including altering the maturity and/or the amount of interest payable and/or imposing a temporary suspension on payments), removing management, appointing an interim administrator, and discontinuing the listing and admission to trading of financial instruments.

Before taking a resolution measure, including implementing the Bail-in Power, or exercising the power to write down or convert relevant capital instruments, the Resolution Authority must ensure that a fair, prudent and realistic valuation of the assets and liabilities of the institution is carried out by a person independent from any public authority.

The BRRD, the BRR Act 2015 and the SRM Regulation however also state that, under exceptional circumstances, if the bail-in instrument is applied, the SRB, in cooperation with the CSSF, may completely or partially exclude certain liabilities from the application of the impairment or conversion powers under certain conditions.

Since 1 January 2016, EU credit institutions (such as Societe Generale) and certain investment firms have to meet, at all times, a minimum requirement for own funds and eligible liabilities ("**MREL**") pursuant to Article 12 of the SRM Regulation. The MREL, which is expressed as a percentage of the total liabilities and own funds of the institution, aims at preventing institutions from structuring their liabilities in a manner that impedes the effectiveness of the Bail-in Power in order to facilitate resolution.

The regime has evolved as a result of the changes adopted by the EU legislators. On 7 June 2019, as part of the contemplated amendments to the so-called "EU Banking Package", the following legislative texts were published in the Official Journal of the EU 14 May 2019:

- Directive (EU) 2019/879 of the European Parliament and of the Council of 20 May 2019 amending the BRRD as regards the loss-absorbing and recapitalisation capacity of credit institutions and investment firms (“**BRRD II**”); and
- Regulation (EU) 2019/877 of the European Parliament and of the Council of 20 May 2019 amending the SRM Regulation as regards the loss-absorbing and recapitalisation capacity (“**TLAC**”) of credit institutions and investment firms (the “**SRM II Regulation**” and, together with the BRRD II, the “**EU Banking Package Reforms**”).

The EU Banking Package Reforms introduced, among other things, the TLAC standard as implemented by the Financial Stability Board's TLAC Term Sheet (“**FSB TLAC Term Sheet**”), by adapting, among other things, the existing regime relating to the specific MREL with aim of reducing risks in the banking sector and further reinforcing institutions’ ability to withstand potential shocks will strengthen the banking union and reduce risks in the financial system.

The TLAC has been implemented in accordance with the FSB TLAC Term Sheet, which impose a level of “Minimum TLAC” that will be determined individually for each global systemically important bank (“**G-SIB**”), such as Societe Generale, in an amount at least equal to (i) 16%, plus applicable buffers, of risk weight assets since January 1, 2022 and 18%, plus applicable buffers, thereafter and (ii) 6% of the Basel III leverage ratio denominator since January 1, 2022 and 6.75% thereafter (each of which could be extended by additional firm-specific requirements).

Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms (the “**CRR**”), as amended by Regulation (EU) 2019/876 as regards the leverage ratio, the net stable funding ratio, requirements for own funds and eligible liabilities, counterparty credit risk, market risk, exposures to central counterparties, exposures to collective investment undertakings, large exposures, reporting and disclosure requirements (the “**CRR II**”), EU G-SIBs, such as Societe Generale, have to comply with TLAC requirements, on top of the MREL requirements, since the entry into force of the CRR II. As such, G-SIBs, such as Societe Generale have to comply with both the TLAC and MREL requirements.

Consequently, the criteria for MREL-eligible liabilities have been closely aligned with the criteria for TLAC-eligible liabilities under CRR II, but subject to the complementary adjustments and requirements introduced in the BRRD II. In particular, certain debt instruments with an embedded derivative component, such as certain structured notes, will be eligible, subject to certain conditions, to meet MREL requirements to the extent that they have a fixed or increasing principal amount repayable at maturity that is known in advance with only an additional return permitted to be linked to that derivative component and dependent on the performance of a reference asset.

The level of capital and eligible liabilities required under MREL is set by the SRB for Societe Generale on an individual and/or consolidated basis based on certain criteria including systemic importance and may also be set for SG Issuer. Eligible liabilities may be senior or subordinated, provided, among other requirements, that they have a remaining term of at least one year and, they recognise contractually the Resolution Authority's power to write down or convert the liabilities governed by non-EU law.

The scope of liabilities used to meet MREL includes, in principle, all liabilities resulting from claims arising from ordinary unsecured creditors (non-subordinated liabilities) unless they do not meet specific eligibility criteria set out in BRRD, as amended by BRRD II. To enhance the resolvability of institutions and entities through an effective use of the bail-in tool, the SRB should be able to require that MREL be met with own funds and other subordinated liabilities, in particular where there are

clear indications that bailed-in creditors are likely to bear losses in resolution that would exceed the losses that they would incur under normal insolvency proceedings. Moreover the SRB should assess the need to require institutions and entities to meet the MREL with own funds and other subordinated liabilities where the amount of liabilities excluded from the application of the bail-in tool reaches a certain threshold within a class of liabilities that includes MREL-eligible liabilities. Any subordination of debt instruments requested by the SRB for the MREL shall be without prejudice to the possibility to partly meet the TLAC requirements with non-subordinated debt instruments in accordance with the CRR, as amended by the CRR II, as permitted by the TLAC standard. Specific requirements apply to resolution groups with assets above EUR 100 billion (top-tier banks, including Societe Generale).

## TERMS AND CONDITIONS OF THE CERTIFICATES

*The following are the terms and conditions of the Certificates and should be read in conjunction with, and are qualified by reference to, the other information set out in this document and the Base Listing Document.*

The Conditions are set out in the section headed “Terms and Conditions of the European Style Cash Settled Long/Short Certificates on Single Equities” in the Base Listing Document. For the purposes of the Conditions, the following terms shall have the following meanings:

Certificates:	17,800,000 European Style Cash Settled Long Certificates relating to the ordinary shares of DBS Group Holdings Ltd (the “ <b>Underlying Stock</b> ”)
ISIN:	LU2517560079
Company:	DBS Group Holdings Ltd (RIC: DBSM.SI)
Underlying Price <sup>3</sup> and Source:	S\$34.38 (Reuters)
Calculation Agent:	Société Générale
Strike Level:	Zero
Daily Leverage:	5x (within the Leverage Strategy as described below)
Notional Amount per Certificate:	SGD 0.45
Management Fee (p.a.) <sup>4</sup> :	0.40%
Gap Premium (p.a.) <sup>5</sup> :	6.50%, is a hedging cost against extreme market movements overnight.
Funding Cost <sup>6</sup> :	The annualised costs of funding, referencing a publicly published reference rate plus spread.
Rebalancing Cost <sup>6</sup> :	The transaction costs (if applicable), computed as a function of leverage and daily performance of the Underlying Stock.
Launch Date:	18 April 2024
Closing Date:	24 April 2024
Expected Listing Date:	25 April 2024

<sup>3</sup> These figures are calculated as at, and based on information available to the Issuer on or about 24 April 2024. The Issuer is not obliged, and undertakes no responsibility to any person, to update or inform any person of any changes to the figures after 24 April 2024.

<sup>4</sup> Please note that the Management Fee is calculated on a 360-day basis and may be increased up to a maximum of 3% p.a. on giving one month’s notice to investors. Any increase in the Management Fee will be announced on the SGXNET. Please refer to “Fees and Charges” below for further details of the fees and charges payable and the maximum of such fees as well as other ongoing expenses that may be borne by the Certificates.

<sup>5</sup> Please note that the Gap Premium is calculated on a 360-day basis.

<sup>6</sup> These costs are embedded within the Leverage Strategy.

Last Trading Date:	The date falling 5 Business Days immediately preceding the Expiry Date, currently being 15 October 2025
Expiry Date:	23 October 2025 (if the Expiry Date is not a Business Day, then the Expiry Date shall fall on the preceding Business Day and subject to adjustment of the Valuation Date upon the occurrence of Market Disruption Events as set out in the Conditions of the Certificates)
Board Lot:	100 Certificates
Valuation Date:	22 October 2025 or if such day is not an Exchange Business Day, the immediately preceding Exchange Business Day.
Exercise:	The Certificates may only be exercised on the Expiry Date or if the Expiry Date is not a Business Day, the immediately preceding Business Day, in a Board Lot or integral multiples thereof. Certificate Holders shall not be required to deliver an exercise notice. Exercise of Certificates shall be determined by whether the Cash Settlement Amount (less any Exercise Expenses) is positive. If the Cash Settlement Amount (less any Exercise Expenses) is positive, all Certificates shall be deemed to have been automatically exercised at 10:00 a.m. (Singapore time) on the Expiry Date or if the Expiry Date is not a Business Day, the immediately preceding Business Day. The Cash Settlement Amount less the Exercise Expenses in respect of the Certificates shall be paid in the manner set out in Condition 4(c) of the Conditions. In the event the Cash Settlement Amount (less any Exercise Expenses) is zero, all Certificates shall be deemed to have expired at 10:00 a.m. (Singapore time) on the Expiry Date or if the Expiry Date is not a Business Day, the immediately preceding Business Day, and Certificate Holders shall not be entitled to receive any payment from the Issuer in respect of the Certificates.
Cash Settlement Amount:	In respect of each Certificate, shall be an amount payable in the Settlement Currency equal to:  Closing Level multiplied by the Notional Amount per Certificate  Please refer to the “Information relating to the European Style Cash Settled Long Certificates on Single Equities” section on pages 42 to 56 of this document for examples and illustrations of the calculation of the Cash Settlement Amount.
Hedging Fee Factor:	In respect of each Certificate, shall be an amount calculated as: Product (for $t$ from 2 to Valuation Date) of $(1 - \text{Management Fee} \times (\text{ACT}(t-1;t) \div 360)) \times (1 - \text{Gap Premium}(t-1) \times (\text{ACT}(t-1;t) \div 360))$ , where:  “ $t$ ” refers to “ <b>Observation Date</b> ” which means each Exchange Business Day (subject to Market Disruption Event) from (and including) the Exchange Business Day immediately preceding the Expected Listing Date to the Valuation Date; and

ACT (t-1;t) means the number of calendar days between the Exchange Business Day immediately preceding the Observation Date (which is “t-1”) (included) and the Observation Date (which is “t”) (excluded).

If the Issuer determines, in its sole discretion, that on any Observation Date a Market Disruption Event has occurred, then that Observation Date shall be postponed until the first succeeding Exchange Business Day on which there is no Market Disruption Event, unless there is a Market Disruption Event on each of the five Exchange Business Days immediately following the original date that, but for the Market Disruption Event, would have been an Observation Date. In that case, that fifth Exchange Business Day shall be deemed to be the Observation Date notwithstanding the Market Disruption Event and the Issuer shall determine, its good faith estimate of the level of the Leverage Strategy and the value of the Certificate on that fifth Exchange Business Day in accordance with the formula for and method of calculation last in effect prior to the occurrence of the first Market Disruption Event taking into account, inter alia, the exchange traded or quoted price of the Underlying Stock and the potential increased cost of hedging by the Issuer as a result of the occurrence of the Market Disruption Event.

Please refer to the “Information relating to the European Style Cash Settled Long Certificates on Single Equities” section on pages 42 to 56 of this document for examples and illustrations of the calculation of the Hedging Fee Factor.

Closing Level: In respect of each Certificate, shall be an amount payable in the Settlement Currency equal to:

$$\left( \frac{\text{Final Reference Level} \times \text{Final Exchange Rate}}{\text{Initial Reference Level} \times \text{Initial Exchange Rate}} - \text{Strike Level} \right) \times \text{Hedging Fee Factor}$$

Initial Reference Level: 1,000

Final Reference Level: The closing level of the Leverage Strategy (as described below) on the Valuation Date

The calculation of the closing level of the Leverage Strategy is set out in the “Specific Definitions relating to the Leverage Strategy” section on pages 19 to 24 below.

Initial Exchange Rate: 1

Final Exchange Rate: 1

Air Bag Mechanism:	<p>The “<b>Air Bag Mechanism</b>” refers to the mechanism built in the Leverage Strategy and which is designed to reduce the Leverage Strategy exposure to the Underlying Stock during extreme market conditions. If the Underlying Stock falls by 15% or more (“<b>Air Bag Trigger Price</b>”) during the trading day (which represents an approximately 75% loss after a 5 times leverage), the Air Bag Mechanism is triggered and the Leverage Strategy is adjusted intra-day. The Air Bag Mechanism reduces the impact on the Leverage Strategy if the Underlying Stock falls further, but will also maintain a reduced exposure to the Underlying Stock in the event the Underlying Stock starts to rise after the Air Bag Mechanism is triggered, thereby reducing its ability to recoup losses.</p> <p>Trading of Certificates is suspended for at least 30 minutes of continuous trading after the Air Bag is triggered. The resumption of trading is subject to the SGX-ST’s requirements of at least 15 minutes after the SGX-ST approves the request from the Issuer to resume trading on the Certificates, rounded to the next quarter of an hour.</p> <p>The Leverage Strategy is floored at 0 and the Certificates cannot be valued below zero. Please refer to the “Extraordinary Strategy Adjustment for Performance Reasons (“Air Bag Mechanism”)” section on pages 22 to 24 below and the “Description of Air Bag Mechanism” section on pages 48 to 49 of this document for further information of the Air Bag Mechanism.</p>
Adjustments and Extraordinary Events:	<p>The Issuer has the right to make adjustments to the terms of the Certificates if certain events, including any capitalisation issue, rights issue, extraordinary distributions, merger, delisting, insolvency (as more specifically set out in the terms and conditions of the Certificates) occur in respect of the Underlying Stock. For the avoidance of doubt, no notice will be given if the Issuer determines that adjustments will not be made.</p>
Underlying Stock Currency:	Singapore Dollar (“ <b>SGD</b> ”)
Settlement Currency:	SGD
Exercise Expenses:	Certificate Holders will be required to pay all charges which are incurred in respect of the exercise of the Certificates.
Relevant Stock Exchange for the Certificates:	The Singapore Exchange Securities Trading Limited (the “ <b>SGX-ST</b> ”)
Relevant Stock Exchange for the Underlying Stock:	The SGX-ST
Business Day, Settlement Business Day and Exchange Business Day:	A “ <b>Business Day</b> ”, a “ <b>Settlement Business Day</b> ” or an “ <b>Exchange Business Day</b> ” is a day on which the SGX-ST is open for dealings in Singapore during its normal trading hours and banks are open for business in Singapore.

Warrant Agent:	The Central Depository (Pte) Limited (“CDP”)
Clearing System:	CDP
Fees and Charges:	<p>Normal transaction and brokerage fees shall apply to the trading of the Certificates on the SGX-ST. Investors should note that they may be required to pay stamp taxes or other documentary charges in accordance with the laws and practices of the country where the Certificates are transferred. Investors who are in any doubt as to their tax position should consult their own independent tax advisers. In addition, investors should be aware that tax regulations and their application by the relevant taxation authorities change from time to time. Accordingly, it is not possible to predict the precise tax treatment which will apply at any given time.</p> <p>Investors holding position overnight would also be required to bear the Management Fee and Gap Premium, which are calculated daily and applied to the value of the Certificates, as well as certain costs embedded within the Leverage Strategy including the Funding Cost and Rebalancing Cost. The Management Fee may be increased up to a maximum of 3% p.a. on giving one month’s notice to investors in accordance with the terms and conditions of the Certificates. Any increase in the Management Fee will be announced on the SGXNET.</p>
Further Information:	Please refer to the website at <a href="http://dlc.socgen.com">dlc.socgen.com</a> for more information on the theoretical closing price of the Certificates on the previous trading day, the closing price of the Underlying Stock on the previous trading day, the Air Bag Trigger Price for each trading day and the Management Fee and Gap Premium.

**Specific Definitions relating to the Leverage Strategy**

**Description of the Leverage Strategy**

The Leverage Strategy is designed to track a 5 times daily leveraged exposure to the Underlying Stock.

At the end of each trading day of the Underlying Stock, the exposure of the Leverage Strategy to the Underlying Stock is reset within the Leverage Strategy in order to retain a daily leverage of 5 times the performance of the Underlying Stock (excluding costs) regardless of the performance of the Underlying Stock on the preceding day. This mechanism is referred to as the Daily Reset.

The Leverage Strategy incorporates an air bag mechanism which is designed to reduce exposure to the Underlying Stock during extreme market conditions, as further described below.

**Leverage Strategy Formula**

**LSL<sub>t</sub>** means, for any Observation Date(t), the Leverage Strategy Closing Level as of such day (t).

Subject to the occurrence of an Intraday Restrike Event, the Leverage Strategy Closing Level as of such Observation Date(t) is calculated in accordance with the following formulae:

On Observation Date(1):

$$LSL_1 = 1000$$

On each subsequent Observation Date(t):

$$LSL_t = \text{Max}[LSL_{t-1} \times (1 + LR_{t-1,t} - FC_{t-1,t} - RC_{t-1,t}), 0]$$

**LR<sub>t-1,t</sub>** means the Leveraged Return of the Underlying Stock between Observation Date(t-1) and Observation Date(t) closing prices, calculated as follows:

$$LR_{t-1,t} = \text{Leverage} \times \left( \frac{S_t}{S_{t-1} \times Rfactor_t} - 1 \right)$$

**FC<sub>t-1,t</sub>** means, the Funding Cost between Observation Date(t-1) (included) and Observation Date(t) (excluded) calculated as follows :

$$FC_{t-1,t} = (\text{Leverage} - 1) \times \frac{\text{Rate}_{t-1} \times \text{ACT}(t-1,t)}{\text{DayCountBasisRate}}$$

**RC<sub>t-1,t</sub>** means the Rebalancing Cost of the Leverage Strategy on Observation Date (t), calculated as follows :

$$RC_{t-1,t} = \text{Leverage} \times (\text{Leverage} - 1) \times \left( \left| \frac{S_t}{S_{t-1} \times Rfactor_t} - 1 \right| \right) \times \text{TC}$$

**TC** means the Transaction Costs applicable (including Stamp Duty and any other applicable taxes, levies and costs which may be levied on the stock transactions on the Relevant Stock Exchange for the Underlying Stock by the applicable regulatory authorities from time to time) that are currently equal to:

0.04%

“Stamp Duty” refers to the applicable rate of stamp duty on the stock transactions in the jurisdiction of the Relevant Stock Exchange for the Underlying Stock, which may be changed by the applicable regulatory authorities from time to time.

**Leverage** 5

**S<sub>t</sub>** means, in respect of each Observation Date(t), the Closing Price of the Underlying Stock as of such Observation Date(t), subject to the adjustments and provisions of the Conditions.

**Rate<sub>t</sub>** means, in respect of each Observation Date(t), a rate calculated as of such day in accordance with the following formula:

$$\text{Rate}_t = \text{CashRate}_t + \% \text{SpreadLevel}_t$$

**CashRate<sub>t</sub>** means, in respect of each Observation Date(t), the daily Singapore Overnight Rate Average (SORA) provided by the Monetary Authority of Singapore as administrator of the benchmark (or a successor

	administrator), as published on BLOOMBERG/SIBCSORA Index or any successor page, being the rate as of day (t-2) at 09:00 Singapore time, provided that if such rate is not available, then such rate shall be determined by reference to the last available rate that was published on Refinitiv Screen (SORA=MAST) or any successor page.
<b>%SpreadLevel<sub>t</sub></b>	1.00%, subject to change by the Issuer on giving 10 Business Days' notice to investors via SGXNet.
<b>Rfactor<sub>t</sub></b>	means, in the event Observation Date (t) is an ex-dividend date of the Underlying Stock, an amount determined by the Calculation Agent, subject to the adjustments and provisions of the Conditions, according to the following formula:  $Rfactor_t = 1 - \frac{Div_t}{S_{t-1}}$ where  <i>Div<sub>t</sub></i> is the dividend to be paid out in respect of the Underlying Stock and the relevant ex-dividend date which shall be considered net of any applicable withholding taxes.
<b>ACT(t-1,t)</b>	ACT (t-1;t) means the number of calendar days between the Exchange Business Day immediately preceding the Observation Date (which is "t-1") (included) and the Observation Date (which is "t") (excluded).
<b>DayCountBasisRate</b>	365
<b>Benchmark Fallback</b>	upon the occurrence or likely occurrence, as determined by the Calculation Agent, of a Reference Rate Event, the Calculation Agent may make adjustments as it may determine appropriate to account for the relevant event or circumstance, including but not limited to using any alternative rates from such date, with or without retroactive effect as the Calculation Agent may in its sole and absolute discretion determine.
<b>Reference Rate Event</b>	means, in respect of the Reference Rate any of the following has occurred or will occur:  (i) a Reference Rate Cessation;  (ii) an Administrator/Benchmark Event; or  (iii) a Reference Rate is, with respect to over-the-counter derivatives transactions which reference such Reference Rate, the subject of any market-wide development formally agreed upon by the International Swaps and Derivative Association (ISDA) or the Asia Securities Industry & Financial Markets Association (ASIFMA), pursuant to which such Reference Rate is, on a specified date, replaced with a risk-free rate (or near risk-free rate) established in order to comply with the recommendations in the Financial Stability Board's paper titled "Reforming Major Interest Rate Benchmarks" dated 22 July 2014.
<b>Reference Rate Cessation</b>	means, for a Reference Rate, the occurrence of one or more of the following events:

(i) a public statement or publication of information by or on behalf of the administrator of the Reference Rate announcing that it has ceased or will cease to provide the Reference Rate permanently or indefinitely, provided that, at the time of the statement or publication, there is no successor administrator that will continue to provide the Reference Rate;

(ii) a public statement or publication of information by the regulatory supervisor for the administrator of the Reference Rate, the central bank for the currency of the Reference Rate, an insolvency official with jurisdiction over the administrator for the Reference Rate, a resolution authority with jurisdiction over the administrator for the Reference Rate or a court or an entity with similar insolvency or resolution authority over the administrator for the Reference Rate, which states that the administrator of the Reference Rate has ceased or will cease to provide the Reference Rate permanently or indefinitely, provided that, at the time of the statement or publication, there is no successor administrator that will continue to provide the Reference Rate; or

(iii) in respect of a Reference Rate, a public statement or publication of information by the regulatory supervisor for the administrator of such Reference Rate announcing that (a) the regulatory supervisor has determined that such Reference Rate is no longer, or as of a specified future date will no longer be, representative of the underlying market and economic reality that such Reference Rate is intended to measure and that representativeness will not be restored and (b) it is being made in the awareness that the statement or publication will engage certain contractual triggers for fallbacks activated by pre-cessation announcements by such supervisor (howsoever described) in contracts;

**Administrator/Benchmark Event** means, for a Reference Rate, any authorisation, registration, recognition, endorsement, equivalence decision, approval or inclusion in any official register in respect of the Reference Rate or the administrator or sponsor of the Benchmark has not been, or will not be, obtained or has been, or will be, rejected, refused, suspended or withdrawn by the relevant competent authority or other relevant official body, in each case with the effect that either the Issuer, the Calculation Agent or any other entity is not, or will not be, permitted under any applicable law or regulation to use the Reference Rate to perform its or their respective obligations under the Certificates.

**Reference Rate(s)** means the rate(s) used in the Leverage Strategy Formula, for example SORA, SOFR and US Federal Funds Effective Rate.

**Extraordinary Strategy Adjustment for Performance Reasons (“Air Bag Mechanism”)**

**Extraordinary Strategy Adjustment for Performance Reasons** If the Calculation Agent determines that an Intraday Restrike Event has occurred during an Observation Date(t) (the **Intraday Restrike Date**, noted hereafter **IRD**), an adjustment (an **Extraordinary Strategy Adjustment for Performance Reasons**) shall take place during such Observation Date(t) in accordance with the following provisions.

(1) Provided the last Intraday Restrike Observation Period as of such Intraday Restrike Date does not end on the TimeReferenceClosing, the Leverage Strategy Closing Level on the Intraday Restrike Date ( $LSL_{IRD}$ ) should be

computed as follows :

$$LSL_{IRD} = \text{Max}[ILSL_{IR(n)} \times (1 + ILR_{IR(n),IR(C)} - IRC_{IR(n),IR(C)}), 0]$$

(2) If the last Intraday Restrike Event Observation Period on the relevant Intraday Restrike Date ends on the TimeReferenceClosing:

$$LSL_{IRD} = \text{Max}[ILSL_{IR(n)}, 0]$$

**ILSL<sub>IR(k)</sub>** means, in respect of IR(k), the Intraday Leverage Strategy Level in accordance with the following provisions:

(1) for k = 1 :

$$ILSL_{IR(1)} = \text{Max}[LSL_{IRD-1} \times (1 + ILR_{IR(0),IR(1)} - FC_{IRD-1,IRD} - IRC_{IR(0),IR(1)}), 0]$$

(2) for k > 1 :

$$ILSL_{IR(k)} = \text{Max}[ILSL_{IR(k-1)} \times (1 + ILR_{IR(k-1),IR(k)} - IRC_{IR(k-1),IR(k)}), 0]$$

**ILR<sub>IR(k-1),IR(k)</sub>** means the Intraday Leveraged Return between IR(k-1) and IR(k), calculated as follows:

$$ILR_{IR(k-1),IR(k)} = \text{Leverage} \times \left( \frac{IS_{IR(k)}}{IS_{IR(k-1)}} - 1 \right)$$

**IRC<sub>IR(k-1),IR(k)</sub>** means the Intraday Rebalancing Cost of the Leverage Strategy in respect of IR(k) on a given Intraday Restrike Date, calculated as follows:

$$IRC_{IR(k-1),IR(k)} = \text{Leverage} \times (\text{Leverage} - 1) \times \left( \left| \frac{IS_{IR(k)}}{IS_{IR(k-1)}} - 1 \right| \right) \times TC$$

**IS<sub>IR(k)</sub>** means the Underlying Stock Price in respect of IR(k) computed as follows:

(1) for k=0

$$iS_{IR(0)} = S_{IRD-1} \times Rfactor_{IRD}$$

(2) for k=1 to n

means in respect of IR(k), the lowest price of the Underlying Stock during the respective Intraday Restrike Observation Period

(3) with respect to IR(C)

$$iS_{IR(C)} = S_{IRD}$$

In each case, subject to the adjustments and provisions of the Conditions.

**IR(k)** For k=0, means the scheduled close for the Relevant Stock Exchange for the Underlying Stock (or any successor thereto) on the Observation Date immediately preceding the relevant Intraday Restrike Date;

For k=1 to n, means the k<sup>th</sup> Intraday Restrike Event on the relevant Intraday Restrike Date.

**IR(C)** means the scheduled close for the Relevant Stock Exchange for the Underlying Stock (or any successor thereto) on the relevant Intraday Restrike Date.

<b>n</b>	means the number of Intraday Restrike Events that occurred on the relevant Intraday Restrike Date.
<b>Intraday Restrike Event</b>	<p>means in respect of an Observation Date(t) :</p> <p>(1) provided no Intraday Restrike Event has previously occurred on such Observation Date (t), the decrease at any Calculation Time of the Underlying Stock price by 15% or more compared with the relevant Underlying Stock Price <math>iS_{IR(0)}</math> as of such Calculation Time.</p> <p>(2) if k Intraday Restrike Events have occurred on the relevant Intraday Restrike Date, the decrease at any Calculation Time of the Underlying Stock price by 15% or more compared with the relevant Underlying Stock Price <math>iS_{IR(k)}</math> as of such Calculation Time.</p>
<b>Calculation Time</b>	means any time between the TimeReferenceOpening and the TimeReferenceClosing, provided that the relevant data is available to enable the Calculation Agent to determine the Leverage Strategy Level.
<b>TimeReferenceOpening</b>	means the scheduled opening time (including pre-opening session or opening auction, as the case may be) for the Relevant Stock Exchange for the Underlying Stock (or any successor thereto).
<b>TimeReferenceClosing</b>	means the scheduled closing time (including closing auction session) for the Relevant Stock Exchange for the Underlying Stock (or any successor thereto).
<b>Intraday Restrike Event Observation Period</b>	<p>means in respect of an Intraday Restrike Event, the period starting on and excluding the Intraday Restrike Event Time and finishing on and including the sooner between (1) the time falling 15 minutes of continuous trading after the Intraday Restrike Event Time and (2) the TimeReferenceClosing.</p> <p>Where, during such period, the Calculation Agent determines that (1) the trading in the Underlying Stock is disrupted or subject to suspension or limitation or (2) the Relevant Stock Exchange for the Underlying Stock is not open for continuous trading, the Intraday Restrike Event Observation Period will be extended to the extent necessary until (1) the trading in the Underlying Stock is no longer disrupted, suspended or limited and (2) the Relevant Stock Exchange for the Underlying Stock is open for continuous trading.</p>
<b>Intraday Restrike Event Time</b>	means in respect of an Intraday Restrike Event, the Calculation Time on which such event occurs.

The Conditions set out in the section headed “Terms and Conditions of the European Style Cash Settled Long/Short Certificates on Single Equities” in the Base Listing Document are set out below. This section is qualified in its entirety by reference to the detailed information appearing elsewhere in this document which shall, to the extent so specified or to the extent inconsistent with the relevant Conditions set out below, replace or modify the relevant Conditions for the purpose of the Certificates.

## TERMS AND CONDITIONS OF THE EUROPEAN STYLE CASH SETTLED LONG/SHORT CERTIFICATES ON SINGLE EQUITIES

### 1. Form, Status and Guarantee, Transfer and Title

- (a) *Form.* The Certificates (which expression shall, unless the context otherwise requires, include any further certificates issued pursuant to Condition 11) are issued subject to and with the benefit of:-
- (i) a master instrument by way of deed poll (the “**Master Instrument**”) dated 16 June 2023, made by SG Issuer (the “**Issuer**”) and Société Générale (the “**Guarantor**”); and
  - (ii) a warrant agent agreement (the “**Master Warrant Agent Agreement**” or “**Warrant Agent Agreement**”) dated any time before or on the Closing Date, made between the Issuer and the Warrant Agent for the Certificates.

Copies of the Master Instrument and the Master Warrant Agent Agreement or Warrant Agent Agreement are available for inspection at the specified office of the Warrant Agent.

The holders of the Certificates (the “**Certificate Holders**”) are entitled to the benefit of, are bound by and are deemed to have notice of all the provisions of the Master Instrument and the Master Warrant Agent Agreement or Warrant Agent Agreement.

- (b) *Status and Guarantee.* The Certificates constitute direct, general and unsecured obligations of the Issuer and rank, and will rank, equally among themselves and *pari passu* with all other present and future unsecured and unsubordinated obligations of the Issuer (save for statutorily preferred exceptions). The Certificates provide for cash settlement on exercise. The Certificates do not entitle Certificate Holders to the delivery of any Underlying Stock, are not secured by the Underlying Stock and do not entitle Certificate Holders to any interest in any Underlying Stock.

The due and punctual payment of any amounts due by the Issuer in respect of the Certificates issued by the Issuer is unconditionally and irrevocably guaranteed by the Guarantor as provided in the Guarantee (each such amount payable under the Guarantee, a “**Guarantee Obligation**”).

The Guarantee Obligations will constitute direct, unconditional, unsecured and unsubordinated obligations of the Guarantor ranking as senior preferred obligations as provided for in Article L. 613-30-3 I 3° of the French Code *Monétaire et Financier* (the “**Code**”).

Such Guarantee Obligations rank and will rank equally and rateably without any preference or priority among themselves and:

- (i) *pari passu* with all other direct, unconditional, unsecured and unsubordinated obligations of the Guarantor outstanding as of the date of the entry into force of the law no. 2016-1691 (the “**Law**”) on 11 December 2016;

- (ii) *pari passu* with all other present or future direct, unconditional, unsecured and senior preferred obligations (as provided for in Article L. 613-30-3 I 3° of the Code) of the Guarantor issued after the date of the entry into force of the Law on 11 December 2016;
- (iii) junior to all present or future claims of the Guarantor benefiting from the statutorily preferred exceptions; and
- (iv) senior to all present and future senior non-preferred obligations (as provided for in Article L.613-30-3 I 4° of the Code) of the Guarantor.

In the event of the failure of the Issuer to promptly perform its obligations to any Certificate Holder under the terms of the Certificates, such Certificate Holder may, but is not obliged to, give written notice to the Guarantor at Société Générale, Tour Société Générale, 75886 Paris Cedex 18, France marked for the attention of SEGL/JUR/OMF - Market Transactions & Financing.

- (c) **Transfer.** The Certificates are represented by a global warrant certificate (“**Global Warrant**”) which will be deposited with The Central Depository (Pte) Limited (“**CDP**”). Certificates in definitive form will not be issued. Transfers of Certificates may be effected only in Board Lots or integral multiples thereof. All transactions in (including transfers of) Certificates, in the open market or otherwise, must be effected through a securities account with CDP. Title will pass upon registration of the transfer in the records maintained by CDP.
- (d) **Title.** Each person who is for the time being shown in the records maintained by CDP as entitled to a particular number of Certificates shall be treated by the Issuer, the Guarantor and the Warrant Agent as the holder and absolute owner of such number of Certificates, notwithstanding any notice to the contrary. The expression “**Certificate Holder**” shall be construed accordingly.
- (e) **Bail-In.** By the acquisition of Certificates, each Certificate Holder (which, for the purposes of this Condition, includes any current or future holder of a beneficial interest in the Certificates) acknowledges, accepts, consents and agrees:
  - (i) to be bound by the effect of the exercise of the Bail-In Power (as defined below) by the Relevant Resolution Authority (as defined below) on the Issuer’s liabilities under the Certificates, which may include and result in any of the following, or some combination thereof:
    - (A) the reduction of all, or a portion, of the Amounts Due (as defined below), on a permanent basis;
    - (B) the conversion of all, or a portion, of the Amounts Due into shares, other securities or other obligations of the Issuer or the Guarantor or another person (and the issue to the Certificate Holder of such shares, securities or obligations), including by means of an amendment, modification or variation of the Conditions of the Certificates, in which case the Certificate Holder agrees to accept in lieu of its rights under the Certificates any such shares, other securities or other obligations of the Issuer or the Guarantor or another person;
    - (C) the cancellation of the Certificates; and/or
    - (D) the amendment or alteration of the expiration of the Certificates or amendment of the amounts payable on the Certificates, or the date on

which the amounts become payable, including by suspending payment for a temporary period; and

that terms of the Certificates are subject to, and may be varied, if necessary, to give effect to the exercise of the Bail-In Power by the Relevant Resolution Authority or the regulator,

(the “**Statutory Bail-In**”);

(ii) if the Relevant Resolution Authority exercises its Bail-In Power on liabilities of the Guarantor, pursuant to Article L.613-30-3-I-3 of the French Monetary and Financial Code (the “**Code**”):

(A) ranking:

(1) junior to liabilities of the Guarantor benefitting from statutorily preferred exceptions pursuant to Article L.613-30-3-I 1° and 2 of the Code;

(2) *pari passu* with liabilities of the Guarantor as defined in Article L.613-30-3-I-3 of the Code; and

(3) senior to liabilities of the Guarantor as defined in Article L.613-30-3-I-4 of the Code; and

(B) which are not *titres non structurés* as defined under Article R.613-28 of the Code, and

(C) which are not or are no longer eligible to be taken into account for the purposes of the MREL (as defined below) ratio of the Guarantor

and such exercise of the Bail-In Power results in the write-down or cancellation of all, or a portion of, the principal amount of, or the outstanding amount payable in respect of, and/or interest on, such liabilities, and/or the conversion of all, or a portion, of the principal amount of, or the outstanding amount payable in respect of, or interest on, such liabilities into shares or other securities or other obligations of the Guarantor or another person, including by means of variation to their terms and conditions in order to give effect to such exercise of Bail-In Power, then the Issuer’s obligations under the Certificates will be limited to (i) payment of the amount as reduced or cancelled that would be recoverable by the Certificate Holders and/or (ii) the delivery or the payment of value of the shares or other securities or other obligations of the Guarantor or another person that would be paid or delivered to the Certificate Holders as if, in either case, the Certificates had been directly issued by the Guarantor itself and any Amount Due under the Certificates had accordingly been directly subject to the exercise of the Bail-In Power (the “**Contractual Bail-in**”).

No repayment or payment of the Amounts Due will become due and payable or be paid after the exercise of the Statutory Bail-In with respect to the Issuer or the Guarantor unless, at the time such repayment or payment, respectively, is scheduled to become due, such repayment or payment would be permitted to be made by the Issuer or the Guarantor under the applicable laws and regulations in effect in France or Luxembourg and the European Union applicable to the Issuer or the Guarantor or other members of its group.

No repayment or payment of the Amounts Due will become due and payable or be paid under the Certificates issued by SG Issuer after implementation of the Contractual Bail-in.

Upon the exercise of the Statutory Bail-in or upon implementation of the Contractual Bail-in with respect to the Certificates, the Issuer or the Guarantor will provide a written notice to the Certificate Holders in accordance with Condition 9 as soon as practicable regarding such exercise of the Statutory Bail-in or implementation of the Contractual Bail-in. Any delay or failure by the Issuer or the Guarantor to give notice shall not affect the validity and enforceability of the Statutory Bail-in or Contractual Bail-in nor the effects on the Certificates described above.

Neither a cancellation of the Certificates, a reduction, in part or in full, of the Amounts Due, the conversion thereof into another security or obligation of the Issuer or the Guarantor or another person, as a result of the exercise of the Statutory Bail-in or the implementation of the Contractual Bail-in with respect to the Certificates will be an event of default or otherwise constitute non-performance of a contractual obligation, or entitle the Certificate Holder to any remedies (including equitable remedies) which are hereby expressly waived.

The matters set forth in this Condition shall be exhaustive on the foregoing matters to the exclusion of any other agreements, arrangements or understandings between the Issuer, the Guarantor and each Certificate Holder. No expenses necessary for the procedures under this Condition, including, but not limited to, those incurred by the Issuer and the Guarantor, shall be borne by any Certificate Holder.

For the purposes of this Condition:

**“Amounts Due”** means any amounts due by the Issuer under the Certificates.

**“Bail-In Power”** means any statutory cancellation, write-down and/or conversion power existing from time to time under any laws, regulations, rules or requirements relating to the resolution of banks, banking group companies, credit institutions and/or investment firms, including but not limited to any such laws, regulations, rules or requirements that are implemented, adopted or enacted within the context of a European Union directive or regulation of the European Parliament and of the Council establishing a framework for the recovery and resolution of credit institutions and investment firms, or any other applicable laws or regulations, as amended, or otherwise, pursuant to which obligations of a bank, banking group company, credit institution or investment firm or any of its affiliates can be reduced, cancelled, varied or otherwise modified in any way and/or converted into shares or other securities or obligations of the obligor or any other person.

**“MREL”** means the Minimum Requirement for own funds and Eligible Liabilities as defined in Directive 2014/59/EU of the European Parliament and of the Council of 15 May 2014 establishing a framework for the recovery and resolution of credit institutions and investment firms (as amended from time to time).

**“Relevant Resolution Authority”** means any authority with the ability to exercise the Bail-in Power on Societe Generale or SG Issuer as the case may be.

## **2. Certificate Rights and Exercise Expenses**

- (a) *Certificate Rights.* Every Certificate entitles each Certificate Holder, upon due exercise and on compliance with Condition 4, to payment by the Issuer of the Cash Settlement Amount (as defined below) (if any) in the manner set out in Condition 4.

The **“Cash Settlement Amount”**, in respect of each Certificate, shall be an amount payable in the Settlement Currency equal to the Closing Level multiplied by the Notional Amount per Certificate.

The “**Closing Level**”, in respect of each Certificate, shall be an amount payable in the Settlement Currency equal to:

$$\left( \frac{\text{Final Reference Level} \times \text{Final Exchange Rate}}{\text{Initial Reference Level} \times \text{Initial Exchange Rate}} - \text{Strike Level} \right) \times \text{Hedging Fee Factor}$$

If the Issuer determines, in its sole discretion, that on the Valuation Date or any Observation Date a Market Disruption Event has occurred, then that Valuation Date or Observation Date shall be postponed until the first succeeding Exchange Business Day or Underlying Stock Business Day, as the case may be, on which there is no Market Disruption Event, unless there is a Market Disruption Event on each of the five Exchange Business Days or Underlying Stock Business Days, as the case may be, immediately following the original date that, but for the Market Disruption Event, would have been a Valuation Date or an Observation Date. In that case:-

- (i) that fifth Exchange Business Day or Underlying Stock Business Day, as the case may be, shall be deemed to be the Valuation Date or the Observation Date notwithstanding the Market Disruption Event; and
- (ii) the Issuer shall determine the Final Reference Level or the relevant closing level on the basis of its good faith estimate of the Final Reference Level or the relevant closing level that would have prevailed on that fifth Exchange Business Day or Underlying Stock Business Day, as the case may be, but for the Market Disruption Event.

“**Market Disruption Event**” means the occurrence or existence of (i) any suspension of trading on the Relevant Stock Exchange of the Underlying Stock requested by the Company if that suspension is, in the determination of the Issuer, material, (ii) any suspension of or limitation imposed on trading (including but not limited to unforeseen circumstances such as by reason of movements in price exceeding limits permitted by the Relevant Stock Exchange or any act of God, war, riot, public disorder, explosion, terrorism or otherwise) on the Relevant Stock Exchange in the Underlying Stock if that suspension or limitation is, in the determination of the Issuer, material, or (iii) the closing of the Relevant Stock Exchange or a disruption to trading on the Relevant Stock Exchange if that disruption is, in the determination of the Issuer, material as a result of the occurrence of any act of God, war, riot, public disorder, explosion or terrorism.

- (b) *Exercise Expenses.* Certificate Holders will be required to pay all charges which are incurred in respect of the exercise of the Certificates (the “**Exercise Expenses**”). An amount equivalent to the Exercise Expenses will be deducted by the Issuer from the Cash Settlement Amount in accordance with Condition 4. Notwithstanding the foregoing, the Certificate Holders shall account to the Issuer on demand for any Exercise Expenses to the extent that they were not or could not be deducted from the Cash Settlement Amount prior to the date of payment of the Cash Settlement Amount to the Certificate Holders in accordance with Condition 4.
- (c) *No Rights.* The purchase of Certificates does not confer on the Certificate Holders any right (whether in respect of voting, dividend or other distributions in respect of the Underlying Stock or otherwise) which the holder of an Underlying Stock may have.

### 3. Expiry Date

Unless automatically exercised in accordance with Condition 4(b), the Certificates shall be deemed to expire at 10:00 a.m. (Singapore time) on the Expiry Date or if the Expiry Date is not a Business Day (as defined below), the immediately preceding Business Day.

### 4. Exercise of Certificates

- (a) *Exercise.* Certificates may only be exercised on the Expiry Date or if the Expiry Date is not a Business Day, the immediately preceding Business Day, in accordance with Condition 4(b).
- (b) *Automatic Exercise.* Certificate Holders shall not be required to deliver an exercise notice. Exercise of Certificates shall be determined by whether the Cash Settlement Amount (less any Exercise Expenses) is positive. If the Cash Settlement Amount (less any Exercise Expenses) is positive, all Certificates shall be deemed to have been automatically exercised at 10:00 a.m. (Singapore time) on the Expiry Date or if the Expiry Date is not a Business Day, the immediately preceding Business Day. The Cash Settlement Amount less the Exercise Expenses in respect of the Certificates shall be paid in the manner set out in Condition 4(c) below. In the event the Cash Settlement Amount (less any Exercise Expenses) is zero, all Certificates shall be deemed to have expired at 10:00 a.m. (Singapore time) on the Expiry Date or if the Expiry Date is not a Business Day, the immediately preceding Business Day, and Certificate Holders shall not be entitled to receive any payment from the Issuer in respect of the Certificates.
- (c) *Settlement.* In respect of Certificates which are automatically exercised in accordance with Condition 4(b), the Issuer will pay to the relevant Certificate Holder the Cash Settlement Amount (if any) in the Settlement Currency. The aggregate Cash Settlement Amount (less any Exercise Expenses) shall be despatched as soon as practicable and no later than five Settlement Business Days (as defined in the relevant Supplemental Listing Document and subject to extension upon the occurrence of a Settlement Disruption Event (as defined below)) following the Expiry Date by way of crossed cheque or other payment in immediately available funds drawn in favour of the Certificate Holder only (or, in the case of joint Certificate Holders, the first-named Certificate Holder) appearing in the records maintained by CDP. Any payment made pursuant to this Condition 4(c) shall be delivered at the risk and expense of the Certificate Holder and posted to the Certificate Holder's address appearing in the records maintained by CDP (or, in the case of joint Certificate Holders, to the address of the first-named Certificate Holder appearing in the records maintained by CDP). If the Cash Settlement Amount is equal to or less than the determined Exercise Expenses, no amount is payable.

If the Issuer determines, in its sole discretion, that on any Settlement Business Day during the period of five Settlement Business Days following the Expiry Date a Settlement Disruption Event has occurred, such Settlement Business Day shall be postponed to the next Settlement Business Day on which the Issuer determines that the Settlement Disruption Event is no longer subsisting and such period shall be extended accordingly, provided that the Issuer and/or the Guarantor shall make their best endeavours to implement remedies as soon as reasonably practicable to eliminate the impact of the Settlement Disruption Event on its/their payment obligations under the Certificates and/or the Guarantee.

**"Settlement Disruption Event"** means the occurrence or existence of any malicious action or attempt initiated to steal, expose, alter, disable or destroy information through

unauthorised access to, or maintenance or use of, the Computer Systems of the Issuer, the Guarantor, the Calculation Agent, their respective affiliates (the “SG Group”), their IT service providers, by (and without limitation) the use of malware, ransomware, phishing, denial or disruption of service or cryptojacking or any unauthorized entry, removal, reproduction, transmission, deletion, disclosure or modification preventing the Issuer, the Guarantor and/or the Calculation Agent to perform their obligations under the Certificates, and notwithstanding the implementation of processes, required, as the case may be, by the laws and regulations applicable to the Issuer, the Guarantor, the Calculation Agent and their affiliates, or their IT service providers to improve their resilience to these actions and attempts.

“**Computer System**” means all the computer resources including, in particular: hardware, software packages, software, databases and peripherals, equipment, networks, electronic installations for storing computer data, including Data. The Computer System shall be understood to be that which (i) belongs to the SG Group and/or (ii) is rented, operated or legally held by the SG Group under a contract with the holder of the rights to the said system and/or (iii) is operated on behalf of the SG Group by a third party within the scope of a contractual relationship and/or (iv) is made available to the SG Group under a contract within the framework of a shared system (in particular cloud computing).

“**Data**” means any digital information, stored or used by the Computer System, including confidential data.

- (d) *CDP not liable.* CDP shall not be liable to any Certificate Holder with respect to any action taken or omitted to be taken by the Issuer or the Warrant Agent in connection with the exercise of the Certificates or otherwise pursuant to or in connection with these Conditions.
- (e) *Business Day.* In these Conditions, a “**Business Day**” shall be a day on which the SGX-ST is open for dealings in Singapore during its normal trading hours and banks are open for business in Singapore.

## 5. Warrant Agent

- (a) *Warrant Agent.* The Issuer reserves the right, subject to the appointment of a successor, at any time to vary or terminate the appointment of the Warrant Agent and to appoint another Warrant Agent provided that it will at all times maintain a Warrant Agent which, so long as the Certificates are listed on the SGX-ST, shall be in Singapore. Notice of any such termination or appointment and of any change in the specified office of the Warrant Agent will be given to the Certificate Holders in accordance with Condition 9.
- (b) *Agent of Issuer.* The Warrant Agent will be acting as agent of the Issuer and will not assume any obligation or duty to or any relationship of agency or trust for the Certificate Holders. All determinations and calculations by the Warrant Agent under these Conditions shall (save in the case of manifest error) be final and binding on the Issuer and the Certificate Holders.

## 6. Adjustments

- (a) *Potential Adjustment Event.* Following the declaration by a Company of the terms of any Potential Adjustment Event (as defined below), the Issuer will determine whether such Potential Adjustment Event has a dilutive or concentrative or other effect on the theoretical value of the Underlying Stock and, if so, will (i) make the corresponding adjustment, if any, to any one or more of the Conditions as the Issuer determines appropriate to account for that dilutive or concentrative or other effect, and (ii) determine the effective date of that

adjustment. The Issuer may, but need not, determine the appropriate adjustment by reference to the adjustment in respect of such Potential Adjustment Event made by an exchange on which options or futures contracts on the Underlying Stock are traded.

- (b) **Definitions. “Potential Adjustment Event”** means any of the following:
- (i) a subdivision, consolidation, reclassification or other restructuring of the Underlying Stock (excluding a Merger Event) or a free distribution or dividend of any such Underlying Stock to existing holders by way of bonus, capitalisation or similar issue;
  - (ii) a distribution or dividend to existing holders of the Underlying Stock of (1) such Underlying Stock, or (2) other share capital or securities granting the right to payment of dividends and/or the proceeds of liquidation of the Company equally or proportionately with such payments to holders of such Underlying Stock, or (3) share capital or other securities of another issuer acquired by the Company as a result of a “spin-off” or other similar transaction, or (4) any other type of securities, rights or warrants or other assets, in any case for payment (in cash or otherwise) at less than the prevailing market price as determined by the Issuer;
  - (iii) an extraordinary dividend;
  - (iv) a call by the Company in respect of the Underlying Stock that is not fully paid;
  - (v) a repurchase by the Company of the Underlying Stock whether out of profits or capital and whether the consideration for such repurchase is cash, securities or otherwise;
  - (vi) with respect to a Company an event that results in any shareholder rights pursuant to a shareholder rights agreement or other plan or arrangement of the type commonly referred to as a “poison pill” being distributed, or becoming separated from shares of common stock or other shares of the capital stock of such Company (provided that any adjustment effected as a result of such an event shall be readjusted upon any redemption of such rights); or
  - (vii) any other event that may have, in the opinion of the Issuer, a dilutive or concentrative or other effect on the theoretical value of the Underlying Stock.
- (c) **Merger Event, Tender Offer, Nationalisation and Insolvency.** If a Merger Event, Tender Offer, Nationalisation or Insolvency occurs in relation to the Underlying Stock, the Issuer may take any action described below:
- (i) determine the appropriate adjustment, if any, to be made to any one or more of the Conditions to account for the Merger Event, Tender Offer, Nationalisation or Insolvency, as the case may be, and determine the effective date of that adjustment. The Issuer may, but need not, determine the appropriate adjustment by reference to the adjustment in respect of the Merger Event, Tender Offer, Nationalisation or Insolvency made by an options exchange to options on the Underlying Stock traded on that options exchange;
  - (ii) cancel the Certificates by giving notice to the Certificate Holders in accordance with Condition 9. If the Certificates are so cancelled, the Issuer will pay an amount to each Certificate Holder in respect of each Certificate held by such Certificate Holder which amount shall be the fair market value of a Certificate taking into account the Merger Event, Tender Offer, Nationalisation or Insolvency, as the case

may be, less the cost to the Issuer and/or any of its affiliates of unwinding any underlying related hedging arrangements, all as determined by the Issuer in its reasonable discretion. Payment will be made in such manner as shall be notified to the Certificate Holders in accordance with Condition 9; or

- (iii) following any adjustment to the settlement terms of options on the Underlying Stock on such exchange(s) or trading system(s) or quotation system(s) as the Issuer in its reasonable discretion shall select (the “**Option Reference Source**”) make a corresponding adjustment to any one or more of the Conditions, which adjustment will be effective as of the date determined by the Issuer to be the effective date of the corresponding adjustment made by the Option Reference Source. If options on the Underlying Stock are not traded on the Option Reference Source, the Issuer will make such adjustment, if any, to any one or more of the Conditions as the Issuer determines appropriate, with reference to the rules and precedents (if any) set by the Option Reference Source, to account for the Merger Event, Tender Offer, Nationalisation or Insolvency, as the case may be, that in the determination of the Issuer would have given rise to an adjustment by the Option Reference Source if such options were so traded.

Once the Issuer determines that its proposed course of action in connection with a Merger Event, Tender Offer, Nationalisation or Insolvency, it shall give notice to the Certificate Holders in accordance with Condition 9 stating the occurrence of the Merger Event, Tender Offer, Nationalisation or Insolvency, as the case may be, giving details thereof and the action proposed to be taken in relation thereto. Certificate Holders should be aware that due to the nature of such events, the Issuer will not make an immediate determination of its proposed course of action or adjustment upon the announcement or occurrence of a Merger Event, Tender Offer, Nationalisation or Insolvency.

- (d) *Definitions.* “**Insolvency**” means that by reason of the voluntary or involuntary liquidation, bankruptcy, insolvency, dissolution or winding-up of or any analogous proceeding affecting a Company (i) all the Underlying Stock of that Company is required to be transferred to a trustee, liquidator or other similar official or (ii) holders of the Underlying Stock of that Company become legally prohibited from transferring them. “**Merger Date**” means the closing date of a Merger Event or, where a closing date cannot be determined under the local law applicable to such Merger Event, such other date as determined by the Issuer. “**Merger Event**” means, in respect of the Underlying Stock, any (i) reclassification or change of such Underlying Stock that results in a transfer of or an irrevocable commitment to transfer all of such Underlying Stock outstanding to another entity or person, (ii) consolidation, amalgamation, merger or binding share exchange of a Company with or into another entity or person (other than a consolidation, amalgamation, merger or binding share exchange in which such Company is the continuing entity and which does not result in reclassification or change of all of such Underlying Stock outstanding), (iii) takeover offer, exchange offer, solicitation, proposal or other event by any entity or person to purchase or otherwise obtain 100 per cent. of the outstanding Underlying Stock of the Company that results in a transfer of or an irrevocable commitment to transfer all such Underlying Stock (other than such Underlying Stock owned or controlled by such other entity or person), or (iv) consolidation, amalgamation, merger or binding share exchange of the Company or its subsidiaries with or into another entity in which the Company is the continuing entity and which does not result in a reclassification or change of all such Underlying Stock outstanding but results in the outstanding Underlying Stock (other than Underlying Stock owned or controlled by such other entity) immediately prior to such event

collectively representing less than 50 per cent. of the outstanding Underlying Stock immediately following such event, in each case if the Merger Date is on or before the Valuation Date. “**Nationalisation**” means that all the Underlying Stock or all or substantially all of the assets of a Company are nationalised, expropriated or are otherwise required to be transferred to any governmental agency, authority, entity or instrumentality thereof. “**Tender Offer**” means a takeover offer, tender offer, exchange offer, solicitation, proposal or other event by any entity or person that results in such entity or person purchasing, or otherwise obtaining or having the right to obtain, by conversion or other means, greater than 10 per cent. and less than 100 per cent. of the outstanding voting shares of the Company, as determined by the Issuer, based upon the making of filings with governmental or self-regulatory agencies or such other information as the Issuer deems relevant.

- (e) *Subdivision or Consolidation of the Certificates.* The Issuer reserves the right to subdivide or consolidate the Certificates, provided that such adjustment is considered by the Issuer not to be materially prejudicial to the Certificate Holders generally (without considering the circumstances of any individual Certificate Holder or the tax or other consequences of such adjustment or amendment in any particular jurisdiction) and subject to the approval of the SGX-ST.
- (f) *Other Adjustments.* Except as provided in this Condition 6 and Conditions 10 and 12, adjustments will not be made in any other circumstances, subject to the right reserved by the Issuer (such right to be exercised in the Issuer's sole discretion and without any obligation whatsoever) to make such adjustments and amendments as it believes appropriate in circumstances where an event or events occur which it believes in its sole discretion (and notwithstanding any prior adjustment made pursuant to the above) should, in the context of the issue of the Certificates and the obligations of the Issuer, give rise to such adjustment or, as the case may be, amendment provided that such adjustment or, as the case may be, amendment is considered by the Issuer not to be materially prejudicial to the Certificate Holders generally (without considering the circumstances of any individual Certificate Holder or the tax or other consequences of such adjustment or amendment in any particular jurisdiction).
- (g) *Notice of Adjustments.* All determinations made by the Issuer pursuant hereto will be conclusive and binding on the Certificate Holders. The Issuer will give, or procure that there is given, notice as soon as practicable of any adjustment and of the date from which such adjustment is effective by publication in accordance with Condition 9. For the avoidance of doubt, no notice will be given if the Issuer determines that adjustments will not be made.

## **7. Purchases**

The Issuer, the Guarantor or any of their respective subsidiaries may at any time purchase Certificates at any price in the open market or by tender or by private treaty. Any Certificates so purchased may be held or resold or surrendered for cancellation.

## **8. Meetings of Certificate Holders; Modification**

- (a) *Meetings of Certificate Holders.* The Master Warrant Agent Agreement or Warrant Agent Agreement contains provisions for convening meetings of the Certificate Holders to consider any matter affecting their interests, including the sanctioning by Extraordinary Resolution (as defined in the Master Warrant Agent Agreement or Warrant Agent Agreement) of a modification of the provisions of the Certificates or of the Master Warrant Agent Agreement or Warrant Agent Agreement.

At least 21 days' notice (exclusive of the day on which the notice is given and of the day on which the meeting is held) specifying the date, time and place of the meeting shall be given to the Certificate Holders.

Such a meeting may be convened by the Issuer or by Certificate Holders holding not less than ten per cent. of the Certificates for the time being remaining unexercised. The quorum at any such meeting for passing an Extraordinary Resolution will be two or more persons holding or representing not less than 25 per cent. of the Certificates for the time being remaining unexercised, or at any adjourned meeting, two or more persons being or representing Certificate Holders whatever the number of Certificates so held or represented.

A resolution will be an Extraordinary Resolution when it has been passed at a duly convened meeting by not less than three-quarters of the votes cast by such Certificate Holders who, being entitled to do so, vote in person or by proxy.

An Extraordinary Resolution passed at any meeting of the Certificate Holders shall be binding on all the Certificate Holders whether or not they are present at the meeting. Resolutions can be passed in writing if passed unanimously.

- (b) *Modification.* The Issuer may, without the consent of the Certificate Holders, effect (i) any modification of the provisions of the Certificates or the Master Instrument which is not materially prejudicial to the interests of the Certificate Holders or (ii) any modification of the provisions of the Certificates or the Master Instrument which is of a formal, minor or technical nature, which is made to correct an obvious error or which is necessary in order to comply with mandatory provisions of Singapore law. Any such modification shall be binding on the Certificate Holders and shall be notified to them by the Warrant Agent before the date such modification becomes effective or as soon as practicable thereafter in accordance with Condition 9.

## **9. Notices**

- (a) *Documents.* All cheques and other documents required or permitted by these Conditions to be sent to a Certificate Holder or to which a Certificate Holder is entitled or which the Issuer shall have agreed to deliver to a Certificate Holder may be delivered by hand or sent by post addressed to the Certificate Holder at his address appearing in the records maintained by CDP or, in the case of joint Certificate Holders, addressed to the joint holder first named at his address appearing in the records maintained by CDP, and airmail post shall be used if that address is not in Singapore. All documents delivered or sent in accordance with this paragraph shall be delivered or sent at the risk of the relevant Certificate Holder.
- (b) *Notices.* All notices to Certificate Holders will be validly given if published in English on the web-site of the SGX-ST. Such notices shall be deemed to have been given on the date of the first such publication. If publication on the web-site of the SGX-ST is not practicable, notice will be given in such other manner as the Issuer may determine. The Issuer shall, at least one month prior to the expiry of any Certificate, give notice of the date of expiry of such Certificate in the manner prescribed above.

## **10. Liquidation**

In the event of a liquidation or dissolution of the Company or the appointment of a liquidator (including a provisional liquidator) or receiver or judicial manager or trustee or administrator or analogous person under Singapore or other applicable law in respect of the whole or substantially the whole of its undertaking, property or assets, all unexercised Certificates will lapse and shall cease to be valid for any

purpose, in the case of voluntary liquidation, on the effective date of the relevant resolution and, in the case of an involuntary liquidation or dissolution, on the date of the relevant court order or, in the case of the appointment of a liquidator (including a provisional liquidator) or receiver or judicial manager or trustee or administrator or analogous person under Singapore or other applicable law in respect of the whole or substantially the whole of its undertaking, property or assets, on the date when such appointment is effective but subject (in any such case) to any contrary mandatory requirement of law. In the event of the voluntary liquidation of the Company, the Issuer shall make such adjustments or amendments as it reasonably believes are appropriate in the circumstances.

#### 11. Further Issues

The Issuer shall be at liberty from time to time, without the consent of the Certificate Holders, to create and issue further certificates so as to form a single series with the Certificates, subject to the approval of the SGX-ST.

#### 12. Delisting

- (a) Delisting. If at any time, the Underlying Stock ceases to be listed on the Relevant Stock Exchange, the Issuer shall give effect to these Conditions in such manner and make such adjustments and amendments to the rights attaching to the Certificates as it shall, in its absolute discretion, consider appropriate to ensure, so far as it is reasonably able to do so, that the interests of the Certificate Holders generally are not materially prejudiced as a consequence of such delisting (without considering the individual circumstances of any Certificate Holder or the tax or other consequences that may result in any particular jurisdiction).
- (b) Issuer's Determination. The Issuer shall determine, in its absolute discretion, any adjustment or amendment and its determination shall be conclusive and binding on the Certificate Holders save in the case of manifest error. Notice of any adjustments or amendments shall be given to the Certificate Holders in accordance with Condition 9 as soon as practicable after they are determined.

#### 13. Early Termination

- (a) *Early Termination for Illegality and Force Majeure, etc.* If the Issuer determines that a Regulatory Event (as defined below) has occurred and, for reasons beyond its control, the performance of its obligations under the Certificates has become illegal or impractical in whole or in part for any reason, or the Issuer determines that, for reasons beyond its control, it is no longer legal or practical for it to maintain its hedging arrangements with respect to the Certificates for any reason, the Issuer may in its discretion and without obligation terminate the Certificates early in accordance with Condition 13(e).

Should any one or more of the provisions contained in the Conditions be or become invalid, the validity of the remaining provisions shall not in any way be affected thereby.

For the purposes of this Condition:

**“Regulatory Event”** means, following the occurrence of a Change in Law (as defined below) with respect to the Issuer and/or Société Générale as Guarantor or in any other capacity (including without limitation as hedging counterparty of the Issuer, market maker of the Certificates or direct or indirect shareholder or sponsor of the Issuer) or any of its affiliates involved in the issuer of the Certificates (hereafter the **“Relevant Affiliates”** and each of the Issuer, Société Générale and the Relevant Affiliates, a **“Relevant Entity”**) that, after the Certificates have been issued, (i) any Relevant Entity would incur a materially increased (as compared with circumstances existing prior to such event) amount of tax,

duty, liability, penalty, expense, fee, cost or regulatory capital charge however defined or collateral requirements for performing its obligations under the Certificates or hedging the Issuer's obligations under the Certificates, including, without limitation, due to clearing requirements of, or the absence of, clearing of the transactions entered into in connection with the issue of, or hedging the Issuer's obligation under, the Certificates, (ii) it is or will become for any Relevant Entity impracticable, impossible (in each case, after using commercially reasonable efforts), unlawful, illegal or otherwise prohibited or contrary, in whole or in part, under any law, regulation, rule, judgement, order or directive of any governmental, administrative or judicial authority, or power, applicable to such Relevant Entity (a) to hold, acquire, issue, reissue, substitute, maintain, settle, or as the case may be, guarantee, the Certificates, (b) to acquire, hold, sponsor or dispose of any asset(s) (or any interest thereof) of any other transaction(s) such Relevant Entity may use in connection with the issue of the Certificates or to hedge the Issuer's obligations under the Certificates, (c) to perform obligations in connection with, the Certificates or any contractual arrangement entered into between the Issuer and Société Générale or any Relevant Affiliate (including without limitation to hedge the Issuer's obligations under the Certificates) or (d) to hold, acquire, maintain, increase, substitute or redeem all or a substantial part of its direct or indirect shareholding in the Issuer's capital or the capital of any Relevant Affiliate or to directly or indirectly sponsor the Issuer or any Relevant Affiliate, or (iii) there is or may be a material adverse effect on a Relevant Entity in connection with the issue of the Certificates.

**"Change in law"** means (i) the adoption, enactment, promulgation, execution or ratification of any applicable new law, regulation or rule (including, without limitation, any applicable tax law, regulation or rule) after the Certificates have been issued, (ii) the implementation or application of any applicable law, regulation or rule (including, without limitation, any applicable tax law, regulation or rule) already in force when the Certificates have been issued but in respect of which the manner of its implementation or application was not known or unclear at the time, or (iii) the change of any applicable law, regulation or rule existing when the Certificates are issued, or the change in the interpretation or application or practice relating thereto, existing when the Certificates are issued of any applicable law, regulation or rule, by any competent court, tribunal, regulatory authority or any other entity exercising executive, legislative, judicial, taxing, regulatory or administrative powers or functions of or pertaining to government (including any additional or alternative court, tribunal, authority or entity, to that existing when the Certificates are issued).

- (b) *Early Termination for Holding Limit Event.* The Issuer may in its discretion and without obligation terminate the Certificates early in accordance with Condition 13(e) where a Holding Limit Event (as defined below) occurs.

For the purposes of this Condition:

**"Holding Limit Event"** means, assuming the investor is the Issuer and/or any of its affiliates, the Issuer together with its affiliates, in aggregate hold, an interest in the Underlying Stock, constituting or likely to constitute (directly or indirectly) ownership, control or the power to vote a percentage of any class of voting securities of the Underlying Stock, of the Underlying Stock in excess of a percentage permitted or advisable, as determined by the Issuer, for the purpose of its compliance with the Bank Holding Company Act of 1956 as amended by Section 619 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Volcker Rule), including any requests, regulations, rules, guidelines or directives made by the relevant governmental authority under, or issued by the relevant governmental authority in connection with, such statutes.

- (c) *Early Termination for Hedging Disruption.* If the Issuer or any of its affiliates is, following commercially reasonable efforts, not in the position (i) to enter, re-enter, replace, maintain, liquidate, acquire or dispose of any Hedge Positions (as defined below) or (ii) to freely realize, recover, receive, repatriate, remit, regain or transfer the proceeds of any Hedge Position (where either (i) or (ii) shall constitute a "Hedging Disruption"), the Issuer may terminate the Certificates early in accordance with Condition 13(e) provided that the intrinsic value on the previous trading day of the relevant Certificate is at or above the Issue Price. The Issuer's decision on whether a Hedging Disruption has occurred is final and conclusive. For the avoidance of doubt, Hedging Disruptions shall include the scenario where any Hedge Position cannot be maintained up to the amount necessary to cover all of the Issuer's obligations under the Certificates.

For the purposes hereof, "Hedge Positions" means any one or more commercially reasonable (i) positions (including long or short positions) or contracts in, or relating to, securities, options, futures, other derivatives contracts or foreign exchange, (ii) stock loan or borrowing transactions or (iii) other instruments, contracts, transactions or arrangements (howsoever described) that the Issuer or any of its affiliates determines necessary to hedge, individually or on a portfolio basis, any risk (including, without limitation, market risk, price risk, foreign exchange risk and interest rate risk) in relation to the assumption and fulfilment of the Issuer's obligations under the Certificates.

- (d) *Early Termination for other reasons.* The Issuer reserves the right (such right to be exercised in the Issuer's sole and unfettered discretion and without any obligation whatsoever) to terminate the Certificates in accordance with Condition 13(e) where an event or events occur which it believes in its sole discretion should, in the context of the issue of the Certificates and the obligations of the Issuer, give rise to such termination provided that such termination (i) is considered by the Issuer not to be materially prejudicial to the interests of Certificate Holders generally (without considering the circumstances of any individual Certificate Holder or the tax or other consequences of such termination in any particular jurisdiction); or (ii) is otherwise considered by the Issuer to be appropriate and such termination is approved by the SGX-ST.
- (e) *Termination.* If the Issuer terminates the Certificates early, the Issuer will give notice to the Certificate Holders in accordance with Condition 9. The Issuer will, if and to the extent permitted by applicable law, pay an amount to each Certificate Holder in respect of each Certificate held by such holder equal to the fair market value of a Certificate notwithstanding such illegality, impracticality or the relevant event less the cost to the Issuer of unwinding any underlying related hedging arrangements, all as determined by the Issuer in its sole and absolute discretion. The determination of the fair market value may deviate from the determination of the Cash Settlement Amount under different scenarios, including but not limited to, where (i) the Daily Reset (as defined in the relevant Supplemental Listing Document) mechanism is suspended and/or (ii) the Final Reference Level is determined based on the closing price of the Underlying Stock on multiple Underlying Stock Business Days or Exchange Business Days, as the case may be. Payment will be made in such manner as shall be notified to the Certificate Holders in accordance with Condition 9.

#### **14. Substitution of the Issuer**

The Issuer may be replaced by the Guarantor or any subsidiary of the Guarantor as principal obligor in respect of the Certificates without the consent of the relevant Certificate Holders. If the Issuer determines that it shall be replaced by the Guarantor or any subsidiary of the Guarantor (the "**Substituted Obligor**"),

it shall give at least 90 days' notice (exclusive of the day on which the notice is given and of the day on which the substitution is effected) specifying the date of the substitution, in accordance with Condition 9, to the Certificate Holders of such event and, immediately on the expiry of such notice, the Substituted Obligor shall become the principal obligor in place of the Issuer and the Certificate Holders shall thereupon cease to have any rights or claims whatsoever against the Issuer.

Upon any such substitution, all references to the Issuer in the Conditions and all agreements relating to the Certificates will be to the Substituted Obligor and the Certificates will be modified as required, and the Certificate Holders will be notified of the modified terms and conditions of such Certificates in accordance with Condition 9.

For the purposes of this Condition, it is expressly agreed that by subscribing to, acquiring or otherwise purchasing or holding the Certificates, the Certificate Holders are expressly deemed to have consented to the substitution of the Issuer by the Substituted Obligor and to the release of the Issuer from any and all obligations in respect of the Certificates and all agreements relating thereto and are expressly deemed to have accepted such substitution and the consequences thereof.

#### **15. Governing Law**

The Certificates, the Master Instrument and the Master Warrant Agent Agreement or Warrant Agent Agreement will be governed by and construed in accordance with Singapore law. The Issuer and the Guarantor and each Certificate Holder (by its purchase of the Certificates) shall be deemed to have submitted for all purposes in connection with the Certificates, the Master Instrument and the Master Warrant Agent Agreement or Warrant Agent Agreement to the non-exclusive jurisdiction of the courts of Singapore. The Guarantee shall be governed by and construed in accordance with Singapore law.

#### **16. Prescription**

Claims against the Issuer for payment of any amount in respect of the Certificates will become void unless made within six years of the Expiry Date and, thereafter, any sums payable in respect of such Certificates shall be forfeited and shall revert to the Issuer.

#### **17. Contracts (Rights of Third Parties) Act 2001 of Singapore**

Unless otherwise provided in the Global Warrant, the Master Instrument and the Master Warrant Agent Agreement or Warrant Agent Agreement, a person who is not a party to any contracts made pursuant to the Global Warrant, the Master Instrument and the Master Warrant Agent Agreement or Warrant Agent Agreement has no rights under the Contracts (Rights of Third Parties) Act 2001 of Singapore to enforce any terms of such contracts. Except as expressly provided herein, the consent of any third party is not required for any subsequent agreement by the parties hereto to amend or vary (including any release or compromise of any liability) or terminate such contracts.

## SUMMARY OF THE ISSUE

*The following is a summary of the issue and should be read in conjunction with, and is qualified by reference to, the other information set out in this document and the Base Listing Document. Terms used in this Summary are defined in the Conditions.*

Issuer:	SG Issuer
Company:	DBS Group Holdings Ltd
The Certificates:	European Style Cash Settled Long Certificates relating to the Underlying Stock
Number:	17,800,000 Certificates
Form:	The Certificates will be issued subject to, and with the benefit of, a master instrument by way of deed poll dated 16 June 2023 (the “ <b>Master Instrument</b> ”) and executed by the Issuer and the Guarantor and a master warrant agent agreement dated 29 May 2017 (the “ <b>Master Warrant Agent Agreement</b> ”) and made between the Issuer, the Guarantor and the Warrant Agent (as amended and/or supplemented from time to time).
Cash Settlement Amount:	In respect of each Certificate, is the amount (if positive) equal to:  Notional Amount per Certificate x Closing Level
Denominations:	Certificates are represented by a global warrant in respect of all the Certificates.
Exercise:	The Certificates may only be exercised on the Expiry Date or if the Expiry Date is not a Business Day, the immediately preceding Business Day, in a Board Lot or integral multiples thereof. Certificate Holders will not be required to deliver an exercise notice. If the Cash Settlement Amount (less any Exercise Expenses) is positive, all Certificates will be deemed to have been automatically exercised at 10:00 a.m. (Singapore time) on the Expiry Date or if the Expiry Date is not a Business Day, the immediately preceding Business Day. The Cash Settlement Amount less the Exercise Expenses in respect of the Certificates shall be paid in the manner set out in Condition 4(c) of the Conditions. In the event the Cash Settlement Amount (less any Exercise Expenses) is zero, all Certificates shall be deemed to have expired at 10:00 a.m. (Singapore time) on the Expiry Date or if the Expiry Date is not a Business Day, the immediately preceding Business Day, and Certificate Holders shall not be entitled to receive any payment from the Issuer in respect of the Certificates.
Exercise and Trading Currency:	SGD
Board Lot:	100 Certificates

Transfers of Certificates: Certificates may only be transferred in Board Lots (or integral multiples thereof). All transfers in Certificates, in the open market or otherwise, must be effected through a securities account with CDP. Title will pass upon registration of the transfer in the records of CDP.

Listing: Application has been made to the SGX-ST for permission to deal in and for quotation of the Certificates and the SGX-ST has agreed in principle to grant permission to deal in and for quotation of the Certificates. Issue of the Certificates is conditional on such listing being granted. It is expected that dealings in the Certificates on the SGX-ST will commence on or about 25 April 2024.

Governing Law: The laws of Singapore

Warrant Agent: The Central Depository (Pte) Limited  
4 Shenton Way  
#02-01 SGX Centre 2  
Singapore 068807

Further Issues: Further issues which will form a single series with the Certificates will be permitted, subject to the approval of the SGX-ST.

The above summary is qualified in its entirety by reference to the detailed information appearing elsewhere in this document and the Base Listing Document.

## INFORMATION RELATING TO THE EUROPEAN STYLE CASH SETTLED LONG CERTIFICATES ON SINGLE EQUITIES

### What are European Style Cash Settled Long Certificates on Single Equities?

European style cash settled long certificates on single equities (the “**Certificates**”) are structured products relating to the Underlying Stock and the return on a Certificate is linked to the performance of the Leverage Strategy.

#### **A) Cash Settlement Amount Payable upon the Exercise of the Certificates at Expiry**

Upon the exercise of the Certificates at expiry, the Certificate Holders would be paid a Cash Settlement Amount in respect of each Certificate.

The Cash Settlement Amount, in respect of each Certificate, shall be an amount payable in the Settlement Currency equal to the Closing Level multiplied by the Notional Amount per Certificate.

The Closing Level, in respect of each Certificate, shall be an amount payable in the Settlement Currency equal to (1) divided by (2) less (3) subject to any adjustments such as (4), where:

- (1) is the Final Reference Level multiplied by the Final Exchange Rate;
- (2) is the Initial Reference Level multiplied by the Initial Exchange Rate;
- (3) is the Strike Level; and
- (4) is the Hedging Fee Factor.

If the Cash Settlement Amount (less any Exercise Expenses) is positive, all Certificates shall be deemed to have been automatically exercised and investors will receive a Cash Settlement Amount. If the Cash Settlement Amount (less any Exercise Expenses) is zero, all Certificates shall be deemed to have expired. Please refer to the section headed “Terms and Conditions of the European Style Cash Settled Long/Short Certificates on Single Equities” for further details on the calculation of the Cash Settlement Amount.

The Certificates are only suitable for investors who believe that the price of the Underlying Stock will increase and are seeking short-term leveraged exposure to the Underlying Stock.

#### **B) Trading the Certificates before Expiry**

If the Certificate Holders want to cash out their investments in the Certificates before the expiry of the Certificates, they may sell the Certificates in the secondary market during the life of the Certificates, and would be subject to the following fees and charges:

- (i) For Certificate Holders who trade the Certificates intraday: shall pay normal transaction and brokerage fees for the trading of the Certificates on the SGX-ST, and may be required to pay stamp taxes or other documentary charges in accordance with the laws and practices of the country where the Certificates are transferred; and
- (ii) For Certificate Holders who hold the Certificates overnight: in addition to the normal transaction and brokerage fees and applicable stamp taxes, would also be required to bear the Management Fee and Gap Premium as well as certain costs embedded within the Leverage Strategy including the Funding Cost and Rebalancing Cost.

### Illustration of the Calculation of Hedging Fee Factor

Hedging Fee Factor	=	Product of the Daily Fees
--------------------	---	---------------------------

Daily Fees	=	<b>Daily Management Fee Adjustment</b>
		$1 - \text{Management Fee} \times \text{ACT}(t-1;t) / 360$
		x
		<b>Daily Gap Premium Adjustment</b>
		$1 - \text{Gap Premium}(t-1) \times \text{ACT}(t-1;t) / 360$

### Illustration of the Calculation of Cash Settlement Amount

Cash Settlement Amount = Final Value of Certificates – Strike Level (zero)

Value of Certificates	=	t'=0	x	t=1	x	t=2	x ...	t=i			
		Notional Amount		Leverage Strategy daily performance <sup>8</sup>		Daily Fees		Leverage Strategy daily performance	Daily Fees	Leverage Strategy Daily performance	Daily Fees

Value of Certificates	=	t=0	x	<b>Product of the daily Leverage Strategy Performance</b>	x	<b>Product of the Daily Fees (Hedging Fee Factor)</b>
		Notional Amount		Leverage Strategy daily performance x Leverage Strategy daily performance		Daily Fees x Daily Fees

Final Value of Certificates	=	t=0	x	Final Reference Level x Final Exchange Rate	÷	Initial Reference Level x Initial Exchange Rate	x	Hedging Fee Factor
		Notional Amount						

### Illustration of the applicable fees and charges for an intraday trading scenario

Hedging Fee is implemented overnight in the price of the Certificate. As a consequence, when trading intraday, investors will not bear any Hedging Fee.

Investors will only support bid/ask costs, which are the difference between the price at which the Designated Market Maker purchases (bid) and sells (ask) the Certificate at any point of time.

<sup>7</sup> "t" refers to "Observation Date" which means each Exchange Business Day (subject to Market Disruption Event) from (and including) the Exchange Business Day immediately preceding the Expected Listing Date to the Valuation Date.

<sup>8</sup> Leverage Strategy daily performance is computed as the Leverage Strategy Closing Level on Business Day (t) divided by the Leverage Strategy Closing Level on Business Day (t-1).

## Example of Calculation of Hedging Fee Factor and Cash Settlement Amount

The example is purely hypothetical. We include the example to illustrate how the Certificates work, and you **MUST NOT** rely on them as any indication of the actual return or what the payout on the Certificates might actually be. The example also assumes a product which expires 16 days after listing date, to illustrate the daily calculation of price, costs and fees from listing date to expiry date.

Assuming an investor purchases the following Certificates at the Issue Price:

Underlying Stock:	Ordinary shares of DBS Group Holdings Ltd
Expected Listing Date:	<b>03/07/2018</b>
Expiry Date:	<b>18/07/2018</b>
Initial Reference Level:	<b>1,000</b>
Initial Exchange Rate:	<b>1</b>
Final Reference Level:	<b>1,200</b>
Final Exchange Rate:	<b>1</b>
Issue Price:	<b>0.45 SGD</b>
Notional Amount per Certificate:	<b>0.45 SGD</b>
Management Fee (p.a.):	<b>0.40%</b>
Gap Premium (p.a.):	<b>6.50%</b>
Strike Level:	Zero

### Hedging Fee Factor

Hedging Fee Factor on the  $n^{\text{th}}$  Exchange Business Day after issuance of Certificate ("HFF (n)") is calculated as follows:

$$\text{HFF}(0) = 100\%$$

On Next Calendar Day (assuming it is an Exchange Business Day):

$$\text{HFF}(1) = \text{HFF}(0) \times \left(1 - \text{Management Fee} \times \frac{\text{ACT}(t-1; t)}{360}\right) \times \left(1 - \text{Gap Premium} \times \frac{\text{ACT}(t-1; t)}{360}\right)$$

$$\text{HFF}(1) = 100\% \times \left(1 - 0.40\% \times \frac{1}{360}\right) \times \left(1 - 6.50\% \times \frac{1}{360}\right)$$

$$\text{HFF}(1) = 100\% \times 99.9989\% \times 99.9819\% \approx 99.9808\%$$

Assuming 2<sup>nd</sup> Exchange Business Day falls 3 Calendar Days after 1<sup>st</sup> Exchange Business Day:

$$\text{HFF}(2) = \text{HFF}(1) \times \left(1 - \text{Management Fee} \times \frac{\text{ACT}(t-1; t)}{360}\right) \times \left(1 - \text{Gap Premium} \times \frac{\text{ACT}(t-1; t)}{360}\right)$$

$$\text{HFF}(2) = 99.9808\% \times \left(1 - 0.40\% \times \frac{3}{360}\right) \times \left(1 - 6.50\% \times \frac{3}{360}\right)$$

$$\text{HFF (2)} = 99.9808\% \times 99.9967\% \times 99.9458\% \approx 99.9233\%$$

The same principle applies to the following Exchange Business Days:

$$\text{HFF (n)} = \text{HFF (n - 1)} \times \left(1 - \text{Management Fee} \times \frac{\text{ACT (t - 1; t)}}{360}\right) \times \left(1 - \text{Gap Premium} \times \frac{\text{ACT (t - 1; t)}}{360}\right)$$

In this example, the Hedging Fee Factor as of the Valuation Date would be equal to 99.7129% as illustrated below:

Date	HFF
3/7/2018	100.0000%
4/7/2018	99.9808%
5/7/2018	99.9617%
6/7/2018	99.9425%
9/7/2018	99.8850%
10/7/2018	99.8659%
11/7/2018	99.8468%
12/7/2018	99.8276%
13/7/2018	99.8085%
16/7/2018	99.7511%
17/7/2018	99.7320%
18/7/2018	99.7129%

### Cash Settlement Amount

In this example, the Closing Level and the Cash Settlement Amount would be computed as follows:

$$\begin{aligned} \text{Closing Level} &= [(\text{Final Reference Level} \times \text{Final Exchange Rate}) / (\text{Initial Reference Level} \times \text{Initial Exchange Rate}) - \text{Strike Level}] \times \text{Hedging Fee Factor} \\ &= [(1200 \times 1) / (1000 \times 1) - 0] \times 99.7129\% \\ &= 119.66\% \end{aligned}$$

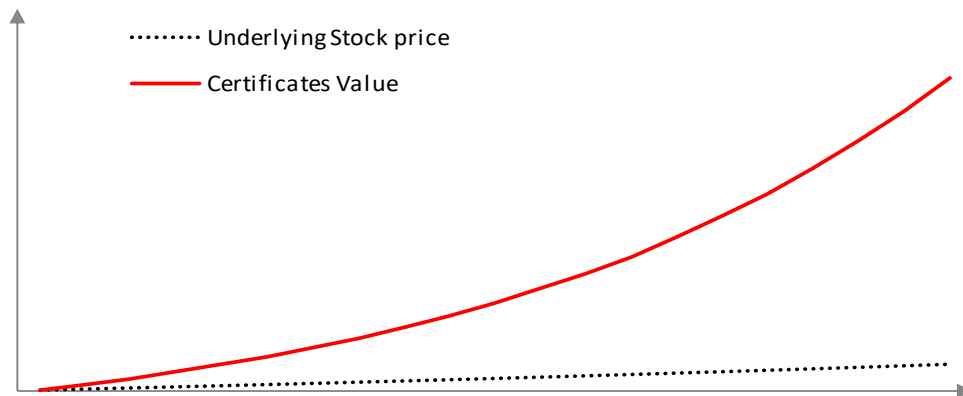

$$\begin{aligned} \text{Cash Settlement Amount} &= \text{Closing Level} \times \text{Notional Amount per Certificate} \\ &= 119.66\% \times 0.45 \text{ SGD} \\ &= \mathbf{0.538 \text{ SGD}} \end{aligned}$$

## Illustration on how returns and losses can occur under different scenarios

The examples are purely hypothetical and do not take fees and charges payable by investors into consideration. The examples highlight the effect of the Underlying Stock performance on the value of the Certificates and do not take into account the possible influence of fees, exchange rates, dividends, or any other market parameters.

### 1. Illustrative examples

Accumulated Return		10.00%	-1.00%	8.90%	-1.99%	7.81%

## Description of Air Bag Mechanism

The Certificates integrate an “Air Bag Mechanism” which is designed to reduce exposure to the Underlying Stock during extreme market conditions.

When the Air Bag triggers, this is followed by a period which is divided into two sub-periods:

- Observation Period: the price of the Underlying Stock is observed and its minimum price is recorded (i) during 15 minutes of continuous trading after the Air Bag is triggered, or (ii) until Market Close if there is less than 15 minutes of continuous trading until Market Close when the Air Bag Mechanism is triggered; and
- Reset Period: the Leverage Strategy is then reset using the minimum price of the Underlying Stock during the Observation Period as the New Observed Price. The New Observed Price replaces the last closing price of the Underlying Stock in order to compute the performance of the Leverage Strategy.

During the Observation Period and Reset Period, trading of Certificates is suspended for a period of at least 30 minutes of continuous trading after the Air Bag is triggered, and such suspension will be based on instructions provided by the Issuer to the SGX-ST for suspension of trading. Investors cannot sell or purchase any Certificates during this period.

For the avoidance of doubt, if the Air Bag Mechanism was triggered more than 60 minutes of continuous trading before Market Close, trading of Certificates will resume the same trading day after the Reset Period has elapsed, subject to the SGX-ST’s approval to resume trading. If the Air Bag Mechanism was triggered between 45 minutes and 60 minutes of continuous trading before Market Close, trading of Certificates may or may not resume the same trading day after the Reset Period has elapsed. If the Air Bag Mechanism was triggered with only 45 minutes or less of continuous trading before Market Close, trading of Certificates resumes on the next trading day.

The resumption of trading is subject to the SGX-ST’s requirements of at least 15 minutes after the SGX-ST approves the request from the Issuer to resume trading on the Certificates, rounded to the next quarter of an hour. The Issuer will provide at least 15 minutes’ notice of the resumption of trading by making an SGXNET announcement.

With **Market Close** defined as:

- the Underlying Stock closing time, including the closing auction session, with respect to the Observation Period; and
- the sooner of (i) the Underlying Stock closing time for continuous trading and (ii) the SGX-ST closing time, with respect to the Resumption of Trading

Illustrative examples of the Air Bag Mechanism<sup>9</sup>

Scenario 1 – Downward Trend after Air Bag trigger

^ The resumption of trading is subject to the SGX-ST's requirements of at least 15 minutes after the SGX-ST approves the request from the Issuer to resume trading on the Certificates, rounded to the next quarter of an hour.

Scenario 2 – Upward Trend after Air Bag trigger

^ The resumption of trading is subject to the SGX-ST's requirements of at least 15 minutes after the SGX-ST approves the request from the Issuer to resume trading on the Certificates, rounded to the next quarter of an hour.

<sup>9</sup> The illustrative examples are not exhaustive.

## Scenarios where the investor may lose the entire value of the investment

The scenarios below are purely hypothetical and do not take fees and charges payable by investors into consideration. The scenarios highlight cases where the Certificates may lose 100% of their value.

### Scenario 1 – Overnight fall of the Underlying Stock

On any business day, the opening price of the Underlying Stock may be higher or lower than the closing price on the previous day. The difference between the previous closing price and the opening price of the Underlying Stock is termed a “gap”. If the opening price of the Underlying Stock is 20% or more below the previous day closing price, the Air Bag Mechanism would only be triggered when the market opens (including pre-opening session or opening auction, as the case may be) the following day, and the Certificates would lose their entire value in such event.

Scenario 2 – Sharp intraday fall of the Underlying Stock

Although the Air Bag Mechanism is designed to reduce the exposure to the Underlying Stock during extreme market conditions, the Certificate can lose 100% of its value in the event the price of the Underlying Stock falls by 20% or more within the 15 minutes Observation Period compared to the reference price, being: (i) if air bag has not been previously triggered on the same day, the previous closing price of the Underlying Stock, or (ii) if one or more air bag have been previously triggered on the same day, the latest New Observed Price. The Certificates would lose their entire value in such event.

## Examples and illustrations of adjustments due to certain corporate actions

*The examples are purely hypothetical and do not take fees and charges payable by investors into consideration. The examples highlight the effect of corporate actions on the value of the Certificates and do not take into account the possible influence of fees, exchange rates, or any other market parameters.*

In the case of any corporate action on the Underlying Stock, the Calculation Agent will, as soon as reasonably practical after it becomes aware of such event, determine whether such corporate action has a dilutive or concentrative effect on the theoretical value of the Underlying Stock, and if so, will (a) calculate the corresponding adjustment, if any, to be made to the elements relating to the Underlying Stock which are used to determine any settlement or payment terms under the Certificates and/or adjust at its discretion any other terms of the Certificates as it determines appropriate to preserve the economic equivalent of the obligations of the Issuer under the Certificates and (b) determine the effective date of such adjustment.

Notwithstanding the foregoing, in the event Observation Date (t) is an ex-date with respect to a corporate action related to the Underlying Stock, the Calculation Agent may, in its sole and absolute discretion, replace the  $Rfactor_t$  with respect to such Observation Date (t) by an amount computed according to the following generic formula :

$$Rfactor_t = \left[ 1 - \frac{Div_t + DivExc_t - M \times R}{S_{t-1}} \right] \times \frac{1}{1 + M}$$

This formula is provided for indicative purposes and the Calculation Agent may determine that this formula is not appropriate for certain corporate actions and may apply a different formula instead.

Such adjustment of  $Rfactor_t$  would affect the Leveraged Return, the Rebalancing Cost, and the Underlying Reference Price used to determine the Intraday Restrike Event. The Air Bag mechanism would not be triggered if the stock price falls by 15% exclusively because of the dilutive effect of a corporate action.

Where:

$DivExc_t$  is the amount received as an Extraordinary Dividend by a holder of existing Shares for each Share held prior to the Extraordinary Dividend, net of any applicable withholding taxes.

**M** is the number of new Share(s) (whether a whole or a fraction) per existing Share each holder thereof is entitled to subscribe or to receive (positive amount) or the number of existing Shares redeemed or canceled per existing Share (negative amount), as the case may be, resulting from the corporate action.

**R** is the subscription price per Share (positive amount) or the redemption price per Share (negative amount) including any dividends or other benefits forgone to be subscribe to or to receive (as applicable), or to redeem a Share.

### 1. Stock split

Assuming the Underlying Stock is subject to a 1 to 2 stock split (i.e. 1 new Share for every 1 existing share):

$$S_{t-1} = \$100$$

$$S_t = \$51$$

$$Div_t = \$0$$

$$DivExc_t = \$0$$

$$M = 1 \text{ (i.e. 1 new Shares for 1 existing Share)}$$

$$R = \$0 \text{ (no subscription price / redemption price)}$$

$$Rfactor_t = \left[ 1 - \frac{0 + 0 - 2 \times 0}{100} \right] \times \frac{1}{1 + 1} = 50\%$$

As a consequence:

$$LR_{t-1,t} = \text{Leverage} \times \left( \frac{S_t}{S_{t-1} \times Rfactor_t} - 1 \right) = 5 \times \left( \frac{51}{100 \times 50\%} - 1 \right) = 10\%$$

$S_{t-1}$	$S_{t-1} \times Rfactor_t$	$S_t$	Adjusted Underlying Stock Performance
100	50	51	2%

Value of the Certificate (t-1)	Value of the Certificate (t)	Certificates' performance (excluding any cost and fees)
0.45	0.495	10%

In such case an Intraday Restrike Event would occur if the Underlying Stock price falls to \$42.5, which is 15% below \$50, the Underlying Stock Reference Price.

## 2. Share Consolidation

Assuming the Underlying Stock is subject to a 2 to 1 share consolidation (i.e. 1 Share canceled for every 2 existing Shares):

$$S_{t-1} = \$100$$

$$S_t = \$202$$

$$Div_t = \$0$$

$$DivExc_t = \$0$$

$$M = -0.5 \text{ (i.e. 0.5 Shares canceled for each 1 existing Share)}$$

$$R = \$0 \text{ (no subscription price / redemption price)}$$

$$Rfactor_t = \left[ 1 - \frac{0 + 0 - (-0.5) \times 0}{100} \right] \times \frac{1}{1 + (-0.5)} = 200\%$$

As a consequence:

$$LR_{t-1,t} = \text{Leverage} \times \left( \frac{S_t}{S_{t-1} \times Rfactor_t} - 1 \right) = 5 \times \left( \frac{202}{100 \times 200\%} - 1 \right) = 5\%$$

$S_{t-1}$	$S_{t-1} \times Rfactor_t$	$S_t$	Adjusted Underlying Stock Performance
100	200	202	1%

Value of the Certificate (t-1)	Value of the Certificate (t)	Certificates' performance (excluding any cost and fees)
0.45	0.4725	5%

In such case an Intraday Restrike Event would occur if the Underlying Stock price falls to \$170, which is 15% below \$200, the Underlying Stock Reference Price.

### 3. Rights Issues

Assuming there is a rights issue with respect to the Underlying Stock, with a right to receive 1 new Share for every 2 existing Shares, for a subscription price of \$40.

$$S_{t-1} = \$100$$

$$S_t = \$84$$

$$\text{Div}_t = \$0$$

$$\text{DivExc}_t = \$0$$

$$R = \$40 \text{ (i.e. subscription price of \$40)}$$

$$M = 0.5 \text{ (i.e. 1 new share for every 2 existing shares)}$$

$$Rfactor_t = \left[ 1 - \frac{0 + 0 - 0.5 \times 40}{100} \right] \times \frac{1}{1 + 0.5} = 80\%$$

As a consequence:

$$LR_{t-1,t} = \text{Leverage} \times \left( \frac{S_t}{S_{t-1} \times Rfactor_t} - 1 \right) = 5 \times \left( \frac{84}{100 \times 80\%} - 1 \right) = 25\%$$

$S_{t-1}$	$S_{t-1} \times Rfactor_t$	$S_t$	Adjusted Underlying Stock Performance
100	80	84	5%

Value of the Certificate (t-1)	Value of the Certificate (t)	Certificates' performance (excluding any cost and fees)
0.45	0.5625	25%

In such case an Intraday Restrike Event would occur if the Underlying Stock price falls to \$68, which is 15% below \$80, the Underlying Stock Reference Price.

### 4. Bonus Issues

Assuming there is a bonus issue with respect to the Underlying Stock, where shareholders receive 1 bonus share for 5 existing shares:

$$S_{t-1} = \$100$$

$$S_t = \$85$$

$$\text{Div}_t = \$0$$

$$\text{DivExc}_t = \$0$$

$$R = \$0$$

$$M = 0.2 \text{ (i.e. 1 new share for 5 existing shares)}$$

$$Rfactor_t = \left[ 1 - \frac{0 + 0 - 0.2 \times 0}{100} \right] \times \frac{1}{1 + 0.2} = 83.33\%$$

As a consequence:

$$LR_{t-1,t} = \text{Leverage} \times \left( \frac{S_t}{S_{t-1} \times Rfactor_t} - 1 \right) = 5 \times \left( \frac{85}{100 \times 83.33\%} - 1 \right) = 10\%$$

$S_{t-1}$	$S_{t-1} \times Rfactor_t$	$S_t$	Adjusted Underlying Stock Performance
100	83.33	85	2%

Value of the Certificate (t-1)	Value of the Certificate (t)	Certificates' performance (excluding any cost and fees)
0.45	0.495	10%

In such case an Intraday Restrike Event would occur if the Underlying Stock price falls to \$70.83, which is 15% below \$83.33, the Underlying Stock Reference Price.

### 5. Extraordinary Dividend

Assuming there is an extraordinary dividend of \$20 (net of taxes) paid in respect of each stock.

$$S_{t-1} = \$100$$

$$S_t = \$84$$

$$\text{Div}_t = \$0$$

$$\text{DivExc}_t = \$20$$

$$R = \$0$$

$$M = 0$$

$$Rfactor_t = \left[ 1 - \frac{0 + 20 - 0 \times 0}{100} \right] \times \frac{1}{1 + 0} = 80\%$$

As a consequence:

$$LR_{t-1,t} = \text{Leverage} \times \left( \frac{S_t}{S_{t-1} \times Rfactor_t} - 1 \right) = 5 \times \left( \frac{84}{100 \times 80\%} - 1 \right) = 25\%$$

$S_{t-1}$	$S_{t-1} \times Rfactor_t$	$S_t$	Adjusted Underlying Stock Performance
100	80	84	5%

Value of the Certificate (t-1)	Value of the Certificate (t)	Certificates' performance (excluding any cost and fees)
0.45	0.5625	25%

In such case an Intraday Restrike Event would occur if the Underlying Stock price falls to \$68, which is 15% below \$80, the Underlying Stock Reference Price.

## INFORMATION RELATING TO THE COMPANY

*All information contained in this document regarding the Company, including, without limitation, its financial information, is derived from publicly available information which appears on the web-site of the SGX-ST at <http://www.sgx.com>. The Issuer has not independently verified any of such information.*

DBS Group Holdings Ltd (“**DBS**” or the “**Company**”) is a leading financial services group in Asia with a presence in 18 markets. Headquartered and listed in Singapore, DBS is in the three key Asian axes of growth: Greater China, Southeast Asia and South Asia. The bank's "AA-" and "Aa1" credit ratings are among the highest in the world. Recognised for its global leadership, DBS has been named "World's Best Bank" by Euromoney, "Global Bank of the Year" by The Banker and "Best Bank in the World" by Global Finance. The bank is at the forefront of leveraging digital technology to shape the future of banking, having been named "World's Best Digital Bank" by Euromoney. In addition, DBS has been accorded the “Safest Bank in Asia” award by Global Finance for 12 consecutive years from 2009 to 2020.

DBS provides a full range of services in consumer, SME and corporate banking. As a bank born and bred in Asia, DBS understands the intricacies of doing business in the region's most dynamic markets. DBS is committed to building lasting relationships with customers, and positively impacting communities through supporting social enterprises, as it banks the Asian way. It has also established a SGD 50 million foundation to strengthen its corporate social responsibility efforts in Singapore and across Asia. With its extensive network of operations in Asia and emphasis on engaging and empowering its staff, DBS presents exciting career opportunities.

The information set out in Appendix I of this document relates to the audited consolidated financial statements of the Company and its subsidiaries for the financial year ended 31 December 2023 and has been extracted and reproduced from an announcement by the Company released on 6 March 2024 in relation to the same. Further information relating to the Company may be located on the web-site of the SGX-ST at <http://www.sgx.com>.

## INFORMATION RELATING TO THE DESIGNATED MARKET MAKER

Société Générale has been appointed the designated market maker (“**DMM**”) for the Certificates. The DMM will provide competitive buy and sell quotes for the Certificates continuously during the trading hours of the SGX-ST on the following basis:

- (a) Maximum bid and offer spread : (i) when the best bid price of the Certificate is S\$10 and below: 10 ticks or S\$0.20 whichever is greater; and  
(ii) when the best bid price of the Certificate is above S\$10: 5% of the best bid price of the Certificate.
- (b) Minimum quantity subject to bid and offer spread : 10,000 Certificates
- (c) Last Trading Day for Market Making : The date falling 5 Business Days immediately preceding the Expiry Date

In addition, the DMM may not provide a quotation in the following circumstances:

- (i) during the pre-market opening and five minutes following the opening of the SGX-ST on any trading day;
- (ii) if the Certificates are valueless (where the Issuer’s bid price is below the minimum bid size for such securities as prescribed by the SGX-ST);
- (iii) where the Certificates are suspended from trading for any reason;
- (iv) market disruption events, including, without limitation, any suspension of or limitation imposed on trading (including but not limited to unforeseen circumstances such as by reason of movements in price exceeding limits permitted by the SGX-ST or any act of God, war, riot, public disorder, explosion, terrorism or otherwise) in the Underlying Stock;
- (v) where the Issuer or the DMM faces technical problems affecting the ability of the DMM to provide bids and offer quotations;
- (vi) where the ability of the Issuer to source a hedge or unwind an existing hedge, as determined by the Issuer in good faith, is materially affected by the prevailing market conditions, and the Issuer informs the SGX-ST of its inability to do so as soon as practicable;
- (vii) in cases where the Issuer has no Certificates to sell, then the DMM will only provide the bid price;
- (viii) if the stock market experiences exceptional price movement and volatility;
- (ix) when it is a public holiday in Singapore and the SGX-ST is not open for dealings; and
- (x) during the suspension of trading of Certificates after an Air Bag Mechanism has been triggered.

The last trading day on which the DMM will provide competitive quotations for the Certificates would be the fifth Business Day immediately preceding the Expiry Date.

## **SUPPLEMENTAL INFORMATION RELATING TO THE GUARANTOR**

The information set out in Appendix II of this document is a reproduction of the Guarantor's audited consolidated financial statements for the year ended 31 December 2023.

## SUPPLEMENTAL GENERAL INFORMATION

The information set out herein is supplemental to, and should be read in conjunction with the information set out in the Base Listing Document.

1. Save as disclosed in this document and the Base Listing Document, neither the Issuer nor the Guarantor is involved in any legal or arbitration proceedings (including any proceedings which are pending or threatened of which the Issuer or the Guarantor is aware) which may have or have had in the previous 12 months a significant effect on the financial position of the Issuer or the Guarantor in the context of the issuance of the Certificates.
2. Settlement of trades done on a normal “ready basis” on the SGX-ST generally take place on the second Business Day following the transaction. Dealing in the Certificates will take place in Board Lots in Singapore dollars. For further details on the transfer of Certificates and their exercise, please refer to the section headed “Summary of the Issue” above.
3. It is not the current intention of the Issuer to apply for a listing of the Certificates on any stock exchange other than the SGX-ST.
4. Save as disclosed in the Base Listing Document and herein, there has been no material adverse change in the financial position or prospects of the Issuer since 30 June 2023 or the Guarantor since 31 December 2023, in the context of the issuance of Certificates hereunder.
5. The following contracts, relating to the issue of the Certificates, have been or will be entered into by the Issuer and/or the Guarantor and may be material to the issue of the Certificates:
  - (a) the Guarantee;
  - (b) the Master Instrument; and
  - (c) the Master Warrant Agent Agreement.

None of the directors of the Issuer and the Guarantor has any direct or indirect interest in any of the above contracts.

6. The reports of the Auditors of the Issuer and the Guarantor were not prepared exclusively for incorporation into this document.

The Auditors of the Issuer and the Guarantor have no shareholding in the Issuer or the Guarantor or any of its subsidiaries, nor do they have the right (whether legally enforceable or not) to subscribe for or to nominate persons to subscribe for securities of the Issuer or the Guarantor or any of its subsidiaries.
7. The Certificates are not fully covered by the Underlying Stock held by Issuer or a trustee for and on behalf of the Issuer. The Issuer has appropriate risk management capabilities to manage the issue of the Certificates.
8. Société Générale, Singapore Branch, currently of 8 Marina Boulevard, #12-01 Marina Bay Financial Centre Tower 1, Singapore 018981, has been authorised to accept, on behalf of the Issuer and the Guarantor, service of process and any other notices required to be served on the Issuer or the Guarantor. Any notices required to be served on the Issuer or the Guarantor should be sent to Société Générale at the above address for the attention of Société Générale Legal Department.
9. Copies of the following documents may be inspected during usual business hours on any weekday (Saturdays, Sundays and holidays excepted) at the offices of Société Générale, Singapore Branch

at 8 Marina Boulevard, #12-01 Marina Bay Financial Centre Tower 1, Singapore 018981, during the period of 14 days from the date of this document:

- (a) the Memorandum and Articles of Association of the Issuer and the Constitutional Documents of the Guarantor;
- (b) the latest financial reports (including the notes thereto) of the Issuer;
- (c) the latest financial reports (including the notes thereto) of the Guarantor;
- (d) the Base Listing Document (which can also be viewed at: <https://www.sgx.com/securities/prospectus-circulars-offer-documents>);
- (e) this document; and
- (f) the Guarantee.

## PLACING AND SALE

### General

No action has been or will be taken by the Issuer that would permit a public offering of the Certificates or possession or distribution of any offering material in relation to the Certificates in any jurisdiction where action for that purpose is required. No offers, sales or deliveries of any Certificates, or distribution of any offering material relating to the Certificates may be made in or from any jurisdiction except in circumstances which will result in compliance with any applicable laws or regulations and will not impose any obligation on the Issuer. In the event that the Issuer contemplates a placing, placing fees may be payable in connection with the issue and the Issuer may at its discretion allow discounts to placees.

Each Certificate Holder undertakes that it will inform any subsequent purchaser of the terms and conditions of the Certificates and all such subsequent purchasers as may purchase such securities from time to time shall be deemed to be a Certificate Holder for the purposes of the Certificates and shall be bound by the terms and conditions of the Certificates.

### Singapore

This document has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, this document and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of Certificates may not be circulated or distributed, nor may Certificates be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than pursuant to, and in accordance with the conditions of, any applicable provision of the Securities and Futures Act 2001 of Singapore.

### Hong Kong

Each dealer has represented and agreed, and each further dealer appointed in respect of the Certificates and each other purchaser will be required to represent and agree, that:

- (a) it has not offered or sold and will not offer or sell in Hong Kong, by means of any document, any Certificates (except for Certificates which are a "structured product" as defined in the Securities and Futures Ordinance (Cap.571) of Hong Kong ("SFO")) other than (i) to "professional investors" as defined in the SFO and any rules made under the SFO; or (ii) in other circumstances which do not result in the document being a "prospectus", as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong ("CWUMPO") or which do not constitute an offer to the public within the meaning of the CWUMPO; and
- (b) it has not issued or had in its possession for the purposes of issue, and will not issue or have in its possession for the purposes of issue, whether in Hong Kong or elsewhere, any advertisement, invitation or document relating to the Certificates, which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to Certificates which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" as defined in the SFO and any rules made under the SFO.

### European Economic Area

Each dealer represents and agrees, and each further dealer appointed in respect of the Certificates will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell, or otherwise make available any Certificates which are the subject of the offering as contemplated by this document to any retail investor in the European Economic Area. For the purposes of this provision:

- (a) the expression “**retail investor**” means a person who is one (or more) of the following:
  - (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); or
  - (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the Insurance Distribution Directive), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
  - (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (as amended and superseded, the Prospectus Regulation); and
- (b) the expression “**offer**” includes the communication in any form and by any means of sufficient information on the terms of the offer and the Certificates to be offered so as to enable an investor to decide to purchase or subscribe for the Certificates.

### **United Kingdom**

Each dealer represents and agrees, and each further dealer appointed in respect of the Certificates will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Certificates which are the subject of the offering as contemplated by this document to any retail investor in the United Kingdom. For the purposes of this provision:

- (a) the expression “**retail investor**” means a person who is one (or more) of the following:
  - (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (“**EUWA**”); or
  - (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act, as amended (the “**FSMA**”) and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or
  - (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA; and
- (b) the expression an “**offer**” includes the communication in any form and by any means of sufficient information on the terms of the offer and the Certificates to be offered so as to enable an investor to decide to purchase or subscribe for the Certificates.

Each dealer further represents and agrees, and each further dealer appointed in respect of the Certificates will be required to further represent and agree, that:

- (a) in respect to Certificates having a maturity of less than one year: (i) it is a person whose ordinary activities involve it in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of its business; and (ii) it has not offered or sold and will not offer or sell any Certificates other than to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold, manage or dispose of investments (as principal or agent) for the purposes of their businesses where the issue of the Certificates would otherwise constitute a contravention of Section 19 of the FSMA by the Issuer;
- (b) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning

of section 21 of the FSMA) received by it in connection with the issue or sale of any Certificates in circumstances in which section 21(1) of the FSMA does not apply to the Issuer or the Guarantor; and

- (c) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to any Certificates in, from or otherwise involving the United Kingdom.

## **United States**

The Certificates and the Guarantee have not been and will not be registered under the United States Securities Act of 1933, as amended (the “**Securities Act**”) or any state securities law, and trading in the Certificates has not been approved by the United States Commodity Futures Trading Commission (the “**CFTC**”) under the United States Commodity Exchange Act of 1936, as amended (the “**Commodity Exchange Act**”) and the Issuer has not been and will not be registered as an investment company under the United States Investment Company Act of 1940, as amended, and the rules and regulations thereunder. None of the Securities and Exchange Commission, any state securities commission or regulatory authority or any other United States, French or other regulatory authority has approved or disapproved of the Certificates or the Guarantee or passed upon the accuracy or adequacy of this document. Accordingly, Certificates, or interests therein, may not at any time be offered, sold, resold, traded, pledged, exercised, redeemed, transferred or delivered, directly or indirectly, in the United States or to, or for the account or benefit of, U.S. persons, nor may any U.S. person at any time trade, own, hold or maintain a position in the Certificates or any interests therein. In addition, in the absence of relief from the CFTC, offers, sales, re-sales, trades, pledges, exercises, redemptions, transfers or deliveries of Certificates, or interests therein, directly or indirectly, in the United States or to, or for the account or benefit of, U.S. persons, may constitute a violation of United States law governing commodities trading and commodity pools. Consequently, any offer, sale, resale, trade, pledge, exercise, redemption, transfer or delivery made, directly or indirectly, within the United States or to, or for the account or benefit of, a U.S. person will not be recognised.

Each dealer has represented and agreed, and each further dealer will be required to represent and agree, that it has not and will not at any time offer, sell, resell, trade, pledge, exercise, redeem, transfer or deliver, directly or indirectly, Certificates in the United States or to, or for the account or benefit of, any U.S. person or to others for offer, sale, resale, trade, pledge, exercise, redeem, transfer or delivery, directly or indirectly, in the United States or to, or for the account or benefit of, any such U.S. person. Any person purchasing Certificates of any tranches must agree with the relevant dealer or the seller of such Certificates that (i) it is not a U.S. Person, (ii) it will not at any time offer, sell, resell, trade, pledge, exercise, redeem, transfer or deliver, directly or indirectly, any Certificates in the United States or to, or for the account or benefit of, any U.S. person or to others for offer, sale, resale, trade, pledge, exercise, redemption, transfer or delivery, directly or indirectly, in the United States or to, or for the account or benefit of, any U.S. person, and (iii) it is not purchasing any Certificates, directly or indirectly, in the United States or for the account or benefit of any U.S. person.

Exercise or otherwise redemption of Certificates will be conditional upon certification that each person exercising or otherwise redeeming a Certificate is not a U.S. person or in the United States and that the Certificate is not being exercised or otherwise redeemed on behalf of a U.S. person. No payment will be made to accounts of holders of the Certificates located in the United States.

As used in the preceding paragraphs, the term “**United States**” includes the territories, the possessions and all other areas subject to the jurisdiction of the United States of America, and the term “**U.S. person**” means any person who is (i) a U.S. person as defined under Regulation S under the Securities Act, (ii) a U.S. person as defined in paragraph 7701(a)(30) of the Internal Revenue Code of 1986, or (iii) a person who comes within any definition of U.S. person for the purposes of the United States Commodity Exchange Act of 1936, as amended (the “**CEA**”) or any rules thereunder of the CFTC (the “**CFTC Rules**”), guidance or order proposed or issued under the CEA (for the avoidance of doubt, any

person who is not a “Non-United States person” defined under CFTC Rule 4.7(a)(1)(iv), but excluding, for purposes of subsection (D) thereof, the exception for qualified eligible persons who are not “Non-United States persons”, shall be considered a U.S. person).

## **APPENDIX I**

### **REPRODUCTION OF THE AUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2023 OF DBS GROUP HOLDINGS LTD AND ITS SUBSIDIARIES**

The information set out below is a reproduction of the audited consolidated financial statements of the Company and its subsidiaries for the financial year ended 31 December 2023 and has been extracted and reproduced from an announcement by the Company released on 6 March 2024 in relation to the same.

DBS Group Holdings Ltd and its Subsidiaries

# Independent auditor's report

## To the members of DBS Group Holdings Ltd

### Report on the Audit of the Financial Statements

#### Our opinion

In our opinion, the accompanying consolidated financial statements of DBS Group Holdings Ltd (the "Company") and its subsidiaries (the "Group") and the balance sheet of the Company are properly drawn up in accordance with the provisions of the Companies Act 1967 (the "Act") and Singapore Financial Reporting Standards (International) ("SFRS(I)s") so as to give a true and fair view of the financial position of the Company and the consolidated financial position of the Group as at 31 December 2023 and of the consolidated financial performance, the consolidated changes in equity and the consolidated cash flows of the Group for the financial year ended on that date.

#### What we have audited

The financial statements of the Company and the Group comprise:

- the consolidated income statement of the Group for the year ended 31 December 2023;
- the consolidated statement of comprehensive income of the Group for the year ended 31 December 2023;
- the balance sheets of the Group and of the Company as at 31 December 2023;
- the consolidated statement of changes in equity of the Group for the year then ended;
- the consolidated cash flow statement of the Group for the year then ended; and
- the notes to the financial statements, including material accounting policy information.

#### Basis for opinion

We conducted our audit in accordance with Singapore Standards on Auditing ("SSAs"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report.

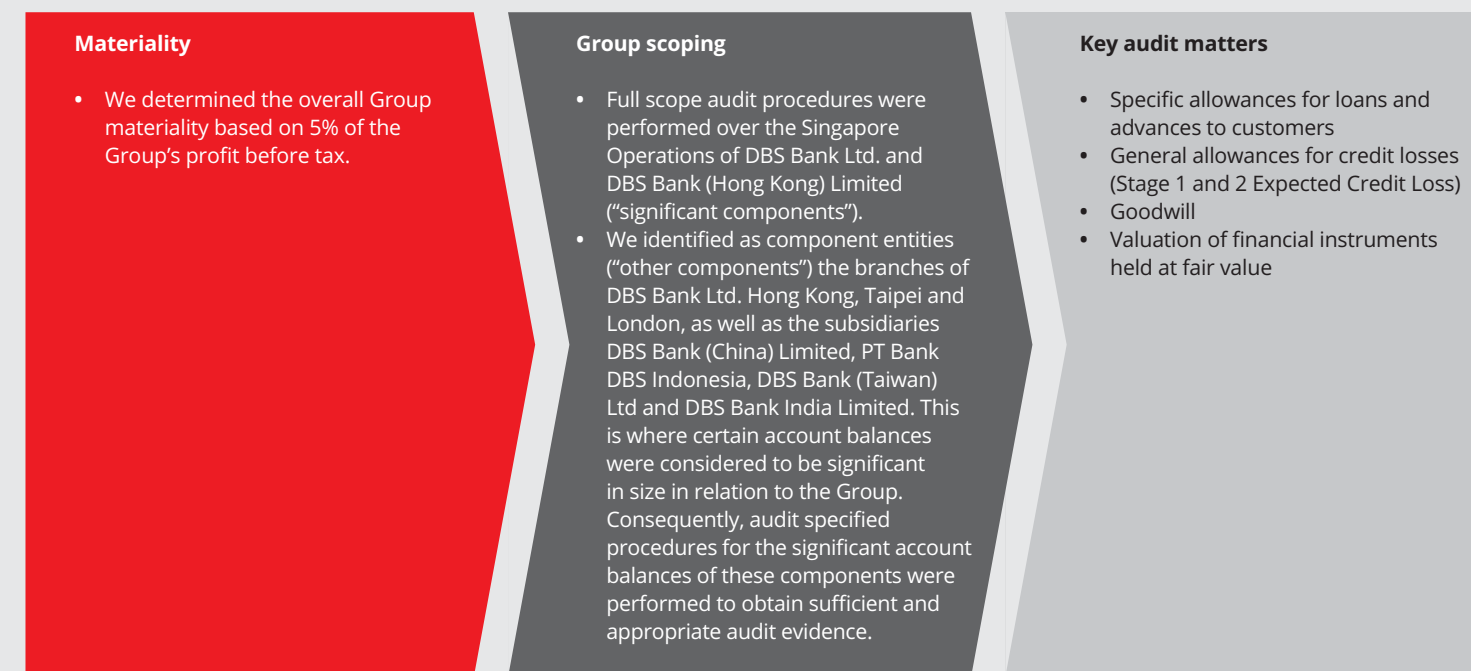

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We are independent of the Group in accordance with the Accounting and Corporate Regulatory Authority Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities ("ACRA Code") together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code.

### Our audit approach

#### Overview

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the accompanying financial statements. In particular, we considered where management made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including, among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

#### Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance as to whether the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall group materiality for the consolidated financial statements as a whole, as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and on the financial statements as a whole.

<b>How we determined overall Group materiality</b>	5% of the Group's profit before tax
<b>Rationale for benchmark applied</b>	<ul style="list-style-type: none"> <li>• We chose 'profit before tax' as, in our view, it is the benchmark against which performance of the Group is most commonly measured.</li> <li>• We selected 5% based on our professional judgement, noting that it is also within the range of commonly accepted profit-related thresholds.</li> </ul>

In performing our audit, we allocated materiality levels to the significant components and other components of the Group. These are less than the overall Group materiality.

**How we developed the audit scope**

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates. The Group's financial reporting process is dependent on its Information Technology ("IT") systems. Our audit scope included testing the operating effectiveness of the controls over the integrity of key financial data processed through the IT systems that are relevant to financial reporting.

In establishing the overall Group audit approach, we determined the extent of audit procedures that were needed to be performed across the Group by us or by other PwC network firms, operating under our instruction, who are familiar with the local laws and regulations in each respective territory, (the "component auditors"). Where the work was performed by component auditors, we determined the level of involvement we needed to have in the procedures to be able to conclude whether sufficient and appropriate audit evidence had been obtained as a basis for our opinion on the financial statements as a whole.

**Key audit matters**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements for the financial year ended 31 December 2023. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How our audit addressed the key audit matter
<p><b>Specific allowances for loans and advances to customers</b></p> <p>As at 31 December 2023, the specific allowances for loans and advances to customers of the Group was \$2,347 million, the majority of which related to Institutional Banking Group ("IBG") customers. Specific allowances refer to loss allowances for credit-impaired exposures (i.e. Stage 3, per SFRS (I) 9). Expected Credit Losses ("ECL") on non-impaired exposures (i.e. Stage 1 and Stage 2) are set out under the 'General allowances for credit losses' key audit matter.</p> <p>We focused on this area because management assessment of impairment can be inherently subjective and involves significant judgement over both the timing and estimation of the size of such impairment. This includes:</p> <ul style="list-style-type: none"> <li>principal assumptions underlying the calculation of specific allowances for loans and advances to IBG customers where there is evidence of impairment losses (including future profitability of borrowers and expected realisable value of collateral held); and</li> <li>classification of loans and advances in line with MAS Notice 612 ("MAS 612").</li> </ul> <p>(Refer also to Notes 3 and 18 to the financial statements.)</p>	<p>We assessed the design and evaluated the operating effectiveness of key controls over the specific allowances for loans and advances. These controls included:</p> <ul style="list-style-type: none"> <li>oversight of credit risk by the Group Credit Risk Committee;</li> <li>timely management review of credit risk;</li> <li>watchlist identification and monitoring;</li> <li>timely identification of impairment events;</li> <li>classification of loans and advances in line with MAS 612; and</li> <li>collateral monitoring and valuation.</li> </ul> <p>We determined that we could rely on these controls for the purposes of our audit.</p> <p>We inspected a sample of loans and advances to IBG customers to assess whether the classification of the loans and advances was in line with MAS 612 and, where there was evidence of an impairment loss, whether it had been identified in a timely manner. This included, where relevant, how forbearance had been considered.</p> <p>Where impairment had been identified, for a sample of loans and advances, our work included:</p> <ul style="list-style-type: none"> <li>considering the latest developments in relation to the borrower;</li> <li>examining the forecasts of future cash flows prepared by management, including key assumptions in relation to the amount and timing of recoveries;</li> <li>comparing the collateral valuation and other sources of repayment to check the calculation of the impairment against external evidence, where available, including independent valuation reports;</li> <li>challenging management's assumptions; and</li> <li>testing the calculations.</li> </ul> <p>For a sample of performing loans and advances to IBG customers which had not been identified by management as potentially impaired, we evaluated management's assumptions on their classification, using external evidence where available in respect of the relevant borrower.</p> <p>Based on procedures performed, we assessed that the aggregate specific allowance for loans and advances is appropriate.</p>

Key audit matter	How our audit addressed the key audit matter
<p><b>General allowances for credit losses (Stage 1 and 2 Expected Credit Loss)</b></p> <p>SFRS(I) 9 <i>Financial Instruments</i> ("SFRS(I) 9") requires an ECL impairment model which takes into account forward-looking information to reflect potential future economic events. In estimating ECL over future time periods, significant judgement is required.</p> <p>We focused on the Group's measurement of general allowances on non-impaired exposures (\$3,896 million). This covers both 'Stage 1' exposures (where there has not been a significant increase in credit risk), and 'Stage 2' exposures (where a significant increase in credit risk has been observed). The ECL framework implemented by the Group involves significant judgement and assumptions that relate to, amongst others:</p> <ul style="list-style-type: none"> <li>adjustments to the Group's Basel credit models and parameters;</li> <li>use of forward-looking and macro-economic information;</li> <li>estimates for the expected lifetime of revolving credit facilities;</li> <li>assessment of significant increase in credit risk; and</li> <li>post-model adjustments to account for limitations in the ECL models.</li> </ul> <p>(Refer also to Notes 3 and 11 to the financial statements.)</p>	<p>We critically assessed management's assumptions and estimates relating to Stage 1 and Stage 2 ECL for retail and non-retail portfolios as at 31 December 2023. This included assessing refinements in methodologies made during the year, as well as to account for changes in risk outlook.</p> <p>We assessed the design and evaluated the operating effectiveness of key controls, focusing on:</p> <ul style="list-style-type: none"> <li>involvement of governance committees, in reviewing and approving certain forward-looking macroeconomic assumptions, including post-model adjustments;</li> <li>completeness and accuracy of external and internal data inputs into the ECL calculations; and</li> <li>accuracy and timeliness of allocation of exposures into Stage 1 and Stage 2 based on quantitative and qualitative triggers.</li> </ul> <p>We determined that we could rely on these controls for the purposes of our audit.</p> <p>The Group's internal experts continue to perform independent model validation of selected aspects of the Group's ECL methodologies and assumptions each year. We checked their results as part of our work.</p> <p>We also reviewed the ECL of selected credit portfolios to assess if the methodologies and estimates are appropriate.</p> <p>Through the course of our work, we assessed the rationale and calculation basis of post-model adjustments. We also assessed the reasonableness of certain forward-looking economic inputs, as well as the overall ECL output.</p> <p>Overall, we concluded that the Group's ECL on non-impaired exposures is appropriate.</p>
<p><b>Goodwill</b></p> <p>As at 31 December 2023, the Group had \$6,081 million of goodwill as a result of acquisitions.</p> <p>We focused on this area as management makes significant judgements in estimating future cash flows when undertaking its annual goodwill impairment assessment.</p> <p>The key assumptions used in the discounted cash flow analyses relate to:</p> <ul style="list-style-type: none"> <li>cash flow forecasts;</li> <li>discount rate; and</li> <li>long-term growth rate.</li> </ul> <p>(Refer also to Notes 3 and 27 to the financial statements.)</p>	<p>For goodwill balances, we assessed the appropriateness of management's identification of the Group's cash generating units and the process by which indicators of impairment were identified.</p> <p>For DBS Bank (Hong Kong) Limited's franchise (goodwill of \$4,631 million as at 31 December 2023), we evaluated management's cash flow forecasts and the process by which they were developed. Together with valuation specialists in our team, we assessed discount rate and growth rate assumptions against the Group's own historical performance and available external industry and economic indicators. We checked management's sensitivity analysis over the key assumptions to determine whether any reasonably possible change in these assumptions would result in an impairment, and also performed our own stress analysis.</p> <p>We concur with management's assessment that goodwill balances are not impaired as at 31 December 2023.</p>

Key audit matter	How our audit addressed the key audit matter
<p><b>Valuation of financial instruments held at fair value</b></p> <p>Financial instruments held by the Group at fair value include derivative assets and liabilities, trading securities, certain debt instruments and other assets and liabilities designated at fair value.</p> <p>The Group's financial instruments are predominantly valued using quoted market prices ('Level 1') or market observable prices ('Level 2'). The valuations of 'Level 3' instruments rely on significant unobservable inputs.</p> <p>We considered the overall valuation of financial instruments (Level 1, 2 and 3) to be a key audit matter given the financial significance to the Group, the nature of the underlying products and the estimation involved to determine fair value.</p> <p>In determining fair value, management also make adjustments to recognise credit risk, funding costs, bid-offer spreads and, in some cases, parameter and model risk limitations. This is broadly consistent with the banking industry, albeit the methodology to calculate some of these adjustments is continuing to evolve.</p> <p>(Refer also to Notes 3 and 41 to the financial statements.)</p>	<p>We assessed the design and tested the operating effectiveness of the controls over the Group's financial instruments valuation processes. These included the controls over:</p> <ul style="list-style-type: none"> <li>management's testing and approval of new models and revalidation of existing models;</li> <li>the completeness and accuracy of pricing data inputs into valuation models;</li> <li>monitoring of collateral disputes; and</li> <li>governance mechanisms and monitoring over the valuation processes (including derivative valuation adjustments) by the Group Market and Liquidity Risk Committee and the Group Valuation Committee.</li> </ul> <p>We determined that we could rely on the controls for the purposes of our audit.</p> <p>In addition, we:</p> <ul style="list-style-type: none"> <li>engaged our own specialists to use their models and input sources to determine an independent estimate of fair value for a sample of the Group's Level 1 and Level 2 financial instruments. We compared these to the Group's calculations of fair value to assess individual material valuation differences or systemic bias;</li> <li>assessed the reasonableness of methodologies used and assumptions made for a sample of financial instrument valuations with significant unobservable valuation inputs (Level 3 instruments);</li> <li>performed procedures on collateral disputes to identify possible indicators of inappropriate valuations;</li> <li>performed tests of inputs and assessed the methodology over fair value adjustments, in light of available market data and industry trends; and</li> <li>considered the implications of global reforms to Interest Reference Rates in our assessment of fair value.</li> </ul> <p>Overall, we considered that the valuation of financial instruments held at fair value was within a reasonable range of outcomes.</p>

### Other Information

Management is responsible for the other information. The other information comprises the Directors' Statement (but does not include the financial statements and our auditor's report thereon), which we obtained prior to the date of this auditor's report, and the other sections of the annual report ("the Other Sections") which are expected to be made available to us after that date.

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the Other Sections, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take appropriate actions in accordance with SSAs.

### Responsibilities of Management and Directors for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Act and SFRS(I)s, and for devising and maintaining a system of internal accounting controls sufficient to provide a reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition; and transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair financial statements and to maintain accountability of assets.

In preparing the financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The directors' responsibilities include overseeing the Group's financial reporting process.

### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### Report on Other Legal and Regulatory Requirements

In our opinion, the accounting and other records required by the Act to be kept by the Company and by those subsidiary corporations incorporated in Singapore of which we are the auditors have been properly kept in accordance with the provisions of the Act.

The engagement partner on the audit resulting in this independent auditor's report is Yura Mahindroo.

<b>Cash flows from financing activities</b>		
Redemption of subordinated term debts	(3,057)	-
Interest paid on subordinated term debts	(92)	(86)
Purchase of treasury shares	(20)	(11)
Dividends paid to shareholders of the Company <sup>(a)</sup>	(6,013)	(3,789)
Dividends paid to non-controlling interest	(7)	-
<b>Net cash used in financing activities (3)</b>	<b>(9,189)</b>	<b>(3,886)</b>
Exchange translation adjustments (4)	(805)	(903)
<b>Net change in cash and cash equivalents (1)+(2)+(3)+(4)</b>	<b>(4,101)</b>	<b>(2,714)</b>
<b>Cash and cash equivalents at 1 January</b>	<b>43,976</b>	<b>46,690</b>
<b>Cash and cash equivalents at 31 December (Note 15)</b>	<b>39,875</b>	<b>43,976</b>

(a) Includes distributions paid on capital securities classified as equity

(see notes on pages 126 to 180 as well as the Risk Management section on pages 80 to 96 which form part of these financial statements)

## DBS Group Holdings Ltd and its Subsidiaries

# Notes to the financial statements

for the year ended 31 December 2023

These Notes are integral to the financial statements.

The consolidated financial statements for the year ended 31 December 2023 were authorised for issue by the Directors on 6 February 2024.

## 1. Domicile and Activities

The Company, DBS Group Holdings Ltd, is incorporated and domiciled in the Republic of Singapore and has its registered office at 12 Marina Boulevard, Marina Bay Financial Centre Tower Three, Singapore 018982.

The Company is listed on the Singapore Exchange.

The Company is an investment holding, treasury and funding vehicle for the group. Its main subsidiary is DBS Bank Ltd. (the Bank), which is wholly owned and engaged in a range of commercial banking and financial services, principally in Asia.

The financial statements relate to the Company and its subsidiaries (the Group) and the Group's interests in associates and joint ventures.

## 2. Summary of Material Accounting Policies

### 2.1 Basis of preparation

#### Compliance with Singapore Financial Reporting Standards (International) (SFRS(I))

The financial statements of the Company and the consolidated financial statements of the Group are prepared in accordance with Singapore Financial Reporting Standards (International) (SFRS(I)). As permitted by Section 201(10)(b) of the Companies Act 1967 (the Act), the Company's income statement has not been included in these financial statements.

The financial statements are presented in Singapore dollars and rounded to the nearest million, unless otherwise stated.

### 2.2 Significant estimates and judgement

The preparation of financial statements requires management to exercise judgement, use estimates and make assumptions in the application of policies and in reporting the amounts in the financial statements. Although these estimates are based on management's best knowledge of current events and actions, actual results may differ from these estimates. Critical accounting estimates and assumptions used that are significant to the financial statements, and areas involving a higher degree of judgement and complexity, are disclosed in Note 3.

### 2.3 New or amended SFRS(I) effective for 2023 year-end

The Group has adopted International Tax Reform – Pillar Two Model Rules (Amendments to SFRS(I) 1-12) upon its issuance in May 2023. The amendments provide a temporary mandatory exception from deferred tax accounting arising from the implementation of Pillar Two model rules which is effective immediately, and also require new disclosures on the Pillar Two exposure.

The other amendments to SFRS(I) that were effective from 1 January 2023 did not have a significant impact on the Group's financial statements.

### 2.4 New SFRS(I) and Interpretations effective for future periods

The amendments and interpretations effective for future periods do not have a significant impact on the Group's financial statements.

### A) General Accounting Policies

A summary of the Group's material accounting policies is described further below starting with those relating to the entire financial statements, followed by those relating to the income statement, the balance sheet and other specific topics. This does not reflect the relative importance of these policies to the Group.

### 2.5 Group Accounting

#### Subsidiaries

Subsidiaries are entities (including structured entities) over which the Group has control. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Subsidiaries are consolidated from the date control is transferred to the Group to the date control ceases.

The acquisition method is used to account for business combinations. Please refer to Note 2.13 for the Group's accounting policy on goodwill.

All intra-group transactions and balances are eliminated on consolidation.

#### Associates and Joint Ventures

Associates are entities over which the Group has significant influence but no control, where the Group generally holds a shareholding of between and including 20% and 50% of the voting rights.

Joint ventures are entities which the Group has joint control and rights to the net assets of the entity.

Investments in associates and joint ventures are initially recognised at cost. In addition, when the Group's share of the fair value of the identifiable net assets of the investment exceeds the cost of acquisition paid by the Group, the excess is recognised in profit and loss as part of the share of profit from associates and joint ventures.

Investments in associates and joint ventures are accounted for using the equity method. Under the equity method of accounting, these investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of post-acquisition profits or losses and the Group's share of other comprehensive income. Dividends received or receivable from the associates and joint ventures are recognised as a reduction of the carrying amount of the investments.

### 2.6 Foreign currency treatment

#### Functional and presentation currency

Items in the financial statements are measured using the functional currency of each entity in the Group, this being the currency of the primary economic environment in which the entity operates. The Group's financial statements are presented in Singapore dollars, which is the functional currency of the Company.

#### Foreign currency transactions and balances

Transactions in foreign currencies are measured using the exchange rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency of the entity undertaking the transaction at the exchange rates at the balance sheet date. Foreign exchange differences arising from this translation are recognised in the income statement within "Net trading income".

Non-monetary assets and liabilities measured at cost in a foreign currency are translated using the exchange rates at the date of the transaction.

Non-monetary assets and liabilities measured at fair values in foreign currencies are translated using the exchange rates at the date when the fair values are determined, which is generally the balance sheet date.

Unrealised foreign exchange differences arising from non-monetary financial assets and liabilities classified as fair value through profit or loss (FVPL) are recognised in the income statement as trading income.

Non-monetary financial assets that are classified at fair value through other comprehensive income (FVOCI) relates mainly to FVOCI equities. Please refer to Note 2.9 for the accounting treatment of FVOCI equities.

### Foreign operations

The results and financial position of subsidiaries, associates, joint ventures and branches or units whose functional currency is not Singapore dollars ("foreign operations") are translated into Singapore dollars in the following manner:

- Assets and liabilities are translated at the exchange rates at the balance sheet date;
- Income and expenses in the income statement are translated at exchange rates prevailing at each month-end, approximating the exchange rates at the dates of the transactions; and
- All resulting exchange differences are recognised in other comprehensive income and accumulated under foreign currency translation reserves in equity. When a foreign operation is partially or fully disposed of, or when it is liquidated, such exchange differences are recognised in the income statement as part of the gain or loss.

For acquisitions prior to 1 January 2005, the foreign exchange rates at the respective dates of acquisition were used. Goodwill and fair value adjustments arising on the acquisition of a foreign operation on or after 1 January 2005 are treated as assets and liabilities of the foreign operation and translated at the closing rate. Please refer to Note 27 for an overview of goodwill recorded.

### 2.7 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to management.

In preparing the segment information, amounts for each business segment are shown after the allocation of certain centralised costs, funding income and the application of transfer pricing, where appropriate. Transactions between segments are recorded within the segment as if they are third party transactions and are eliminated on consolidation.

Please refer to Note 45 for further details on business and geographical segment reporting.

## B) Income Statement

### 2.8 Income recognition

#### Interest income and interest expense

Interest is accrued on all interest-bearing financial assets and financial liabilities, regardless of their classification and measurement, except for limited transactions measured at FVPL where the economics are better reflected in “Net trading income”.

Interest income and interest expense are recognised on a time-proportionate basis using the effective interest method. The calculation includes significant fees and transaction costs that are integral to the effective interest rate, as well as premiums or discounts.

Net interest income also includes the interest element of derivative instruments that are (i) designated in hedge accounting relationships (Note 2.19) or (ii) used in funding or other hedging arrangements where this treatment would reduce an accounting mismatch.

#### Fee and commission income

The Group earns fee and commission income from a diverse range of products and services provided to its customers. Fee and commission income are recognised when the Group has satisfied its performance obligation in providing the promised products and services to the customer, and are recognised based on contractual rates agreed with customers, net of expected waivers based on historical experience, and net of expenses directly related to it. The Group generally satisfies its performance obligation and recognises the fee and commission income on the following basis:

- Transaction-based fee and commission income is recognised on the completion of the transaction. Such fees include underwriting fees, brokerage fees, bancassurance sales commission and variable service fees, and fees related to the completion of corporate finance transactions.
- For a service that is provided over a period of time, fee and commission income is generally recognised on equal proportion basis over the period during which the related service is provided or credit risk is undertaken. This basis of recognition most appropriately reflects the nature and pattern of provision of these services to the customers over time. Fees for these services can be billed to customers in advance or periodically over time. Such fees include the income from issuance of financial guarantees and bancassurance fixed service fees.

The Group does not provide any significant credit terms to customers for the above products and services. Directly related expenses typically include brokerage fees paid, card-related expenses and sales commissions, but do not include expenses for services delivered over a period (such as service contracts) and other expenses that are not specifically related to fee and commission income transactions.

#### Dividend income

Dividend income is recognised when the right to receive payment is established. Dividend income arising from financial assets classified as FVPL is recognised in “Net trading income”, while those arising from FVOCI financial assets is recognised in “Net income from investment securities”.

#### Allowances for credit and other losses

Please refer to Note 2.11 for the accounting policy on impairment of financial assets.

## C) Balance Sheet

### 2.9 Financial assets

#### Initial recognition

Purchases and sales of all financial assets are recognised on the date that the Group enters into the contractual arrangements with counterparties. When the Group acts as a trustee or in a fiduciary capacity for assets it does not directly control or benefit from, the assets and the corresponding income belonging to a customer are excluded from the financial statements.

Financial assets are initially recognised at fair value, which is generally the transaction price.

#### Classification and subsequent measurement

SFRS(I) 9 categorises debt-like financial assets based on the business model within which the assets are managed, and whether the assets constitute a “basic lending arrangement” where their contractual cash flows represent solely payments of principal and interest (SPPI). Interest is defined as consideration for the time value of money, credit risk, other basic lending risks and may include a profit margin.

The classification of the financial assets and the associated accounting treatment are as follows:

- Debt instruments are measured at **amortised cost** when they are in a “hold to collect” (HTC) business model and have contractual cash flows that are SPPI in nature. The objective of a HTC business model is to collect contractual principal and interest cash flows. Sales are incidental to the objective and expected to be either insignificant or infrequent. These assets consist primarily of loans in the “Consumer Banking/ Wealth Management” and “Institutional Banking” segments as well as debt securities from the “Others” segment.
- Debt instruments are measured at **fair value through other comprehensive income (FVOCI)** when they are in a “hold to collect & sell” (HTC & S) business model and have cash flows that are SPPI in nature. Both the collection of contractual cash flows and sales are integral to achieving the objective of the HTC & S business model. Assets measured at FVOCI comprise mainly of debt securities from “Treasury Markets” and the “Others” segment.

Unrealised gains or losses on FVOCI debt instruments are recorded in other comprehensive income and accumulated in FVOCI revaluation reserves. When they are sold, the accumulated fair value adjustments in FVOCI revaluation reserves are reclassified to the income statement as “Net income from investment securities”.

- Debt instruments are measured at **fair value through profit or loss (FVPL)** when:
  - i) the assets are not SPPI in nature;
  - ii) the assets are not part of a “HTC” or “HTC & S” business model; or
  - iii) the assets are designated at FVPL to eliminate or significantly reduce the measurement or recognition inconsistencies that would otherwise arise from measuring assets or liabilities on different bases.

Assets measured at FVPL are mainly recorded in the “Treasury Markets” segment. Realised and unrealised gains or losses on FVPL financial assets are taken to the income statement in the period they arise.

- Subsequent changes in fair value of non-trading equity instruments can be taken through profit or loss or comprehensive income, as elected. The Group generally elects its non-trading equity instruments to be classified as FVOCI. Other than dividend income, gains and losses on FVOCI equity instruments are recorded in other comprehensive income and accumulated in FVOCI revaluation reserves, and not reclassified to profit or loss upon derecognition.
- Derivatives (including derivatives embedded in financial liabilities but separated for accounting purposes) are classified as held for trading unless they are designated in hedge accounting relationships (Note 2.19). Derivatives are classified as assets when the fair value is positive and as liabilities when the fair value is negative. Changes in the fair value of derivatives other than those designated as hedging instruments in cash flow or net investment hedges are included in “Net trading income”. Also refer to Note 2.8 on the accounting for the interest element of derivative instruments.

#### Reclassification

Reclassification of financial assets are prohibited unless the Group changes its business model for managing financial assets. In practice, this is expected to be infrequent.

#### Determination of fair value

The fair value of financial assets is the price that would be received if the asset is sold in an orderly transaction between market participants at the measurement date. Fair value is generally estimated by using prices in active markets or by using valuation techniques that use observable market parameters as inputs.

Where applicable, a valuation reserve or pricing adjustment is applied to arrive at the fair value. Significant judgement is required in estimating fair value. Refer to Note 41 for further details.

#### Offsetting

Financial assets and liabilities are presented net when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle them on a net basis, or realise the asset and settle the liability simultaneously.

#### Derecognition

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or when they have been transferred together with substantially all the risks and rewards of ownership.

The Group enters into certain transactions where it transfers financial assets recognised on its balance sheet but retains either all or a portion of the risks and rewards of the transferred financial assets. In such cases, the transferred financial assets are not derecognised from the balance sheet. Such transactions include repurchase agreements described in Note 2.12. They also include transactions where control over the financial asset is retained, for example, by a simultaneous transaction (such as options) with the same counterparty to which the asset is transferred. These are mainly transacted in the “Treasury Markets” segment. In such cases, the Group continues to recognise the asset to the extent of its continuing involvement which is the extent to which it is exposed to changes in the value of the transferred asset.

Please refer to Note 19 for disclosures on transferred financial assets.

### 2.10 Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand and non-restricted balances with central banks which are readily convertible into cash.

### 2.11 Impairment of financial assets at amortised cost and FVOCI

#### Expected Credit Losses (ECL)

ECL are recognised for all financial assets held at amortised cost, debt instruments measured at FVOCI, guarantees and undrawn credit commitments. It represents the present value of expected cash shortfalls over the residual term of a financial asset, guarantee or undrawn commitment.

At initial recognition, allowance is required for ECL resulting from possible default events that may occur within the next 12 months (“12-month ECL”). In the event of a significant increase in credit risk, allowance is required for ECL resulting from possible default events over the expected life of the instrument (“lifetime ECL”).

The ECL recognised follows the three-stage model: financial instruments where 12-month ECL is recognised are considered Stage 1; financial instruments which experience a significant increase in credit risk (SICR) are in Stage 2; and financial instruments with objective evidence of default or are credit-impaired are in Stage 3.

- **Stage 1** – Financial instruments are classified as Stage 1 at initial recognition and will remain under Stage 1 unless they experience a SICR or become credit-impaired. 12-month ECL is recognised for these instruments.
- **Stage 2** – Financial instruments which experience a SICR subsequent to initial recognition, but are not yet credit-impaired, will migrate from Stage 1 to Stage 2. Lifetime ECL is recognised for these instruments.

**SICR:** SICR is assessed by comparing the risk of default at reporting date to the risk of default at origination using a range of qualitative and quantitative factors.

For wholesale exposures, a financial instrument is deemed to have experienced a significant increase in credit risk when:

- the observed change in its probability of default (PD), as observed by downgrades in the Group’s internal credit risk rating for this instrument between origination and reporting dates, is more than pre-specified thresholds; or
- it is placed on certain internal credit watchlists categories for closer scrutiny of developing credit issues.

For retail exposures, days past due is the main driver, supplemented with a PD-based criterion. In any event, all retail and wholesale exposures that are more than 30 days past due are presumed to have experienced a significant increase in credit risk, unless assessed otherwise, and are classified as Stage 2.

Instruments in Stage 2 that no longer exhibit a significant increase in credit risk will be transferred back to Stage 1.

- **Stage 3** – Financial instruments that become credit-impaired with evidence of default, i.e. non-performing assets, are transferred to Stage 3. Please refer to Risk Management section for the definition of non-performing assets.

Lifetime ECL is recognised for these assets. ECL for Stage 3 assets are also known as specific allowances.

A Stage 3 exposure that is restructured can be upgraded to Stage 2 if there are reasonable grounds to conclude that the obligor is able to service future principal and interest payments in accordance with the restructured terms. Stage 3 financial assets are written-off, in whole or in part, when the Group has exhausted all practical recovery efforts and has concluded that there is no reasonable expectation of future recoveries.

#### Measurement of ECL

ECL are unbiased and probability-weighted estimates of credit losses determined by evaluating a range of possible outcomes, considering past events, current conditions and assessments of future economic conditions at the reporting date. The ECL associated with a financial instrument is typically a product of its probability of default (PD), loss given default (LGD) and exposure at default (EAD) discounted using the original effective interest rate to the reporting date.

Component	Description
PD	Point-in-time (based on current conditions, adjusted to take into account estimates of future conditions that will impact PD) estimate of the likelihood of default.
LGD	Estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the Group would expect to receive, including recoveries from collaterals.
EAD	Estimate of the expected credit exposure at time of default, taking into account repayments of principal and interest as well as expected drawdowns on undrawn credit commitments and potential pay-outs on guarantees issued.

The 12-month ECL is calculated by multiplying the 12-month PD, LGD and EAD. Lifetime ECL is calculated by multiplying the lifetime PD, LGD and EAD. The 12-month and lifetime PDs represent the probability of default occurring over the next 12 months and the remaining maturity of the instrument respectively.

In most instances, expected remaining maturity is the same as the remaining contractual life which represents the maximum contractual period over which the Group is exposed to the credit risk of the borrower. However, for some revolving products (e.g. credit cards), the expected remaining maturity may exceed the contractual maturity. In such instances, behavioural expected remaining life will be used.

#### ECL Modelling - Point-in-Time and Forward-Looking Adjustments

The Group leverages the models and parameters implemented under the Basel II Internal Ratings-Based (IRB) framework where possible, with appropriate modifications to meet SFRS(I) 9 requirements.

Other relevant historical information, loss experience or proxies will be utilised for portfolios without appropriate Basel models and parameters, with a view to maximise the use of available information that is reliable and supportable.

For the wholesale portfolios, credit cycle indices (CCIs) have been developed for the key industries and geographies. CCIs are summary measures that depict broad-based, sector-wide changes in credit risk, which are constructed by comparing the median expected default frequency of firms within each segment against a long-run average. Expected default frequency is in turn a market-based point-in-time default risk measure driven by the market value of firms' assets, asset volatility and leverage. CCIs are then used as inputs to convert the generally more through-the-cycle PDs derived from Basel models/ parameters into the point-in-time equivalents by adding the unaccounted portion of cyclical variations, as well as to incorporate forward-looking information. LGDs are determined using historical loss data, which are adjusted for both the latest and forecasted recovery experience.

The Group relies on a Monte Carlo simulation approach to consider over 100 probability-weighted forward-looking scenarios in estimating ECL. This involves simulations of many alternative CCI scenarios to arrive at an unbiased ECL estimate that are meant to cover all possible good and bad scenarios based on known estimates.

For material unsecured retail portfolios under the Advanced Internal Ratings-Based Approach (Advanced IRBA), the Group has rolled out a SFRS(I) 9 adjusted PD, LGD and EAD-based approach during the year. For other retail portfolios, historical loss experience is used in conjunction with the forecast loss rates which take into account relevant macroeconomic variables, such as property prices and unemployment rates.

#### Expert credit judgement and post model adjustments

The measurement of ECL requires the application of expert credit judgement and post model adjustments. These include:

- assignment of credit risk ratings and determination of whether exposures should be placed on credit watchlists;
- assessment of whether a significant increase in credit risk has occurred;
- selecting and calibrating the ECL models such as CCIs;
- determining the expected remaining maturity of revolving products (e.g. overdrafts and credit cards);
- determination of the forecast loss rates; and
- application of thematic overlays based on emerging risk themes where potential risks may not be fully captured in the underlying modelled ECL. Such top-down additional modelled ECL was quantified by means of applying conditional probabilities on more severe scenarios materialising from emerging risk themes.

The Group has the following thematic overlays as at 31 December 2023.

In addition to the base scenarios generated by the model, the Group has incorporated stress scenarios and assigned probabilities to the scenarios, in line with management's judgement of the likelihood of each scenario. The stress scenarios factor in heightened geopolitical and macro-economic risk, potential vulnerabilities in the US and EU corporates, as well as stress in the China commercial real estate sector.

There is also a thematic overlay to address pricing pressures and risks of asset stranding that the conventional energy sector could face as a result of a transition to a low-carbon economy. Probabilities were assigned to the scenarios in-line with management's judgement of the likelihood of each scenario.

#### Governance framework

The measurement of ECL is subject to a robust governance framework as described below.

- The Group ECL Review Committee (Review Committee) is the overarching committee for ECL related matters and comprises senior management and representatives from functions across the Group. Significant changes to ECL models and methodologies and the application of thematic overlays are subject to the oversight and approval of the Review Committee.
- The Review Committee is supported by the Group ECL Operating Committee (Operating Committee) which comprises cross functional representatives and subject matter experts. The Operating Committee recommends changes to ECL models, methodologies and thematic overlays to the Review Committee; provides oversight over system design, infrastructure and development; and establishes principles and significant policies pertaining to ECL. Group Credit Risk Models Committee oversees ECL models and credit risk models used by the Group.
- Location ECL committees are established for key overseas subsidiaries to govern and manage location-specific ECL reporting.
- ECL models are subject to independent validation by the Risk Management Group (RMG) Model Validation team, as well as independent reviews by internal and external auditors. The validation and assurance processes cover the review of the underlying ECL methodology including its logic and conceptual soundness.

#### Minimum Regulatory Loss Allowance

Singapore banks are required to maintain the Minimum Regulatory Loss Allowances (MRLA) of at least 1% of the gross carrying amount of selected credit exposures net of collaterals per MAS Notice 612. For periods when Stage 1 and 2 ECL fall below MRLA, the shortfall is appropriated from retained earnings in the shareholders' funds into a non-distributable Regulatory Loss Allowance Reserve (RLAR) account.

#### 2.12 Repurchase agreements

**Repurchase agreements (Repos)** are arrangements where the Group sold the securities but are subject to a commitment to repurchase or redeem the securities at a pre-determined price. The securities are retained on the balance sheet as the Group retains substantially all the risk and rewards of ownership and these securities are disclosed within "Financial assets pledged or transferred" (Note 19). The consideration received is recorded as financial liabilities in either "Due to banks" or "Deposits and balances from customers". Short-dated repos transacted as part of Treasury Markets activities are measured at FVPL.

#### Reverse repurchase agreements (Reverse repos) are

arrangements where the Group purchased the securities but are subject to a commitment to resell or return the securities at a pre-determined price. The risk and rewards of ownership of the collateral are not acquired by the Group and are reflected as collateral received and recorded off-balance sheet. The consideration paid is recorded as financial assets as "Cash and balances with central banks", "Due from banks" or "Loans and advances to customers". Short-dated reverse repos transacted as part of Treasury Markets activities are measured at FVPL.

#### 2.13 Goodwill and intangible assets arising from business combinations

##### Goodwill

Goodwill arising from business combinations generally represents the excess of the acquisition cost over the fair value of identifiable assets acquired and liabilities and contingent liabilities assumed on the acquisition date. Goodwill is stated at cost less impairment losses and is tested at least annually for impairment.

At the acquisition date, any goodwill acquired is allocated to each of the cash-generating units (CGU) or group of CGUs expected to benefit from the combination's synergies.

An impairment loss is recognised on goodwill when the carrying amount of a CGU, or group of CGUs, including the goodwill, exceeds the applicable recoverable amount. The recoverable amount of a CGU or CGU group is the higher of the CGU's or CGU group's fair value less cost to sell and its value-in-use. An impairment loss on goodwill is recognised in the income statement and cannot be reversed in subsequent periods.

#### Other intangible assets

Intangible assets acquired in a business combination are recognised at fair value at the acquisition date and they relate mainly to customer relationships and core customer deposits. They have a finite useful life and are subsequently measured at cost less accumulated amortisation and impairment losses. Intangible assets are amortised using the straight-line method over their estimated useful lives of 10 years.

#### 2.14 Properties and other fixed assets

##### Owned properties and other fixed assets

Properties (including investment properties) and other fixed assets are stated at cost less accumulated depreciation and impairment losses.

Depreciation is calculated using the straight-line method to write down the costs of the assets to their residual values over the estimated useful lives of the assets. The useful life refers to the period which the Group expects to use or hold the asset.

The residual value of an asset is its estimated selling price (after deducting related costs), assuming that it is already at the age and in the condition expected at the end of its useful life. No depreciation is recognised when the residual value is higher than the carrying amount.

Freehold and leasehold land with unexpired lease terms of more than 100 years are not depreciated. The depreciation periods of the other assets are as follows:

Leasehold land with unexpired lease terms below 100 years	The shorter of the remaining lease term or useful life
Buildings	The shorter of 50 years, the remaining lease term or useful life
Computer software	3 to 5 years
Computer hardware, office equipment, furniture and fittings	3 to 10 years
Leasehold improvements	Up to 20 years

##### Leased properties and other fixed assets

Lease liabilities are initially measured at the present value of lease payments to be made over the lease term at the lease commencement date. The measurement of the associated right-of-use assets generally approximates the lease liability.

Lease liabilities are subsequently measured at amortised cost using the effective interest method. The right-of-use assets are depreciated over the lease term on a straight-line basis.

Extension options and termination options are included in the assessment of the lease term if the options are reasonably certain to be exercised or not exercised accordingly. If the Group changes its initial assessment, adjustments are made to the carrying amounts of the lease liabilities and right-of-use assets prospectively.

The recognition exceptions for short-term leases and leases of low-value assets are applied.

Please refer to Note 26 for the details of owned and leased properties and other fixed assets.

## 2.15 Financial liabilities

### Initial recognition, classification and subsequent measurement

Financial liabilities are initially recognised at fair value. The Group generally classifies and measures its financial liabilities in accordance with the purpose for which the financial liabilities are incurred and managed. Accordingly:

- Financial liabilities are classified as **financial liabilities at fair value through profit or loss** if they are incurred for the purpose of repurchasing in the near term (“**held for trading**”), and this may include debt securities issued and short positions in securities for the purpose of ongoing market-making or trading. Financial liabilities at fair value through profit or loss can also be designated by management on initial recognition (“**designated at fair value through profit or loss**”) if doing so eliminates or significantly reduces measurement or recognition inconsistencies that would otherwise arise, or if the financial liability contains an embedded derivative that would otherwise need to be separately recorded, or if a group of financial liabilities or financial assets and financial liabilities is managed and its performance is evaluated on a fair value basis. Financial liabilities in this classification are usually within the “Treasury Markets” segment.

Realised or unrealised gains or losses on financial liabilities held for trading and financial liabilities designated under the fair value option, except interest expense, are taken to “Net trading income” in the income statement in the period they arise.

The changes to the fair value of financial liabilities designated under the fair value option that are attributable to the Group’s own credit risk are taken to revenue reserves through other comprehensive income. These amounts are not transferred to the income statement even when realised.

- Derivative liabilities are treated consistently with derivative assets. Please refer to Note 2.9 for the accounting policy on derivatives.
- Other financial liabilities are carried at **amortised cost** using the effective interest method. These comprise predominantly the Group’s “Deposits and balances from customers”, “Due to banks” and “Other debt securities”.

Please refer to Note 14 for further details on the types of financial liabilities classified and measured as above.

### Determination of fair value

The fair value of financial liabilities is the price that would be paid to transfer the liability in an orderly transaction between market participants at the measurement date.

Please refer to Note 41 for further fair value disclosures.

### Derecognition

A financial liability is derecognised from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired.

## 2.16 Loan commitments, letters of credit and financial guarantees

### Loan commitments

Loan commitments are not recognised on the balance sheet and are disclosed in Note 35. Upon a loan draw-down, the amount of the loan is generally recognised as “Loans and advances to customers” on the Group’s balance sheet.

### Letters of credit

Letters of credit are recorded off-balance sheet as contingent liabilities upon issuance, and the corresponding payables to the beneficiaries and receivables from the applicants are recognised on the balance sheet upon acceptance of the underlying documents.

### Financial guarantees

Financial guarantees are initially recognised in the financial statements at fair value on the date the guarantees are given.

Financial guarantees are subsequently measured at the higher of:

- the amount of the ECL (Note 2.11); and
- the unamortised portion of the fees that were received on initial recognition.

Please refer to Note 2.8 for the principles for recognising the fees.

Off-balance sheet credit exposures are managed for credit risk in the same manner as financial assets.

Please refer to Note 2.11 on the Group’s accounting policies on allowances for credit losses.

## 2.17 Provisions

Provisions are liabilities of uncertain timing or amounts and are recognised when:

- the Group has a present legal or constructive obligation as a result of past events;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate of the amount of the obligation can be made.

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the balance sheet date.

## 2.18 Share capital and other instruments classified as equity

Ordinary shares, preference shares and other instruments which do not result in the Group having a contractual obligation to deliver cash or another financial asset, or to exchange financial assets or financial liabilities with the holder under conditions that are potentially unfavourable to the Group, are classified as equity. Distributions arising from such instruments are recognised in equity as there is no contractual obligation to pay distributions on these instruments. Incremental external costs directly attributable to the issuance of such instruments are accounted for as a deduction from equity.

When any entity within the Group purchases the Company’s ordinary shares (“treasury shares”), the consideration paid, including any directly attributable incremental cost is presented as a component within equity, until they are cancelled, sold or reissued.

When treasury shares are subsequently cancelled, the cost of the treasury shares is deducted against either the share capital account or retained earnings. When treasury shares are subsequently sold or reissued, any realised gain or loss on sale or reissue, net of any directly attributable incremental transaction costs and related income tax, is recognised in other reserves.

For ordinary and preference shares, interim dividends are recorded during the financial year in which they are declared payable. Final dividends are recorded during the financial year in which the dividends are approved by the shareholders at the Annual General Meeting.

## D) Other Specific Topics

### 2.19 Hedge accounting

As part of the overall risk management of the Group, derivatives and other instruments are used to manage exposures to interest rate and foreign currency risks, including exposures arising from forecast transactions. Where all relevant criteria are met, the Group can elect to apply hedge accounting to reduce the accounting mismatch between hedging instrument and the hedged item.

To qualify for hedge accounting, at the inception of each hedging relationship, the Group designates and documents the relationship between the hedging instrument and the hedged item; the risk management objective for undertaking the hedge transaction; and the methods used to assess the effectiveness of the hedge. At inception and on an on-going basis, the Group also assesses and measures the effectiveness of the hedging relationship between the hedging instrument and the hedged item.

The Group designates certain derivatives as hedging instruments in respect of foreign currency risk and interest rate risk in fair value hedges, cash flow hedges, or hedges of net investments in foreign operations as described below.

#### • Fair value hedge

For a qualifying fair value hedge, the changes in the fair value of the hedging instruments are recorded in the income statement, together with any changes in the fair value of the hedged item attributable to the hedged risk. If the hedge no longer meets the criteria for hedge accounting, the adjustment on the hedged item is amortised using the effective interest method to the income statement over its remaining maturity.

However, where the hedged item is an equity instrument classified as FVOCI, changes in the fair value of the hedging instrument and the hedged item are both recorded in other comprehensive income and accumulated in FVOCI revaluation reserves. The amounts recorded in FVOCI revaluation reserves are not subsequently reclassified to the income statement.

#### • Cash flow hedge

For qualifying cash flow hedges, the effective portion of changes in the fair value of derivatives is recognised in other comprehensive income and accumulated under the cash flow hedge reserves in equity. This amount is reclassified to the income statement in the periods when the hedged forecast cash flows affect the income statement. The ineffective portion of the gain or loss is recognised immediately in the income statement under “Net trading income”.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in the cash flow hedge reserves remains until the forecast transaction is recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss in the cash flow hedge reserves is immediately reclassified from equity to the income statement.

#### • Net investment hedge

Hedges of net investments in the Group’s foreign operations are accounted for in a manner similar to cash flow hedges.

On disposal of the foreign operations, the cumulative gain or loss in the foreign currency translation reserves is reclassified to the income statement as part of the gain or loss on disposal.

When designating the hedging instrument, the Group may elect to exclude the valuation components of currency basis spreads and forward points from the hedge relationship on a hedge-by-hedge basis.

The forward points and currency basis spreads which are excluded and recorded in other comprehensive income are:

- reclassified to the income statement when the forecast transaction occurs; or
- amortised to the income statement over the hedging tenor for time-period hedges. The amounts recorded in other comprehensive income are not subsequently reclassified to the income statement for hedges of FVOCI equities.

The Group has elected to apply the SFRS(I) 9 hedge accounting rules in full.

Please refer to Note 38 for further details relating to hedge accounting, including fair value, cash flow and net investment hedges.

## 2.20 Employee benefits

Employee benefits, which include base pay, cash bonuses, share-based compensation, contribution to defined contribution plans such as the Central Provident Fund and other staff-related allowances, are recognised in the income statement when incurred.

For defined contribution plans, contributions are made to publicly or privately administered funds on a mandatory, contractual or voluntary basis. Once the contributions have been paid, the Group has no further payment obligations.

Employee entitlement to annual leave is recognised when they accrue to employees. A provision is made for the estimated liability for annual unutilised leave as a result of services rendered by employees up to the balance sheet date.

## 2.21 Share-based compensation

Employee benefits also include share-based compensation, namely the DBSH Share Plan, the DBSH Employee Share Plan and the DBSH Employee Share Purchase Plan (the Plans). The details of the Plans are described in Note 39.

Equity instruments granted and ultimately vested under the Plans are recognised in the income statement based on the fair value of the equity instruments at the date of grant. The expense is amortised over the vesting period of each award, with a corresponding adjustment to the share plan reserves.

A trust has been set up for the DBSH Employee Share Purchase Plan. The employer’s share of the trust fund is consolidated. The unvested DBSH shares held by the trust funds are accounted for as treasury shares, which is presented as a deduction within equity.

## 2.22 Current and deferred taxes

Current income tax for current and prior periods is recognised as the amount expected to be paid or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. The Group considers uncertain tax positions generally at the level of the total tax liability to each tax authority for each period. The liability is determined based on the total amount of current tax expected to be paid, taking into account all tax uncertainties, using either an expected value approach or a single best estimate of the most likely outcome.

Tax assets and liabilities of the same type (current or deferred) are offset when a legal right of offset exists and settlement in this manner is intended. This applies generally when they arise from the same tax reporting group and relate to the same tax authority.

Deferred income tax is provided on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that, at the time of the transaction, affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted by the balance sheet date.

The amount of deferred tax assets recognised takes into account the likelihood the amount that can be used to offset payable taxes on future profits.

Deferred tax related to fair value re-measurement of FVOCI investments is recognised in other comprehensive income and accumulated in the FVOCI revaluation reserves.

## 3. Critical Accounting Estimates

The Group's accounting policies and use of estimates are integral to the reported amounts in the financial statements. Certain accounting estimates require management's judgement in determining the appropriate methodology for valuation of assets and liabilities. Procedures are in place to ensure that methodologies are reviewed and revised as appropriate. The Group believes its estimates for determining the valuation of its assets and liabilities are appropriate.

The following is a brief description of the Group's critical accounting estimates that involve management's valuation judgement.

### 3.1 Impairment of financial assets

It is the Group's policy to recognise, through charges against profit, allowances in respect of estimated and inherent credit losses in its portfolio as described in Note 2.11.

ECLs are unbiased and probability-weighted estimates of credit losses determined by evaluating a range of possible outcomes, considering past events, current conditions and assessments of future economic conditions at the reporting date. This will necessarily involve the use of judgement.

Please refer to Risk Management section for a further description of the Group's credit risk management framework, policies and procedures.

### 3.2 Fair value of financial instruments

The majority of the Group's financial instruments reported at fair value are based on quoted and observable market prices or on internally developed models that are based on independently sourced or verified market parameters.

The fair value of financial instruments without an observable market price in an active market may be determined using valuation models. The choice of model requires significant judgement for complex products especially those in the "Treasury Markets" segment.

Policies and procedures have been established to facilitate the exercise of judgement in determining the risk characteristics of various financial instruments, discount rates, estimates of future cash flows and other factors used in the valuation process.

Please refer to Note 41 for further details on fair valuation and fair value hierarchy of the Group's financial instruments measured at fair value.

### 3.3 Goodwill impairment

The Group performs an impairment review to ensure that the carrying amount of a CGU to which goodwill is allocated does not exceed the recoverable amount of the CGU. Note 27 provides details of goodwill at the reporting date.

The recoverable amount represents the present value of the estimated future cash flows expected to arise from continuing operations. Therefore, in arriving at the recoverable amount, management exercises judgement in estimating the future cash flows, growth rate and discount rate.

### 3.4 Income taxes

The Group has exposure to income taxes in several jurisdictions. The Group recognises liabilities for expected tax issues based on reasonable estimate of whether additional tax will be due. Where uncertainty exists around the Group's tax position, appropriate provisions are provided based on the technical assessment of the cases. Where the final tax outcome of these positions is different from the provision provided, the differences will impact the income tax and deferred tax balances in the period in which the final tax is determined. Note 21 provides details of the Group's deferred tax assets/ liabilities.

## 4. Net Interest Income

In \$ millions	The Group	
	2023	2022
Cash and balances with central banks and Due from banks	3,019	1,255
Customer non-trade loans	17,291	10,268
Trade assets	2,459	1,317
Securities and others	5,093	3,087
Total interest income	27,862	15,927
Deposits and balances from customers	10,833	3,541
Other borrowings	3,387	1,445
Total interest expense	14,220	4,986
Net interest income	13,642	10,941
Comprising:		
Interest income from financial assets at FVPL	1,040	629
Interest income from financial assets at FVOCI	1,794	888
Interest income from financial assets at amortised cost	25,028	14,410
Interest expense from financial liabilities at FVPL	(588)	(206)
Interest expense from financial liabilities not at FVPL <sup>(a)</sup>	(13,632)	(4,780)
Total	13,642	10,941

(a) Includes interest expense of \$19 million (2022: \$21 million) on lease liabilities

## 5. Net Fee and Commission Income

In \$ millions	The Group	
	2023	2022
Investment banking	125	121
Transaction services <sup>(a)</sup>	896	929
Loan-related	554	459
Cards <sup>(b)</sup>	1,052	858
Wealth management	1,504	1,330
Fee and commission income	4,131	3,697
Less: fee and commission expense	765	606
Net fee and commission income <sup>(c)(d)</sup>	3,366	3,091

(a) Includes trade & remittances, guarantees and deposit-related fees

(b) Card fees are net of interchange fees paid

(c) 2023 includes one-time accounting harmonisation impact from the integration of Citigroup Inc's consumer banking business in Taiwan (Citi Taiwan) of \$18 million

(d) Includes net fee and commission income of \$170 million (2022: \$152 million), which was derived from the provision of trust and other fiduciary services during the year. Net fee and commission income earned from financial assets or liabilities not at fair value through profit or loss was \$1,100 million (2022: \$975 million) during the year

## 6. Net Trading Income

In \$ millions	The Group	
	2023	2022
Net trading income <sup>(a)(b)</sup>	4,127	1,852
Net loss from financial assets designated at fair value	(6)	(17)
Net (loss)/ gain from financial liabilities designated at fair value	(1,255)	478
Total	2,866	2,313

(a) Includes income from assets that are mandatorily classified at FVPL

(b) Includes dividend income of \$328 million (2022: \$366 million)

## 7. Net Income from Investment Securities

In \$ millions	The Group	
	2023	2022
Debt securities		
– FVOCI	89	(46)
– Amortised cost	(21)	#
Equity securities at FVOCI <sup>(a)</sup>	149	161
Total	217	115

# Amount under \$500,000

(a) Dividend income

## 8. Other Income

In \$ millions	The Group	
	2023	2022
Net gain on disposal of properties and other fixed assets	2	3
Others <sup>(a)</sup>	69	39
Total	71	42

(a) Includes net gains and losses from sale of loans carried at amortised cost and rental income from operating leases

## 9. Employee Benefits

In \$ millions	The Group	
	2023	2022
Salaries and bonuses	4,141	3,661
Contributions to defined contribution plans	241	208
Share-based expenses <sup>(a)</sup>	175	126
Others	496	381
Total <sup>(b)</sup>	5,053	4,376

(a) Excludes share-based expenses of \$3 million (2022: \$8 million) relating to sales incentive plan and non-executive Directors' remuneration which are reflected under other expenses. The 2023 share-based expenses included a \$28 million impact arising from the change in vesting schedule and retention awards for shares granted in February 2023 in respect of performance year 2022 (refer to Note 39 for more details). The share grant in respect of the performance year 2023, which will be granted in February 2024, will be recognised as an expense over its vesting period from 2024 to 2027

(b) 2023 includes one-time Citi Taiwan integration expenses of \$17 million. It also includes staff expenses arising from the consolidation of Citi Taiwan with effect from 12 August 2023 of \$81 million

## 10. Other Expenses

In \$ millions	The Group	
	2023	2022
Computerisation expenses <sup>(a)</sup>	1,293	1,200
Occupancy expenses <sup>(b)</sup>	432	396
Revenue-related expenses	446	352
Others <sup>(c)</sup>	1,067	766
Total <sup>(d)</sup>	3,238	2,714

- (a) Includes hire, depreciation and maintenance costs of computer hardware and software
- (b) Includes depreciation of leased office and branch premises of \$205 million (2022: \$204 million) and amounts incurred in the maintenance of buildings
- (c) Includes office administration expenses (e.g. printing, stationery, telecommunications, etc.), and legal and professional fees
- (d) 2023 includes one-time Citi Taiwan integration expenses of \$118 million and Corporate Social Responsibility commitment of \$100 million (Note 46.2). It also includes other expenses arising from the consolidation of Citi Taiwan with effect from 12 August 2023 of \$65 million

In \$ millions	The Group	
	2023	2022
Depreciation expenses		
– owned properties and other fixed assets	512	477
– leased properties and other fixed assets	225	224
Hire and maintenance costs of fixed assets, including building-related expenses	476	379
Audit fees <sup>(a)</sup> payable to external auditors <sup>(b)</sup> :		
– Auditors of the Company	5	5
– Associated firms of auditors of the Company	6	5
Non-audit fees payable to external auditors <sup>(b)</sup> :		
– Auditors of the Company	#	#
– Associated firms of auditors of the Company	1	1

- # Amount under \$500,000
- (a) Includes audit related assurance fees
- (b) PricewaterhouseCoopers network firms

## 11. Allowances for Credit and Other Losses

In \$ millions	The Group	
	2023	2022
<b>Specific allowances<sup>(a)</sup></b>		
Loans and advances to customers	466	323
Investment securities (amortised cost)	26	5
Off-balance sheet credit exposures	3	(2)
Others <sup>(b)</sup>	17	9
<b>General allowances<sup>(c)</sup></b>	78	(98)
Total	590	237

- (a) Includes Stage 3 ECL
- (b) Includes allowances for non-credit exposures (2023: write-back of \$1 million; 2022: charge of \$3 million)
- (c) Refers to Stage 1 and 2 ECL

The following tables outline the changes in ECL under SFRS(I) 9 in 2023 and 2022 which are attributable to the following factors:

- Transfers between stages.
- Net portfolio changes, which are determined on an obligor basis i.e. originations with new obligors net of derecognitions of former obligors.
- Remeasurements, which include the impact of changes in model inputs or assumptions, partial repayments, additional drawdowns on existing facilities and changes in ECL following a transfer between stages.

In \$ millions	The Group			Total

Of which (in percentage terms):			
CRR 1 – 6B	0.01% - 0.99%	90%	43%
CRR 7A – 7B	1.26% - 2.30%	6%	21%
CRR 8A – 9	2.57% - 28.83%	2%	36%
Others (not rated)	NA	2%	0%
<b>Total</b>		<b>100%</b>	<b>100%</b>

(a) Basel 12-month PDs are transformed to Point-in-Time and forward-looking PDs. Stage 2 ECLs are also measured on lifetime basis

#### Sensitivity of ECL

The Group assessed ECL sensitivity for the wholesale and retail portfolios to changes in the allocation of exposures between Stages 1 and 2. ECL is estimated to reduce by \$663 million (2022: \$804 million) should all the exposures in Stage 2 return to Stage 1 and were assigned a lower 12-month ECL instead of lifetime ECL. The impact also reflects the higher PDs ascribed to Stage 2 exposures in addition to the recognition of lifetime instead of 12-month ECL.

As ECL estimation relies on multiple variables, no single analysis can fully demonstrate the sensitivity of the ECL to changes in macroeconomic variables.

## 12. Income Tax Expense

In \$ millions	The Group	
	2023	2022
Current tax expense		
– Current year	1,524	1,284
– Prior years' provision	(136)	(75)
Deferred tax expense		
– Origination of temporary differences	24	8
– Prior years' provision	11	(29)
Total	1,423	1,188

The deferred tax expense/ (credit) in the income statement comprises the following temporary differences:

In \$ millions	The Group	
	2023	2022
Tax depreciation	(21)	(46)
Allowances for credit and other losses	27	52
Other temporary differences	29	(27)
Deferred tax (credit)/ expense charged to income statement	35	(21)

The tax on the Group's profit before tax differs from the theoretical amount computed using the Singapore basic tax rate due to:

In \$ millions	The Group	
	2023	2022
Profit before tax	11,486	9,382
Tax calculated at a tax rate of 17% (2022: 17%)	1,953	1,595
Effect of different tax rates in other countries	66	21
Net income not subject to tax	(83)	(28)
Net income taxed at concessionary rate	(524)	(403)
Expenses not deductible for tax	36	26
Others	(25)	(23)
Income tax expense charged to income statement	1,423	1,188

Deferred income tax relating to FVOCI financial assets and cash flow hedges of \$143 million was debited (2022: \$333 million credited) and own credit risk of \$5 million was credited (2022: \$6 million debited) directly to equity.

Please refer to Note 21 for further information on deferred tax assets/ liabilities and International Tax Reform - Pillar Two Model Rules (GloBE).

## 13. Earnings Per Ordinary Share

(a) Includes associates and joint ventures, goodwill and intangible assets, properties and other fixed assets, and deferred tax assets

(b) Includes current tax liabilities and deferred tax liabilities

(c) Includes assets and liabilities that are held for trading and debt-type financial assets that are not SPPI in nature

(d) Relates to derivatives that are designated for hedge accounting

Financial assets and liabilities are presented net when there is a legally enforceable right to offset the recognised amounts, and there is intention to settle them on a net basis or to realise the asset and settle the liability simultaneously.

### Financial assets and liabilities offset on the balance sheet

In late 2022, the Group obtained direct clearing membership with a central counterparty clearing house. As the Group has a legally enforceable right to set off directly cleared assets and liabilities under all circumstances (including default/ insolvency of the Group and the clearing house) and intends to settle net cashflows including variation margins with the clearing house, \$15,897 million (2022: Nil) of derivative assets were offset against \$15,526 million (2022: Nil) of derivative liabilities and \$371 million (2022: Nil) of cash collateral recorded in other assets/ liabilities.

### Financial assets and liabilities subject to netting agreements but not offset on the balance sheet

The Group enters into master netting arrangements with counterparties where it is appropriate and feasible to do so to mitigate counterparty risk. The credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are settled on a net basis. Master netting arrangements do not result in an offset of financial assets and liabilities on the balance sheet, as the legal right to offset the transactions is conditional upon default.

These agreements include derivative master agreements (including the International Swaps and Derivatives Association (ISDA) Master Agreement), global master repurchase agreements and global securities lending agreements. The collaterals received and pledged under these agreements are generally conducted under terms that are in accordance with normal market practice. The agreements may allow rehypothecation of collateral received and there may be ongoing margin requirements to mitigate counterparty risk.

The disclosures set out in the tables below pertain to financial assets and liabilities that are not offset in the Group's balance sheet but are subject to master netting arrangements or similar agreements that cover similar financial instruments. The disclosures enable the understanding of both the gross and net amounts, as well as provide additional information on how such credit risk is mitigated.

Gross loans	422,152	420,284

(a) Balances refer to ECL under SFRS(I) 9 (Specific allowances: Stage 3 ECL; General allowances: Stage 1 and Stage 2 ECL)

Please refer to Note 42.4 for a breakdown of loans and advances to customers by geography and by industry.

## 19. Financial Assets Pledged or Transferred

The Group pledges or transfers financial assets to third parties in the ordinary course of business. Transferred assets continue to be recognised in the Group's financial statements when the Group retains substantially all their risks and rewards.

The financial assets pledged as collateral are mainly for repurchase, securities lending and collateral swap agreements, derivative transactions under credit support agreements and in connection with the Group's covered bond program and secured note issuances.

### Repurchase, securities lending and collateral swap agreement

Securities transferred under repurchase, securities lending and collateral swap arrangements are generally conducted under terms in line with normal market practice. The counterparty is typically allowed to sell or re-pledge the securities but has an obligation to return them at maturity. If the securities decrease in value, the Group may, in certain circumstances, be required to place additional collateral.

For repurchase agreements, the securities pledged or transferred continue to be recorded on the balance sheet while cash received in exchange is recorded as a financial liability. The Group also pledges assets to secure its short position in securities and to facilitate settlement operations. The fair value of the associated liabilities approximates their carrying amount of \$9,321 million (2022: \$9,020 million), which are recorded under "Due to banks", "Deposits and balances from customers" and "Other liabilities" on the balance sheet.

For securities lending and collateral swap transactions, the securities lent continue to be recorded on the balance sheet. As the Group mainly receives other financial assets in exchange, the associated liabilities are not recorded on the balance sheet.

## Derivatives

In addition, the Group pledges securities for derivative transactions under credit support agreements. These assets continue to be recorded on the balance sheet. As the related derivative assets and liabilities are managed on a portfolio basis, there is no direct relationship between the securities pledged and the associated liabilities. As such, the associated liabilities are not disclosed.

### Covered bonds and secured notes

Pursuant to the Bank's Global Covered Bond Programme, selected pools of residential mortgages originated by the Bank have been assigned to a bankruptcy-remote structured entity, Bayfront Covered Bonds Pte. Ltd. (see Notes 22.2 and 30.4). These residential mortgages continue to be recognised on the Bank's balance sheet as the Bank remains exposed to the risks and rewards associated with them.

Pursuant to secured notes issued by the Bank, selected loan assets have been assigned as security (see Note 30.4). The Group remains the legal and beneficial owner of the loan assets and the loan assets continue to be recognised on the Group's balance sheet.

As at 31 December 2023, the carrying value of the covered bonds and secured notes in issue was \$13,166 million (2022: \$7,575 million), while the carrying value of assets assigned was \$25,560 million (2022: \$16,740 million). The difference in values is attributable to an intended over-collateralisation required to maintain the credit ratings of the covered bonds in issue, and additional assets assigned to facilitate future issuances.

The table below presents the assets pledged as collateral under the aforementioned transactions.

In \$ millions	The Group	
	2023	2022
Singapore government securities and treasury bills	2,147	2,773
Other government securities and treasury bills	6,179	7,339
Bank and corporate debt securities	3,767	2,641
Equity securities	1,135	1,232
Certificates of deposit	507	504
Cash collateral pledged (Note 20)	5,208	6,201
Loans and advances to customers <sup>(a)</sup>	25,560	16,740
Total	44,503	37,430

(a) Refers to the loans pledged under covered bond program and secured notes issuances and reflect the intended over-collateralisation

There were no derecognised assets that were subject to the Group's partial continuing involvement as at 31 December 2023 and 31 December 2022.

## 20. Other Assets

In \$ millions	The Group	
	2023	2022
Accrued interest receivable	3,104	2,346
Deposits and prepayments	1,203	711
Receivables from securities business	559	358
Sundry debtors and others	7,131	7,800
Cash collateral pledged <sup>(a)</sup>	5,208	6,201
Deferred tax assets (Note 21)	770	887
Total <sup>(b)</sup>	17,975	18,303

(a) Mainly relates to cash collateral pledged in respect of derivative portfolios

(b) Balances are net of specific and general allowances

## 21. Deferred Tax Assets/ Liabilities

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred income taxes relate to the same tax authority. The deferred tax assets and liabilities are determined after appropriate offsetting, as shown in "Other assets" (Note 20) and "Other liabilities" (Note 29) respectively.

Deferred tax assets and liabilities comprise the following temporary differences:

In \$ millions	The Group	
	2023	2022
<b>Deferred income tax assets</b>		
Allowances for credit and other losses	347	368
FVOCI financial assets	84	143

Total	108	56
<b>Net deferred tax assets</b>	<b>662</b>	<b>831</b>

### 21.1 International Tax Reform – Pillar Two Model Rules (GloBE)

The Group is within the scope of the OECD/ G20 Inclusive Framework on Base Erosion and Profit Shifting Pillar Two Global Anti-Base Erosion (GloBE) model rules. In the Singapore 2023 Budget Statement, the Singapore government announced plans to implement the GloBE rules as well as a domestic top-up tax (DTT) beginning on or after 1 January 2025. Since the Pillar Two legislation has not been enacted in Singapore, the jurisdiction in which DBS Group Holdings Ltd is incorporated, and is thus not effective at the reporting date, the Group has no related current tax exposure. The Group has applied the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes, as provided in the amendments to SFRS(I) 1-12 *International Tax Reform—Pillar Two Model Rules* issued in May 2023.

Under the GloBE model rules, the GloBE effective tax rate (ETR) is assessed on a jurisdictional basis and top up tax is payable if the jurisdictional ETR is below 15%. The GloBE ETR is not exactly the same as accounting ETR. However, if the accounting ETR were to be used to assess the potential GloBE implications, DBS entities in most jurisdictions are operating with an average accounting ETR that exceeds 15%, except for Singapore, Macau, Malaysia and United Arab Emirates (UAE). Please refer to the geographical segment information in Note 45.2 for details on Singapore's accounting profits and tax expenses. As of the issuance date of these financial statements, Singapore has not announced when and how the GloBE rules will be enacted. Consequently, it is not presently feasible to reasonably estimate the quantitative impact of this legislation. The Group is actively engaged in evaluating its potential exposure to these forthcoming regulations. The impact of Pillar Two for Macau, Malaysia and UAE is expected to be immaterial.

Japan, South Korea, United Kingdom and Vietnam have respectively either announced draft legislations or enacted legislations to implement Pillar Two in 2024. The average accounting ETRs of the DBS entities operating in these jurisdictions are above 15%, without considering the various elections available and adjustments required under the GloBE model rules. While the exact quantitative impact cannot be reasonably estimated as yet due to the complexities in applying the legislations, the impact of Pillar Two is expected to be immaterial.

## 22. Subsidiaries and Consolidated Structured Entities

In \$ millions	The Company	
	2023	2022

DBS Digital Exchange Pte. Ltd. <sup>(a)</sup>	Singapore	92	90	90
DBS Securities (China) Co. Ltd*	China	51	51	51

\* Audited by PricewaterhouseCoopers network firms outside Singapore

(a) Subsidiary held by DBS Finnovation Pte. Ltd., an investment holding company under DBS Bank Ltd.

The Group's main subsidiaries are regulated banks and non-bank financial institutions. Statutory, contractual or regulatory requirements as well as protective rights of non-controlling interests may restrict the ability of the Company to access and transfer assets freely to or from other entities within the Group and to settle liabilities of the Group. Since the Group did not have any material non-controlling interests as at the balance sheet dates, any protective rights associated with these did not give rise to significant restrictions in 2022 and 2023.

### 22.2 Consolidated Structured Entity

The structured entity consolidated by the Group is listed below.

Name of entity	Purpose of consolidated structured entity	Incorporated in
Bayfront Covered Bonds Pte. Ltd.	Covered bond guarantor	Singapore

Bayfront Covered Bonds Pte. Ltd. is a bankruptcy-remote structured entity established in conjunction with the Bank's USD 20 billion Global Covered Bond Programme (see Note 30.4). As part of the contractual structures that are integral to this programme, the Bank provides funding and hedging facilities to it.

## 23. Associates and Joint Ventures

In \$ millions	The Group	
	2023	2022
Unquoted equity securities	2,157	2,055
Share of post-acquisition reserves	330	225
Total	2,487	2,280

As of 31 December 2023 and 31 December 2022, no associate and joint venture was individually material to the Group.

As a non-controlling shareholder, the Group's ability to receive dividends is subject to agreement with other shareholders. The associates and joint ventures may also be subject to statutory, contractual or regulatory requirements restricting dividend payments or to repay loans or advances made.

Aggregate information about the Group's share of investments in associates and joint ventures that were not individually material is as follows:

In \$ millions	The Group	
	2023	2022
Profit for the financial year	214	207
Other comprehensive income	(1)	8
Total comprehensive income	213	215

The Group's share of off-balance sheet items of the associates and joint ventures at 31 December are as follows:

In \$ millions	The Group	
	2023	2022
<b>Off-balance sheet</b>		
Share of contingent liabilities and commitments	4,067	3,737

### 23.1 Main associates

The main associates of the Group are listed below.

Name of associate	Incorporated in	The Group	
		2023	2022
<b>Unquoted</b>			
Central Boulevard Development Pte Ltd*	Singapore	33.3	33.3
Shenzhen Rural Commercial Bank Corporation Limited* <sup>(a)(b)</sup>	China	13.0	13.0

\* Audited by other auditors

(a) The Group is able to exercise significant influence over the financial and operating policy decision through board representation

(b) On 29 December 2023, the Group announced that it has obtained the requisite regulatory approvals to increase the Bank's existing stake in Shenzhen Rural Commercial Bank Corporation Limited (SRCB) from 13% to 16.69%. The transaction was completed in January 2024. Please refer to Note 46.3 for details

## 24. Unconsolidated Structured Entities

"Unconsolidated structured entities" are structured entities, as defined by SFRS(I) 12, that are not controlled by the Group. In the normal course of business, the Group enters into transactions with these structured entities to facilitate customer transactions and for specific investment opportunities.

While the economic exposures may be the same as those to other types of entities, SFRS(I) 12 specifically requires companies to disclose such exposures arising from transactions with unconsolidated structured entities. The table below reflects exposures to third party securitisation structures where the Group holds an interest in the normal course of business.

As is the case with other types of counterparties, the carrying amount from transactions with unconsolidated structured entities have been included in the Group's financial statements.

The risks arising from such transactions are subject to the Group's risk management practices.

The table below represents the Group's maximum exposure to loss which for on-balance sheet assets and liabilities is represented by the carrying amount, and does not reflect mitigating effects from the availability of netting arrangements and financial instruments that the Group may utilise to manage the risks inherent in third party structured entities, or risk-reducing effects of collateral or other credit enhancements.

In \$ millions	The Group	
	2023	2022
Derivatives	84	25
Corporate securities	5,204	4,017
Other assets	7	3
Total assets	5,295	4,045
Commitments	617	799
Maximum exposure to loss	5,912	4,844
Derivatives	154	244
Total liabilities	154	244

SFRS(I) 12 also requires additional disclosures where the Group acts as a sponsor to unconsolidated structured entities. The Group is deemed a sponsor of a structured entity if it plays a key role in establishing the entity, and has an on-going involvement with the structured entity or if the Group's name appears in the structured entity's name.

There are certain investment funds where the Group is the fund manager and the investors have no or limited removal rights over the fund manager. These funds are primarily subscribed by the investors. As of 31 December 2023, the Group did not hold any investment in these investment funds. The table below summarises the Group's involvement in the funds.

In \$ millions	The Group	
	2023	2022
Total assets of the sponsored structured entities	613	476
Fee income earned from the sponsored structured entities	6	8

## 25. Acquisition

### Consumer banking business of Citigroup Inc in Taiwan ("Citi Taiwan")

In August 2023, the Group completed the acquisition of the consumer banking business of Citigroup Inc in Taiwan ("Citi Taiwan") via a transfer of assets and liabilities. With the acquisition of Citi Taiwan, DBS Taiwan has become Taiwan's largest foreign bank by assets and will have clear market leadership in loans, deposits, cards and investments among foreign players in the market. The acquisition is in line with the Group's strategy to scale up its investment and accelerates its expansion in Taiwan.

The Group has paid a cash consideration of \$936 million for the assets acquired (comprising mainly foreign currency cash accounts and loans and advances) of \$12.6 billion and the liabilities assumed (comprising mainly deposits and balances with customers and pension liabilities) of \$12.4 billion.

The provisional goodwill and intangible assets arising from the acquisition were \$763 million (TWD 17.8 billion) and \$232 million respectively as of 31 December 2023. Intangible assets mainly relate to customer relationships and core deposits.

The contribution to the Group's net profit from the consolidation of the acquired Citi Taiwan from 12 August 2023 to 31 December 2023 was not material.

Integration costs of \$135 million were included in the Group's expenses for the year ended 31 December 2023 in the audited consolidated income statement.

## 26. Properties and Other Fixed Assets

In \$ millions	The Group	
	2023	2022
<b>Owned properties and other fixed assets</b>		
Investment properties	37	39
Owner-occupied properties	576	398
Software <sup>(a)</sup>	1,310	1,181
Other fixed assets	430	367
Sub-total	2,353	1,985
<b>Right-of-use assets</b>		
Properties	1,249	1,155
Other fixed assets	87	98
Sub-total	1,336	1,253
Total	3,689	3,238

(a) During the year, the additions to software were \$478 million (2022: \$491 million), disposals/ write-offs were \$19 million (2022: \$51 million) and depreciation expenses were \$330 million (2022: \$300 million)

## 27. Goodwill and Intangible Assets

The carrying amounts of the Group's goodwill and intangible assets arising from business acquisitions are as follows:

In \$ millions	The Group	
	2023	2022
<b>Goodwill</b>		
DBS Bank (Hong Kong) Limited	4,631	4,631
DBS Taiwan consumer banking business <sup>(a)</sup>	763	–
Others	687	709
Sub-total	6,081	5,340
<b>Intangible assets</b>		
Customer relationships and core deposits <sup>(b)</sup>	232	–
Total Goodwill and intangible assets	6,313	5,340

(a) Goodwill from acquisition of Citi Taiwan has been recognised on a provisional basis. Refer to Note 25 for further details

(b) Intangible assets from acquisition of Citi Taiwan

Goodwill is reviewed on an annual basis or when indicators of impairment exist.

The more material goodwill at the Group relates to DBS Bank (Hong Kong) Limited's franchise and DBS Taiwan Consumer Banking Business. The recoverable value of the franchise is determined based on a value-in-use calculation. The CGU's five-year projected free cash flows, after taking into account the maintenance of capital adequacy requirements at target levels, are discounted by its cost of capital to derive its present value. To derive the value beyond the fifth year, a long-term growth rate is imputed to the fifth-year cash flow and then discounted by the cost of capital to derive the terminal value. The long-term growth rate used does not exceed the historical long-term growth rate of the market the CGU operates in. The recoverable value is the sum of the present value of the five-year cash flows and the terminal value.

A growth rate of 3.5% (2022: 3.5%) and discount rate of 9.0% (2022: 9.0%) were assumed in the value-in-use calculation for DBS Bank (Hong Kong) Limited's franchise.

The process of evaluating goodwill impairment involves management judgement and prudent estimates of various factors including future cash flows as well as the cost of capital and long-term growth rates. The results can be highly sensitive to the assumptions used. Key assumptions used to determine the recoverable amounts of the CGU, including growth rate and discount rate, are tested for sensitivity by applying a reasonably possible change to those assumptions. The reasonably possible changes in key assumptions did not result in an impairment of goodwill as at 31 December 2023.

USD		1.492% to 2.3%, payable semi-annually	256	385	-	-
Total			9,541	6,592	4,716	3,472

The outstanding senior medium term notes as at 31 December 2023 were issued between 24 January 2019 and 12 September 2023 (2022: 24 January 2019 and 22 November 2022) and mature between 19 January 2024 and 15 March 2027 (2022: 3 March 2023 and 15 March 2027).

**30.3** The commercial papers were issued by the Bank under its USD 5 billion Euro Commercial Paper Programme and USD 20 billion US Commercial Paper Programme and by the Company under its USD 5 billion US Commercial Paper Programme. These are mainly zero-coupon papers. The outstanding notes as at 31 December 2023 were issued between 28 July 2023 and 27 November 2023 (2022: 7 July 2022 and 31 December 2022) and mature between 3 January 2024 and 30 May 2024 (2022: 3 January 2023 and 30 June 2023).

**30.4** The covered bonds were issued by the Bank under its USD 20 billion Global Covered Bond Programme. A covered bond is a senior obligation of the Bank backed by a cover pool comprising assets that have been ring-fenced via contractual structures in a bankruptcy-remote structured entity, Bayfront Covered Bonds Pte. Ltd. Bayfront Covered Bonds Pte. Ltd. provides an unconditional and irrevocable guarantee, which is secured by the cover pool, to the covered bond holders. Please refer to Note 19 for further details on the covered bonds.

The outstanding covered bonds of \$12,127 million as at 31 December 2023 (2022: \$7,575 million) were issued between 23 January 2017 and 17 November 2023 (2022: 23 January 2017 and 12 December 2022) and mature between 23 January 2024 and 16 August 2027 (2022: 23 January 2024 and 17 March 2027).

The Bank also issued secured notes. These notes are senior obligations of the Bank backed by a pool of assets. The outstanding notes of \$1,039 million as at 31 December 2023 (2022: Nil) were issued between 20 January 2023 and 28 March 2023 and mature on 17 January 2025. Please refer to Note 19 for further details on the secured notes.

**30.5** Other debt securities issued and outstanding as at 31 December are as follows:

In \$ millions	The Group	
	2023	2022
<b>Issued by the Bank and other subsidiaries</b>		
Equity linked notes	3,035	1,740
Credit linked notes	4,342	3,832
Interest linked notes	7,976	2,364
Others	437	122
Total	15,790	8,058

The outstanding securities (excluding perpetual securities) as at 31 December 2023 were issued between 12 March 2013 and 31 December 2023 (2022: 12 March 2013 and 31 December 2022) and mature between 2 January 2024 and 22 February 2062 (2022: 3 January 2023 and 22 February 2062).

**31. Subordinated Term Debts**

The following subordinated term debts issued by the Company are classified as liabilities. These term debt instruments have a junior or lower priority claim on the issuing entity's assets in the event of a default or liquidation.

The subordinated term debts issued by the Company include contractual provisions for them to be written-off if and when the Monetary Authority of Singapore (MAS) notifies the Company that a write-off of the instruments, or a public sector injection of capital (or equivalent support), is necessary, without which the Company or the Group would become non-viable, as determined by the MAS. These instruments qualify as Tier 2 capital under the "Notice to Designated Financial Holding Companies on Risk Based Capital Adequacy Requirements" (MAS Notice FHC-N637).

## 33. Other Equity Instruments

The following perpetual capital securities issued by the Company are classified as other equity instruments. These instruments are subordinated to all liabilities of the Company and senior only to ordinary shareholders of the Company.

These instruments include contractual provisions for them to be written-off if and when the MAS notifies the Company that a write-off of the instruments, or a public sector injection of capital (or equivalent support), is necessary, without which the Company or the Group would become non-viable, as determined by the MAS. These instruments qualify as Additional Tier 1 capital under MAS Notice FHC-N637.

In \$ millions	Note	Issue Date	Distribution Payment	The Group and The Company	
				2023	2022
<b>Issued by the Group and the Company</b>					
SGD 1,000m 3.98% Non-Cumulative, Non-Convertible Perpetual Capital Securities First Callable in 2025	33.1	12 Sep 2018	Mar/ Sep	<b>1,000</b>	1,000

Interim dividends on ordinary shares of \$1.38 paid for the current financial year (2022: \$1.08 one-tier tax-exempt)	3,557	2,778
Dividends on other equity instruments	84	85
Total dividends paid	6,013	3,789
Balance at 31 December	48,092	44,347

As at 31 December 2023, revenue reserves include statutory reserves maintained in accordance with the applicable laws and regulations of \$633 million (2022: \$575 million). There was no regulatory loss allowance reserve as at 31 December 2023 and 31 December 2022.

### 34.3 Proposed dividends

Proposed final one-tier tax-exempt dividends on ordinary shares of \$0.54 per share have not been accounted for in the financial statements for the year ended 31 December 2023. This is to be approved at the Annual General Meeting on 28 March 2024.

## 35. Contingent Liabilities and Commitments

The Group issues guarantees, performance bonds and indemnities in the ordinary course of business. The majority of these facilities are offset by corresponding obligations of its customers.

**Guarantees and performance bonds** are generally written by the Group to support the performance of a customer to third parties. As the Group will only be required to meet these obligations in the event of the customer's default, the cash requirements of these instruments are expected to be considerably below their contractual nominal amount.

In \$ millions	The Group	
	2023	2022
Guarantees on account of customers	23,048	21,006
Letters of credit and other obligations on account of customers	15,571	16,663

## 36. Financial Derivatives

### 36.1 Trading derivatives

Most of the Group's derivatives relate to sales and trading activities. Sales activities include the structuring and marketing of derivatives to customers to enable them to take, transfer, modify or reduce current or expected risks. Trading activities are entered into principally for dealer's margin or for the purpose of generating a profit from short-term fluctuations in price.

Trading includes mainly market-making and warehousing to facilitate customer orders. Market-making involves quoting bid and offer prices to other market participants with the intention of generating revenues based on spread and volume. Warehousing involves holding on to positions in order to liquidate in an orderly fashion with timing of unwinding determined by market conditions and traders' views of markets as they evolve.

### 36.2 Hedging derivatives

Apart from derivatives which are designated in hedge accounting relationships (Note 38), all other derivatives including those used for risk management purposes are treated in the same way as trading derivatives.

The following table summarises the contractual or underlying principal amounts of derivative financial instruments held or issued for trading and hedging purposes outstanding at balance sheet date. They do not represent amounts at risk.

Derivative financial instruments are revalued on a gross position basis and the unrealised gains or losses are reflected as derivative assets or derivative liabilities. Derivative assets and liabilities arising from different transactions are only offset if the transactions are done with the same counterparty, a legal right of offset exists, and the parties intend to settle the cash flows on a net basis. Refer to Note 14 for details on offsetting between derivative assets and liabilities.

In \$ millions	Underlying notional	The Group			Underlying notional	Assets	Liabilities

### 37. Interest Rate Benchmark Reform

In 2023, the Group has transitioned most of its Interbank Offered Rates (IBOR) contracts that are subject to cessation.

The remaining contracts that require transition relate mainly to Fallback Rate (SOR) and SIBOR (Singapore Interbank Offered Rate). For these rates, the industry has agreed with MAS on the transition approach to SORA (Singapore Overnight Rate Average), including timing and Adjustment Spread. The Group is also engaging its customers to transition out of the contracts referencing Synthetic USD LIBOR (London Interbank Offered Rate).

### 38. Hedge Accounting

The Group enters into hedging transactions to manage exposures to interest rate and foreign currency risks. Hedge accounting is applied to minimise volatility in earnings arising from changes in interest rate and foreign exchange rates.

Please refer to Risk Management section for more information on market risk and the Group's risk management practices and Note 2.19 for the Group's accounting policy for hedge accounting.

#### 38.1 Fair value hedge

In accordance with the risk management strategy in place, the Group enters into interest rate swaps to mitigate the risk of changes in interest rates on the fair value of the following:

- issued fixed rate debt;
- fixed rate bonds;
- fixed rate loans;
- account receivable purchase;
- bond repos; and
- deposits and borrowings.

In such instances, the Group hedges the benchmark interest rate risk component which is an observable and reliably measurable component of interest rate risk. Specifically, the Group has designated fair value hedge relationships, on a hedge-by-hedge basis, to hedge against movements in the benchmark interest rate. This effectively results in the recognition of interest expense (for fixed rate liabilities), or interest income (for fixed rate assets) at floating rates. The Group also uses cross currency swaps when there is a need to hedge both interest rate and foreign exchange risks.

For risks not covered by hedge accounting, the Group manages these in accordance with its risk management strategy.

The Group assesses prospective hedge effectiveness by comparing the changes in fair value of the hedged item resulting from movements in the benchmark interest rate with the changes in fair value of the interest rate swaps used to hedge the exposure. The Group determines the hedge ratio by comparing the notional of the derivative with the principal of the debt issued or the bond asset purchased, or the loan granted.

The Group has identified the following possible sources of ineffectiveness:

- the use of derivatives as a protection against interest rate risk creates an exposure to the derivative counterparty's credit risk which is not offset by the hedged item. This risk is minimised by entering into derivatives with high credit quality counterparties;
- the use of different discounting curves when measuring the fair value of the hedged items and hedging instruments. For derivatives, the discounting curve used depends on collateralisation and the type of collateral used;
- difference in tenor of hedged items and hedging instruments;
- difference in the timing of settlement of hedging instruments and hedged items.
- fixing risk or difference in fixing rate of hedging instruments and implied forward rate on hedged items; and
- difference in hedged rate between hedged item and hedging instrument.

The Group also uses foreign currency denominated borrowings/ deposits to fund its investments in non-SGD denominated FVOCI equity instruments. To reduce the accounting mismatch on the borrowings/ deposits and FVOCI equity instruments because of foreign exchange rate movements, the Group designates the borrowings/ deposits as the hedging instruments in fair value hedges of the FVOCI equity instruments. The hedge ratio is determined by comparing the principal of the borrowings/ deposits with the investment costs of the FVOCI equity instruments. A potential source of ineffectiveness is a decrease in the fair value of the equity instruments below their investment costs.

The following table sets out the maturity profile of the hedging instruments used in fair value hedges. The amounts shown in the table reflect the notional amounts of derivatives and the carrying amounts of borrowings and deposits. Please refer to Note 36 for the carrying values of the derivatives.

In \$ millions	Type of risk hedged	The Group			Total
		Less than 1 year	1 to 5 years	More than 5 years	
<b>2023</b>					
<b>Derivatives (notional)</b>

Currency swaps	Interest rate & Foreign exchange	104	426	–	530
<b>Total derivatives</b>		<b>2,091</b>	<b>11,864</b>	<b>3,058</b>	<b>17,013</b>
Non-derivative instruments (e.g. borrowings, deposits)	Foreign exchange	1,463	–	–	1,463
<b>Total non-derivative instruments</b>		<b>1,463</b>	<b>–</b>	<b>–</b>	<b>1,463</b>

The table below provides information on hedged items relating to fair value hedges.

In \$ millions	The Group			
	2023	2022	2023	2022
	Carrying amounts (including hedge adjustments)	Fair value hedge adjustments included in carrying amounts	Carrying amounts (including hedge adjustments)	Fair value hedge adjustments included in carrying amounts
<b>Assets</b>				
Loans and advances to customers	852	(5)	786	(21)
Due from banks	687	#	–	–
Government securities and treasury bills <sup>(a)</sup>	1,379	(13)	1,204	(17)
Bank and corporate securities <sup>(a)</sup>	5,960	(9)	6,500	(13)
<b>Liabilities</b>				
Due to banks	727	3	–	–
Deposits and balances from customers	55	#	–	–
Subordinated term debts	93	#	426	#
Other debt securities	10,508	(285)	8,451	(500)
#	Amount under \$500,000			
(a)	The carrying amounts of debt and equity instruments at fair value through other comprehensive income do not include fair value hedge adjustments as the hedged assets are measured at fair value. The accounting for the hedge relationship results in a transfer from other comprehensive income to the income statement for debt instruments			

For the year ended 31 December 2023, the net gains on hedging instruments used to calculate hedge effectiveness was \$100 million (2022: net gains of \$121 million). The net losses on hedged items attributable to the hedged risk amounted to \$105 million (2022: net losses of \$118 million).

### 38.2 Cash flow hedge

The Group is predominantly exposed to variability in future cash flows due to interest rate movements and foreign currency fluctuations from the following:

- assets subject to repricing, reinvestment or refinancing risk;
- forecasted interest earnings denominated in foreign currency;
- issued floating or fixed rate foreign currency debt; and
- floating or fixed rate foreign currency bonds.

In accordance with the Group risk management strategy, the Group enters into interest rate swaps, foreign currency forwards and swaps, as well as cross currency swaps to protect against the variability of cash flows due to changes in interest rates and/ or foreign currency exchange rates.

In such instances, cash flow hedge relationships are designated. These are applied on a hedge-by-hedge basis or portfolio basis, for example:

- For cash flows from assets subject to repricing or reinvestment risk, a portfolio cash flow hedge relationship is designated using interest rate swaps. A dynamic process is applied for this hedge as the portfolio composition can change e.g. due to maturities and new originations. The portfolio cash flow hedge relationship effectively extends the duration of the assets, such that the interest cash flows are transformed from a floating rate basis to a fixed rate basis.
- Foreign currency forwards and swaps are used to hedge against variability in future cash flows arising from USD-denominated interest income, and to hedge against foreign exchange movements arising from a portfolio of foreign currency denominated assets and liabilities.
- Cross currency swaps are used to mitigate the risk of fluctuation of coupon and principal cash flows due to changes in foreign currency exchange rates of issued foreign currency debt and foreign currency bonds.
- Bond forwards are used to reduce exposures to foreign currency bonds.

For risks not covered by hedge accounting, the Group manages these in accordance with its risk management strategy.

The Group assesses hedge effectiveness by comparing the changes in fair value of a hypothetical derivative reflecting the terms of the hedged item due to movements in the hedged risk with the changes in fair value of the derivatives used to hedge the exposure.

The Group determines the hedge ratio by comparing the notional of the derivatives with the assets subject to repricing/ reinvestment/ refinancing risk or amount of forecast earnings denominated in foreign currency or the principal of the debt securities issued or purchased foreign currency bonds.

The Group has identified the following possible sources of ineffectiveness in its cash flow hedge relationships:

- the use of derivatives as a protection against currency and interest rate risk creates an exposure to the derivative counterparty's credit risk which is not offset by the hedged item. This risk is minimised by entering into derivatives with high credit quality counterparties;
- difference in tenor of hedged items and hedging instruments;
- difference in timing of settlement of the hedging instrument and hedged item; and
- designation of off-market hedging instruments.

The following table sets out the maturity profile of the hedging instruments used in cash flow hedges. The amounts shown in the table reflect the notional amounts of derivatives. Please refer to Note 36 for the carrying values of the derivatives.

In \$ millions	Type of risk hedged	The Group			Total
		Less than 1 year	1 to 5 years	More than 5 years	
<b>2023</b>					
<b>Derivatives (notional)</b>					
Forward rate agreements	Interest rate	20	–	82	102
Interest rate swaps	Interest rate	9,108	41,689	–	50,797
FX contracts	Foreign exchange	25,752	186	–	25,938
Currency swaps	Interest rate & Foreign exchange	4,605	9,355	4,879	18,839
Total		39,485	51,230	4,961	95,676
<b>2022</b>					
<b>Derivatives (notional)</b>					
Forward rate agreements	Interest rate	–	–	42	42
Interest rate swaps	Interest rate	86	33,312	–	33,398
FX contracts	Foreign exchange	17,343	125	–	17,468
Currency swaps	Interest rate & Foreign exchange	8,842	6,830	5,245	20,917
Total		26,271	40,267	5,287	71,825

The hedge ineffectiveness arising from these hedges was insignificant.

Please refer to Note 34 for information on the cash flow hedge reserves.

### 38.3 Net investment hedges

The Group manages currency risk of its net investment in foreign operations (or structural foreign exchange risk) using foreign currency borrowings, foreign currency forwards and swaps, as well as cross currency swaps.

Structural foreign exchange exposures are managed with the primary aim of ensuring that consolidated capital ratios are largely protected from the effect of fluctuations in foreign exchange rates against SGD.

Under the Group's hedging strategy, the carrying amount of these investments could be fully hedged, partially hedged or not hedged at all. The Group regularly reviews its hedging strategy, taking into account the long-term outlook of currency fundamentals and the impact of fluctuations in foreign exchange rates on capital adequacy ratios.

The table below analyses the structural currency exposure of the Group by functional currency.

In \$ millions	Net investments in foreign operations <sup>(a)</sup>	Financial instruments which hedge the net investments	The Group		Remaining unhedged structural currency exposures
			Structural currency exposures before natural offset from AT1 equity instruments	AT1 equity instruments <sup>(c)</sup>	
<b>2023</b>					
Hong Kong dollar	9,633	3,740	5,893	–	5,893
US dollar <sup>(b)</sup>	10,117	–	10,117	1,318	8,799
Chinese yuan	4,329	3,950	379	–	379
Taiwan dollar	4,223	4,020	203	–	203
Others	6,350	1,486	4,864	–	4,864
Total	34,652	13,196	21,456	1,318	20,138
<b>2022</b>					
Hong Kong dollar	10,262	4,451	5,811	–	5,811
US dollar <sup>(b)</sup>	9,331	5,706	3,625	1,343	2,282
Chinese yuan	4,277	269	4,008	–	4,008
Taiwan dollar	1,954	1,842	112	–	112
Others	5,618	–	5,618	–	5,618
Total	31,442	12,268	19,174	1,343	17,831

(a) Refers to net tangible assets of entities (e.g. subsidiaries, associates, joint ventures and overseas branches) or units with non-SGD functional currency

(b) Includes the Treasury Markets trading business in Singapore ("TM Singapore"). With effect from 1 January 2021, the functional currency of TM Singapore changed from SGD to US dollars (USD) to better reflect the increasing dominance of the USD in the business activities of TM Singapore

(c) Represents foreign currency denominated AT1 equity instruments. These are accounted for at historical cost and do not qualify for hedge accounting

Please refer to Note 34 for information on the foreign currency translation reserves. Foreign currency translation reserves include the effect of translation differences on net investments in foreign entities (e.g. subsidiaries, associates, joint ventures and branches) or units with non-SGD functional currency and the related foreign currency financial instruments designated for hedge accounting.

### 39. Share-based Compensation Plans

As part of the Group's remuneration policy, the Group provides various share-based compensation plans to foster a culture that aligns employees' interests with shareholders', enable employees to share in the Group's performance and enhance talent retention.

Main Scheme/ Plan	Note
<b>DBSH Share Plan (Share Plan)</b>	
<ul style="list-style-type: none"> <li>The Share Plan is granted to Group executives as determined by the Compensation and Management Development Committee ("Committee") which has been appointed to administer the Share Plan from time to time.</li> <li>Participants are awarded shares of the Company or, at the Committee's discretion, their equivalent cash value or a combination.</li> <li>The share awards consist of a main award and a retention award for employees on bonus/ sales incentive plans. Dividends on unvested shares do not accrue to employees.</li> <li>The Directors reviewed and approved the proposed changes to the vesting schedule and retention awards on 5 December 2022. These would apply to shares granted from 2023, and there are no changes to the vesting schedule and retention awards for shares that had been granted in earlier periods:</li> </ul>	39.1

#### Vesting schedule

- For employees on bonus plan (including key employees who are also awarded shares as part of talent retention):
  - The main award granted prior to February 2023 will vest 2 to 4 years after grant i.e. 33% will vest 2 years after grant; another 33% will vest on the third year and the remaining 34% plus the retention award will vest 4 years after grant.
  - The main award granted from February 2023 will vest 1 to 4 years after grant i.e. 25% will vest each year. The retention award will vest 4 years after grant.
- Special Awards are granted as part of talent retention for selected individuals.
  - Special Awards granted prior to February 2023 will vest 2 to 4 years after grant i.e. 33% will vest 2 years after grant; another 33% will vest on the third year and the remaining 34% will vest 4 years after grant.
  - Special Awards granted from February 2023 will vest 1 to 3 years after grant; i.e. 33% will vest 1 year after grant, another 33% will vest on the second year and the remaining 34% will vest 3 years after grant.

#### Retention award

- For share awards granted from 2023, the retention award for employees on bonus plan was reduced from 20% to 15% following the change in the vesting schedule.
- There is no retention award for Special Awards.
- For employees on sales incentive plan, the main award will vest 1 to 3 years after grant; i.e. 33% will vest 1 year after grant, another 33% will vest on the second year and the remaining 34% plus the retention award will vest 3 years after grant. The retention award remains unchanged at 15%.
- All the DBSH Share Plan awards will lapse immediately upon termination of employment, except in the event of ill health, injury, disability, redundancy, retirement or death.
- The market price of shares on the grant date is used to estimate the fair value of the shares awarded. The fair value of the shares granted includes an adjustment to exclude the present value of future expected dividends to be paid during the vesting period.
- Vested and unvested shares are subject to clawback/ malus. Conditions that trigger such clawback/ malus are in the Remuneration Report section of the Annual Report.
- Shares are awarded to non-executive Directors as part of director's remuneration. Details of these awards are disclosed in the Corporate Governance section of the Annual Report.

#### DBSH Employee Share Plan (ESP)

- The Committee has ceased granting shares under the ESP effective from financial year 2018 remuneration. All outstanding ESP share grants have fully vested in 2022.

#### DBSH Employee Share Purchase Plan (ESPP)

- The ESPP was implemented in 2019 in selective markets across the Group. All permanent employees who hold the rank of Vice President and below are eligible to participate in the scheme.
- The ESPP is a share ownership plan for eligible employees to own DBSH shares through monthly contributions via deductions from payroll or designated bank accounts.
- Participants contribute up to 10% of month salary (minimum S\$50, capped at S\$1,000) and the Group will match 25% of the participant's contributions to buy DBSH ordinary shares for a period of 12 months during each plan year.
- The matching shares bought from the Group's contribution will vest 24 months after the last contribution month for each plan year.
- The matching shares will lapse immediately upon termination of employment, except in the event of ill health, injury, disability, redundancy, retirement or death.

### 39.1 DBSH Share Plan and DBSH Employee Share Plan

The following table sets out the movements of the awards during the year.

Number of shares	The Group			
	2023	ESP	2022	ESP
Balance at 1 January	16,138,420	-	17,105,292	145,804
Granted <sup>(a)</sup>	5,778,718	-	5,068,826	-
Vested	(5,584,985)	-	(5,205,424)	(145,138)
Forfeited/ others	(357,378)	-	(830,274)	(666)
Balance at 31 December	15,974,775	-	16,138,420	-
Weighted average fair value of the shares granted during the year	\$29.75		\$32.35	

(a) 2023 includes adjustments (229,765 shares) made to all unvested share awards following the shareholders' approval for the special dividend of \$0.50 per ordinary share at DBSH's Annual General Meeting held on 31 March 2023 in accordance with terms of the Share Plan

### 39.2 DBSH Employee Share Purchase Plan

The following table sets out the movements of the shares during the year.

Number of shares	The Group	
	2023	2022
Balance at 1 January	1,320,131	1,403,440
Granted	629,333	503,737
Vested <sup>(b)</sup>	(523,660)	(446,839)
Forfeited	(73,932)	(140,207)
Balance at 31 December	1,351,872	1,320,131
Weighted average fair value of the shares granted during the year	\$28.05	\$29.39

(b) Excludes shares vested but temporarily withheld under the regulatory requirement as of the reporting date. Such shares will be reported as vested in the period the shares are released to the employees

### 40. Related Party Transactions

**40.1** Transactions between the Company and its subsidiaries, including consolidated structured entities, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this Note.

**40.2** During the financial year, the Group had banking transactions with related parties, consisting of associates and joint ventures and key management personnel of the Group. These included the taking of deposits and extension of credit card and other loan facilities. These transactions were made in the ordinary course of business and carried out at arms-length commercial terms, and were not material.

In addition, key management personnel received remuneration for services rendered during the financial year. Non-cash benefits including performance shares were also granted.

**40.3** Total compensation and fees to key management personnel<sup>(a)</sup> are as follows:

In \$ millions	The Group	
	2023	2022
Short-term benefits <sup>(b)</sup>	54	57
Share-based payments <sup>(c)</sup>	36	32
Total	90	89

(a) Includes Company Directors and members of the Management Committee who have authority and responsibility in planning the activities and direction of the Group. The composition and number of Directors and Management Committee members may differ from year to year

(b) Includes cash bonus based on amount accrued during the year, to be paid in the following year

(c) Share-based payments are expensed over the vesting period in accordance with SFRS(I) 2. The 2023 share-based payments included a \$4 million impact arising from the change in vesting schedule and retention awards for shares granted in February 2023 in respect of performance year 2022 (refer to Note 39 for more details). The share grant in respect of the performance year 2023, which will be granted in February 2024, will be recognised as an expense over its vesting period from 2024 to 2027

## 41. Fair Value of Financial Instruments

### 41.1 Valuation Process

The valuation processes within the Group are governed by the Valuation Policy, which is approved by the Board Audit Committee.

The Valuation Policy applies to all financial assets and liabilities that are measured at fair value, covering both market prices as well as model inputs. Financial assets and liabilities are marked directly using reliable and independent quoted market prices where available or by using reliable and independent market parameters (as model inputs) in conjunction with a valuation model.

Valuation models go through an assurance process carried out by the Risk Management Group (RMG), independent of the model developers. This assurance process covers the review of the underlying methodology including its logic and conceptual soundness together with the model inputs and outputs. Model assurances are conducted prior to implementation and subject to regular review or when there are significant changes arising from market or portfolio changes. Where necessary, the Group also imposes model reserves and other adjustments in determining fair value. Models are approved by the Group Market and Liquidity Risk Committee (GMLRC).

A process of independent price verification (IPV) is in place to establish the accuracy of the market parameters used when the marking is performed by the Front Office. The IPV process entails independent checks to compare traders' marks to independent sources such as broker/ dealer quotes or market consensus providers.

Where market parameters are sourced independently for the marking of financial assets and liabilities, or used as inputs into a valuation model, these are checked for reliability and accuracy, for example by reviewing large daily movements or by referencing other similar sources, or transactions.

Valuation adjustments and reserves are taken to account for close-out costs, model and market parameter uncertainty, and any other factor that may affect valuations. Valuation adjustment and reserve methodologies are approved by the GMLRC and governed by the Valuation Policy.

The valuation adjustments and reserves include but are not limited to:

#### Model and Parameter Uncertainty Adjustments

Valuation uncertainties may occur during fair value measurement either due to uncertainties in the required input parameters or uncertainties in the modelling methods used in the valuation process. In such situations, adjustments may be necessary to take these factors into account.

For example, where market data such as prices or rates for an instrument are no longer observable after an extended period of time, these inputs used to value the financial instruments may no longer be relevant in the current market conditions. In such situations, adjustments may be necessary to address the pricing uncertainty arising from the use of stale market data inputs.

#### Credit Valuation Adjustments

Credit valuation adjustments are taken to reflect the impact on fair value of counterparty credit risk. Credit valuation adjustments are based upon the creditworthiness of the counterparties, magnitude of the current or potential exposure on the underlying transactions, netting and collateral arrangements, and the maturity of the underlying transactions.

### Funding Valuation Adjustments

Funding valuation adjustments represent an estimate of the adjustment to fair value that a market participant would make in incorporating funding costs and benefits that arise in relation to uncollateralised derivatives positions.

#### Day 1 Profit or Loss (P&L) Reserve

In situations where the market for an instrument is not active and its fair value is established using a valuation model based on significant unobservable market parameters, the Day 1 P&L arising from the difference in transacted price and end-of-day model valuation is set aside as reserves. A market parameter is defined as being significant when its impact on the Day 1 P&L is greater than an internally determined threshold. The Day 1 P&L reserve is released to the income statement when the parameters become observable or when the transaction is closed out or amortised over the duration of the transaction. At year end, the unamortised Day 1 P&L was not material.

#### Bid-Offer Adjustments

The Group often holds, at varying points in time, both long or short positions in financial instruments which are valued using mid-market levels. Bid-offer adjustments are then made to account for close-out costs.

### 41.2 Fair Value Hierarchy

The fair value hierarchy accords the highest level to observable inputs such as unadjusted quoted prices in active markets for identical assets or liabilities and the lowest level to unobservable inputs. The fair value measurement of each financial instrument is categorised in accordance with the same level of the fair value hierarchy as the input with the lowest level that is significant to the entire measurement. If unobservable inputs are deemed significant, the financial instrument will be categorised as Level 3.

Financial instruments that are valued using quoted prices in active markets are classified as Level 1 within the fair value hierarchy. These would include government and sovereign securities, listed equities and corporate debt securities which are actively traded. Derivatives contracts which are traded in an active exchange market are also classified as Level 1 of the valuation hierarchy.

Where fair value is determined using quoted market prices in less active markets or quoted prices for similar assets and liabilities, such instruments are generally classified as Level 2. In cases where quoted prices are generally not available, the Group will determine the fair value based on valuation techniques that use market parameters as inputs including but not limited to yield curves, volatilities and foreign exchange rates. The majority of valuation techniques employ only observable market data so that reliability of the fair value measurement is high. These would include corporate debt securities, repurchase, reverse repurchase agreements and most of the Group's over-the-counter (OTC) derivatives.

The Group classifies financial instruments as Level 3 when there is reliance on unobservable market parameters whether used directly to value a financial asset or liability, or used as inputs to a valuation model, attributing to a significant contribution to the instrument value. These would include all input parameters which are derived from historical data, for example, asset correlations or certain volatilities. Level 3 instruments also include unquoted equity securities which are measured based on the net asset value of the investments. In addition, Level 3 inputs include all stale quoted security prices and other approximations (e.g. bonds valued using credit default swap spreads).

The following tables present assets and liabilities measured at fair value, classified by level within the fair value hierarchy.

In \$ millions	The Group			Total
	Level 1	Level 2	Level 3	
<b>2023</b>				
<b>Assets</b>				
Financial assets at FVPL				
– Government securities and treasury bills	13,130	3,147	–	16,277
– Bank and corporate securities	16,947	4,782	108 <sup>(a)</sup>	21,837
– Other financial assets	368	28,955	–	29,323
FVOCI financial assets				
– Government securities and treasury bills	27,340	2,492	–	29,832
– Bank and corporate securities	17,694	5,248	632	23,574
– Other financial assets	–	5,052	–	5,052
Derivatives	35	22,543	122	22,700
<b>Liabilities</b>				
Financial liabilities at FVPL				
– Other debt securities	–	15,880	–	15,880
– Other financial liabilities	3,040	25,710	–	28,750

– Other financial liabilities	2,300	17,681	1	19,982
Derivatives	19	45,245	1	45,265

(a) Decrease in Level 3 balance was mainly due to updated pricing of less liquid bonds

The bank and corporate securities classified as Level 3 at 31 December 2023 comprised mainly securities which were marked using approximations, less liquid bonds and unquoted equity securities valued based on net asset value of the investments.

### 41.3 Own credit adjustments on financial liabilities designated at fair value through profit or loss

Changes in the fair value of financial liabilities designated at fair value through profit or loss related to the Group's own credit risk are recognised in other comprehensive income. As the Group does not hedge changes in own credit risk arising from financial liabilities, presenting the own credit movements within other comprehensive income does not create or increase an accounting mismatch in the income statement.

The change in fair value attributable to changes in own credit risk has been determined as the amount of change in fair value that is attributable to changes in funding spreads above benchmark interest rates. Fair value changes arising from factors other than the Group's own credit risk are insignificant.

The cumulative amounts attributable to changes in own credit risk for these financial liabilities as at 31 December 2023 was a loss of \$42 million (2022: gain of \$66 million).

Realised losses attributable to changes in own credit risk as at 31 December 2023 was \$22 million (2022: loss of \$22 million).

### 41.4 Financial assets & liabilities not carried at fair value

For financial assets and liabilities not carried at fair value in the financial statements, the Group has ascertained that their fair values were not materially different from their carrying amounts at year end.

For cash and balances with central banks, due from banks, loans and advances to customers, as well as due to banks and deposits and balances from customers, the basis of arriving at fair values is by discounting cash flows using the relevant market interest rates for the respective currencies.

For investment debt securities, subordinated term debts and other debts issued, fair values are determined based on independent market quotes, where available. Where market prices are not available, fair values are estimated using discounted cash flow method.

The fair value of variable interest-bearing as well as short-term financial instruments accounted for at amortised cost is assumed to be approximated by their carrying amounts.

## 42. Credit Risk

### 42.1 Maximum exposure to credit risk

The following table shows the exposure to credit risk of on-balance sheet and off-balance sheet financial instruments, before taking into account any collateral held, other credit enhancements and netting arrangements. For on-balance sheet financial assets, the maximum credit exposure is the carrying amounts. For contingent liabilities, the maximum exposure to credit risk is the amount the Group would have to pay if the instrument is called upon. For undrawn facilities, the maximum exposure to credit risk is the full amount of the undrawn credit facilities granted to customers.

In \$ millions	The Group	
	2023	2022
<b>On-balance sheet</b>		
Cash and balances with central banks (excluding cash on hand)	47,786	51,650
Government securities and treasury bills	70,565	64,995
Due from banks	67,461	60,131
Derivatives	22,700	44,935
Bank and corporate debt securities	69,335	62,667
Loans and advances to customers	416,163	414,519
Other assets (excluding deferred tax assets)	17,205	17,416
	<b>711,215</b>	716,313
<b>Off-balance sheet</b>		
Contingent liabilities and commitments (excluding capital commitments)	463,546	403,937
Total	<b>1,174,761</b>	1,120,250

The Group's exposures to credit risk, measured using the expected gross credit exposures that will arise upon a default of the end obligor are as shown in the Group's Pillar 3 Disclosures (unaudited). These exposures, which include both on-balance sheet and off-balance sheet financial instruments, are shown without taking into account any collateral held or netting arrangements.

#### Analysis of Collateral

Whilst the Group's maximum exposure to credit risk is the carrying amount of the assets or, in the case of off-balance sheet instruments, the amount guaranteed, committed, accepted or endorsed, the likely exposure may be lower due to offsetting collateral, credit guarantees and other actions taken to mitigate the Group's exposure.

The description of collateral for each class of financial asset is set out below.

#### Balances with central banks, Government securities and treasury bills, Due from banks and Bank and corporate debt securities

Collateral is generally not sought for these assets.

#### Derivatives

The Group maintains collateral agreements and enters into master netting agreements with most of the counterparties for derivative transactions. Please refer to Note 36 for the impact of netting arrangements recognised for the computation of Capital Adequacy Ratio (CAR).

#### Loans and advances to customers, Contingent liabilities and commitments

Certain loans and advances to customers, contingent liabilities and commitments are typically collateralised to a substantial extent. In particular, residential mortgage exposures are generally fully secured by residential properties. Income-producing real estate, which is a sub-set of the Specialised Lending exposure, is fully secured by the underlying assets financed.

The extent to which credit exposures are covered by Basel eligible collateral, besides real estate, after the application of the requisite regulatory haircuts, is shown in the Group's Pillar 3 Disclosures (unaudited). The amounts are a sub-set of the actual collateral arrangements entered by the Group as Basel imposes strict legal and operational standards before collateral can be admitted as credit risk mitigants. As a result, certain collateral arrangements which do not meet its criteria will not be included. Certain collateral types which are not permitted as credit risk mitigants for credit exposures under the Standardised Approach are also excluded.

(a) Derivative financial assets and liabilities are included in the "Less than 7 days" bucket as they are mainly held for trading. Please refer to the tables in Note 38 for the maturity profile of hedging derivatives

The above table includes disclosure of the contractual maturity of financial liabilities, which approximates the same analysis on an undiscounted basis, as total future interest payments are not material relative to the principal amounts. Assets and liabilities (including non-maturing savings/current deposits) are represented on a contractual basis or in a period when it can legally be withdrawn. The cash flows of assets and liabilities may behave differently from their contractual terms.

### 43.2 Contingent liabilities and commitments

The table below shows the Group's contingent liabilities and commitments based on the remaining period as at the balance sheet date to contractual expiry date.

In \$ millions	The Group				Total
	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years	
<b>2023</b>					
Guarantees, letters of credit and other contingent liabilities	38,619	–	–	–	38,619
Undrawn credit commitments <sup>(a)</sup> and other facilities	377,906	24,892	20,110	2,019	424,927
Capital commitments	39	14	3	–	56
<b>Total</b>	<b>416,564</b>	<b>24,906</b>	<b>20,113</b>	<b>2,019</b>	<b>463,602</b>
<b>2022</b>					
Guarantees, letters of credit and other contingent liabilities	37,669	–	–	–	37,669
Undrawn credit commitments <sup>(a)</sup> and other facilities	318,487	23,247	21,288	3,246	366,268
Capital commitments	61	32	41	–	134
<b>Total</b>	<b>356,217</b>	<b>23,279</b>	<b>21,329</b>	<b>3,246</b>	<b>404,071</b>

(a) Includes commitments that are unconditionally cancellable at any time by the Group

The Group expects that not all of the contingent liabilities will be called upon and not all of the undrawn credit commitments will be drawn before expiry.

## 44. Capital Management

The Board is responsible for setting the Group's capital management objective, which is to maintain a strong capital position consistent with regulatory requirements under the MAS Notice 637 and MAS Notice FHC-N637, and the expectations of various stakeholders, including customers, investors and rating agencies. The Board articulates this objective in the form of capital targets. This objective is pursued while delivering returns to shareholders and ensuring that adequate capital resources are available for business growth and investment opportunities as well as adverse situations, taking into consideration the Group's strategic plans and risk appetite.

The Group's capital management objective is implemented via a capital management and planning process that is overseen by the Capital Committee. The Chief Financial Officer chairs the Capital Committee. The Capital Committee receives regular updates on the Group's current and projected capital positions. A key tool for capital planning is the annual Internal Capital Adequacy Assessment Process (ICAAP) through which the Group assesses its projected capital supply and demand relative to regulatory requirements and capital targets. The ICAAP generally has a three-year horizon and covers various scenarios, including stress scenarios of differing scope and severity.

The Group is subject to and has complied with the capital adequacy requirements set out in the MAS Notice FHC-N637, which effects the Basel Committee on Banking Supervision's capital adequacy framework in Singapore, throughout the year. The Group's capital adequacy ratios as at 31 December 2023 and 2022 have been subject to an external limited assurance review, pursuant to the MAS Notice FHC-N609 "Auditors' Report and Additional Information to be submitted with Annual Accounts".

For more information, please refer to the Group's Pillar 3 disclosures (unaudited) published on DBS website (<https://www.dbs.com/investors/default.page>).

## 45. Segment Reporting

### 45.1 Business segment reporting

The business segment results are prepared based on the Group's internal management reporting which reflects the organisation's management structure. As the activities of the Group are highly integrated, internal allocation has been made in preparing the segment information. Amounts for each business segment are shown after the allocation of certain centralised costs, funding income and the application of transfer pricing, where appropriate. Transactions between segments are recorded within the segment as if they are third party transactions and are eliminated on consolidation.

The Group's various business segments are described below.

#### Consumer Banking/ Wealth Management

Consumer Banking/ Wealth Management provides individual customers with a diverse range of banking and related financial services. The products and services available to customers include current and savings accounts, fixed deposits, loans and home finance, cards, payments, investment and insurance products.

#### Institutional Banking

Institutional Banking provides financial services and products to institutional clients including bank and non-bank financial institutions, government-linked companies, large corporates and small and medium-sized businesses. The business focuses on broadening and deepening customer relationships. Products and services comprise the full range of credit facilities from short-term working capital financing to specialised lending. It also provides global transactional services such as cash management, trade finance and securities and fiduciary services, treasury and markets products, corporate finance and advisory banking as well as capital markets solutions.

#### Treasury Markets

Treasury Markets' activities primarily include structuring, market-making and trading across a broad range of treasury products.

Income from sale of treasury products offered to customers of Consumer Banking/ Wealth Management and Institutional Banking is not reflected in the Treasury Markets segment, but in the respective customer segments.

#### Others

The Others segment encompasses the results of corporate decisions that are not attributed to business segments. It includes earnings on capital deployed into high quality assets, earnings from non-core asset sales and certain other head office items such as centrally-managed credit allowances. DBS Vickers Securities is also included in this segment.

The following table analyses the results, total assets and total liabilities of the Group by business segment.

In \$ millions	The Group				Total

## 45.2 Geographical segment reporting

The Group's performance by geography includes net revenues and expenses from internal and external counterparties. The performance by geography is classified based on the location in which income and assets are recorded, while some items such as centrally-managed credit allowances and technology-related services are reflected in Singapore. Hong Kong comprises mainly DBS Bank (HK) Limited and DBS HK branch. Rest of Greater China comprises mainly DBS Bank (China) Ltd, DBS Bank (Taiwan) Ltd and DBS Taipei branch. South and Southeast Asia comprises mainly PT Bank DBS Indonesia, DBS Bank India Limited and DBS Labuan branch. All results are prepared in accordance with SFRS(I).

In \$ millions	The Group					Total

(a) Investments in associates and joint ventures, properties and other fixed assets

## 46. Significant Events

### 46.1 Operational Risk Penalty for Digital Disruption

In May 2023, MAS imposed an additional capital requirement on the main subsidiary of the Company, DBS Bank Ltd. (the Bank) following the widespread unavailability of its digital banking services in March and a subsequent disruption to its digital banking and ATM services in May 2023. MAS' supervisory action requires the Bank to set aside additional capital amounting to 1.8 times of its risk-weighted assets for operational risk. In November 2023, MAS imposed a six-month pause on the Bank's non-essential IT changes.

The Bank has drawn up a comprehensive technology resiliency roadmap to strengthen its technology risk management and controls in four main areas: change management, system resiliency, incident management, and technology governance and oversight. The roadmap is being implemented in phases.

### 46.2 Commitment Up To \$1 Billion to Support Vulnerable Communities and Catalyse Social Impact Over Ten Years

On 11 August 2023, the Company announced that it will commit up to \$1 billion over the next ten years to improve lives and livelihoods of the low-income and underprivileged, and foster a more inclusive society. The actual contribution each year, of up to \$100 million, will be determined based on the Group's financial performance in the preceding year. The Group will deploy up to \$100 million each year in Singapore and its other key markets with effect from 2024. This commitment augments existing community initiatives by the Group and DBS Foundation.

The Group has made a provision of \$100 million as part of the ten-year \$1 billion Corporate and Social Responsibility commitment for the year ended 31 December 2023.

### 46.3 Increased stake in an associate, Shenzhen Rural Commercial Bank Corporation Limited (SRCB)

On 29 December 2023, the Company announced that its wholly owned subsidiary, DBS Bank Ltd., has obtained the requisite regulatory approvals to increase its existing stake in SRCB from 13% to 16.69% for a total consideration of \$374 million. The transaction was completed in January 2024.

## 47. Subsequent Event

### Proposed Bonus Issue

On 6 February 2024, the Board has proposed a bonus issue on the basis of one bonus share for every existing 10 DBSH ordinary shares held. The bonus shares will qualify for dividend payments from the first interim dividend of the financial year ending 31 December 2024.

DBS Bank Ltd

# Notes to the supplementary financial statements

for the year ended 31 December 2023

The supplementary financial statements of DBS Bank Ltd. (the Bank) are extracted from the Audited Statutory Financial Statements of DBS Bank Ltd and its subsidiaries (the Bank Group) for the financial year ended 31 December 2023. The statutory financial statements of the Bank and the Bank Group which contained an unqualified audit report, will be delivered to the Accounting & Corporate Regulatory Authority in accordance with the Singapore Companies Act 1967.

## 1. Summary of Material Accounting Policies

The accounting policies applied by the Bank and the Bank Group are consistent with those applied by the Group as disclosed in Note 2 of the "Notes to the Financial Statements" (Notes) in the Group's Consolidated Financial Statements.

## 2. Other Income

Other income includes the following:

In \$ millions	2023	2022
Dividends from subsidiaries	948	225
Dividends from associates	59	65
Total	1,007	290

## 3. Subsidiaries

In \$ millions	2023	2022
Investment in subsidiaries <sup>(a)</sup>		
Ordinary shares	15,594	13,065
Due from subsidiaries		
Other receivables	29,309	22,758
Total	44,903	35,823

(a) The carrying amounts of certain investments which are designated as hedged items in a fair value hedge are adjusted for fair value changes attributable to the hedged risks

## 4. Share Capital

	Shares ('000)		In \$ millions	
	2023	2022	2023	2022
Ordinary shares	2,626,196	2,626,196	24,452	24,452
Issued share capital at 31 December			24,452	24,452

## 5. Other Equity Instruments

The following perpetual capital securities issued by the Bank are classified as other equity instruments. These instruments are subordinated to all liabilities of the Bank and senior only to ordinary shareholders of the Bank.

These instruments include contractual provisions for them to be written-off if and when the MAS notifies the Bank that a write-off of the instruments, or a public sector injection of capital (or equivalent support), is necessary, without which the Bank Group or the DBSH Group (DBSH and its subsidiaries) would become non-viable, as determined by the MAS. These instruments qualify as Additional Tier 1 capital under MAS Notice 637.

In \$ millions	Issue Date	Distribution Payment	2023	2022
<b>Issued by the Bank</b>				
SGD 1,000m 3.98% Non-Cumulative, Non-Convertible Perpetual Capital Securities First Callable in 2025	12 Sep 2018	Mar/ Sep	1,000	1,000
USD 1,000m 3.30% Non-Cumulative, Non-Convertible Perpetual Capital Securities First Callable in 2025	27 Feb 2020	Feb/ Aug	1,396	1,396
Total			2,396	2,396

## 6. Other Reserves and Revenue Reserves

### 6.1 Other reserves

In \$ millions	2023	2022
FVOCI revaluation reserves (debt)	(863)	(1,415)
FVOCI revaluation reserves (equity)	(328)	(394)
Cash flow hedge reserves	(979)	(1,910)
Foreign currency translation reserves	(440)	(261)
Total	(2,610)	(3,980)

Movements in other reserves of the Bank during the year are as follows:

In \$ millions	FVOCI revaluation reserves (debt)	FVOCI revaluation reserves (equity)	Cash flow hedge reserves	Foreign currency translation reserves	Total
<b>2023</b>					
Balance at 1 January	(1,415)	(394)	(1,910)	(261)	(3,980)
Net exchange translation adjustments	-	-	-	(179)	(179)
FVOCI financial assets and cash flow hedge movements:					
– net valuation taken to equity	652	(176)	775	-	1,251
– transferred to income statement	(66)	-	202	-	136
– taxation relating to components of other comprehensive income	(34)	(4)	(46)	-	(84)
Transfer to revenue reserves upon disposal of FVOCI equities	-	246	-	-	246
Balance at 31 December	(863)	(328)	(979)	(440)	(2,610)
<b>2022</b>					
Balance at 1 January	(79)	(114)	(187)	(45)	(425)
Net exchange translation adjustments	-	-	-	(216)	(216)
FVOCI financial assets and cash flow hedge movements:					
– net valuation taken to equity	(1,530)	(437)	(1,703)	-	(3,670)
– transferred to income statement	117	-	(100)	-	17
– taxation relating to components of other comprehensive income	77	15	80	-	172
Transfer to revenue reserves upon disposal of FVOCI equities	-	142	-	-	142
Balance at 31 December	(1,415)	(394)	(1,910)	(261)	(3,980)

## 6.2 Revenue reserves

In \$ millions	2023	2022
Balance at 1 January	26,917	23,693
Net profit attributable to shareholders	9,203	7,040
Other comprehensive income attributable to shareholders		
– Fair value change from own credit risk on financial liabilities designated at fair value (net of tax)	(108)	115
– Defined benefit plans remeasurements (net of tax)	(3)	-
– Transfer from FVOCI revaluation reserves upon disposal of FVOCI equities	(246)	(142)
Sub-total	35,763	30,706
Less: Dividends paid to holding company	5,013	3,789
Balance at 31 December	30,750	26,917

## DBS Group Holdings and its Subsidiaries

# Five-year summary

Group	2023	2022	2021	2020	2019

Net Finance income or expenses from reinsurance contracts held	Note 4.3	5	45
Cost of credit risk of financial assets from insurance activities	Note 3.8	7	1
Income from other activities	Note 4.2	21,005	13,301
Expenses from other activities	Note 4.2	(17,394)	(10,625)
<b>Net banking income</b>		<b>25,104</b>	<b>27,155</b>
Other operating expenses	Note 5	(16,849)	(16,425)
Amortisation, depreciation and impairment of tangible and intangible fixed assets		(1,675)	(1,569)
<b>Gross operating income</b>		<b>6,580</b>	<b>9,161</b>
Cost of risk	Note 3.8	(1,025)	(1,647)
<b>Operating income</b>		<b>5,555</b>	<b>7,514</b>
Net income from investments accounted for using the equity method		24	15
Net income/expense from other assets		(113)	(3,290)
Value adjustments on goodwill	Note 2.2	(338)	-
<b>Earnings before tax</b>		<b>5,128</b>	<b>4,239</b>
Income tax	Note 6	(1,679)	(1,483)
<b>Consolidated net income</b>		<b>3,449</b>	<b>2,756</b>
Non-controlling interests	Note 2.3	956	931
<b>Net income, Group share</b>		<b>2,493</b>	<b>1,825</b>
Earnings per ordinary share	Note 7.2	2.17	1.50
Diluted earnings per ordinary share	Note 7.2	2.17	1.50

(1) The Interest and similar income and Net gains and losses on financial transactions lines include in particular the gains and losses on the investments of insurance activities. These amounts must be assessed by taking into account the financial gains and losses arising from the measurement of the insurance and reinsurance contracts associated with these investments, which are presented in the Net financial income or expenses of the insurance contracts issued (see Note 4.3).

## 6.1.4 STATEMENT OF NET INCOME AND UNREALISED OR DEFERRED GAINS AND LOSSES

<i>(In EUR m)</i>	<b>2023</b>	<b>2022 R</b>
<b>Consolidated net income</b>	<b>3,449</b>	<b>2,756</b>
<b>Unrealised or deferred gains and losses that will be reclassified subsequently into income</b>	<b>(166)</b>	<b>578</b>
Translation differences	(356)	1,820
<i>Revaluation differences for the period</i>	(429)	1,278
<i>Reclassified into income</i>	73	542
Revaluation of debt instruments at fair value through other comprehensive income <sup>(1)</sup>	2,402	(10,849)
<i>Revaluation differences for the period</i>	2,374	(11,029)
<i>Reclassified into income</i>	28	180
Revaluation of insurance contracts at fair value through other comprehensive income <sup>(1)</sup>	(2,134)	10,050
Revaluation of hedging derivatives	(68)	(610)
<i>Revaluation differences of the period</i>	(36)	(482)
<i>Reclassified into income</i>	(32)	(128)
Related tax	10	167
<b>Unrealised or deferred gains and losses that will not be reclassified subsequently into income</b>	<b>(177)</b>	<b>539</b>
Actuarial gains and losses on defined benefit plans	12	92
Revaluation of own credit risk of financial liabilities at fair value through profit or loss	(257)	671
Revaluation of equity instruments at fair value through other comprehensive income	1	(26)
Related tax	(67)	(198)
<b>Total unrealised or deferred gains and losses</b>	<b>(343)</b>	<b>1,117</b>
<b>Net income and unrealised or deferred gains and losses</b>	<b>3,106</b>	<b>3,873</b>
<i>o/w Group share</i>	2,085	3,080
<i>o/w non-controlling interests</i>	1,021	793

(1) The Revaluation of the debt instruments at fair value through other comprehensive income" line includes the revaluation gains and losses on the investments of the insurance activities measured at fair value through other comprehensive income. Their net amounts must be perceived taking into account the financial gains and losses from the revaluation of the insurances contracts associated with these investments; these gains and losses are presented in the line Revaluation of insurance contracts at fair value through other comprehensive income (see Note 4.3).

## 6.1.5 CHANGES IN SHAREHOLDERS' EQUITY

## 6.2 NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements were approved by the Board of Directors on 7 February 2024.

### NOTE 1 SIGNIFICANT ACCOUNTING PRINCIPLES

#### NOTE 1.1 Introduction

##### ACCOUNTING STANDARDS

Under European Regulation 1606/2002 of 19 July 2002 on the application of International Accounting Standards, the Societe Generale group (“the Group”) prepared its consolidated financial statements for the year ended 31 December 2023 in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union and in force at that date. The Group includes the Societe Generale parent company (including the Societe Generale foreign branches) and all the entities in France and abroad that it controls either directly or indirectly (subsidiaries and joint arrangements) or on which it exercises significant influence (associates).

These standards are available on the European Commission website.

In accordance with the transitional measures provided by IFRS 9, the Group has elected to continue accounting for hedging transactions under IAS 39 as adopted by the European Union, including the provisions related to macro-fair value hedge accounting (IAS 39 “carve-out”).

##### FINANCIAL STATEMENTS PRESENTATION

As the IFRS framework does not specify a standard model, the format of the primary financial statements used is consistent with the format proposed by the French Accounting Standard Setter, the *Autorité des Normes Comptables* (ANC), under Recommendation No. 2022-01 of 8 April 2022.

The disclosures provided in the notes to the consolidated financial statements focus on information that is both relevant and material to the financial statements of the Societe Generale group, its activities, and the circumstances in which it conducted its operations during the period under review.

The Group publishes its Annual Financial Report 2023 using the European Single Electronic Format (ESEF) as defined by the amended Delegated Regulation (EU) 2019/815.

##### PRESENTATION CURRENCY

The presentation currency of the consolidated financial statements is the euro.

The figures reported in the financial statements and in the notes are expressed in millions of euros, unless otherwise specified. The effect of rounding may generate discrepancies between the figures reported in the financial statements and those reported in the Notes.

**NOTE 1.2 New accounting standards applied by the Group as of 1 January 2023**

IFRS 17 “Insurance Contracts”

Amendments to IFRS 17 “Insurance Contracts” and IFRS 9 “Financial Instruments”

Amendments to IAS 1 “Disclosure of Accounting Policies”

Amendments to IAS 8 “Definition of Accounting Estimates”

Amendments to IAS 12 “Income Taxes: Deferred Tax related to Assets and Liabilities arising from a Single Transaction”

Amendments to IAS 12 “International Tax Reform – Pillar 2 Model Rules”

Amendments to IFRS 16 “Lease Liability in a Sale and Leaseback” (early application)

**IFRS 17 “INSURANCE CONTRACTS” – AMENDMENTS TO IFRS 17 PUBLISHED ON 25 JUNE 2020 AND AMENDMENTS TO IFRS 17 AND IFRS 9 PUBLISHED ON 9 DECEMBER 2021**

The impacts of the first application of IFRS 17 and IFRS 9 by the insurance subsidiaries are presented in paragraph 4 below.

**AMENDMENTS TO IAS 1 “DISCLOSURE OF ACCOUNTING POLICIES”**

The aim of these amendments is to help companies improve the materiality of the information on accounting policies disclosed in the Notes to the financial statements and the usefulness of that information to investors and financial statement users.

The Group takes into account these amendments for the preparation of its consolidated financial statements.

**AMENDMENTS TO IAS 8 “DEFINITION OF ACCOUNTING ESTIMATES”**

The aim of these amendments is to facilitate distinguishing between changes in accounting methods and changes in accounting estimates.

The Group takes into account these amendments for the preparation of its consolidated financial statements.

**AMENDMENTS TO IAS 12 “INCOME TAXES – DEFERRED TAX RELATED TO ASSETS AND LIABILITIES ARISING FROM A SINGLE TRANSACTION”**

These amendments clarify and narrow the scope of the exemption provided by the IAS 12 “Income Tax” standard allowing institutions not to recognise any deferred tax at the initial recognition of an asset or a liability. Are excluded from the exemption scope all leases and decommissioning obligations for which companies recognise both an asset and a liability and will now have to recognise deferred taxes.

The aim of these amendments is to reduce heterogeneity in the recognition of the deferred taxes related to leases and to decommissioning obligations.

Since the date of first application of IFRS 16 “Leases”, the Group has been considering the rights of use and the lease-related debt as a single transaction. Consequently, on the initial recognition date, the amount of deferred tax asset offsets the amount of deferred tax liability. The net temporary differences arising from later variations in the right of use and lease debt subsequently result in the recognition of a deferred tax. This amendment thus has no impact on the Group’s consolidated financial statements.

**AMENDMENTS TO IAS 12 “INTERNATIONAL TAX REFORM – PILLAR 2 MODEL RULES”**

These amendments introduce a mandatory temporary exemption from the recognition of deferred income tax assets and liabilities stemming from the OECD Pillar 2 rules and apply retrospectively for the financial years beginning on or after 1 January 2023.

This exemption involves specific reporting requirements for the consolidated financial statements.

The Group has put in place a project structure in order to identify the impacts of these amendments to conform with the new obligations imposed by the latter in relation to the OECD’s Pillar 2 global tax reform (see Note 6).

**AMENDMENTS TO IFRS 16 “LEASE LIABILITY IN A SALE AND LEASEBACK”**

These amendments provide clarifications on the subsequent measurement of leaseback transactions when the initial sale of the asset meets the criteria of IFRS 15 (“Revenue from contract with customers”) to be recognised as a sale. These amendments specify in particular how to subsequently assess the lease liability resulting from these leaseback transactions, made of variable lease payments that do not depend on an index or a rate.

These amendments have no impact on the Group’s consolidated financial statements.

### NOTE 1.3 Accounting standards, amendments or interpretations to be applied by the Group in the future

The IASB published accounting standards and amendments, some of which have not yet been adopted by the European Union as at 31 December 2023. Their application is required for the financial years

beginning on or after 1 January 2024 at the earliest or on the date of their adoption by the European Union. They have thus not been applied by the Group as at 31 December 2023.

The provisional timetable for the application of these standards is as follows:

<b>2025</b>	<ul style="list-style-type: none"> <li>• Amendments to IAS 21 “Lack of Exchangeability”</li> </ul>
-------------	----------------------------------------------------------------------------------------------------

#### AMENDMENTS TO IAS 21 “LACK OF EXCHANGEABILITY”

Published on 15 August 2023.

These amendments specify the situations in which a currency is considered convertible, and the procedure for assessing the exchange rate of a non-convertible currency. They also detail the supplementary information to provide in the Notes to the financial statements for non-convertible currencies.

These amendments will be consolidated in IAS 21 “The Effects of Changes in Foreign Exchange Rates” and IFRS 1 “First-time Adoption of IFRS” in March 2024.

The impact of these amendments is currently being analysed.

### NOTE 1.4 Initial application of IFRS 17 “Insurance contracts” and of IFRS 9 “Financial instruments” to insurance subsidiaries

IFRS 17 “Insurance Contracts”, issued on 18 May 2017 and modified by the 25 June 2020 and 9 December 2021 Amendments, replaces IFRS 4 “Insurance Contracts” which allowed, in particular, insurance contracts to be recognised using methods set out by the local accounting regulations.

On 23 November 2021, the European Commission (EC) published in the Official Journal, Commission Regulation (EU) 2021/2036 of 19 November 2021 adopting IFRS 17 “Insurance Contracts”. This adoption included the possibility for European companies not to apply the requirement laid out in the standard to group some insurance contracts by annual cohort for their measurement; this exemption will be reassessed by the European Commission by 31 December 2027 at the latest.

Since 1 January 2023, the Group has been applying IFRS 17. On that same date, the Group’ insurance subsidiaries started applying IFRS 9 “Financial Instruments” for the first time; this application had been delayed as a result of the possibilities offered by the Amendments to IFRS 17 and to IFRS 4 issued by the IASB on 25 June 2020 and extended by Regulations (EU) 2017/1988 and 2020/2097 of the European Commission.

On 8 September 2022, the European Union adopted the amendments to IFRS 17 published by the IASB on 9 December 2021 with the aim of improving the usefulness of the comparative information about financial assets presented on the initial application of IFRS 17 and IFRS 9.

The main consequences of the application of IFRS 17 concern:

- the measurement of insurance contracts, materialised mainly as liabilities on the balance sheet: their value will be updated on each closing date based on a re-estimate of the future cash flows related to their fulfilment. This re-estimate will take account, in particular, of market data in relation to financial elements and the behaviour of policyholders;
- the recognition of the margin: although the profitability of the insurance contracts remains unchanged, the pace of recognition of the margin in the income statement is modified. Any expected profit is deferred in the balance sheet and spread in the income statement over the coverage period of the insurance contracts. Conversely, any expected loss is immediately recognised in the income statement upon its initial recognition or in subsequent measurements; and
- the presentation of the income statement: the operating expenses attributable to the fulfilment of insurance contracts is hence presented in reduction of the net banking income as Insurance service expenses and thus does not impact the total operating expenses on the consolidated income statement anymore.

## TRANSITIONAL AND INITIAL APPLICATION REQUIREMENTS

### IFRS 17 standard

The initial application of IFRS 17 on 1 January 2023 is retrospective and the comparative data of the 2022 financial year have been restated.

The differences in measurement of the insurance assets and liabilities resulting from the retrospective application of IFRS 17 as at 1 January 2022 are presented directly in equity.

The retrospective measurement of these assets and liabilities, and in particular of the different insurance contract portfolios, may be subject to simplified alternate approaches when the necessary data are not all available. The standard then allows for the use of:

- either a modified retrospective approach that provides, based on reasonable information available at no cost or undue effort, measurements that are as close as possible to those that would result from the retrospective application of the standard;
- or an approach based on the fair value of the insurance contracts portfolios as at 1 January 2022.

The Group has applied a modified retrospective approach for the savings life insurance contracts and savings retirement contracts which represent the large majority of its contracts. Protection-Property and casualty contracts were subject to a full retrospective approach. For Protection-Provident contracts a retrospective approach, either full or modified, has been applied on a case-by-case basis.

The measurement of the insurance contracts made on a current basis, taking into account the time value of money and the financial risks related to future cash flows, required to adjust the measurement of some assets held to back the contracts in order to reduce the possible accounting mismatches.

Since 1 January 2023, initial application date of IFRS 17, the Group is measuring at fair value the investment properties held by insurance companies to back the insurance contracts issued. These are investment properties held as part of the management of insurance contracts with direct participations features.

IFRS 17 requires to include in the measurement of the insurance contracts general operating expenses (personnel expenses, amortisation expenses for fixed assets and other operating expenses) directly attributable to the fulfilment of contracts and to present them as Insurance service expenses in the net banking income.

The Group's insurance subsidiaries systematically identify in the fulfilment cash flows of their contracts the amount of administrative costs they expect to bear. These administrative costs are presented under Insurance service expenses in the net banking income. Consequently, the administrative costs presented by nature on the consolidated income statement are reduced by the amounts allocated to the fulfilment of the insurance contracts.

Furthermore, the Group's banking entities sell, through their retail networks, the insurance contracts issued by the Group's insurance subsidiaries and thus invoice fees to these entities. These fees cover the costs incurred by the banking entities plus a margin. As this invoicing takes place between

Group-controlled entities, the internal margin received by the banking entity and incurred by the insurance entity is eliminated in the consolidated accounts. The administrative costs incurred by the banking entities for the distribution of contracts are regarded as expenses directly attributable to the fulfilment of the contracts and are thus incorporated into the measurement of the contracts and presented under the "Insurance service expenses" heading. The contractual service margin of the insurance contracts distributed by the Group's banking entities is thus determined by taking into account both the costs incurred by the distributing banking entity (excl. internal margin) and the other directly attributable costs incurred by the insurance entity.

### IFRS 9 standard

The initial application of IFRS 9 by the Group's insurance subsidiaries as at 1 January 2023 is retrospective.

For the sake of consistency with the IFRS 17 transition arrangements, and in order to provide more relevant and useful information, the Group has restated the comparative figures of the 2022 financial year related to the relevant financial instruments of its insurance subsidiaries (including the financial instruments derecognised during the 2022 financial year in accordance with IFRS 17 amendment which allows the presentation of comparative information concerning a financial asset as if IFRS 9 had previously been applied to that asset).

Following the retrospective application of IFRS 9 as at 1 January 2022, the differences in measurement (including the impairment for credit risk) of the financial assets and liabilities impacted are recognised directly in equity.

### New presentation of the financial statements

On the balance sheet, the accounting outstanding amounts related to insurance contracts, previously booked under Other assets, Insurance contracts related liabilities and Other liabilities are now presented under Insurance and reinsurance contracts assets and Insurance and reinsurance contracts liabilities.

The accounting outstanding amounts related to the financial instruments and investments properties of insurance activities, previously booked on the assets side under Investments of insurance companies and on the liabilities side under Insurance contracts related liabilities, are now presented under the different headings of the balance sheet according to their classification and valuation technique.

In the consolidated income statement, in the net banking income, the income and expenses related to the insurance contracts issued and the reinsurance contracts were previously grouped under Net income from insurance activities. These income and expenses are now measured and recognised according to IFRS 17, and presented in the net banking income under the following headings:

- income from insurance contracts issued;
- insurance service expenses;
- income and expenses from reinsurance contracts held;
- net finance income or expenses from insurance contracts issued; and
- net finance income or expenses from reinsurance contracts held.

The incomes and expenses related to the financial instruments of insurance activities, previously presented under Net income from insurance activities, are now presented under the consolidated income statement headings dedicated to the valuation of financial instruments, with the exception of the expenses and incomes related to credit risk which are presented in the net banking income under Cost of credit risk of the financial assets related to insurance activities.

Furthermore, in the context of the application of IFRS 17, the Group has modified the presentation of the general operating expenses in the consolidated income statement to improve the readability of the Group's performance. The Other general operating expenses heading now includes the amounts previously presented under Personnel expenses and Other operating expenses, from which are deducted the

general operating expenses related to insurance contracts that will henceforth be presented under the Insurance service expenses heading in the net banking income.

### IMPACTS ON THE GROUP'S BALANCE SHEET AND PERFORMANCE

The following tables reconcile the balance sheet as at 31 December 2021, presented taking into account the application of IAS 39 and IFRS 4 by the insurance subsidiaries, and the balance sheet as at 1 January 2022, presented taking into account the application of IFRS 9 and IFRS 17. The tables also include the balance sheet as at 31 December 2022 restated as a result of the application of IFRS 9 and IFRS 17.

(1) This column includes the allocation to retained earnings of 2021 net income and gains and losses recognised directly in equity that will not be reclassified subsequently to income.

## DESCRIPTION OF THE RECLASSIFICATIONS MADE FOR THE FINANCIAL INSTRUMENTS AND OTHER INVESTMENT ASSETS AS AT 1 JANUARY 2022 (COLUMNS A, B, C, D AND I)

### Reclassification of available-for-sale financial assets (column A)

Applying IFRS 9 causes the disappearance of the Available-for-sale financial assets accounting category. Consequently, the instruments previously included in this category have been reclassified under IFRS 9 accounting headings according to the characteristics of their contractual cash flows and their business model.

The Available-for-sale assets of insurance companies included, as at 31 December 2021, debt securities (bonds and equivalent securities) for EUR 74,084 million and equity securities (shares and equivalent securities) for EUR 14,402 million.

Basic debt securities (financial instruments, whose contractual cash flows are solely payments of principal and interests) were reclassified as follows:

- debt securities held as part of a business model whose objective is to hold assets in order to collect contractual cash flows business model were reclassified as Financial assets at amortised cost for EUR 4,975 million. These are mainly debt securities acquired for the purpose of reinvesting the own funds of insurance subsidiaries;
- debt securities held as part of a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets business model were reclassified as Financial assets at fair value through other comprehensive income for EUR 67,632 million. These debt securities are mainly acquired for the management of insurance contracts.

Non-basic debt securities and equity securities were reclassified into Financial assets at fair value through profit or loss for EUR 15,879 million. These securities are held for the purpose of managing insurance contracts.

### Reclassification of loans and receivables (columns B, C and D)

Basic loans and receivables (financial instruments whose contractual cash flows are Solely Payments of Principal and Interests) were reclassified as follows:

- loans and receivables held as part of a business model whose objective is to hold assets in order "to collect contractual cash flows" business model were reclassified as Due from banks at amortised cost for EUR 1,232 million and as Customer loans at amortised cost for EUR 69 million (column D);
- loans and receivables held as part of a business model whose objective is achieved by both "collecting contractual cash flows and selling financial assets" business model were reclassified as Financial assets at fair value through other comprehensive income for an amount of EUR 1,454 million. These loans and receivables are Due from banks (column B).

Non-basic loans and receivables were reclassified as Financial assets at fair value through profit or loss for EUR 2,085 million (column C).

Financial instruments reclassified as Financial assets at fair value through other comprehensive income or as Financial assets at fair value through profit or loss are mainly bonds recognised at amortised cost following the amendment of IAS 39 in 2008. This amendment provided, under certain conditions, the option to reclassify Available-for-sale Financial Assets into the Loans and Receivables category.

### Other reclassifications (columns D and I)

In addition to the reclassifications described above, the other reclassifications are intended to reallocate the remaining outstanding amounts related to insurance activities to the accounting items commonly used by the rest of the Group.

The financial assets at fair value through profit or loss of the trading portfolio of the insurance subsidiaries (EUR 211 million) on the one hand, the financial assets measured at fair value through profit or loss under the fair value option (EUR 84,448 million) on the other hand, and an asset resulting from a indexed co-insurance agreement, previously shown under other assets (EUR 1,167 million), have been reclassified under Financial assets at fair value through profit or loss. Included in these financial assets, EUR 69,383 million of non-basic instruments have thus been transferred under Financial assets measured mandatorily at fair value through profit or loss; they mainly consist in underlying financial assets of unit-linked contracts previously measured at fair value using the fair value option under IAS 39 to eliminate accounting mismatches with the related insurance liabilities.

Hedging derivatives were reclassified into the corresponding heading for EUR 353 million.

Real estate investments were reclassified as Tangible and intangible fixed assets for EUR 538 million.

Financial liabilities of insurance companies were reclassified as Financial liabilities at fair value through profit and loss for an amount of EUR 4,140 million. These include investments contracts (outside the scope of IFRS 17) and trading derivatives in the scope of IFRS 9.

### Description of the book value adjustments made for the financial instruments and other investments assets as at 1 January 2022 (columns E and J)

The Balance sheet value of the Investments of insurance companies whose valuation method was modified, was adjusted in equity as at 1 January 2022 for a total amount of EUR 509 million before tax effects. This amount includes:

- the revaluation at fair value of investment properties for an amount of EUR 356 million in application of IAS 40 "Investment property", in order to avoid an accounting mismatch between the measurement method applied to the properties and the insurance contracts they are backing;
- the adjustment of the book value of financial assets for a net amount of EUR 153 million as a result of their new measurement method in application of IFRS 9. This amount includes the recognition of additional expected credit losses for EUR 1 million for the Securities at amortised cost.

Gains and losses recognised directly in equity for Financial assets at fair value through other comprehensive income relating to credit risk were reclassified at 1 January 2022 to retained earnings for an amount of EUR 19 million. This refers to the expected credit loss related to the impairment of loans in Stage 1 or Stage 2.

**Description of the derecognition of IFRS 4 insurance contracts and the recognition of insurance contracts under IFRS 17 as at 1 January 2022 (columns F, G, K and L)**

The adjustment of the book value of the insurance contracts assets and liabilities, resulting from the replacement of IFRS 4 (prudent valuation)

by IFRS 17 (economic valuation), was recorded as at 1 January 2022 in equity for a negative amount of EUR 402 million before tax effects.

This amount is broken down as follows:

(1) This amount is composed of Underwriting reserves for EUR 151,148 million and of Other Liabilities for EUR 360 million.

(2) This amount is composed of other assets for EUR 1,702 million and of tangible and intangible fixed assets for EUR 14 million.

(3) This amount is composed of Insurance contracts liabilities for EUR 150,562 million and of Other Liabilities for EUR 28 million.

(4) This amount is composed of Insurance contracts assets for EUR 380 million and of other assets for EUR 16 million.

(5) The contractual service margin (CSM) represents the unearned profit that the entity will recognise in the income statement as the insurance services are provided in the future.

(6) The non-financial risk adjustment corrects the present value of future cash flows in insurance contracts to reflect uncertainty about the amount and timing of these flows.

**Marginal total impact on the Total equity as at 1 January 2022**

As at the transition date (1 January 2022), the retrospective application of IFRS 17 and IFRS 9 by the Group's insurance subsidiaries resulted in a EUR 46 million increase in the Total consolidated equity.

This impact is broken down as follows: a decrease of EUR 402 million related to the transition from IFRS 4 to IFRS 17, an increase of EUR 509 million related to the transition to IFRS 9 and the revaluation of investment properties according to IAS 40, and a decrease of EUR 61 million related to the adjustment of deferred tax assets and liabilities.

### Positive total impact on the Total equity as at 1 January 2023

The retrospective application of IFRS 9 and IFRS 17 by the Group's insurance subsidiaries resulted in an adjustment of the comparative data for the financial year 2022 for an amount of EUR -191 million on the consolidated net income and an amount of EUR +689 million on the unrealised or deferred gains and losses recognised directly in equity.

As at the date of initial application (1 January 2023), the cumulative impact on the Total equity amounted to EUR +544 million.

The table below shows the Group's consolidated income statement for 2022 as published in the last Annual Financial Report and then the restated income statement (2022 R) following the application of IFRS 17 and IFRS 9 by the Group's insurance subsidiaries.

In the Notes to the financial statements, the restated data are identified with "R".

(In EUR m)	2022 R	2022

<b>Consolidated net income</b>	<b>2,756</b>	<b>2,947</b>
Non-controlling interests	931	929
<b>Net income, Group share</b>	<b>1,825</b>	<b>2,018</b>

(1) The variations between the 2022 financial year published and the 2022 financial year restated are linked to the new presentation and measurement of insurance companies' investments, now including in the same headings used by the rest of the Group, previously recorded as Net income from insurance activities.

(2) The financial performance of insurance companies must be analysed by taking into account on one hand the income and expenses from the investments backing in the insurance contracts and on the other hand the net finance income or expenses from insurance contracts measured according to IFRS 17. Both components of expenses and income mentioned above partly offset each other (see Note 4.3, table Detail of liabilities).

(3) The change in Other general operating expenses between the 2022 financial year published and the 2022 financial year restated is related to the allocation within Insurance service expenses of general operating expenses attributable to the fulfilment of insurance contracts.

The table below presents the statement of net income and unrealised or deferred gains and losses published in 2022 and the one restated (2022 R) following the application of IFRS 17 and IFRS 9 by the Group's insurance subsidiaries.

(In EUR m)	2022 R	2022
<b>Consolidated net income</b>	<b>2,756</b>	<b>2,947</b>
<b>Unrealised or deferred gains and losses that will be reclassified subsequently into income</b>	<b>578</b>	<b>(111)</b>

Revaluation of insurance and reinsurance contracts through other comprehensive income <sup>(2)</sup>	10,050	
Revaluation of hedging derivatives	(610)	(380)
Related tax	167	403
<b>Unrealised or deferred gains and losses that will not be reclassified subsequently into income</b>	<b>539</b>	<b>539</b>
<b>Total unrealised or deferred gains and losses</b>	<b>1,117</b>	<b>428</b>
<b>Net income and unrealised or deferred gains and losses</b>	<b>3,873</b>	<b>3,375</b>
<i>o/w Group share</i>	<i>3,080</i>	<i>2,592</i>
<i>o/w non-controlling interests</i>	<i>793</i>	<i>783</i>

(1) The variations between the 2022 financial year published and the 2022 financial year restated are linked to the new presentation and measurement of insurance companies' investments, under the same headings used by the rest of the Group.

(2) The financial performance of insurance companies must be analysed by taking into account on one hand the gains and losses of the investments backing the insurance contracts (now presented according to the nature of the investment considered) and on the other hand the net finance gains and losses from insurance contracts measured according to IFRS 17. Both components of losses and gains mentioned above partly offset each other.

(3) This amount of EUR -1,223 million included, pursuant to the application of IAS 39 and IFRS 4, the re-measurement of the Available-for-sale assets for EUR -11,297 million, and the related Deferred profit-sharing for EUR 10,074 million.

## NOTE 1.5 Use of estimates and judgement

To prepare the Group's consolidated financial statements, in application of the accounting principles described in the Notes, the Management makes assumptions and estimates that may impact the amounts recognised in the income statement or as Unrealised or deferred capital gains and losses, on the valuation of assets and liabilities on the balance sheet, and on the information disclosed in the related notes to the consolidated financial statements.

In order to make these assumptions and estimates, the Management uses the information available when the consolidated financial statements are prepared and may exercise its judgment. Valuations based on estimates intrinsically involve risks and uncertainties relating to their occurrence in the future. Consequently, the actual future results may differ from these estimates and then have a significant impact on the financial statements.

The assumptions and estimates made for the preparation of these consolidated financial statements take account of the uncertainties related to the economic consequences of geopolitics crisis and to the current macroeconomic context. The effects of these events on the assumptions and estimates used are specified in paragraph 6 of this Note.

Estimates and judgment are applied in particular with regard to the following items:

- the fair value on the balance sheet of the financial instruments not listed on an active market that are recognised as Financial assets and liabilities at fair value through profit or loss, Hedging derivatives, Financial assets at fair value through other comprehensive income (described in Notes 3.1, 3.2, 3.3 and 3.4), as well as the fair value of the instruments measured at amortised cost for which this information is disclosed in the Notes to the financial statements (see Note 3.9);

- the impairment and provisions for credit risk related to financial assets measured at amortised cost or at fair value through other comprehensive income and loan commitments and guarantee commitments granted measured using models or internal assumptions based on historical, current and prospective data (see Note 3.8). The use of estimates and judgment relates in particular to the assessment of the deterioration in credit risk observed since the initial recognition of financial assets and the measurement of the amount of expected credit losses on these same financial assets;
- the assumptions and amortisation conventions used to determine the maturities of financial assets and liabilities for the purpose of measuring and monitoring structural interest rate risk and documenting the related macro fair value hedge accounting (see Note 3.2);
- the impairment of Goodwill (see Note 2.2);
- the provisions recorded under liabilities on the balance sheet (see Notes 5.2 and 8.2);
- the estimates related to the valuation of insurance contracts assets and liabilities and of the implementation of the transition methods in the context of the initial application of IFRS 17 (see Note 4.3);
- the tax assets and liabilities recognised on balance sheet (see Note 6);
- an analysis of the characteristics of the contractual cash flows of financial assets in order to determine the appropriate accounting classification (see Note 3);
- the assessment of the degree of control for the determination of the scope of consolidated entities, especially with regard to structured entities (see Note 2.4);
- the determination of the lease period to be applied for recognising the right-of-use assets and lease liabilities (see Note 8.3).

**CLIMATE RISK**

The Group continues its work to gradually integrate climate risks in the preparation of its consolidated accounts. Climate change-related risks are not a new risk category but rather an aggravating factor for categories already covered by the Group's risk management system. In this regard, the impact of transitional risk on the credit risk of the corporate customers of Societe Generale remains one of the major climate risks for the Group.

As at 31 December 2023, the determination of the expected credit losses includes the possible impact of climate risks considered when assessing individual risks and sectoral risks, provided it is compatible

with the provisioning horizon. The impact of the Group's commitments in favour of the energy and environmental transition and the development of the territories are still taken into account in the estimated budgets to determine the recoverable amount of the cash-generating units and the recoverability of the deferred tax assets.

Furthermore, the Group is currently analysing the provisions in the European Sustainability Reporting Standards (ESRS) adopted by the European Commission on 31 July 2023, notably those related to the connections between the future Sustainability reports and the consolidated financial statements.

**NOTE 1.6 Geopolitical crises and macroeconomic context**

2023 was a year of cumulative uncertainties with, in particular, the continuing conflict in Ukraine but also tensions in the banking sector in the United States and Europe at the beginning of the year, as well as the situation in the Middle East at the end of the year. Monetary policies were clearly restrictive. Focusing on inflation control, central banks increased interest rates rapidly and significantly. In the euro area:

- the slowdown in economic activity observed during the first half of 2023 continued and was accentuated during the second half of the year;
- inflation remained high in 2023; it is expected to ease to around 3% in 2024 and fall back to the target in the midterm.

In the US, the economy performed better than expected by most forecasters. Warning signs point to an already apparent sharper slowdown towards the end of the year.

In this context, the Group updated the macroeconomic scenarios chosen for the preparation of the consolidated financial statements.

These macroeconomic scenarios are taken into account in the credit loss measurement models including forward-looking data (see Note 3.8) and are also used in some goodwill impairment tests (see Note 2.2) and tests of the recoverability of deferred tax assets (see Note 6).

**NOTE 1.6.1 MACROECONOMIC SCENARIOS**

As at 31 December 2023, the Group selected three macroeconomic scenarios to help understand the uncertainties related to the current macroeconomic context.

The assumptions selected to build these scenarios are described below:

- the central scenario ("SG Central") predicts a continuing economic slowdown in the euro area in 2024 with only a modest rebound in 2025. The fall in inflation, to around 2.5%, will be accompanied by an increase in the unemployment rate. The ECB would lower its interest rates starting in Spring 2024, but would continue scaling down its balance sheet at least until 2025 (reducing its direct purchases on the market). Economic growth is also expected to decelerate in 2024, interest rates are likely to decrease and inflation should remain on a downward trend while the unemployment rate increases;

- the favourable scenario ("SG Favourable") describes an accelerated economic growth compared to the trajectory projected in the central scenario; this growth may result from improved supply conditions owing to a positive shock on productivity or from unexpectedly improved demand conditions. In both cases, stronger growth will have a positive impact on employment and the profitability of companies;

- the stressed scenario ("SG Stress") corresponds to a crisis situation leading to a negative deviation in GDP compared to the central scenario. This scenario may result from a financial crisis (like the 2008 crisis, euro area crisis, etc.), an exogenous crisis (Covid-19-like pandemic) or a combination of both.

These scenarios are developed by the Economic and Sector Research Division of Societe Generale for all the entities in the Group based, in particular, on the information published by the statistical institutes in each country.

Institutional forecasts produced by organisations like the IMF, the World Bank, the ECB and the OECD and the consensus among market economists serve as a reference to challenge the Group's forecasts.

**NOTE 1.6.2 FINANCIAL INSTRUMENTS: EXPECTED CREDIT LOSSES**

The scenarios provided by the Group economists are incorporated into the expected credit loss provisioning models over a three-year horizon, followed by a two-year period to gradually return by the fifth year to the average probability of default observed during the calibration period. The assumptions made by the Group with a view to developing these macroeconomic scenarios have been updated during the fourth quarter 2023 to account for uncertainties about the macroeconomic context.

**Variables**

The GDP growth rate, the profit margin of companies in France, the unemployment rates, the inflation rate in France and the yield on France 10-year government bonds are the main variables used in the expected credit losses measurement models.

The variables with the stronger impact on the determination of expected credit losses (GDP growth percentage for the major countries in which the Group operates and corporate profit margin in France) for each scenario are detailed hereinafter:

<b>“SG Favourable” scenario</b>	<b>2024</b>	<b>2025</b>	<b>2026</b>	<b>2027</b>	<b>2028</b>
France GDP	1.5	2.7	2.1	2.3	1.5
Corporate profit margin in France	33.0	32.7	32.9	32.9	32.4
Euro area GDP	1.5	2.8	2.1	2.3	1.4
United States GDP	1.9	3.5	2.8	3.0	2.2
China GDP	5.4	6.0	4.8	4.8	3.8
Czech Republic GDP	3.0	4.0	3.1	3.3	2.3
Romania GDP	3.8	4.8	3.8	4.2	3.2

<b>“SG Central” scenario</b>	<b>2024</b>	<b>2025</b>	<b>2026</b>	<b>2027</b>	<b>2028</b>
France GDP	0.5	0.7	1.1	1.3	1.5
Corporate profit margin in France	32.4	32.4	32.4	32.3	32.4
Euro area GDP	0.5	0.8	1.1	1.3	1.4
United States GDP	0.9	1.5	1.8	2.0	2.2
China GDP	4.4	4.0	3.8	3.8	3.8
Czech Republic GDP	2.0	2.0	2.1	2.3	2.3
Romania GDP	2.8	2.8	2.8	3.2	3.2

<b>“SG Stress” scenario</b>	<b>2024</b>	<b>2025</b>	<b>2026</b>	<b>2027</b>	<b>2028</b>
France GDP	(4.5)	(2.3)	(0.4)	0.8	1.5
Corporate profit margin in France	30.2	30.2	30.2	30.1	32.4
Euro area GDP	(4.5)	(2.2)	(0.4)	0.8	1.4
United States GDP	(4.1)	(1.5)	0.3	1.5	2.2
China GDP	(0.6)	1.0	2.3	3.3	3.8
Czech Republic GDP	(3.0)	(1.0)	0.6	1.8	2.3
Romania GDP	(2.2)	(0.2)	1.3	2.7	3.2

These simulations assume that the historical relationships between the key economic variables and the risk parameters remain unchanged. In reality, these correlations may be impacted by geopolitical or climatic events, or changes in behaviour, legal environment or credit granting policy.

The graph below compares the GDP forecasts in the euro area used by the Group for each scenario with the scenarios published by the ECB in December 2023.

## WEIGHTING OF THE MACROECONOMIC SCENARIOS

The probabilities used are based on the differences observed over the past 25 years between the forecasts made by a consensus of economists regarding the US GDP and the actual scenario that occurred (forecast similar to the actual scenario, significantly optimistic or pessimistic).

In order to better account for a possible reversal in the cycle, the Group applies a weighting methodology to its scenarios (mainly based on the observed output gaps for the USA and the euro area) and assigns a higher weight to the SG Central scenario when the economy is depressed. Conversely, the methodology provides for a higher weight to be assigned to the SG Stress scenario when the economy moves towards the peak of the cycle. Accordingly, the weighting applied to the SG Central scenario was set at 62% at 31 December 2023.

## PRESENTATION OF THE CHANGES IN WEIGHTS

	31.12.2023	30.06.2023	31.12.2022
SG Central	62%	62%	60%
SG Stress	28%	28%	30%
SG Favourable	10%	10%	10%

## CALCULATION OF EXPECTED CREDIT LOSSES AND SENSITIVITY ANALYSIS

Credit risk costs as at 31 December 2023, insurance subsidiaries excluded, amount to a net expense of EUR 1,025 million, decreasing by EUR 622 million (38%) compared to 31 December 2022 (EUR 1,647 million).

Sensitivity tests have been performed to measure the impact of the changes in weights on the models. The sectoral adjustments (see Note 3.8) have been taken into account in these sensitivity tests. The scope of these tests includes the Stage 1 and Stage 2 outstanding loans subject to a statistical modelling of the impacts of the macroeconomic variables (which accounts for 88% of the expected credit losses on the outstanding loans concerned compared to 72% as at 31 December 2022).

The results of these tests, taking into account of the effect on the classification of 67% of the total outstanding loans concerned, show that, in the event of a 100% weighting:

- of the SG Stress scenario, the impact would be an additional allocation of EUR 570 million;
- of the SG Favourable scenario, the impact would be a reversal of EUR 378 million;
- of the SG Central scenario, the impact would be a reversal of EUR 248 million.

## COVID-19 CRISIS: STATE GUARANTEED LOANS ("PGE")

Until 30 June 2022, the Group offered its crisis-impacted clients (professionals and corporate clients) the allocation of State Guaranteed Loan facilities ("PGE"). Within the framework of the 2020 French Amending Finance Act and the conditions set by the French decree of 23 March 2020, these are financings granted at cost price and guaranteed by the government for a share of the borrowed amount between 70% to 90% depending on the size of the borrowing enterprise (with a waiting period of two months after disbursement at the end of which the guarantee period begins).

With a maximum amount corresponding, in the general case, to three months of turnover before tax, these loans came with a one-year repayment exemption. At the end of that year, the customer could either repay the loan or amortise it over one to five more years, with the possibility of extending the grace period for the repayment of

principal for one year (in line with the announcements made by the French Ministry of Economics, Finance and Industrial and Digital Sovereignty on 14 January 2021) without extending the total duration of the loan. The remuneration conditions of the guarantee have been set by the State and applied by all French banking institutions: the Bank keeps only a share of the guarantee premium paid by the borrower (the amount of which depends on the size of the Company and the maturity of the loan) remunerating the risk it bears, which corresponds to the part of the loan not guaranteed by the State (i.e., between 10% and 30% of the loan depending on the size of the borrowing company). A French decree published on 19 January 2022, amending the decree published on 23 March 2020, allows some companies to benefit, under certain conditions, from an extension of their PGE repayment deadlines from 6 to 10 years.

The contractual characteristics of the PGE are those of basic loans (SPPI criterion) and these loans are held by the Group within the framework of a business model whose objective is to collect their contractual cash flows until their maturity; as a result, these loans have been recorded in the consolidated balance sheet under "Customer loans at amortised cost".

As at 31 December 2023, after the first repayments made in 2022 and in 2023 at the end of the moratorium period, the amount outstanding corresponding to the State Guaranteed Loans (PGE) granted by the Group is approximately EUR 8.8 billion (of which EUR 1.8 billion classified as Stage 2 and EUR 1.1 billion as Stage 3). The portion of PGE granted by the French Retail networks amounts, as at 31 December 2023, to EUR 7.8 billion (of which EUR 1.6 billion classified as Stage 2 and EUR 0.9 billion as Stage 3); the State guarantee for these loans covers, on average, 90% of their amount.

The expected credit losses recognised as at 31 December 2023 for PGE (French state guaranteed loans) amount to some EUR 240 million of which EUR 171 million booked by the French Retail networks (including EUR 28 million in Stage 2 and EUR 124 million in Stage 3).

## CONSEQUENCES OF THE WAR IN UKRAINE

The table below shows the changes in balance sheet and off-balance sheet exposures (measured at amortised cost or at fair value through OCI) booked by the Group's entities in Russia, on one side, and by the Group's entities outside Russia for Russian counterparties or subsidiaries of Russian groups, on the other side.

(In EUR billion)	31.12.2023		30.06.2023		31.12.2022	
	Exposure at default	Gross outstanding/ commitments	Exposure at default	Gross outstanding/ commitments	Exposure at default	Gross outstanding/ commitments
Onshore exposures on consolidated subsidiaries	0	0	0	0	0.3	0.3
Offshore exposures <sup>(1)</sup>	0.9	1	1.6	1.7	1.8	2
Rosbank residual exposures	0.1	0.1	0.1	0.1	0.1	0.1
<b>TOTAL</b>	<b>1</b>	<b>1.1</b>	<b>1.7</b>	<b>1.8</b>	<b>2.2</b>	<b>2.4</b>

(1) Offshore exposures (exc. Private Banking and residual exposures linked to the disposal of Rosbank) correspond to the exposures on Russian counterparties or subsidiaries of Russian groups booked outside Russia.

### Exposures in Russia and Ukraine

On 11 April 2022, ALD had announced that it would not engage in any new commercial transactions in Russia, Kazakhstan and Belarus without challenging the going concern status over the next twelve months of ALD Automotive OOO in Russia and ALD Automotive LLC in Belarus; the two entities continuing to serve their clients and manage the existing vehicle fleet without encountering any specific difficulties in relation to business activities.

On 27 April 2023, ALD announced the completion of the sale of its ALD Automotive OOO subsidiary in Russia.

ALD Automotive LLC in Belarus was sold on 30 October 2023.

As at 31 December 2023, the Group operates in Russia through its LeasePlan subsidiary with very low residual exposures.

The Group also operates in Ukraine through its ALD Automotive Ukraine Limited Liability Company subsidiary the total balance sheet of which amounts to EUR 82 million as at 31 December 2023.

### Offshore exposures

The Group also holds assets on Russian counterparties the volume of which dropped significantly between 31 December 2022 and 31 December 2023 (owing in particular to the disposal of assets but also to customer reimbursements completed without incident). These outstanding loans including the residual exposures on Rosbank (EUR 1.1 billion against EUR 2.1 billion in 2022) have been classified as “sensitive” from the very beginning of the conflict (see Note 3.8) and declassified to Stage 2 of impairment for credit risk or to Stage 3 when necessary.

The consequences of these classifications, as well as the account taken of the new macroeconomic scenarios to determine expected credit losses as at 31 December 2023 are described in Note 3.8.

Furthermore, to take account of these specific risk exposures the Group supplemented the expected credit losses through a post-model adjustment, as described in Note 3.8.

## NOTE 1.7 Hyperinflation in Turkey and Ghana

Publications from the Centre for Audit Quality’s International Practices Task Force, the usual reference for identifying countries in hyperinflation, show that Turkey and Ghana have been considered hyperinflationary economies since 2022 and 2023 respectively.

Accordingly, the Group applies the provisions of IAS 29 (“Financial Reporting in Hyperinflationary Economies”) to prepare the individual financial statements presented in Turkish liras of the ALD Group entities located in Turkey (including the Turkish subsidiary LeasePlan Otomotiv Servis ve Ticaret A.S acquired in the first half of 2023) and the individual financial statements in cedis of the entity Societe Generale Ghana PLC located in Ghana (before their conversion into euro in the frame of the consolidation process) since 1<sup>st</sup> January 2022 and 1<sup>st</sup> January 2023 respectively.

The accounts of the SG Istanbul branch have, however, not been restated, their impact being non-material.

Under IAS 29, the accounting value of some balance sheet items measured at cost is adjusted, on the closing date, for the inflation effects observed over the period. In the financial statements of the entities concerned, these adjustments are mainly applied to the tangible assets (including in particular the rented car fleet, buildings), as well as to the different components of equity.

On the date of first application of this hyperinflation treatment, the consideration for these adjustments is recognised in the Group retains earnings and Non-Controlling Investments; on that date, the translation differences on the entities concerned are reclassified to the same balance sheets items. At subsequent closing dates, inflation adjustments for the assets concerned and equity items, as well as for income and expenses for the period, are recognised as income or expenses on foreign exchange transactions under Net gains and losses on financial transactions.

Thus restated, the financial statements are converted to euro based on the exchange rate applicable on the closing date.

On 1 January 2023, in the context of the first implementation of the accounting requirements of IAS 29 for the Societe Generale Ghana PLC entity, the total consolidated shareholders’ equity was increased by EUR 21 million, including a reduction in the consolidated reserves of EUR -121.5 million before tax for the different adjustments and the reclassification of the translation differences recorded at that date.

On 31 December 2023, a gain of EUR 122.1 million was recognised in the Net gains and losses on financial transactions from financial adjustments for the period. After taking into account the adjustments of the other income and expense lines of the period, the impact of the restatements for hyperinflation of the consolidated accounting result before tax is EUR 76.9 million.

## NOTE 2 CONSOLIDATION

MAKING IT  
SIMPLE

The various activities of the Societe Generale group in France and abroad are carried out by Societe Generale – Parent company (which includes the Societe Generale foreign branches) and by all of the entities that it controls either directly or indirectly (subsidiaries and joint arrangements) or on which it exercises significant influence (associates). All of these entities make up the scope of the Group consolidation.

Consolidation uses a standardised accounting process to give an aggregated presentation of the accounts of Societe Generale – Parent company and its subsidiaries, joint arrangements and associates, presented as if they were a single entity.

To do so, the individual accounts of the entities that make up the Group are restated so that they are in accordance with IFRS, as adopted by the European Union, in order to present consistent information in the consolidated financial statements.

In addition, the accounting balances (assets, liabilities, income and expense) generated by transactions between Group entities are eliminated through the consolidation process so that the consolidated financial statements present only the transactions and results made with third parties outside of the Group.

### ACCOUNTING PRINCIPLES

The consolidated accounts bring together the accounts of Societe Generale, its foreign branches and the French and foreign entities over which the Group exercises control, joint control or significant influence.

#### Consolidated entities

##### SUBSIDIARIES

Subsidiaries are the entities over which the Group has exclusive control. The Group controls an entity if and only if the three following conditions are met:

- the Group has power over the entity (ability to direct its relevant activities, *i.e.* the activities that significantly affect the entity's returns), through the holding of voting rights or other rights; and
- the Group has exposure or rights to variable returns from its involvement with the entity; and
- the Group has the ability to use its power over the entity to affect the amount of the Group's returns.

##### Power

When determining voting rights for the purpose of establishing the Group's degree of control over an entity and the appropriate consolidation method, potential voting rights are taken into account where they can be freely exercised at the time the assessment is made or at the latest when decisions about the direction of the relevant activities need to be made. Potential voting rights are instruments such as call options on ordinary shares outstanding on the market or rights to convert bonds into new ordinary shares.

Some rights are designed to protect the interests of their holder (protective rights) without giving that party power over the investee to which those rights relate.

If there are several investors, each with substantive rights that give them the unilateral ability to direct different relevant activities, the investor with that has the current ability to direct the activities that most significantly affect the variable returns of the investee is presumed to have power over the investee.

##### Exposure to variable returns

Control exists only if the Group is significantly exposed to the variability of variable returns generated by its investment or its involvement in the entity. These returns, which could be dividends, interest, fees, etc., can be only positive, only negative or both positive and negative.

##### Link between power and variable returns

To assess the link between power and variable returns, if the Group has been delegated decision-making rights that it exercises on behalf and for the benefit of third parties (the principals), it is presumed to act as an agent for these principals, and therefore it does not control the entity when it exercises its decision-making power. In asset management activities, an analysis shall be performed in order to determine whether the asset manager is acting as agent or principal when managing the net assets of a fund; the fund is presumed to be controlled by the asset manager if the latter is considered as a principal.

### Special case of structured entities

A structured entity is an entity designed so that voting rights are not the determining factor in identifying who controls the entity. Such is the case, for example, when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements.

A structured entity often presents certain characteristics such as a limited business activity, a specific and carefully defined purpose, or insufficient capital to fund its activities without the use of subordinated financing. Structured entities may assume different legal forms: stock companies, partnerships, securitisation vehicles, mutual funds, unincorporated entities, etc.

When assessing the existence of control over a structured entity, all facts and circumstances shall be considered among which:

- the purpose and design of the entity;
- the structuring of the entity;
- risks to which the entity is exposed by way of its design and the Group's exposure to some or all of these risks;
- potential returns and benefits for the Group.

Unconsolidated structured entities are those that are not exclusively controlled by the Group.

### JOINT ARRANGEMENTS

Through a joint arrangement (either a joint operation or a joint venture) the Group exercises joint control over an entity if decisions about the direction of its relevant activities require the unanimous consent of the parties that collectively control the entity. Assessing joint control requires an analysis of the rights and obligations of all the parties. In the case of a joint operation, the parties to the arrangement have rights to the assets and obligations for the liabilities.

In the case of a joint venture, the parties have rights to the net assets of the entity.

### ASSOCIATES

Associates are companies over which the Group exercises significant influence and are accounted for using the equity method in the Group's consolidated financial statements. Significant influence is the power to participate in the financial and operating policies of an entity without exercising control. In particular, significant influence can result from Societe Generale being represented on the Board of Directors or Supervisory Board, from its involvement in strategic decisions, from the existence of significant intercompany transactions, from the exchange of management staff, or from the company's technical dependency on Societe Generale. The Group is assumed to exercise significant influence over the financial and operating policies of an entity when it directly or indirectly holds at least 20% of the voting rights in this entity.

### Consolidation rules and methods

The consolidated financial statements are built up from the financial statements of the entities that are included in the consolidation scope. Companies with a fiscal year ending more than three months before or after that of Societe Generale prepare *pro-forma* statements for a twelve-month period ended 31 December. All significant balances, profits and transactions between Group companies are eliminated.

The results of newly acquired subsidiaries are included in the consolidated financial statements from their effective acquisition date while the results of subsidiaries disposed of during the fiscal year are included up to the date where the Group relinquished control.

### CONSOLIDATION METHODS

The subsidiaries, including the structured entities over which the Group has exclusive control, are fully consolidated.

In the consolidated balance sheet, full consolidation consists in replacing the value of the subsidiary's equity securities held by the Group with each of the subsidiary's assets and liabilities, in addition to the goodwill recognised when the Group assumed control over the entity (see Note 2.2). In the income statement and the statement of net income and unrealised or deferred gains and losses, the subsidiary's expense and income items are aggregated with those of the Group.

The portion of non-controlling interests in the subsidiary is presented separately in the consolidated balance sheet and income statement. However, in consolidated structured entities that are controlled by the Group, the portions of these entities not owned by the Group are recognised as Debt in the balance sheet.

In the case of a joint operation, the Group distinctly recognises in its consolidated financial statements its share in the assets and liabilities as well as its share in the related revenue and expense.

Associates and joint ventures are accounted for using the equity method in the consolidated financial statements of the Group. Under the equity method, the investment in an associate is recognised, on initial recognition, under Investments accounted for using the equity method at the cost of the Group's investment in the joint venture or associate, including goodwill and after the date of acquisition the carrying amount is increased or decreased to recognise the changes in the investor's share in the net asset value of the investee.

These investments are tested for impairment if there is objective evidence of impairment. If the recoverable amount of the investment (value in use or market value net of selling costs, whichever is higher) is lower than its carrying amount, an impairment loss is recorded on the balance sheet at the carrying amount of the investment. Impairment allowances and reversals are recorded under Net income from investments accounted for using the equity method in the consolidated income statement.

The Group's share in the entity's net income and unrealised or deferred gains and losses is presented on separate lines in the consolidated income statement and the consolidated statement of net income and unrealised or deferred gains and losses. If the Group's share in the losses of an entity consolidated using the equity method becomes greater than or equal to its ownership interest in the Company, the Group ceases to recognise its share in subsequent losses unless it is required to do so by legal or implied obligations, in which case it records a provision for said losses. Capital gains and losses generated on the disposal of companies accounted for using the equity method are recorded under Net income/expense from other assets.

#### TRANSLATION OF FOREIGN ENTITY FINANCIAL STATEMENTS

The balance sheet items of consolidated companies reporting in foreign currencies are translated into euro at the official exchange rates prevailing at the closing date. Income statement items of these companies are translated into euros, at the average month-end exchange rates. Gains and losses arising from the translation of capital, reserves, retained earnings and income are recognised under Unrealised or deferred gains and losses – Translation differences. Gains and losses arising from the translation of the capital contribution of foreign branches of Group banks are also included in changes in consolidated shareholders' equity under the same heading.

In accordance with the option allowed under IFRS 1, the Group allocated all differences arising on translation of foreign entity financial statements at 1 January 2004 to consolidated reserves. As a result, if any of these entities are sold, the proceeds from the sale will only include write-backs of those translation differences arising since 1 January 2004.

#### CHANGES IN GROUP'S OWNERSHIP INTEREST IN A CONSOLIDATED ENTITY

In the event of an increase in Group's ownership interest in a subsidiary over which it already exercises control, the differences between the price paid for the additional stake and the assessed fair value of the proportion of net assets acquired at this date is recorded under Retained earnings, Group share.

Also, in the event of a reduction in the Group's ownership interest in a subsidiary over which it keeps control, the difference between the selling price and the carrying amount of the share of interests sold is recorded under Retained earnings, Group share.

The costs related to these transactions are recognised directly in equity.

When the Group loses control of a consolidated subsidiary, any investment retained in the former subsidiary is remeasured at fair value through profit or loss, at the same time the capital gain or loss is recorded under Net income/expense from assets in the consolidated income statement. The gains or losses on disposals include a share of goodwill previously allocated to the cash-generating units to which the subsidiary belongs. This share's determination is based on a normative capital allocated to the subsidiary that is sold and to the portion of cash-generating unit that is retained.

#### Commitments to buy out minority shareholders in fully consolidated subsidiaries

In some fully consolidated Group subsidiaries, the Group has awarded minority shareholders commitments to buy out their stakes. For the Group, these buyout commitments are put option sales (put options without transfer of the risks and advantages associated with the ownership interest before the option's exercise). The exercise price for these options can be established using a formula agreed upon at the time of the acquisition of the shares in the subsidiary that takes into account its future performance. It can also be set as the fair value of these shares at the exercise date of the options.

The commitments are recorded as follows:

- in accordance with IAS 32, the Group records a financial liability for the put options granted to minority shareholders of the subsidiaries over which it exercises control. This liability is initially recognised at the present value of the estimated exercise price of the put options under Other liabilities;
- the obligation to recognise a liability even though the put options have not been exercised means that, in order to be consistent, the Group must use the same accounting treatment as the one applied to transactions in Non-controlling interests. As a result, the counterpart of this liability is a write-down in value of non-controlling interests underlying the options, with any balance deducted from Retained earnings, Group share;
- subsequent variations in this liability (linked to changes in the estimated exercise price of the options and the carrying value of Non-controlling interests) are recorded in full in Retained earnings, Group share;
- if the buy-out takes place, the liability is settled by the cash payment linked to the acquisition of non-controlling interests in the subsidiary. However if, when the commitment reaches its term, the buy-out has not occurred, the liability is written off against Non-controlling interests and Retained earnings, Group share for their respective portions;
- as long as the options have not been exercised, the results linked to Non-controlling interests with a put option are recorded under Non-controlling interests on the Group's consolidated income statement.

## NOTE 2.1 Consolidation scope

The consolidation scope includes subsidiaries and structured entities under the Group's exclusive control, joint arrangements (joint ventures and joint operations) and associates whose financial statements are significant relative to the Group's consolidated financial statements, notably regarding Group consolidated total assets and gross operating income.

The main changes to the consolidation scope as at 31 December 2023, compared with the scope applicable at the closing date of 31 December 2022, are as follow:

### SALE OF SOCIETE GENERALE CONGO

The Group sold the totality of its holding in SG Congo, its Congolese subsidiary. This sale led to a reduction of EUR 0.3 billion in the total Group's balance sheet.

### LEASEPLAN ACQUISITION BY ALD

On 22 May 2023, following the approval of ALD's Board of Directors and relevant regulatory authorities' approvals, ALD acquired 100% of LeasePlan for a consideration of EUR 4,897 million. This amount is subject to a contingent additional consideration of an amount up to EUR 235 million in cash, according to the achievements of objectives related to LeasePlan's regulatory ratios particularly.

The consideration includes:

- a cash component: EUR 1,828 million mainly financed *via* a capital increase of EUR 1,212 million in 2022. Societe Generale held 79.82% of ALD's capital prior to this increase. In accordance with its commitment to remain ALD's majority shareholder in the long term, Societe Generale subscribed to new shares for an amount of EUR 803 million representing 66.26% of the capital increase and held, at the end of 2022, 75.94% of ALD;
- a share component: 251,215,332 new ALD shares have been issued, representing 30.75% of ALD capital after the completion of the acquisition, and before the exercise of the attached warrants. The value of this share component amounts to EUR 2,871 million, based on the fair value of ALD's shares of EUR 11.43 at the completion date;

- a warrant component: ALD has issued 26,310,039 warrants attached to ALD's share for the benefit of LeasePlan's selling shareholders, so that their total shareholding could reach 32.91% in case of full exercise of warrants. Their main characteristics are as follows: exercise price of EUR 2.00 per share; parity of 1 warrant for 1 share; and exercisable one to three years after their issuance, if the ALD share price reaches EUR 14.07 per share in the exercise period. The fair value of these warrants' amounted, as at 22 May 2023, EUR 128 million. This value was determined based on a Black & Scholes mathematical valuation model, taking as main assumptions the exercise possible at any time between one and three years; a euro area risk-free interest rate and an assumed historical volatility of the observed ALD share of around 30%. In the Group's financial statements, the warrants attached to shares are recorded in Retained earnings;

- a contingent consideration: estimated by the Group at its fair value of EUR 70 million, as at 31 December 2023. The earn-out mechanism will last until 31 December 2024, subject to an additional 6-month period in certain limited circumstances, with potential payments every quarter. In the Group's financial statements, the contingent consideration is recorded as Other liabilities.

After the completion of the LeasePlan acquisition, Societe Generale remains the majority shareholder of the new combined entity, named Ayvens since 16 October 2023, with a stake of 52.59% (the Group voting interest is 68.97% as at 31 December 2023 due to double voting rights). This stake may be reduced to 50.95% in the event of the exercise of the shares with warrants attached that have been granted to LeasePlan shareholders to allow them to increase their stake up to 32.91% of Ayvens' social capital. As of 31 December 2023, the former LeasePlan shareholders consortium led by TDR Capital holds 30.75% of the combined entity, while the free float represents 16.6%.

Following the completion of the whole transaction, the Ayvens group will remain fully consolidated by the Group.

Details of the purchase price are set out in the table below:

(In EUR m)

Purchase price paid in ALD shares <sup>(1)</sup>	2,871
Fair value of warrants attached to shares	128
<b>Acquisition price paid in ALD equity instruments</b>	<b>2,999</b>
<b>Acquisition price paid in cash</b>	<b>1,828</b>
<b>Total acquisition price</b>	<b>4,827</b>
Contingent consideration	70
<b>Total acquisition price including contingent consideration</b>	<b>4,897</b>

(1) o/w 26,310,039 shares with warrants attached.

As at 31 December 2023, subject to any purchase price allocation and/or acquisition price adjustment within one year from closing, the Group has recognised a goodwill of EUR 1,396 million (see Note 2.2).

As a result of the allocation of LeasePlan's purchase price, the assessment of the entity's identifiable assets acquired and liabilities assumed at fair value led the Group to revise upwards the value of LeasePlan's net assets by EUR 230 million.

<i>(In EUR m)</i>	Certified balance sheet at acquisition date	Fair value adjustment	Allocation as at 31 December 2023
Cash, due from central banks	3,812	-	3,812
Customer loans at amortised cost	615	-	615
Net non-current assets and liabilities held for sale <sup>(1)</sup>	617	33	650
Tangible and intangible fixed assets	23,891	330	24,221
<i>o/w Assets under operating leases</i>	20,983	429	21,412
Debts securities issued	(9,327)	7	(9,320)
Due to bank	(2,687)	(7)	(2,694)
Customer deposits	(11,334)	33	(11,301)
Net tax assets/liabilities	(505)	(64)	(569)
Net other assets and liabilities	(1,298)	(102)	(1,400)
Fair value of assets and liabilities acquired (C)	3,784	230	4,014
Non-controlling interests <sup>(2)</sup> (B)	513	-	513
Total purchase price (A)	4,897	-	4,897
<b>GOODWILL (A) + (B) - (C)</b>	<b>1,626</b>	<b>(230)</b>	<b>1,396</b>

(1) Amount after elimination of intra-group transactions.

(2) Other equity instruments issued.

As part of the purchase price allocation update, the table above includes mainly the following adjustments to the assets acquired and liabilities assumed disclosed as at 31 December 2023:

Assets/liabilities of LeasePlan	Description of the valuation approach
Asset under operating leases – rental fleet	Fair value of the fleet is obtained by adding the sum of the future discounted cash flows of lease and additional services with the discounted terminal value (residual value of the vehicle which is its expected sales price). The implemented valuation relies on DCF model for each contract and considers regional parameters such as specific tax rates and country risk premia.
Intangible assets – customer relationships of Business to Business segment of LeasePlan	Customer relationships intangible asset has been recognised separately from goodwill and it materialises the loyalty of Business to Business fleet customers to LeasePlan. The valuation is based on Multi-period excess earnings method (M.P.E.E.M.).
Intangibles assets – softwares	In the framework of the valuation, the Group has estimated the cost that would be incurred to develop each domains needed to have a fully functional technology multiplied by a completion rate by domain.

The combined entity is well-positioned to deliver profitable growth drawing on a fleet of around 3.4 million vehicles, including worldwide biggest multi-brand electric vehicle fleet, and a direct presence in 44 countries covering all customers categories.

ALD and LeasePlan serve the same three client segments (large corporates, SMEs, individual consumers), but each of them has specific areas of leadership. LeasePlan has a network of large and very large blue-chip international and national corporate clients and has been particularly strong in this segment in which a customer overlap with ALD is limited. ALD has developed a strong network of partnerships with more than 200 partners across a large spectrum of sectors. It allowed the Company to rapidly develop its presence in the SME and individual consumers segments. This complementarity must offer to the combined entity the best footprint across all segments.

ALD benefits a financing structure and strong credit ratings facilitating efficient access to external funding. LeasePlan relies on its deposit collection platforms in Germany and the Netherlands. The combined entity would therefore have an enlarged funding source base.

The consolidated income of the Group includes the income of LeasePlan's activities from 22 May 2023. As at 31 December 2023, the contribution of LeasePlan's activities amounts to EUR 693 million in net banking income and EUR 24 million in Consolidated net income.

On 22 March 2023, the Group announced that ALD entered into a share agreement to sell its subsidiaries in Ireland, Portugal and Norway, as well as LeasePlan's subsidiaries in Luxembourg, Finland and Czech Republic. These disposals have been initiated to fulfil the commitments made by ALD in the context of the clearance by the European Commission of the acquisition of LeasePlan by ALD, to address concentration risk in the involved countries. As at 31 December 2023, the Group has completed these disposals.

#### CREATION OF A JOINT VENTURE BY SOCIETE GENERALE AND ALLIANCEBERNSTEIN

On 6 February 2023, Societe Generale and AllianceBernstein signed a *Memorandum of Understanding* for the creation of a joint venture combining their cash equities and equity research businesses.

On the date of completion of the transaction, scheduled in the first half of 2024 the joint venture will be organised under two separate legal entities, one focusing on North America and the other on Europe and Asia.

The Group assesses that, in the consolidated statements, the entity responsible for the Europe and Asia activities should be fully consolidated and the entity responsible for the North America activities should be accounted for using the equity method.

Subject to the relevant regulatory approvals, some options might allow Societe Generale to eventually reach 100% ownership in both entities.

**NOTE 2.2 Goodwill**

When the Group acquires a company, it integrates in its consolidated balance sheet all of the new subsidiary's assets and liabilities at fair value.

But the acquisition price of a company is generally higher than the net revalued amount of its assets and liabilities. The excess value, called goodwill, can represent part of the Company's intangible capital (reputation, quality of its personnel, market shares, etc.) which contributes to its overall value, or the value of the future synergies that the Group hopes to develop by integrating the new subsidiary in its existing activities.

In the consolidated balance sheet, the goodwill is recognised as an intangible asset, the useful life of which is presumed to be unlimited; it is not amortised and therefore does not generate any recurring expense in the Group's future results.

However, every year, the Group assesses whether the value of its goodwill has not depreciated. If it has, an irreversible expense is immediately recognised in the Group results, which indicates that the profitability of the intangible capital of the acquired entity is inferior to initial expectations, or that the anticipated synergies have not been fulfilled.

**ACCOUNTING PRINCIPLES**

The Group uses the acquisition method to recognise its business combinations in accordance with IFRS 3 "Business Combinations".

On the acquisition date, the acquisition cost is calculated as the total fair value of all assets given, liabilities incurred or assumed and equity instruments issued in exchange for the control of the acquired entity. The costs directly linked to business combinations are recognised in profit or loss for the period except those related to the issuance of equity or debt instruments.

Any contingent consideration is included in the acquisition cost at its fair value on the acquisition date, even if its occurrence is only potential. It is recognised under equity or debt in the balance sheet depending on the settlement alternatives. If recognised as debt, any subsequent adjustment is recorded under income for financial liabilities in accordance with IFRS 9 and within the scope of the appropriate standards for other debts. If recognised as equity instruments, these subsequent adjustments are not recorded.

On the acquisition date, as required by IFRS 3, all assets, liabilities, off-balance sheet items and contingent liabilities of this new subsidiary (even if they were not recognised before the combination) are measured individually at their fair value regardless of their purpose. At the same time, non-controlling interests are valued according to their share of the fair value of the identifiable assets and liabilities of the acquired entity. However, for each business combination, the Group may also choose to measure non-controlling interests initially at their fair value, in which case a fraction of goodwill is allocated.

Any excess of the price paid over the assessed fair value of the proportion of net assets acquired is recorded on the asset side of the consolidated balance sheet under Goodwill. Any deficit is immediately recognised in profit or loss.

On the acquisition date, any stake in this entity already held by the Group is remeasured at fair value through profit or loss. In the case of a step acquisition, goodwill is therefore determined by referring to the fair value on the acquisition date.

The analyses and professional appraisals required for this initial valuation must be carried out within 12 months as from the acquisition date, as must any corrections to the value based on new information related to facts and circumstances existing at the acquisition date. Goodwill and non-controlling interests initially recorded are consequently adjusted. On the acquisition date, each item of goodwill is allocated to one or more cash-generating units expected to derive benefits from the acquisition. When the Group reorganises its reporting structure in a way that changes the composition of one or more cash-generating units, goodwill previously allocated to modified units is reallocated to the units affected (new or existing). This reallocation is generally performed using a relative approach based on the normative capital requirements of each cash-generating unit (CGU) affected.

Goodwill is reviewed regularly by the Group and tested for impairment whenever there is any indication that its value may have diminished, and at least once a year. Any impairment of goodwill is calculated based on the recoverable value of the relevant cash-generating unit(s).

If the recoverable amount of the cash-generating unit(s) is less than its (their) carrying amount, an irreversible impairment is recorded in the consolidated income statement for the period under Value adjustment on goodwill.

As at 31 December 2023, goodwill is split into the following nine CGUs:

Pillars	Activities
<b>French Retail Banking, Private Banking and Insurances</b>	
French Retail Banking and Private Banking	Societe Generale's retail banking network, Boursorama online banking activities, wealth Management Solutions
Insurances	Life and non-life insurance activities in France and abroad (including Sogécap, Sogessur, Oradéa Vie and Antarius)
<b>Global Banking and Investor Solutions</b>	
Global Markets and Investor Services	Market solutions for businesses, financial institutions, the public sector, family offices and a full range of securities services, clearing services, execution, prime brokerage and custody
Financing and Advisory	Advisory and financing services for businesses, financial institutions, the public sector and transaction and payment management services
<b>International Retail Banking, Mobility and Leasing Services</b>	
Europe	Retail banking in Europe, notably in Czech Republic (KB) and Romania (BRD)
Africa, Mediterranean Basin and Overseas	Retail banking and consumer finance in Africa, the Mediterranean Basin and Overseas, including in Morocco (SGMA), Algeria (SGA), Tunisia (UIB), Cameroon (SGBC), Côte d'Ivoire (SGBCI) and Senegal (SGBS)
Equipment and Vendor Finance	Financing of sales and professional equipment by Societe Generale Equipment Finance
Auto Leasing Financial Services	Operational vehicle leasing and fleet management services (Ayvens)
Consumer finance	Consumer finance in Europe including Germany (Hanseatic Bank, BDK), Italy (Fiditalia), and France (CGL)

#### PERIMETER OF CGUS AS OF 31 DECEMBER 2023

As part of the change in the Group's governance in the second half of 2023, the organisation of the perimeter of CGUs has evolved:

- the CGU Insurances is now attached to the RPBI Pillar (Retail and Private Banking and Insurance);
- the former CGU Europe consisted of the retail banking activities in Europe (KB and BRD) and the consumer finance activities in France

(CGL), Germany (Hanseatic Bank and BDK) and Italy (Fiditalia). From now on, two separate CGUs are presented:

- the CGU Consumer Finance brings together consumer credit activities in France, Germany and Italy. This CGU is now part of the Mobility and Leasing Services operating segment,
- and the residual CGU Europe including KB and BRD. This CGU remains integrated in the International Retail Banking operating segment.

The table below shows by CGU and by operating segment (Note 8.1) the changes over the year 2023 in the values of goodwill:

<i>(In EUR m)</i>	Value as at 31.12.2022	Acquisitions and other increases	Disposals and other decreases	Transfers	Impairment	Value as at 31.12.2023
<b>French Retail and Private Banking</b>	<b>1,068</b>	<b>81</b>	-	-	-	<b>1,149</b>
French Retail and Private Banking	1,068	81	-	-	-	1,149
<b>Insurances</b>	<b>334</b>	<b>14</b>	-	-	-	<b>348</b>
Insurances	334	14	-	-	-	348
<b>International Banking</b>	<b>1,473</b>	-	<b>(4)</b>	<b>(528)</b>	<b>(110)</b>	<b>831</b>
Europe	1,359	-	-	(528)	-	831
Africa, Mediterranean Basin and Overseas	114	-	(4)	-	(110)	-
<b>Mobility and Leasing Services</b>	<b>849</b>	<b>1,415</b>	-	<b>528</b>	<b>(228)</b>	<b>2,564</b>
Equipment and Vendor Finance	228	-	-	-	(228)	-
Auto Leasing Financial Services <sup>(1)</sup>	621	1,398	-	-	-	2,019
Consumer finance	-	17	-	528	-	545
<b>Global Markets and Investor Services</b>	-	-	-	-	-	-
Global Markets and Investor Services	-	-	-	-	-	-
<b>Financing and Advisory</b>	<b>57</b>	-	-	-	-	<b>57</b>
Financing and Advisory	57	-	-	-	-	57
<b>TOTAL</b>	<b>3,781</b>	<b>1,510</b>	<b>(4)</b>	-	<b>(338)</b>	<b>4,949</b>

(1) The increase is almost completely related to the acquisition of LeasePlan (see Note 2.1).

## IMPAIRMENT TEST OF CGU

The Group performed an annual impairment test on 31 December 2023 for each CGU to which goodwill had been allocated.

A CGU is defined as the smallest identifiable group of assets that generates cash inflows, which are largely independent of the cash inflows from the Group's other assets or groups of assets. Impairment tests consist into assessing the recoverable value of each CGU and comparing it with its carrying value. An irreversible impairment loss is recorded in the income statement if the carrying value of a CGU, including goodwill, exceeds its recoverable value. This loss is booked under value adjustment on goodwill.

The recoverable amount of a CGU is calculated using the discounted cash flow (DCF) method applied to the entire CGU.

The key principles retained for the implementation of annual tests for the assessment of the recoverable value of CGUs are as follows:

- for each CGU, estimates of future distributable dividends are determined over a five-year period, based on a four-year budget trajectory (2024-2027) extrapolated to 2028, the latter year being used as a "normative" year to calculate the terminal value;

- these estimates consider the equity target allocated to each CGU, in increase compared to 31 December 2022 (12% of the risk-weighted assets of each CGU versus 11% for 2022);
- the growth rates used to calculate the terminal value are determined using forecasts on sustainable long-term economic growth and inflation. These rates are estimated using two main sources, namely the International Monetary Fund and the economic analyses produced by SG Cross Asset Research which provide 2027 or 2028 forecasts;
- the projected dividends are then discounted based on a rate equal to the risk-free rate grossed up by a risk premium based on the CGU's underlying activities. This risk premium, specific to each activity, is calculated from a series of equity risk premiums published by SG Cross Asset Research and from its specific estimated volatility (beta). Where appropriate, the risk-free rate is also grossed up by a sovereign risk premium, representing the difference between the risk-free rate available around monetary assignment (mainly US dollar area or Euro area) and the interest rate observed on liquid long-term treasury bonds issued (mainly US dollar area or Euro area), in proportion with risk-weighted assets for CGUs covering several countries.

As of 31 December 2023, the specific discount rates and long-term growth rates to the CGUs of the Group's three pillars are as follows:

<b>Assumptions as at 31 December 2023</b>	<b>Discount rate</b>	<b>Long-term growth rate</b>
French Retail Banking and Private Banking	9.6%	2.0%
Insurances	10.2%	2.5%
Global Markets and Investor Services	11.7%	2.0%
Financial Services	10,3%	2.0%
International Retail Banking	11.9% to 13.7%	2.0% to 3.0%
Mobility and Leasing Services	10.5% to 10.6%	2.0%

The budget trajectories take into account in particular the impacts of the commitments in favor of the energy and environmental transition and the development of the territories detailed in the Declaration of Non-Financial Performance.

These budgets are based on the following main business and macroeconomic assumptions:

## Pillars

### French Retail Banking, Private Banking and Insurances

French Retail Banking and Private Banking	<ul style="list-style-type: none"> <li>▪ Ongoing efforts to shift operations and relationship banking at Societe Generale towards a digital model</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Consolidation of commercial and operational efficiency in Wealth Management and continued development of synergies with retail banking network</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Confirmation of Boursorama's customer acquisition plan to reach more than 8 millions clients in 2026</li> </ul>
Insurances	<ul style="list-style-type: none"> <li>▪ Reinforcement of integrated bank insurance model and continued dynamic growth in France and abroad in synergy with the retail banking network, Private Banking and financial services to businesses</li> </ul>

### Global Banking and Investor Solutions

Global Markets and Investor Services	<ul style="list-style-type: none"> <li>▪ Thanks to the restructuring initiated, better balance of the portfolio of businesses securing future revenues and enabling an optimisation of the use of resources in a standardised market context</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Consolidation of market-leading franchises (equities) and growth mainly supported by financing and investment solutions activities</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Continued of optimisation measures and investments in information systems</li> </ul>
Financing and Advisory	<ul style="list-style-type: none"> <li>▪ Consolidation of origination momentum of financing activities oriented towards capital consumption optimisation</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Consolidation of market-leading franchises (commodity and structured financing) and continued RSE business development</li> </ul>

### International Retail Banking, Mobility and Leasing Services

Europe	<ul style="list-style-type: none"> <li>▪ Continued adaptation of our models to capture growth potential in the region and consolidate the competitive positions of our operations</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Strict discipline applied to operating expenses and normalisation of cost of risk</li> </ul>
Africa, Mediterranean Basin and Overseas	<ul style="list-style-type: none"> <li>▪ Continued development of Societe Generale's sales network</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Continued focus on operating efficiency (automatisation, dematerialisation, digitalisation and mutualisation initiatives) and gradual reduction cost of risk</li> </ul>
Equipment and Vendor Finance	<ul style="list-style-type: none"> <li>▪ Consolidation of leadership in these corporate financing businesses</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Strict discipline applied to operating expenses and scarce resources</li> </ul>
Auto Leasing Financial Services	<ul style="list-style-type: none"> <li>▪ Creation of a leading global player in mobility with the integration of LeasePlan</li> </ul>
	<ul style="list-style-type: none"> <li>▪ New strategic plan articulated around four priorities: clients, operational efficiency, responsibility and profitability</li> </ul>
Consumer Finance	<ul style="list-style-type: none"> <li>▪ Continued adaptation of our models to capture growth potential in the region and consolidate the competitive positions of our operations</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Strict discipline applied to operating expenses and normalisation of cost of risk</li> </ul>

The goodwill on Africa, Mediterranean Basin and Overseas and Equipment and Vendor Finance CGUs was fully written down on 30 September 2023 as a result of the appearance of indications of impairment.

As of 31 December 2023, the CGU impairment tests were carried out on both the old and the new CGUs, to neutralise any structural effect related to the splitting of the CGU Europe into two CGUs (Europe: KB and BRD and Consumer Credit: Fidelity, Hanseatic Bank, BDK and CGL).

The tests carried out in this way show that the recoverable amount of these CGUs remains higher than their carrying value.

For CGUs, the tests carried out on 31 December 2023 show that the recoverable amount remains higher than the book value.

Sensitivity tests were performed to measure the impact of the change in the discount rate and in the long-term growth rate on the recoverable amount of each CGU. The results of these tests show that:

- a 50 basis point increase applied to all CGU discount rates shown in the table above would result in a decrease in the total recoverable amount of 6.5% without requiring additional impairment of any CGU;
- a 50 basis point reduction in long-term growth rates would result in a 2.4% decrease in the total recoverable amount without requiring additional depreciation of any CGU;
- by combining these two sensitivity cases, the total recoverable amount would result in a 8.4% decrease without requiring additional depreciation of any CGU.

## NOTE 2.3 Additional disclosures for consolidated entities and investments accounted for using the equity method

This Note provides additional disclosures for entities included in the consolidation scope.

These disclosures concern entities over which Societe Generale exercises exclusive control, joint control or significant influence,

provided these entities have significant impact on the Group's consolidated financial statements. The significance of the impact is considered in particular regarding Group consolidated total assets and gross operating income.

### NOTE 2.3.1 CONSOLIDATED STRUCTURED ENTITIES

Consolidated structured entities include:

- collective investment vehicles such as SICAVs (open-ended investment funds) and mutual funds managed by the Group's asset management subsidiaries;
- securitisation funds and conduits issuing financial instruments that can be subscribed for by investors and that generate credit risks inherent in an exposure or basket of exposures which can be divided into tranches; and
- asset financing vehicles (aircraft, rail, shipping or real estate finance facilities).

The Group has entered into contractual agreements with certain consolidated structured entities that may lead to financial support for these entities due to their exposure to credit, market or liquidity risks.

The Group did not provide any financial support to these entities outside of any binding contractual arrangement and, as of 31 December 2023, does not intend to provide such support.

Securities issued by structured debt vehicles carry an irrevocable and unconditional guarantee from Societe Generale for payment of amounts due by the issuer. These issuers also enter into hedging transactions with Societe Generale to enable them to meet their payment obligations. As at 31 December 2023, the amount of outstanding loans thus guaranteed is EUR 55.4 billion.

As part of its securitisation activities on behalf of its clients or investors, Societe Generale grants two liquidity lines to ABCP (Asset Back Commercial Paper) conduits for a total amount for EUR 28.3 billion as at 31 December 2023.

### NOTE 2.3.2 NON-CONTROLLING INTERESTS

Non-controlling interests refer to equity holdings in fully consolidated subsidiaries that are neither directly nor indirectly attributable to the Group. They include equity instruments issued by these subsidiaries and not held by the Group, as well as the share of income and accumulated reserves, and of unrecognised or deferred gains and losses attributable to the holders of these instruments.

Non-controlling interests amount to EUR 10,272 million as at 31 December 2023 (versus EUR 6,356 million as at 31 December 2022) and account for 13% of total shareholders' equity as at 31 December 2023 (versus 9% as at 31 December 2022).

## INFORMATION ON SHAREHOLDER'S EQUITY OF NON-CONTROLLING INTERESTS

<i>(In EURm)</i>	<b>31.12.2023</b>	<b>31.12.2022 R</b>
Capital and reserves	9,095	5,733

**COMMITMENTS TO RELATED PARTIES FOR ASSOCIATES AND JOINT VENTURES**

As at 31 December 2023, the Group has no commitments with related parties linked to associates and joint ventures.

**NOTE 2.3.4 SIGNIFICANT RESTRICTIONS ON THE ABILITY TO ACCESS OR USE THE ASSETS OF THE GROUP**

Legal, regulatory, statutory or contractual constraints or requirements may restrict the ability of the Group to transfer assets freely to or from entities within the Group.

The ability of consolidated entities to distribute dividends or to grant or repay loans and advances to entities within the Group depends on, among other things, local regulatory requirements, statutory reserves and financial and operating performance. Local regulatory requirements may concern regulatory capital, exchange controls or non-convertibility of the local currency (as it is the case in countries belonging to the West African Economic and Monetary Union or to the Economic and Monetary Community of Central Africa), liquidity ratios (as in the United States) or large exposures ratios that aim to cap the entity's exposure in relation to the Group (regulatory requirement to be fulfilled in most countries in Eastern and Central Europe, Maghreb and sub-Saharan Africa). Since May 2022, Russia published legislation providing for temporary restrictions and a special procedure on cash and capital movements initiated by Russian limited companies in favour of their foreign stakeholders related to "unfriendly countries".

The ability of the Group to use assets may also be restricted in the following cases:

- assets pledged as security for liabilities, notably guarantees provided to the central banks, or assets pledged as security for transactions in financial instruments, mainly through guarantee deposits with clearing houses;
- securities that are sold under repurchase agreements or that are lent;
- assets held by insurance subsidiaries in representation of unit-linked liabilities with life-insurance policyholders;
- assets held by consolidated structured entities for the benefit of the third-party investors that have bought the notes or securities issued by the entity;
- mandatory deposits placed with central banks.

## NOTE 2.4 Unconsolidated structured entities

The information provided hereafter concerns entities structured but not controlled by the Group. This information is grouped by main type of similar entities, such as Financing activities, Asset management and Others (including Securitisation and Issuing vehicles).

Asset financing includes lease finance partnerships and similar vehicles that provide aircraft, rail, shipping or real estate finance facilities.

Asset management includes mutual funds managed by the Group's asset management subsidiaries.

Securitisation includes securitisation funds or similar vehicles issuing financial instruments that can be subscribed for by investors and that generate credit risks inherent in an exposure or basket of exposures which can be divided into tranches.

The Group's interests in unconsolidated entities that have been structured by third parties are classified among financial instruments in the consolidated balance sheet according to their nature.

### NOTE 2.4.1 INTERESTS IN UNCONSOLIDATED STRUCTURED ENTITIES

The Group's interests in an unconsolidated structured entity refer to contractual and non-contractual involvements that expose the Group to the variability of returns from the performance of this structured entity.

Such interests can be evidenced by:

- the holding of equity or debt instruments regardless of their rank of subordination;
- other funding (loans, cash facilities, loan commitments, liquidity facilities);
- credit enhancement (guarantees, subordinated instruments, credit derivatives...);

- issuance of guarantees (guarantee commitments);
- derivatives that absorb all or part of the risk of variability of the structured entity's returns, except Credit Default Swap (CDS) and options purchased by the Group;
- contracts remunerated by fees indexed to the structured entity's performance;
- tax consolidation agreements.

	Asset financing		Asset management		Others	
	31.12.2023	31.12.2022	31.12.2023	31.12.2022	31.12.2023	31.12.2022
<i>(In EUR m)</i>						
<b>Total balance sheet<sup>(1)</sup> of the entity</b>	<b>4,799</b>	<b>5,898</b>	<b>19,509</b>	<b>18,090</b>	<b>11,740</b>	<b>23,085</b>

<b>Assets</b>	<b>2,664</b>	<b>2,646</b>	<b>769</b>	<b>2,579</b>	<b>8,044</b>	<b>8,719</b>
Financial assets at fair value through profit or loss	156	138	647	2,377	557	1,181
Financial assets at fair value through other comprehensive income	-	-	-	-	-	51
Financial assets at amortised cost	2,505	2,503	122	43	7,487	7,486
Others	3	5	-	159	-	1
<b>Liabilities</b>	<b>1,356</b>	<b>1,419</b>	<b>784</b>	<b>2,941</b>	<b>2,147</b>	<b>1,410</b>
Financial liabilities at fair value through profit or loss	105	99	422	2,530	456	175
Due to banks and customer deposits	1,159	1,257	294	384	1,635	1,235
Others	92	63	68	27	56	-

(1) For Asset management: NAV (Net Asset Value) of funds.

The Group may grant to these entities repayable advances related to the establishment of working capital, which remain insignificant.

However, this year, the Group has not provided any financial support to these entities, except if bound to by contract, and, as of 31 December 2023, does not intend to provide such support.

The maximum exposure to loss related to interests in unconsolidated structured entities is measured as:

(In EUR m)	Asset financing		Asset management		Others	
	31.12.2023	31.12.2022	31.12.2023	31.12.2022	31.12.2023	31.12.2022
Amortised cost or fair value (according to the measurement of the financial instrument) of non-derivative financial assets entered into with the structured entity	2,633	2,538	2,395	4,340	514	1,932
Fair value of derivative financial assets recognised in the balance sheet	42	59	484	620	69	346
Notional amount of CDS sold (maximum amount to be paid)	-	-	-	-	-	-
Notional amount of loan or guarantee commitments granted	574	367	734	112	1,382	1,498
<b>Maximum exposure to loss</b>	<b>3,249</b>	<b>2,964</b>	<b>3,613</b>	<b>5,072</b>	<b>1,965</b>	<b>3,776</b>

The amount of maximum exposure to loss can be mitigated by:

- the notional amount of guarantee commitments received;
- the fair value of collateral received;
- the carrying amount of surety deposits received.

These mitigating amounts must be capped in case of legal or contractual limitation of their realisable or recoverable amounts. They amounted to EUR 1,006 million and mainly concern Asset financing.

#### NOTE 2.4.2 INFORMATION ON UNCONSOLIDATED STRUCTURED ENTITIES SPONSORED BY THE GROUP

The Group may have no ownership interest in a structured entity, but still be considered as a sponsor of this structured entity if it acts or has acted as:

- a structurer;
- an originator for potential investors;
- an asset manager;
- an implicit or explicit guarantor of the entity's performance (in particular *via* capital or return guarantees granted to mutual fund unit holders).

A structured entity is also considered to be sponsored by the Group if its name includes the name of the Group or the name of one of its subsidiaries.

Conversely, entities that are structured by the Group according to specific needs expressed by one or more customers or investors are considered to be sponsored by said customers or investors.

As at 31 December 2023, the total amount of the balance sheet of these unconsolidated structured entities, sponsored by the Group, and in which the Group does not have any interest, was EUR 4,356 million.

In 2023, no significant revenue has been recognised for these structured entities.

#### NOTE 2.5 Non-current assets held for sale and related debt

##### ACCOUNTING PRINCIPLES

A non-current asset or group of assets and liabilities is deemed to be "held for sale" if its carrying value will primarily be recovered through a sale and not through its continuing use. For this classification to apply, the asset or group of assets and liabilities must then be immediately available-for-sale in its present condition and it must be highly probable that the sale will occur within twelve months.

For this to be the case, the Group must be committed to a plan to sell the asset (or disposal group of assets and liabilities) and have begun actively searching for a buyer. Furthermore, the asset or group of assets and liabilities must be measured at a price that is reasonable in relation to its current fair value.

Assets and liabilities into this category are classified as Non-current assets held for sale and Non-current liabilities held for sale, with no netting.

If the fair value less selling costs of non-current assets and groups of assets and liabilities held for sale is less than their net carrying value, an impairment is then recognised in profit or loss. Moreover, Non-current assets held for sale are no longer amortised or depreciated.

(In EUR m)

As on 31 December 2023, the Non-current assets held for sale and Non-current liabilities held for sale items encompass the assets and liabilities related to subsidiaries Societe Generale de Banques en Guinée Équatoriale, Societe Generale Mauritanie, Societe Generale Tchad and Societe Generale Burkina Faso.

## NOTE 3 FINANCIAL INSTRUMENTS

The financial instruments represent the contractual rights or obligations to receive or to pay cash or other financial assets. The Group's banking activities generally take the form of financial instruments covering a broad spectrum of assets and liabilities, such as loans, investment portfolios (equity, bonds, etc.), deposits, regulated savings accounts, debt securities issued and derivative instruments (swaps, options, forward contracts, credit derivatives, etc.).

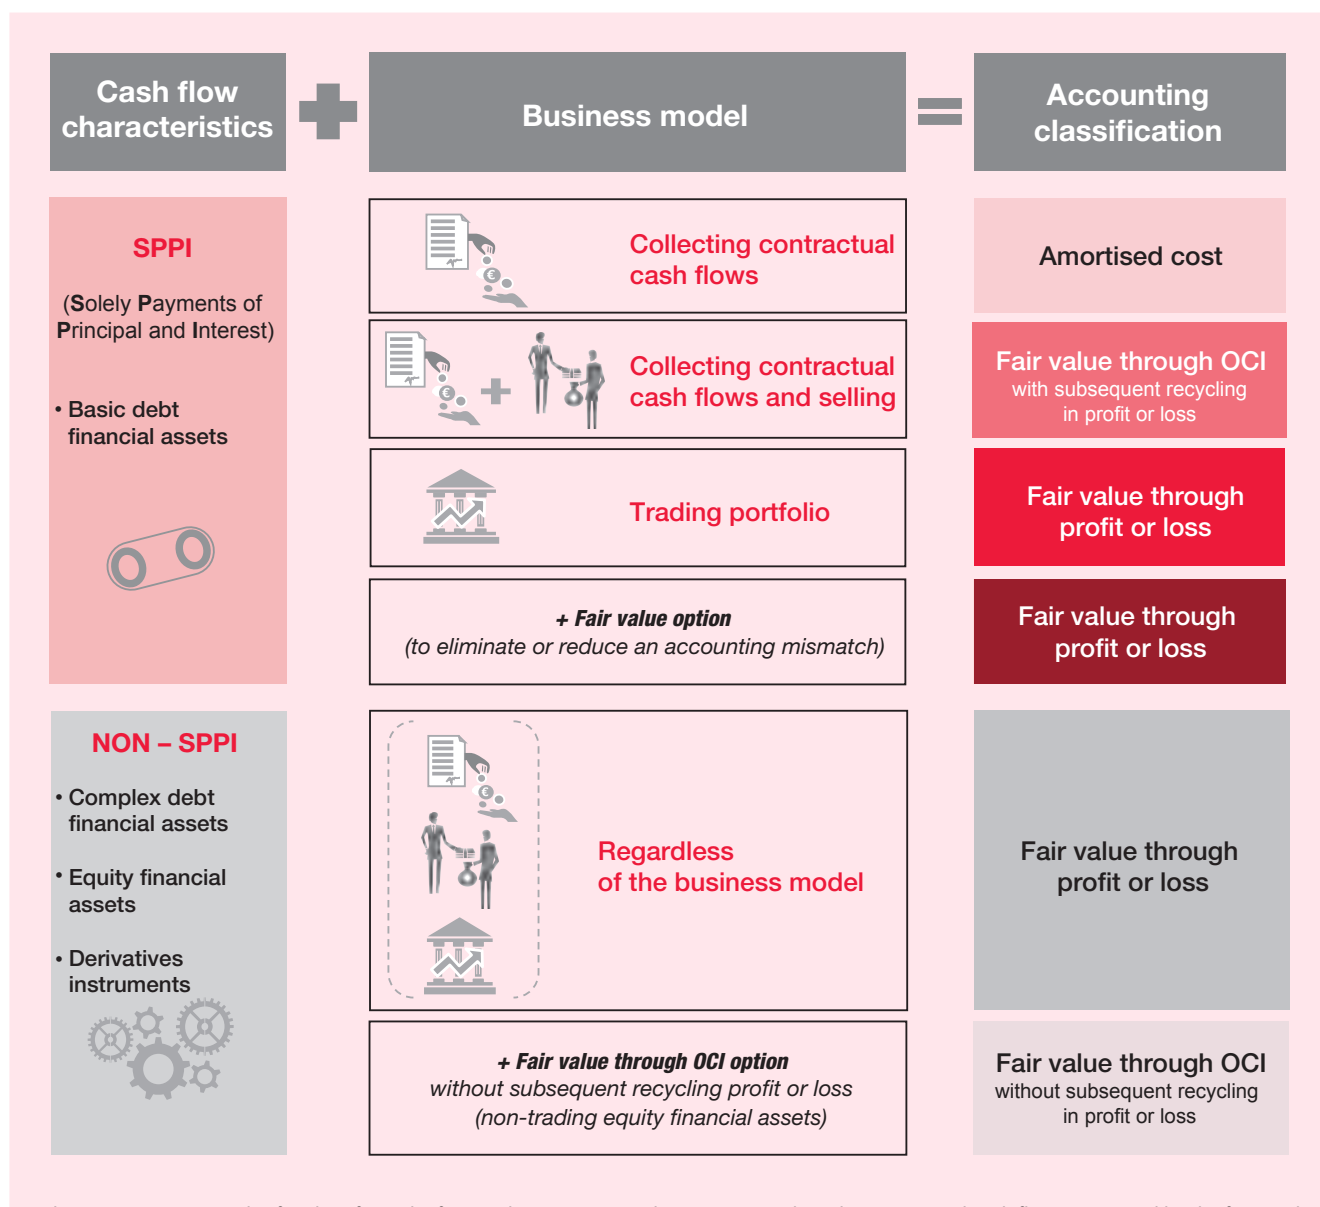

In the financial statements, the classification and valuation of financial assets and liabilities depend on their contractual characteristics and the way the entity manages those financial instruments.

However, this distinction is not applicable to derivative instruments, which are always measured at fair value in the balance sheet, no matter what their purpose is (market activities or hedging transactions).

### ACCOUNTING PRINCIPLES

#### Classification of financial assets

At initial recognition, financial instruments are classified in the Group balance sheet in one of three categories (amortised cost, fair value through profit or loss, and fair value through other comprehensive income) that determine their accounting treatment and subsequent measurement method. Classification is based on their contractual cash flow characteristics and the entity's business model for managing the assets.

The accounting principles for classifying the financial assets require the entity to analyse the contractual cash flows generated by the financial instruments and to analyse the business model for managing the financial instruments.

#### ANALYSIS OF CONTRACTUAL CASH FLOW CHARACTERISTICS

The aim of the analysis of contractual cash flow characteristics is to limit the option of recognising revenues from financial assets using the effective interest method exclusively to the instruments whose characteristics are similar to those of a basic lending arrangement, meaning their associated cash flows are highly predictable. All other financial instruments that do not share these characteristics are measured at fair value through profit or loss, regardless of the business model used to manage them.

The contractual inflows that represent Solely Payments of Principal and Interest (SPPI) on the principal amount outstanding are consistent with a basic lending arrangement.

In a basic lending arrangement, interest predominantly consists of a consideration for the time value of money and for credit risk. Interest may also include a consideration for liquidity risk, administrative costs, and a commercial profit margin. Negative interest is not inconsistent with this definition.

All financial assets that are not basic will be mandatorily measured at fair value through profit or loss, regardless of the business model for managing them.

Derivatives qualifying as hedging instruments for accounting purposes are recorded on a separate line in the balance sheet (see Note 3.2).

The Group can make the irrevocable decision on a security-by-security basis, to classify and measure any equity instrument (shares and other equity securities) that is not held for trading purposes at fair value through other comprehensive income. Subsequently, the profit or loss accumulated in other comprehensive income will never be reclassified to profit or loss (only dividends on these instruments will be recognised as income).

#### **ANALYSIS OF THE BUSINESS MODEL**

The business model represents how the financial instruments are managed in order to generate cash flows and income.

The Group uses several business models in the course of exercising its different business lines. Business models are assessed on how groups of financial instruments are managed together to achieve a particular business objective. The business model is not assessed on an instrument-by-instrument basis, but at a portfolio level, considering relevant evidence such as:

- how the performance of the portfolio is evaluated and reported to the Group's Management;
- how risks related to financial instruments within that business model are managed;
- how managers of the business are compensated;
- sales of assets realised or expected (value, frequency, purpose).

To determine the classification and measurement of financial assets, three different business models shall be distinguished:

- a business model whose objective is to collect contractual cash flows ("Collect" business model);
- a business model whose objective is achieved by both collecting contractual cash flows on financial assets and selling these financial assets ("Collect and Sell" business model);
- a separate business model for other financial assets, especially those that are held for trading purposes, where collecting contractual cash flows is only incidental.

#### **FAIR VALUE OPTION**

SPPI financial assets that are not held for trading purposes can be designated, at initial recognition, at fair value through profit or loss if such designation eliminates or significantly reduces discrepancies in the accounting treatment of the related financial assets and liabilities (accounting mismatch).

#### **Classification of financial liabilities**

Financial liabilities are classified into one of the following two categories:

- financial liabilities at fair value through profit or loss: these are financial liabilities held for trading purposes, which by default include derivative financial liabilities not qualifying as hedging instruments and non-derivative financial liabilities designated by the Group upon initial recognition to be measured at fair value through profit or loss using the fair value option;
- debts: these include the other non-derivative financial liabilities and are measured at amortised cost.

Derivative financial liabilities qualifying as hedging instruments are presented on separate lines of the balance sheet (see Note 3.2).

#### **Reclassifications of financial assets**

Reclassifications of financial assets are only required in the exceptional event that the Group changes the business model used to manage these assets.

These reclassifications are applied prospectively (no restatement of previously recognised profits, losses or interests).

#### **Fair value**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The valuation methods used by the Group to establish the fair value of financial instruments are detailed in Note 3.4.

#### **Initial recognition**

Financial assets are recognised on the balance sheet:

- as at the settlement/delivery date for securities;
- as at the trade date for derivatives;
- as at the disbursement date for loans.

For instruments measured at fair value, changes in fair value between the trade date and the settlement-delivery date are recorded in net income or in other comprehensive income, depending on the accounting classification of the financial assets in question. The trade date is the date on which the contractual commitment becomes binding and irrevocable for the Group.

Upon initial recognition, the financial assets and liabilities are measured at fair value including the transaction costs directly attributable to their acquisition or issuance (except for the financial instruments recognised at fair value through profit or loss, for which these costs are booked directly to the income statement).

If the initial fair value is exclusively based on observable market data, any difference between the fair value and the transaction price, *i.e.* the sales margin, is immediately recognised in profit or loss. However, if one of the valuation inputs is not observable or if the used valuation model is not recognised by the market, the recognition of the sales margin is then generally deferred in profit or loss.

For some instruments, due to their complexity, this margin is recognised at their maturity or upon disposal in the event of an early sale. When valuation inputs become observable, any portion of the sales margin that has not yet been recorded is then recognised in profit or loss (see Note 3.4.7).

### **Derecognition of financial assets and liabilities**

The Group derecognises all or part of a financial asset (or group of similar assets) when the contractual rights to the cash flows on the asset expire or when the Group has transferred the contractual rights to receive the cash flows and substantially all of the risks and rewards linked to ownership of the asset.

The Group also derecognises financial assets over which it has retained the contractual rights to the associated cash flows but is contractually obligated to pass these same cash flows through to a third party ("pass-through agreement") and for which it has transferred substantially all of the risks and rewards.

Where the Group has transferred the cash flows of a financial asset but has neither transferred nor retained substantially all of the risks and rewards of its ownership and has effectively not retained control of the financial asset, the Group derecognises it and, where necessary, recognises a separate asset or liability to cover any rights and obligations created or retained as a result of the transfer of the asset. If the Group has retained control of the asset, it continues to recognise it in the balance sheet to the extent of its continuing involvement in said asset.

When a financial asset is derecognised in its entirety, a gain or loss on disposal is recorded in the income statement for an amount equal to the difference between the carrying value of the asset and the payment received for it, adjusted where necessary for any unrealised profit or loss previously recognised directly in equity and for the value of any servicing asset or servicing liability. Indemnities billed to borrowers following the prepayment of their loan are recorded in profit or loss on the prepayment date in Interest and similar income.

The Group derecognises all or part of a financial liability when it is extinguished, *i.e.* when the obligation specified in the contract is discharged, cancelled or expired.

A financial liability may also be derecognised in the event of a substantial amendment to its contractual conditions or where an exchange is made with the lender for an instrument whose contractual conditions are substantially different.

### **Foreign exchange transactions**

At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are translated into the entity's functional currency at the prevailing spot exchange rate. Realised or unrealised foreign exchange losses or gains are recognised under Net gains and losses on financial instruments at fair value through profit or loss.

Forward foreign exchange transactions are recognised at fair value based on the forward exchange rate for the remaining maturity. Spot foreign exchange positions are valued using the official spot rates prevailing at the end of the period. Unrealised gains and losses are recognised in the income statement under Net gains and losses on financial instruments at fair value through profit or loss (see Note 3.1), except when hedge accounting is applied to a cash-flow hedge transaction or to a hedge of a net investment in a foreign currency operation (see Note 3.2).

At the balance sheet date, non-monetary assets and liabilities denominated in foreign currencies measured at fair value (in particular, shares and other equity instruments) are translated into the entity's functional currency at the prevailing spot exchange rate. Foreign exchange losses or gains are recognised either in profit or loss under Net gains and losses on financial instruments at fair value through profit or loss, or under other comprehensive income (Unrealised and deferred gains and losses), depending on the accounting of the gains or losses relative to these assets/liabilities.

At the balance sheet date, non-monetary assets and liabilities denominated in foreign currencies measured at historical cost are translated into the entity's functional currency at the historical exchange rate on initial recognition.

#### TREATMENTS OF THE CHANGES IN THE BASIS FOR DETERMINING THE CONTRACTUAL CASH FLOWS OF FINANCIAL ASSETS AND LIABILITIES – IBOR REFORM

In the context of the reference interest rates reform (IBOR reform) the basis for determining the contractual cash flows of a financial asset or liability may be modified:

- either by amending the contractual terms and conditions set during the initial recognition of the financial instrument (example: when the agreement is renegotiated, the contractual terms and conditions are amended to replace the initial reference interest rate by an alternative one);
- either by applying the appropriate external disposals without requiring a change in contractual terms (example: the adoption of European regulations requiring the migration of all contracts still indexed to Libor CHF and Eonia in the European Union respectively on 1 January and 3 January 2022);
- or as a result of the activation of an existing contractual term or condition (example: application of the contractual rate replacement provision, or “Fallback”).

If, in the context of the reference interest rates reform (IBOR reform), there is a change in the basis for determining the contractual cash flows of a financial asset or liability at amortised cost or of a financial asset at fair value through other comprehensive income, the modification is considered a simple forward-looking update of the interest rate applied to determine the interest income or expense and does not generate a gain or loss in the income statement.

This treatment depends on compliance with the following conditions:

- a change in the basis for determining the contractual cash flows is required and results directly from the IBOR reform; and
- the new basis for determining the contractual cash flows is economically equivalent to the former basis used before the change.

The cases giving rise to a new basis for determining the contractual cash flows considered economically equivalent to the former basis are, for example:

- the replacement of an existing reference interest rate used to determine the contractual cash flows of a financial asset or liability by an alternative reference interest rate (or by changing the method used to determine the reference interest rate in question) and the addition of a fixed spread necessary to compensate for the difference in basis between the existing reference interest rate and the alternative one;
- the addition of a Fallback provision to the contractual terms and conditions of a financial asset or liability to allow for the implementation of the changes described above;
- changes in the determination of the amount of interest resulting from the use of a new reference interest rate (rate revision procedure, number of days between interest payment dates...).

Changes to a financial asset or liability, in addition to those deriving directly from the application of the IBOR reform, are treated according to the principles usually applicable to changes in financial instruments.

#### METHOD OF ANALYSIS OF CONTRACTUAL CASH FLOWS OF FINANCIAL ASSETS

The Group has established procedures for determining if financial assets pass the SPPI test at initial recognition (loans granting, acquisition of securities, etc.).

All contractual terms shall be analysed, particularly those that could change the timing or amount of contractual cash flows. A contractual term that permits the borrower or the lender to prepay or to return the debt instrument to the issuer before maturity remains consistent with SPPI cash flows, provided the prepayment amount primarily represents the principal remaining due and accrued but unpaid contractual interest, which may include a reasonable compensation. The fact that such compensation can be either positive or negative is not inconsistent with the SPPI nature of cash flows.

The prepayment compensation is considered as reasonable especially when:

- the amount is calculated as a percentage of the outstanding amount of the loan and is capped by regulations (in France, for example, compensation for the prepayment of mortgage loans by individuals is legally capped at an amount equal to six months of interest or 3% of the principal outstanding), or is limited by competitive market practices;
- the amount is equal to the difference between contractual interest that should have been received until the maturity of the loan and the interest that would be obtained by the reinvestment of the prepaid amount at a rate that reflects the relevant benchmark interest rate.

Some loans are prepayable at their current fair value, while others can be prepayable at an amount that includes the fair value cost to terminate an associated hedging swap. It is possible to consider such prepayment amounts as SPPI provided that they reflect the effect of changes in the relevant benchmark interest rate.

**Basic financial assets (SPPI)** are debt instruments which mainly include:

- fixed-rate loans;
- variable-rate loans that can include caps or floors;
- fixed or variable-rate debt securities (government or corporate bonds, other negotiable debt securities);
- securities purchased under resale agreements (reverse repos);
- guarantee deposits paid;
- trade receivables.

Contractual terms that would introduce exposure to risks or volatility in the contractual cash flows, unrelated to a basic lending arrangement (such as exposure to changes in equity prices or stock indexes for

instance, or leverage features), could not be considered as being SPPI, except if their effect on the contractual cash flows remains minimum (*de minimis* character of their variability).

**Non-basic financial assets (non-SPPI)** mainly include:

- derivative instruments;
- shares and other equity instruments held by the entity;
- equity instruments issued by mutual funds;
- debt financial assets that can be converted or redeemed into a fixed number of shares (convertible bonds, equity-linked securities, etc.);
- structured instruments whose cash flows are indexed, in part or in whole, to a benchmark index.

The Basic financial assets (SPPI) held by the Group include the financing of sustainable development projects (labelled Environment Social and Governance) in the form of Sustainability-linked bonds, social bonds and Green bonds with SPPI-compliant contractual cash flows.

Non-basic financial assets (non-SPPI) include the structured instruments whose cash flows are indexed, in whole or in part, to an index that is not specific to the issuer, such as an ESG market index.

Impact loans have been granted by the Group to support enterprises in their Sustainability approach through an incentive mechanism that reviews the margin according to ESG criteria specific to the borrower or to the achievement by the latter of sustainable development goals (Sustainability-linked loans). At the end of 2023, the outstanding amount of impact loans valued at amortised cost reached approximately EUR 6 billion and came jointly with financing commitments of EUR 24 billion. The Sustainability objectives set can be, for example, the reduction of greenhouse gas emissions, the development of cultivated areas with alternatives to synthetic plant protection products, the increase in the representation of women in management bodies, the reduction of water use. As a result of their analysis, these loans have been classified as basic financial assets (SPPI) provided that their flows meet the SPPI criteria and the ESG component fulfills the *de minimis* criterion.

During the second half of 2022, the IASB decided to propose amendments to the IFRS 9 “Implementation Guidance” regarding classification as SPPI as well as new information to be disclosed for the financial instruments whose contractual conditions may change the timetable or the amount of contractual cash flows depending on a potential event. The objective of the project is to clarify how the SPPI qualification criteria apply to financial assets with ESG factors or similar characteristics. Societe Generale followed the IASB proposals included in the exposure draft published in 2023. To date, these proposals will not significantly change the classification of the assets concerned.

When the time value component of interest can be modified according to the contractual term of the instrument, it may be necessary to compare the contractual cash flow with the cash flow that would arise from a benchmark instrument. For instance, that is the case when an interest rate is periodically reset, but the frequency of that reset does not match the tenor of the interest rate (such as an interest rate reset every month to a one-year rate), or when the interest rate is periodically reset to an average of short- and long-term interest rates.

If the difference between the undiscounted contractual cash flows and the undiscounted benchmark cash flows is or may become significant, then the instrument is not considered basic.

Depending on the contractual terms, the comparison with benchmark cash flow may be performed through a qualitative assessment; but in other cases, a quantitative test is required. The difference between contractual and benchmark cash flows has to be considered in each reporting period and cumulatively over the life of the instrument. When performing this benchmark test, the entity considers factors that could affect future undiscounted contractual cash flows: using the yield curve at the date of the initial assessment is not enough, and the entity also has to consider whether the curve could change over the life of the instrument according to reasonably possible scenarios.

Within the Group, the financial instruments concerned by a benchmark test include, for instance, variable-rate housing loans for which interest rates are reset every year based on the twelve-month Euribor average observed over the two months previous to the reset. Another example is loans granted to real estate professionals for which interest is revised quarterly based on the one-month Euribor average observed over the three months previous to the reset. Following the benchmark analysis performed by the Group, it has been concluded that these loans are basic.

Furthermore, a specific analysis of contractual cash flow is required when financial assets are instruments issued by a securitisation vehicle or a similar entity that prioritises payments to holders using multiple contractually-linked instruments that create concentrations of credit risk (tranches). When assessing whether contractual cash flows are SPPI or not, the entity must analyse the contractual terms, as well as the credit risk of each tranche and the exposure to credit risk in the underlying pool of financial instruments. To that end, the entity must apply a “look-through approach” to identify the underlying instruments that are creating the cash flows.

Following the initial application of IFRS 9 by insurance subsidiaries (see. Note 1), the data shown in Note 3 include those relating to the financial instruments entered into by these subsidiaries.

The information on the types of risks, the risk management linked to financial instruments as well as the information on capital management and compliance with regulatory ratios, required by IFRS as adopted by the European Union, are disclosed in Chapter 4 of the present Universal Registration Document (Risks and capital adequacy).

**NOTE 3.1.1 TRADING PORTFOLIO****ACCOUNTING PRINCIPLES**

The trading book contains the financial assets and liabilities held or accrued for the purpose of capital markets activities.

This portfolio also includes, among other trading assets, the physical stocks of raw materials that the Group might hold a market-maker on commodity derivatives.

Derivative financial instruments are classified into the trading portfolio, unless they qualify as hedging instruments (see Note 3.2).

The financial instruments recorded in the trading portfolio are measured at fair value as at the closing date and recognised in the balance sheet under Financial assets or liabilities at fair value through profit or loss. The changes in fair value and revenues associated to those instruments are recorded in profit or loss under Net gains and losses on financial instruments at fair value through profit or loss.

**TRADING ACTIVITIES**

Financial assets held for trading are:

- acquired for the purpose of selling or repurchasing it in the near term; or
- held for market-making purposes; or
- acquired for the purposes of the specialised management of a trading portfolio, including derivative financial instruments, securities or other financial instruments that are managed together and for which there is evidence of a recent pattern of short-term profit-taking.

**Global market activities**

The trading business model is applied by Global Banking and Investor Solutions to manage its global market activities.

It is also applied for managing syndicated loan commitments and loans that are not intended to be kept by the Group and that have been identified since their origination as to be sold in the short term (within 6 to 12 months) on the secondary market, as well as for loans originated by the Group through originate-to-distribute activities and that are expected to be sold shortly.

Financial assets held in run-off portfolios are also monitored based on their fair value. Although those portfolios are not related to market activities, those assets are presented amongst trading portfolio and are measured at fair value through profit or loss.

Trading portfolio includes all the financial assets held for trading purpose regardless of the characteristics of their contractual cash flows. Only non-SPPI financial assets that are not held for trading are classified amongst Financial assets measured mandatorily at fair value through profit or loss (see section 3.1.2).

**ASSETS**

## NOTE 3.1.2 FINANCIAL INSTRUMENTS MANDATORILY AT FAIR VALUE THROUGH PROFIT OR LOSS

## ACCOUNTING PRINCIPLES

Financial assets measured mandatorily at fair value through profit or loss include:

- loans, bonds and bond equivalents that are not held for trading purposes and do not pass the SPPI test (non-basic or non-SPPI instruments);
- shares and share equivalents that are not classified in any other sub-category: trading book at fair value through profit or loss, instruments designated by the Group at fair value through other comprehensive income without subsequent reclassification to profit or loss.

These assets are recorded at fair value in the balance sheet under Financial assets at fair value through profit or loss and changes in the fair value of these instruments (excluding interest income) are recorded in profit or loss under Net gains or losses on financial instruments at fair value through profit or loss.

(In EURm)	31.12.2023	31.12.2022 R
Bonds and other debt securities	30,677	22,413
Shares and other equity securities	68,691	62,756
Loans, receivables and securities purchased under resale agreements	15,283	16,433
<b>TOTAL</b>	<b>114,651</b>	<b>101,602</b>

## BREAKDOWN OF LOANS AND RECEIVABLES AND SECURITIES PURCHASED UNDER RESALE AGREEMENTS

(In EURm)	31.12.2023	31.12.2022 R
Short-term loans	1,360	1,897
Equipment loans	10,052	11,338
Other loans	3,871	3,198
<b>TOTAL</b>	<b>15,283</b>	<b>16,433</b>

The loans, receivables and securities purchased under resale agreements recorded in the balance sheet under Financial assets mandatorily at fair value through profit or loss are mainly:

- loans that include prepayment features with compensation that do not reflect the effect of changes in the benchmark interest rate;
- loans with indexation clauses that do not qualify them as basic loans (SPPI).

### NOTE 3.1.3 FINANCIAL INSTRUMENTS AT FAIR VALUE THROUGH PROFIT OR LOSS USING FAIR VALUE OPTION

#### ACCOUNTING PRINCIPLES

In addition to the financial assets and liabilities held for trading, and the financial assets measured mandatorily at fair value through profit or loss, the same items in the financial statements include the non-derivative financial assets and liabilities that the Group has designated at fair value through profit or loss. Changes in the fair value of these instruments (including interest) are recorded in profit or loss under Net gains or losses on financial instruments at fair value through profit or loss, except the share related to the Group's own credit risk on financial liabilities which is booked under Unrealised or deferred gains and losses.

Furthermore, in case of derecognition of a financial liability at fair value through profit or loss using the fair value option before its contractual maturity, any gains and losses, related to the Group's own credit risk are booked under Unrealised or deferred gains and losses and then reclassified under Retained earnings at the beginning of the subsequent financial year.

For financial assets, this option may only be used to eliminate or significantly reduce accounting mismatches that would otherwise arise from applying different accounting treatments to certain related financial assets and liabilities.

For financial liabilities, this option may only be used in the following cases:

- to eliminate or reduce discrepancies in the accounting treatment of certain related financial assets and liabilities;
- when it applies to a hybrid financial instrument with one or more embedded derivatives, which should be recognised separately;
- when a group of financial assets and/or liabilities is managed together and its performance is measured at fair value.

The Group thus recognises structured bonds issued by Societe Generale Corporate and Investment Banking at fair value through profit or loss. These issuances are purely commercial and the associated risks are hedged on the market using financial instruments managed in trading portfolios. By using the fair value option, the Group can ensure consistency between the accounting treatment of these bonds and that of the derivatives hedging the associated market risks, which have to be carried at fair value.

#### ASSETS

(In EURm)	31.12.2023	31.12.2022 R
Bonds and other debt securities	13,821	13,369
Loans, receivables and securities purchased under resale agreements	68	55
Separate assets for employee benefits plans <sup>(1)</sup>	1,255	1,180
<b>TOTAL</b>	<b>15,144</b>	<b>14,604</b>

(1) Including, as at 31 December 2023, EUR 1,076 million of separate assets for defined post-employment benefits compared to EUR 1,002 million as at 31 December 2022 (see Note 5.1.2).

#### LIABILITIES

Financial liabilities measured at fair value through profit or loss in accordance with the fair value option predominantly consist of structured bonds issued by the Societe Generale group.

(In EURm)	31.12.2023		31.12.2022 R	
	Fair value	Amount redeemable at maturity	Fair value	Amount redeemable at maturity
Financial instruments measured using fair value option through profit or loss	94,249	99,500	68,742	70,288

The revaluation differences attributable to the Group's issuer credit risk are determined using valuation models taking into account the Societe Generale group's most recent financing terms and conditions on the markets and the residual maturity of the related liabilities.

Changes in fair value attributable to own credit risk generated an equity loss of EUR 257 million before tax. As at 31 December 2023, the total amount of changes in fair value attributable to own credit risk represents a total gain of EUR 68 million before tax.

**NOTE 3.1.4 NET GAINS AND LOSSES ON FINANCIAL INSTRUMENTS AT FAIR VALUE THROUGH PROFIT OR LOSS**

<i>(In EURm)</i>	<b>2023</b>	<b>2022 R</b>
Net gain/loss on trading portfolio (excluding derivatives)	8,844	(5,644)
Net gain/loss on financial instruments at fair value through profit or loss <sup>(1)</sup>	6,272	(9,135)
Net gain/loss on financial instruments measured using fair value option	(4,793)	3,715
Net gain/loss on derivative instruments	(1,310)	12,353
Net gains/loss on hedging instruments <sup>(2)</sup>	169	(237)
<i>Net gain/loss on fair value hedging derivatives</i>	3,141	(16,246)
<i>Revaluation of hedged items attributable to hedged risks<sup>(3)</sup></i>	(2,973)	16,019
<i>Ineffective cut of the cash flow hedges</i>	1	(10)
Net gain/loss on foreign exchange transactions	1,145	(8)
<b>TOTAL<sup>(4)</sup></b>	<b>10,327</b>	<b>1,044</b>
<i>o/w gains on financial instruments at fair value through other comprehensive income</i>	1,148	1,181

(1) This item includes realised and unrealised gains and losses on debt and equity instruments, with the exception of the income component of debt instruments representative of an interest rate, which is recorded under net interest margin (see Note 3.7).

(2) This item includes only the net gain/loss on hedging transactions related to financial instruments. For the hedging transactions related to non-financial assets and liabilities, the net gain/loss on hedging transactions is included under the income statement of the hedged item.

(3) This item includes the revaluation of fair value hedged items, including the change in revaluation differences in portfolios hedged against interest rate risk.

(4) Including EUR +5,638 million for insurance subsidiaries in 2023 (EUR -5,683 million in 2022). This amount shall be understood taking into account the financial income and expenses of the insurance contracts (see Note 4.3, Detail of performance of insurance activities).

Insofar as income and expenses recorded in the income statement are classified by type of instrument rather than by purpose, the net income generated by activities in financial instruments at fair value through profit or loss must be assessed as a whole. It should be noted that the

income shown here does not include the refinancing cost of these financial instruments, which is shown under interest expense and interest income.

**NOTE 3.2 Financial derivatives**

Derivative instruments are financial instruments for which the value changes according to that of an underlying item and can be accompanied by a leverage effect. The items underlying these instruments are various (interest rates, exchange rates, equity, indexes, commodities, credit rating...), as are their forms (forward contracts, swaps, calls and puts...).

The Group may use these derivative instruments for their market activities to provide to its customers solutions to meet their risk management or revenue optimisation needs. In that case, they are accounted for as trading derivatives.

The Group may also use derivative instruments to manage and hedge its own risks. In which case, they are qualified as hedging derivatives. Hedging transactions can concern individual items or transactions (micro-hedging relationships) or portfolios of financial assets and liabilities that can generate a structural interest-rate risk (macro-hedging relationships).

Contrary to other financial instruments, derivative instruments are always measured at fair value in the balance sheet, regardless their purpose (market activities or hedging transactions). The fair value adjustments of trading derivatives are directly recognised in the income statement. However, the hedge accounting method allows for the linking of the fair value adjustment of hedging derivatives with the accounting treatment of the transactions and hedged instruments in order to eliminate or reduce volatility in the income statement.

**ACCOUNTING PRINCIPLES**

Derivatives are financial instruments meeting the following three criteria:

- their value changes in response to a change in a specified interest rate, foreign exchange rate, share price, index of prices, commodity price, credit rating, etc.;
- they require little to no initial investment;
- they are settled at a future date.

All financial derivatives are recognised at fair value in the balance sheet as financial assets or financial liabilities. They are considered to be trading derivatives, unless they are designated as hedging instruments for accounting purposes.

**Special case - derivatives having Societe Generale shares as their underlying instrument**

Financial derivatives having Societe Generale shares as their underlying instrument or shares in Group subsidiaries and whose liquidation entails the payment of a fixed amount in cash (or another financial asset) against a fixed number of Societe Generale shares (other than derivatives) are equity instruments. These instruments, and any related premiums paid or received, are recognised directly in equity, and any changes in the fair value of these derivatives are not recorded. For sales of put options on Societe Generale shares and forward purchases of Societe Generale shares, a debt is recognised for the value of the notional amount with a contra entry in equity.

Other financial derivatives having Societe Generale shares as their underlying instrument are recorded in the balance sheet at fair value in the same manner as derivatives with other underlying instruments.

**Embedded derivatives**

An embedded derivative is a component of a hybrid contract that also includes a non-derivative host instrument.

Where the host contract is a financial asset, the entire hybrid contract is measured at fair value through profit or loss because its contractual cash flows do not pass the SPPI test.

Where the host contract is a financial liability and is not measured at fair value through profit or loss, the embedded derivative is separated from the host contract if:

- at acquisition, the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host; and
- it would meet the definition of a derivative.

Once separated, the derivative is recognised at fair value in the balance sheet under Financial assets or Financial liabilities at fair value through profit or loss under the aforementioned conditions. The host contract is classified under one of the financial liability categories measured at amortised cost.

## NOTE 3.2.1 TRADING DERIVATIVES

## ACCOUNTING PRINCIPLES

Trading derivatives are recorded in the balance sheet under Financial assets or liabilities at fair value through profit or loss. Changes in fair value are recorded in the income statement under Net gains and losses on financial instruments at fair value through profit or loss.

Changes in the fair value of financial derivatives involving counterparties that subsequently proved to be in default are recorded under Net gains and losses on financial instruments at fair value through profit or loss until the termination date of these instruments. On this termination date, the receivables and debts on these counterparties are recognised at fair value in the balance sheet. Any further impairment of these receivables is recognised under Cost of credit risk in the income statement.

## FAIR VALUE

(In EURm)	31.12.2023		31.12.2022 R	
	Assets	Liabilities	Assets	Liabilities
Interest rate instruments	42,479	38,681	35,004	23,784
Foreign exchange instruments	18,805	20,025	24,272	25,324
Equities and index Instruments	19,772	28,612	15,517	21,209
Commodities Instruments	84	208	199	154
Credit derivatives	1,986	963	1,756	1,404
Other forward financial instruments	409	1,314	27	781
<b>TOTAL</b>	<b>83,535</b>	<b>89,803</b>	<b>76,775</b>	<b>72,656</b>

The Group uses credit derivatives in the management of its corporate credit portfolio, primarily to reduce individual, sectorial and geographical concentration and to implement a proactive risk and capital management approach. All credit derivatives, regardless of their

purpose, are measured at fair value through profit or loss and cannot be qualified as hedging instruments for accounting purposes. Accordingly, they are recognised at fair value among trading derivatives.

**NOTE 3.2.2 HEDGING DERIVATIVES**

According to the transitional provisions of IFRS 9, the Group made the choice to maintain the IAS 39 provisions related to hedge accounting. Consequently, equity instruments held (shares and other equity securities) do not qualify for hedge accounting regardless of their accounting category.

**ACCOUNTING PRINCIPLES**

In order to be hedged against certain market risks, the Group sets up hedging derivatives. From an accounting standpoint, the Group designates the hedging transaction as a fair value hedge, a cash flow hedge, or a hedge of a net investment in a foreign operation, depending on the risk and on the instruments to be hedged.

To designate an instrument as a hedging derivative, the Group documents the hedging relationship in detail, from inception. This documentation specifies the asset, liability, or future transaction hedged, the risk to be hedged and the associated risk management strategy, the type of financial derivative used and the valuation method that will be used to measure its effectiveness.

The derivative designated as a hedging instrument must be highly effective in offsetting the change in fair value or cash flows arising from the hedged risk. This effectiveness is verified when changes in the fair value or cash flows of the hedged instrument are almost entirely offset by changes in the fair value or cash flows of the hedging instrument, with the expected ratio between the two changes ranging from 80% to 125%. Effectiveness shall be assessed both when the hedge is first set up and throughout its life. Effectiveness is measured each quarter prospectively (expected effectiveness over the future periods) and retrospectively (effectiveness measured on past periods). Where the effectiveness falls outside the range specified above, hedge accounting is discontinued.

Hedging derivatives are recognised in the balance sheet under Hedging derivatives.

**Fair value hedges**

The purpose of these hedges is to protect the Group against an adverse fluctuation in the fair value of an instrument which could affect profit or loss if the instrument were derecognised from the balance sheet.

Changes in the fair value of the hedging derivative are recorded in the income statement under Net gains and losses on financial instruments at fair value through profit or loss; for interest rate derivatives, however, accrued interest income and expenses on the derivative are recorded in the income statement under Interest and similar income/Interest and similar expense – Hedging derivatives symmetrically to the accrued interest income and expenses related to the hedged item.

In the balance sheet, the carrying value of the hedged item is adjusted for the gains and losses attributable to the hedged risk, which are reported in the income statement under Net gains and losses on financial instruments at fair value through profit or loss. To the extent that the hedge is highly effective, changes in the fair value of the hedged item and changes in the fair value of the hedging derivative are accurately offset through profit or loss, the difference corresponding to an ineffectiveness gain or loss.

Prospective effectiveness is assessed *via* a sensitivity analysis based on probable market trends or *via* a regression analysis of the statistical relationship (correlation) between the hedged risk component and the hedging instrument. Retrospective effectiveness is assessed by comparing any changes in the fair value of the hedging instrument with any changes in the fair value of the hedged item.

If it becomes apparent that the derivative has ceased to meet the effectiveness criteria for hedge accounting or if it is terminated or sold, hedge accounting is discontinued prospectively. Thereafter, the carrying amount of the hedged asset or liability ceases to be adjusted for changes in fair value attributable to the hedged risk and the cumulative adjustments previously recognised under hedge accounting are amortised over its remaining life. Hedge accounting is also discontinued if the hedged item is sold prior to maturity or early-redeemed, the valuation adjustments are then immediately recognised in the income statement.

**Cash flow hedges**

The purpose of interest rate cash flow hedges is to protect against changes in future cash flows associated with a financial instrument on the balance sheet (loans, securities or floating-rate notes) or with a highly probable future transaction (future fixed interest rates, future exchange rates, future prices, etc.). The purpose of these hedges is to protect the Group against adverse fluctuations in the future cash-flows of an instrument or transaction that could affect profit or loss.

The prospective effectiveness of the hedge is assessed *via* a sensitivity analysis based on probable market input trends or *via* a regression analysis of the statistical relationship (correlation) between the hedged risk component and the hedging instrument. The effectiveness of the hedge is assessed using the hypothetical derivative method, which consists in i) creating a hypothetical derivative which bears exactly the same characteristics as the instrument being hedged (in terms of notional amounts, date on which the rates are reset, interest rate, exchange rate, etc.), but moves in the opposite direction and whose fair value is nil when the hedge is set up, then ii) comparing the expected changes in the fair value of the hypothetical derivative with those of the hedging instrument (sensitivity analysis) or performing a regression analysis on the prospective effectiveness of the hedge.

The changes in fair value of the hedging financial instruments are recorded directly as Unrealised or deferred gains and losses for their effective portion, while the ineffective portion is recognised under Net gains and losses on financial instruments at fair value through profit or loss. With regard to interest rate derivatives, the portion corresponding to the rediscount of the derivative financial instrument is recorded in the income statement under Interest and similar income/Interest and similar expense symmetrically to the interest income or expense related to the hedged item.

The gains or losses, realised or unrealised, accumulated directly in equity for the effective portion of these changes in value, are carried in equity to be recycled in the income statement when the expected hedged cash flows impact the income statement. With regard to the hedging flows related to a variable-rate financial instrument recorded on the balance sheet, recycling is done as and when the hedged interest income or expenses are recognised in the income statement. In the case of hedging of future transactions, if it is the future sale of a financial instrument, recycling takes place on the date when the sold instrument is derecognised; if the transaction is settled through the recognition on the balance sheet of a financial instrument, the gains or losses accumulated in equity are carried in it, before being recycled in the income statement at the same pace as the hedged cash flows generated by the instrument then recognised on the balance sheet.

Whenever the hedging derivative ceases to meet the effectiveness criteria for hedge accounting or is terminated or sold or if the future transaction hedged is no more probable, hedge accounting is discontinued prospectively. The amounts previously recognised directly in equity are reclassified in the income statement over the periods during which interest income is affected by the cash flows from the hedged item. If the hedged item is sold or redeemed earlier than expected or if the hedged forecast transaction ceases to be expected, the unrealised gains and losses recognised in equity are immediately reclassified in the income statement.

#### **Hedging of a net investment in a foreign operation**

The purpose of a hedging of a net investment in a foreign company is to protect against exchange rate risk.

The hedged item is an investment in a country whose currency differs from the Group's functional currency. The hedge therefore serves to protect the net position of a foreign subsidiary or branch against an exchange rate risk linked to the entity's functional currency.

The hedge of a net investment in a foreign operation follows the same accounting principles as the cashflow hedge relationships. Thus, the effective portion of the changes in fair value of a hedging derivative designated for accounting purposes as the hedge of a net investment is recognised in equity under Unrealised or deferred gains and losses, while the ineffective portion is recognised in the income statement under Gains and losses on financial instruments at fair value through profit or loss.

#### **Portfolio hedges (macro-hedge)**

In this type of hedge, interest rate derivatives are used to globally hedge the structural interest rate risk resulting mainly from Retail Banking activities.

In accounting for these transactions, are either documented as fair value hedges or as cash flow hedges, depending on the Group entities.

Group entities documenting a macro fair value hedge of fixed rate assets and liabilities portfolios, apply the IAS 39 "carve-out" standard as adopted by the European Union, which facilitates:

- the application of fair value hedge accounting to the macro-hedges used for asset-liability management, including customer demand deposits in the fixed-rate positions being hedged;
- the performance of the effectiveness tests.

The accounting treatment of the financial derivatives designated as macro fair value hedges is similar to that of other fair value hedging instruments. Changes in the fair value of the portfolio of macro-hedged instruments measured based on the modelled synthetic instrument are reported on a separate line in the balance sheet under Revaluation differences on portfolios hedged against interest rate risk through profit or loss.

Group entities documenting a macro cash flow hedge apply the same accounting principles as those presented above for cash flow hedge. Thus, macro-hedged assets or liabilities portfolios are not measured at fair value for the hedged risk.

In the case of macro cash flow hedge, hedged portfolios include assets or liabilities at variable rate.

Finally, regardless of the documentation used for these macro-hedges, they require the implementation of three tests to measure the effectiveness of the relationship:

- a non-over-coverage test to ensure, prospectively and retrospectively, that the nominal amount of the portfolios covered is higher than the notional amount of the hedging instruments for each future maturity band and each rate generation;
- a test of non-disappearance of the hedged item, which consists in prospectively and retrospectively ensuring that the historically covered maximum position is less than the notional amount of the hedging instruments on the closing date considered for each maturity band and each generation of rates;
- a quantitative test to retrospectively ensure that the fair value changes in the modelled synthetic instrument offset the changes in fair value of the hedging instruments.

The sources of ineffectiveness of the macro-hedges implemented in the Group result from the latest fixing of the variable leg of the hedging swaps, the two-curve valuation of the collateralised hedging instruments, the possible mismatches of interests between the hedged item and the hedging instrument and the consideration of counterparty risk on the hedging instruments.

**TREATMENT OF THE CHANGES IN THE BASIS USED FOR DETERMINING THE CONTRACTUAL CASH FLOWS OF THE COMPONENTS OF A HEDGING RELATIONSHIP – IBOR REFORM****NON-DISCONTINUATION OF HEDGING RELATIONSHIPS**

The documentation of the existing hedging relationships shall be updated to reflect the changes brought about by the reform of the reference interest rate (IBOR reform) on the basis for determining the contractual cash flows of the hedged items and/or of the hedging instruments.

These updates resulting from the IBOR reform do not cause the discontinuation of the hedging relationship nor the designation of a new accounting hedge as long as they meet the following conditions:

- the change in the basis for determining the contractual cash flows is required and results directly from the IBOR reform; and
- the new basis for determining the contractual cash flows is economically equivalent to the former basis used before the change.

When those conditions are met, the update of the hedging documentation only consist in:

- designate the alternative reference interest rate (contractually or non-contractually specified) as a hedged risk;
- update the description of the hedged item, including a description of the hedged portion of cash flows or of the fair value;
- update the description of the hedging instrument;
- update the description of the method used to assess the effectiveness of the hedge.

These updates are performed as and when changes are made to the hedged items or the hedging instruments but before the end of the reporting period during which the change was made; an accounting hedge may be updated several successive times.

Changes not directly resulting from the application of the IBOR reform and impacting the basis used for determining the contractual cash flows of the hedging relationship components or the hedging documentation are analysed beforehand in order to confirm compliance with the qualifying criteria for hedge accounting.

**SPECIFIC ACCOUNTING TREATMENTS**

Regarding fair value hedges and cash flow hedges, the applicable accounting requirements remain unchanged for the recognition of gains and losses resulting from the reassessment of the hedged component and the hedging instrument taking account of the changes described above.

For the purpose of the retrospective effectiveness assessment, the cumulative fair value changes may be reset to zero on a case by case basis for each hedging relationship modified.

With regard to hedged cash flows, when the benchmark rate on which the future hedged cash flows were based changes, the amounts of gains or losses recorded for the hedging instrument are carried in equity until the recording in the income statement of the adjusted hedged cash flows as long as the transaction remains highly probable.

An alternative reference interest rate used as a risk component not specified by an agreement (example, a three month alternative reference interest rate used to determine the fixed rate of a loan and for which the Group intends to hedge the changes in value) may be used, provided it is, as reasonably expected, separately identifiable (*i.e.*, quoted on a sufficiently liquid market) in the 24 months after its first use.

Equity and index Instruments	7	25	6	17
<b>Net investment hedge</b>	<b>151</b>	<b>51</b>	<b>230</b>	<b>114</b>
Foreign exchange instruments	151	51	230	114
<b>TOTAL</b>	<b>10,585</b>	<b>18,708</b>	<b>32,971</b>	<b>46,164</b>

The Group sets up hedging relationships recognised for accounting purposes as fair value hedges in order to protect its fixed-rate financial assets and liabilities (primarily loans/borrowings, securities issued and fixed-rate securities) against changes in long-term interest rates. The hedging instruments used mainly consist of interest rate swaps.

Furthermore, through some of its Corporate and Investment Banking operations, the Group is exposed to future cash flow changes in its short and medium-term funding requirements and sets up hedging relationships recognised for accounting purposes as cash flow hedges. Highly probable funding requirements are determined using historic data established for each activity and representative of balance sheet outstanding. These data may be increased or decreased by changes in management methods.

Finally, as part of their management of structural interest rate and exchange rate risks, the Group's entities set up fair value hedge for portfolios of assets or liabilities for interest rate risk as well as cash flow hedge and net investment hedge for foreign exchange risk.

As part of its structural interest rate risk management, the Group has adjusted the level of hedging of the fixed rate liabilities (*i.e.*, customer deposits). While fixed-rate receiver swaps were contracted to hedge the interest rate risk, fixed-rate payer swaps were used to reduce the hedge. Under IAS 39, these instruments were designated as portfolio hedging instruments (macro hedge accounting). In 2023, the Group transferred to a trading portfolio both the swaps taken out to reduce the macro-hedge and the corresponding initial hedging swaps (receiver interest rate). The tables in this note include the effect of this reclassification. The remaining negative cumulative remeasurement adjustment to be amortised over the residual life of the hedged instruments as at 31 December 2023, resulting from discontinued hedges corresponding to the swaps transferred to the trading portfolio, reduces liabilities by EUR 1,858 million.

As at 31 December 2023, the revaluation differences on macro-hedged fixed-rate assets portfolios and fixed-rate liabilities portfolios are still negative as a result of the high interest rate environment. On the asset side of the balance sheet, the revaluation difference on portfolios hedged against interest rate risk amounts to EUR -433 million as at 31 December 2023 (compared to EUR -2,262 million as at 31 December 2022); and on the liabilities side, the revaluation differences on portfolios hedged against interest rate risk amounts to EUR -5,857 million as at 31 December 2023 (against EUR -9,659 million as at 31 December 2022).

<i>Other liabilities</i>	4	(0)	(0)
<b>TOTAL</b>			<b>16,018</b>

(1) The carrying amount of the macro-hedged items represents the sum of the hedged outstanding and the revaluation differences on portfolios hedged against interest rate risk.

(2) The cumulative change in fair value is taken into account excluding accrued interest for the items hedged against interest rate risk. The amount shown also includes the fair value adjustment remaining to be amortised on the items for which the hedging relationship has been derecognised.

(3) Changes in fair value attributable to the hedged risk only and used to determine the ineffective portion of the fair value of the hedging instrument. This change is excluding accrued interests for the items hedged against interest rate risk.

As at 31 December 2023, EUR 1,773 million of cumulative fair value change remains to be amortised following the termination of hedging relationships, including €1,858 million of cumulative fair value remaining to be amortised relating to the transfer of swaps to the transaction portfolio as at 31 December 2023 presented above.

(1) For macro fair value transactions, the commitment described above equals the net hedging derivatives position in order to represent the economic exposure from these instruments. This position should be linked with the carrying amount of the hedged items which represents the hedged exposure.

(2) The fair value of interest rate hedging derivatives includes accrued interests.

**CASH FLOW HEDGE: BREAKDOWN OF HEDGED ITEMS**

The following table describes the change of fair value of hedged items used to book the ineffective portion of the hedge during the current period. Regarding the cash flow hedges, the change in fair value of hedged items is assessed using the hypothetical derivative method described in the accounting principles above.

<i>Hedged net investment in USD</i>	-	-	-	-	-	(33)
<i>Hedged net investment (other currencies)</i>	-	-	225	10	-	40

(1) The carrying value equals fair value in the case of derivative instruments and equals amortised cost, translated at the closing date, in the case of loans and borrowings in foreign currencies.

(2) A positive change in value reflects a gain.

(3) In the case of foreign exchange risk hedging using derivative, the change in fair value attributable to the hedged foreign exchange risk is presented under the Portion booked in unrealised or deferred gains and losses heading and perfectly offsets the foreign exchange difference recognised on the hedged item. The amounts presented under Ineffective portion recognised in profit or loss correspond to the effects relating to risks other than foreign exchange risk.

**NOTE 3.3.1 DEBT INSTRUMENTS****ACCOUNTING PRINCIPLES**

Debt instruments (loans and receivables, bonds and bond equivalents) are classified as Financial assets at fair value through other comprehensive income when their contractual cash flows are consistent with basic lending arrangements (SPPI) and they are managed under a “Collect and Sell business model”. At the time of original recognition, these financial assets are measured at fair value including the costs directly attributable to their acquisition or subscription.

Accrued or earned income on debt instruments is recorded in profit or loss based on the effective interest rate, under Interest and similar income.

At the reporting date, these instruments are measured at fair value and changes in fair value excluding income, are recorded in equity under Unrealised or deferred gains and losses, except for foreign exchange differences on money market instruments denominated in local currencies, which are recorded in profit or loss. Furthermore, as these financial assets are subject to impairment for credit risk, the changes in expected credit losses are recorded in profit or loss under Cost of credit risk with a corresponding entry under Unrealised or deferred gains and losses. The applicable impairment rules are described in Note 3.8.

**BUSINESS MODEL “HOLD TO COLLECT AND SELL”**

The objective of this business model is to realise cash flows by both collecting contractual payments and selling financial assets. In this type of business model, the sales of financial assets are not incidental or exceptional, but they are integral to achieving the business' objectives.

	<p><b>Cash management</b></p> <p>Within the Group, except for the insurance activities, the “hold to collect and sell” business model is mainly applied by cash management activities for managing HQLA securities (High Quality Liquid Assets) included in the liquidity reserve. Only a few subsidiaries apply a “hold to collect” business model for managing their HQLA securities.</p>

<b>TOTAL<sup>(1)</sup></b>	<b>(2,673)</b>	<b>(5,075)</b>

(1) Including EUR -2,298 million for insurance sector subsidiaries as at 31 December 2023 (EUR -4,479 million as at 31 December 2022). This amount must be read together with the financial income and expenses recorded directly in equity as part of the measurement of the associated insurance contracts for EUR +2,314 million as at 31 December 2023 (EUR +4,448 million as at 31 December 2022).

**NOTE 3.3.2 EQUITY INSTRUMENTS****ACCOUNTING PRINCIPLES**

Equity instruments (shares and share equivalents), that are not held for trading purposes, can be initially designated by the Group to be measured at fair value through other comprehensive income. This choice made instrument by instrument, is irrevocable.

These equity instruments are then measured at fair value and the changes in fair value are recognised under Unrealised or deferred gains and losses with no subsequent reclassification to profit or loss. If the instruments are sold, the realised gains and losses are reclassified to Retained earnings at the opening of the next financial year. Only dividend income, if it is considered as a return on investment, is recorded in profit or loss under Net gains or losses on financial assets at fair value through other comprehensive income.

The Group chose only in few rare cases to designate equity instruments to be measured at fair value through other comprehensive income.

**NOTE 3.4 Fair value of financial instruments measured at fair value**

The financial assets and liabilities recognised in the Group balance sheet are measured either at fair value or at amortised cost. In the latter case, the fair value of the instruments is disclosed in the notes (see Note 3.9).

If an instrument is quoted on an active market, its fair value is equal to its market price.

But many financial instruments are not listed (for example, most customer loans and deposits, interbank debts and claims, etc.), or are only negotiable on illiquid markets or over-the-counter markets (which is the case for many derivative instruments).

In such situations, the fair value of the instruments is calculated using measurement techniques or valuation models. Market parameters are included in these models and must be observable; otherwise they are determined based on internal estimates. The models and parameters used are subject to independent validations and internal controls.

**ACCOUNTING PRINCIPLES****Definition of fair value**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date.

In the absence of observable prices for identical assets or liabilities, the fair value of financial instruments is determined using another measurement technique which maximises the use of observable market input based on assumptions that market operators would use to set the price of the instrument in question.

**Fair value hierarchy**

For information purposes, in the notes to the consolidated financial statements, the fair value of the financial instruments is classified using a fair value hierarchy that reflects the observability level of the inputs used. The fair value hierarchy is composed of the following levels:

**LEVEL 1 (L1): INSTRUMENTS VALUED ON THE BASIS OF QUOTED PRICES (UNADJUSTED) IN ACTIVE MARKETS FOR IDENTICAL ASSETS OR LIABILITIES**

Level 1 instruments carried at fair value on the balance sheet include in particular shares listed in an active market, government or corporate bonds priced directly by external brokers/dealers, derivatives traded on organised markets (futures, options), and units of funds (including UCITS) whose net asset value is available on the balance sheet date.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and if they reflect actual and regular market transactions on an arm's length basis.

Determining whether a market is inactive requires the use of indicators such as a sharp decline in the trading volume and the level of activity in the market, a sharp disparity in prices over time and among the various above-mentioned market participants, or the fact that the latest transactions conducted on an arm's length basis did not take place recently enough.

Where a financial instrument is traded in several markets to which the Group has immediate access, its fair value is represented by the market price at which volumes and activity levels are highest for the instrument in question.

Transactions resulting from involuntary liquidations or distressed sales are usually not taken into account to determine the market price.

**LEVEL 2 (L2): INSTRUMENTS VALUED USING INPUTS OTHER THAN THE QUOTED PRICES INCLUDED IN LEVEL 1 AND THAT ARE OBSERVABLE FOR THE ASSET OR LIABILITY CONCERNED, EITHER DIRECTLY (I.E. AS PRICES) OR INDIRECTLY (I.E. DERIVED FROM PRICES)**

These are the instruments measured using a financial model based on market inputs. The inputs used shall be observable in active markets; using some unobservable inputs is possible only if the latter have only a minor impact on the fair value of the instrument. The prices published by an external source, derived from the valuation of similar instruments are considered as data derived from prices.

Level 2 instruments include in particular the non-derivative financial instruments carried at fair value on the balance sheet that are not directly quoted or do not have a quoted price on a sufficiently active market (e.g. corporate bonds, repos transactions, mortgage-backed securities, units of funds), and the firm derivatives and options traded over-the-counter: interest rate swaps, caps, floors, swaptions, equity options, index options, foreign exchange options, commodity options and credit derivatives. The maturities of these instruments are linked to ranges of terms commonly traded in the market, and the instruments themselves can be simple or offer a more complex remuneration profile (e.g. barrier options, products with multiple underlying instruments), with said complexity remaining however limited. The valuation techniques used in this category are based on common methods shared by the main market participants.

This category also includes the fair value of loans and receivables at amortised cost granted to counterparties whose credit risk is quoted via Credit Default Swap (see Note 3.9).

### **LEVEL 3 (L3): INSTRUMENTS VALUED USING INPUTS A SIGNIFICANT PART OF WHICH ARE NOT BASED ON OBSERVABLE MARKET DATA (REFERRED TO AS UNOBSERVABLE INPUTS)**

Level 3 instruments carried at fair value on the balance sheet are valued using financial models based on market inputs among which those which are unobservable or observable on insufficiently active markets, have a significant impact on the fair value of the financial instrument as a whole.

Accordingly, Level 3 financial instruments include derivatives and repo transactions with longer maturities than those usually traded and/or with specifically-tailored return profiles, structured debts including embedded derivatives valued based on a method using unobservable inputs or long-term equity investments valued based on a corporate valuation method, which is the case for unlisted companies or companies listed on an insufficiently liquid market.

The main L3 complex derivatives are:

- equity derivatives: options with long maturities and/or incorporating bespoke remuneration mechanisms. These instruments are sensitive to market inputs (volatility, dividend rates, correlations, etc.). In the absence of market depth and an objective approach made possible by regularly observed prices, their valuation is based on proprietary methods (e.g. extrapolation from observable data, historical analysis). Hybrid equity instruments (i.e. having at least one non-equity underlying instrument) are also classified as L3 insofar as the correlations between the different underlying assets are generally unobservable;
- interest rate derivatives: long-term and/or exotic options, products sensitive to correlation between different interest rates, different exchange rates, or between interest rates and exchange rates, for example for *quanto* products (in which the instrument is settled in a currency different from the currency of the underlying asset); they are liable to be classified as L3 because the valuation inputs are unobservable due to the liquidity of the correlated pair and the residual maturity of the transactions (e.g. exchange rate correlations are deemed unobservable for the USD/JPY);
- credit derivatives: L3 credit derivatives mainly include baskets of instruments exposed to time to default correlation (“N to default” products in which the buyer of the hedge is compensated as of the N<sup>th</sup> default, which are exposed to the credit quality of the issuers comprising the basket and to their correlation, or CDO Bespoke products, which are Collateralised Debt Obligations created specifically for a group of investors and structured according to their needs), as well as products subject to credit spread volatility;
- commodity derivatives: this category includes products involving unobservable volatility or correlation inputs (i.e. options on commodity swaps or instruments based on baskets of underlyings).

## NOTE 3.4.4 VALUATION METHODS OF FINANCIAL INSTRUMENTS CARRIED AT FAIR VALUE ON THE BALANCE SHEET

For financial instruments recognised at fair value on the balance sheet, fair value is determined primarily on the basis of the prices quoted in an active market. These prices may be adjusted, if they are not available at the balance sheet date in order to incorporate the events that have an impact on prices and occurred after the closing of the stock markets but before the measurement date or in the event of an inactive market.

However, due notably to the varied characteristics of financial instruments traded over-the-counter on the financial markets, a large number of financial products traded by the Group does not have quoted prices in the markets.

For these products, fair value is determined using models based on valuation techniques commonly used by market participants to measure financial instruments, such as discounted future cash flows for swaps or the Black & Scholes formula for certain options and using valuation parameters that reflect current market conditions at the balance sheet date. These valuation models are validated independently by the experts from the Market Risk Department of the Group's Risk Division.

Furthermore, the inputs used in the valuation models, whether derived from observable market data or not, are checked by the Finance Division of Market Activities, in accordance with the methodologies defined by the Market Risk Department.

If necessary, these valuations are supplemented by additional reserves (such as bid-ask spreads or liquidity) determined reasonably and appropriately after an analysis of available information.

Derivatives and security financing transactions are subject to a Credit Valuation Adjustment (CVA) or Debt Valuation Adjustment (DVA). The Group includes all clients and clearing houses in this adjustment, which also reflects the netting agreements existing for each counterparty.

The CVA is determined based on the Group entity's expected positive exposure to the counterparty, the counterparty's probability of default and the amount of the loss given default. The DVA is determined symmetrically based on the negative expected exposure. These calculations are carried out over the life of the potential exposure, with a focus on the use of relevant and observable market data. Since 2021, a system has been in place to identify the new transactions for which CVA/DVA adjustments are significant. These transactions are then classified in Level 3.

Similarly, an adjustment to take into account the costs or profits linked to the financing of these transactions (FVA, Funding Value Adjustment) is also performed.

Observable data must be: independent, available, publicly distributed, based on a narrow consensus and backed up by transaction prices.

For example, consensus data provided by external counterparties are considered observable if the underlying market is liquid and if the prices provided are confirmed by actual transactions. For long maturities, these consensus data are not observable. This is the case for the implied volatility used for the valuation of equity options with maturities of more than five years. However, when the residual maturity of the instrument falls below five years, its fair value becomes sensitive to observable inputs.

In the event of unusual tensions on the markets, leading to a lack of the usual reference data used to measure a financial instrument, the Risk Division may implement a new model in accordance with pertinent available data, similar to methods used by other market players.

### SHARES AND OTHER EQUITY SECURITIES

For listed shares, fair value is taken to be the quoted price on the balance sheet date.

The significant unlisted securities and the significant securities listed on an illiquid market will be valued primarily by using a developed valuation method: Discounted Cash Flows (DCF) or Discounted Dividend Model (DDM) and/or Market multiples.

For non-significant unlisted shares, fair value is determined depending on the type of financial instrument and according to one of the following methods:

- proportion of net asset value held;
- valuation based on a recent transaction involving the issuing company (third party buying into the issuing company's capital, appraisal by a professional valuation agent, etc.);
- valuation based on a recent transaction in the same sector as the issuing company (income multiple, asset multiple, etc.).

### DEBT INSTRUMENTS HELD IN PORTFOLIO, ISSUES OF STRUCTURED SECURITIES MEASURED AT FAIR VALUE AND FINANCIAL DERIVATIVES INSTRUMENTS

The fair value of these financial instruments is determined based on the quoted price on the balance sheet date or prices provided by brokers on the same date, when available. For unlisted financial instruments, fair value is determined using valuation techniques. Concerning liabilities measured at fair value, the on-balance sheet amounts include changes in the Group's issuer credit risk.

### OTHER DEBTS

For listed financial instruments, fair value is taken as their closing quoted price on the balance sheet date. For unlisted financial instruments, fair value is determined by discounting future cash flows to present value at market rates (including counterparty risks, non-performance and liquidity risks).

### CUSTOMER LOANS

The fair value of loans and receivables is calculated, in the absence of an actively traded market for these loans, by discounting the expected cash flows to present value at a discount rate based on interest rates prevailing on the market at the reporting date for loans with broadly similar terms and maturities. These discount rates are adjusted for borrower credit risk.

**NOTE 3.4.5 ESTIMATES OF MAIN UNOBSERVABLE INPUTS**

The following table provides, for Level 3 instruments, the ranges of values of the most significant unobservable inputs by main product type.

(In EURm)

Cash instruments and derivatives	Main products	Valuation techniques used	Significant unobservable inputs	Range of inputs	
				min.	max.
Equities/funds	Simple and complex instruments or derivatives on funds, equities or baskets of stocks	Various option models on funds, equities or baskets of stocks	Equity volatilities	1.00%	623.30%
			Equity dividends	0.00%	16.00%
			Correlations	-80.10%	99.90%
			Hedge fund volatilities	7.60%	7.60%
			Mutual fund volatilities	1.70%	26.80%
Interest rates and Forex	Hybrid forex/interest rate or credit/interest rate derivatives	Hybrid forex interest rate or credit interest rate option pricing models	Correlations	-80.00%	85.00%
	Forex derivatives	Forex option pricing models	Forex volatilities	1.00%	31.00%
	Interest rate derivatives whose notional is indexed to prepayment behaviour in European collateral pools	Prepayment modelling	Constant prepayment rates	0.00%	20.00%
	Inflation instruments and derivatives	Inflation pricing models	Correlations	72.00%	90.00%
Credit	Collateralised Debt Obligations and index tranches	Recovery and base correlation projection models	Time to default correlations	0.00%	100.00%
			Recovery rate variance for single name underlyings	0.00%	100.00%
			Time to default correlations	0.00%	100.00%
	Other credit derivatives	Credit default models	Quanto correlations	0.00%	100.00%
			Credit spreads	0,0 bps	82,4 bps
Commodities	Derivatives on commodities baskets	Option models on commodities	Correlations	NA	NA
Long term equity investments	Securities held for strategic purposes	Net Book Value/Recent transactions	Not applicable	-	-

The table below shows the valuation of cash and derivative instruments on the balance sheet. When it comes to hybrid instruments, they are broken down according to the main unobservable inputs.

	31.12.2023	
	Assets	Liabilities
(In EURm)		
Equities/funds	12,833	22,771
Rates and Forex	13,031	22,676
Credit	166	206
Long term equity investments	1,833	-
<b>TOTAL</b>	<b>27,863</b>	<b>45,653</b>

**NOTE 3.4.6 SENSITIVITY OF FAIR VALUE FOR LEVEL 3 INSTRUMENTS**

Unobservable inputs are assessed carefully, particularly in this persistently uncertain economic environment and market. However, by their very nature, unobservable inputs inject a degree of uncertainty into the valuation of Level 3 instruments.

To quantify this, fair value sensitivity was estimated at 31 December 2023 on instruments whose valuation requires certain unobservable inputs. This estimate was based either on a “standardised” variation in unobservable inputs, calculated for each input on a net position, or on

assumptions in line with the additional valuation adjustment policies for the financial instruments in question.

The “standardised” variation corresponds to the standard deviation of consensus prices (TOTEM...) used to measure an input nevertheless considered as unobservable. In cases of unavailability of these data, the standard deviation of historical data is then used to assess the input.

**SENSITIVITY OF LEVEL 3 FAIR VALUE TO A “STANDARDISED” VARIATION IN UNOBSERVABLE INPUTS**

(In EURm)	31.12.2023		31.12.2022	
	Negative impact	Positive impact	Negative impact	Positive impact
<b>Shares and other equity instruments and derivatives</b>	<b>(31)</b>	<b>52</b>	<b>(30)</b>	<b>82</b>
Equity volatilities	(16)	16	-	5
Dividends	(10)	10	-	20
Correlations	(5)	25	(30)	56
Hedge Fund volatilities	-	0	-	-
Mutual Fund volatilities	(0)	1	(0)	1
<b>Rates or Forex instruments and derivatives</b>	<b>(13)</b>	<b>25</b>	<b>(15)</b>	<b>28</b>
Correlations between exchange rates and/or interest rates	(13)	24	(14)	27
Forex volatilities	(0)	0	(1)	1
Constant prepayment rates	-	-	-	-
Inflation/inflation correlations	(0)	0	(0)	0
<b>Credit instruments and derivatives</b>	<b>(4)</b>	<b>4</b>	<b>-</b>	<b>5</b>
Time to default correlations	(0)	0	-	0
Quanto correlations	(0)	0	-	3
Credit spreads	(3)	3	-	2
<b>Commodity derivatives</b>	<b>NA</b>	<b>NA</b>	<b>NA</b>	<b>NA</b>
Commodities correlations	NA	NA	NA	NA
<b>Long term securities</b>	<b>NA</b>	<b>NA</b>	<b>NA</b>	<b>NA</b>

It should be noted that, given the already conservative valuation levels, this sensitivity is higher for a favourable impact on results than for an unfavourable impact. Moreover, the amounts shown above illustrate

the uncertainty of the valuation as at the computation date based on a “standardised” variation in inputs. Future variations in fair value cannot be deduced or forecast from these estimates.

**NOTE 3.4.7 DEFERRED MARGIN RELATED TO MAIN UNOBSERVABLE INPUTS**

At initial recognition, financial assets and liabilities are measured at fair value, that is to say the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When this fair value differs from transaction price and the instrument's valuation technique uses one or more unobservable inputs, this difference representative of a commercial margin is deferred in time to

be recorded in the income statement, from case to case, at maturity of the instrument, at the time of sell or transfer, over time, or when the inputs become observable.

The table below shows the amount remaining to be recognised in the income statement due to this difference, less any amounts recorded in the income statement after initial recognition of the instrument.

<i>(In EURm)</i>	<b>2023</b>	<b>2022</b>
<b>Deferred margin as at 1 January</b>	<b>1,248</b>	<b>1,191</b>
Deferred margin on new transactions during the period	470	794
Margin recorded in the income statement during the period	(638)	(737)
<i>o/w amortisation</i>	(390)	(497)
<i>o/w switch to observable inputs</i>	(20)	(12)
<i>o/w disposed, expired or terminated</i>	(228)	(228)
<b>Deferred margin as at 31 December</b>	<b>1,080</b>	<b>1,248</b>

## ACCOUNTING PRINCIPLES

Loans, receivables and debt securities are measured at amortised cost where their contractual cash flows are consistent with basic lending arrangements (SPPI) and they are managed under a “Hold to Collect” business model.

Subsequent to initial recognition, they are measured at amortised cost using the effective interest method, and their accrued or earned income are recorded in profit or loss under Interest and similar income. Furthermore, as these financial assets are subject to impairment for credit risk, changes in the expected credit losses are recorded in profit or loss under Cost of credit risk with a corresponding impairment of the amortised cost on the asset side of the balance sheet. The applicable impairment rules are described in Note 3.8. When a loan or a receivable is classified in Stage 3 for impairment (doubtful outstanding), the subsequent accrued interest incremented to the carrying amount of the financial asset before impairment is limited to the interest recognised in profit or loss. The amount of such interest is then calculated by applying the effective interest rate to the net carrying amount of the financial asset (see Note 3.7).

Loans granted by the Group may be subject to renegotiations for commercial reasons, while the borrowing customer is not experiencing any financial difficulties or insolvency. Such efforts are undertaken for customers for which the Group agrees to renegotiate their debt at the new market conditions in the interest of preserving or developing a business relationship, in accordance with the credit approval procedures in force and without relinquishing any principal or accrued interest. Except in specific cases where the modification due to the renegotiation would not be considered significant, renegotiated loans are derecognised as at the renegotiation date, and the new loans contracted under the renegotiated terms and conditions replace the previous loans in the balance sheet as at this same date. The new loans are subject to the SPPI test to determine how they are classified in the balance sheet. If a loan qualifies as a basic instrument (SPPI), the handling and implementation fees associated with the new transaction received are included in the effective interest rate of the new instrument.

Customer loans at amortised cost include lease receivables where they are classified as finance leases. Leases granted by the Group are classified as finance leases if they transfer substantially all the risks and rewards incidental to ownership of the leased asset to the lessee. Otherwise, they are classified as operating leases (see Note 4.2).

These finance lease receivables represent the Group’s net investment in the lease, calculated as the present value of the minimum payments to be received from the lessee, plus any unguaranteed residual value, discounted at the interest rate implicit in the lease. In the event of a subsequent reduction in the estimated unguaranteed residual value used to calculate the lessor’s investment in the finance lease, the present value of this reduction is recognised as a loss under Expenses from other activities in the income statement and as a reduction of the finance lease receivables on the asset side of the balance sheet.

## BUSINESS MODEL “HOLD TO COLLECT”

Under this model, financial assets are managed to obtain cash flows by collecting contractual payments over the life of the instrument.

To achieve the objective of this business model, it is not necessary for the entity to hold all the instruments until maturity. Selling assets remains consistent with a business model whose objective is to collect contractual cash flows in the following cases:

- the financial asset is sold following an increase in the asset’s credit risk; or
- the sale of the financial asset occurs close to its maturity and the proceeds from the sale are similar to the amount to be collected from the remaining contractual cash flows.

Other sales can be consistent with the objective of collecting contractual cash flows, as well, provided they are infrequent (even if significant in value) or insignificant in value, both individually and in aggregate terms (even if frequent). Such other sales include sales made to manage credit concentration risk (without an increase in the asset’s credit risk). The Group has set up procedures for reporting and analysing all significant projected sales of financial assets held for collecting contractual cash flows, as well as a periodic review of sales that have occurred.

### Financing activities

Within the Group, the “hold to collect” business model is mainly applied by financing activities managed by French Retail Banking, International Retail Banking and Financial Services and by Global Banking and Investor Solutions, except for the part of syndicated loans that is expected to be sold.

**NOTE 3.5.1 DUE FROM BANKS**

**NOTE 3.6 Debts****ACCOUNTING PRINCIPLES**

Debts include the non-derivative financial liabilities that are not measured at fair value through profit or loss (these instruments are described in Note 3.1.3).

They are recognised in the balance sheet, depending on the type of instrument and counterparty, under Due to banks, Customer deposits, Debt securities issued or Subordinated debt.

Subordinated debts are all dated or undated borrowings, whether or not in the form of debt securities, which in the event of the liquidation of the borrowing company may only be redeemed after all other creditors have been paid.

Debts are initially recognised at cost, *i.e.* at the fair value of the amount borrowed net of transaction fees. These liabilities are measured as at the reporting date at amortised cost using the effective interest rate method. As a result, issue or redemption premiums on bonds are amortised over the lifetime of the instruments concerned. Accrued or paid expenses are recorded in profit or loss under Interest and similar expense.

The Group's obligations arising from mortgage savings accounts and plans are recorded under Customer deposits – Regulated savings accounts. A provision may be recorded in respect of such mortgage savings instruments (see Note 8.3).

<sup>(1)</sup> Including term-deposits linked to central banks, and in particular long-term refinancing operations set up by the ECB (Targeted Longer-Term Refinancing Operations – TLTRO).

**TLTRO**

The European Central Bank (ECB) launched in 2019 a third series of Targeted Longer-Term Refinancing Operations (TLTRO) with the aim of maintaining favourable credit conditions in the euro area. As in the two previous systems, the return on these loans depended on the performance of the borrowing banking institutions in terms of loans granted to their household customers (excluding real estate loans) and business customers (excluding financial institutions); depending on these performances, it was possible for the borrowing institutions to benefit from a reduced interest rate and an additional temporary bonus applicable from 24 June 2020 to 23 June 2021 (reduction by 50 basis points of the average deposit facility rate with a floor rate set at -1%). These TLTRO III operations were conducted on a quarterly basis between September 2019 and December 2021, for a possible total of 10 drawdowns. Each such operation has a three-year maturity and includes an early repayment option. Some terms and conditions were modified in March 2020, in particular the loan production objectives, rate conditions and drawdown limit, in order to further support the granting of loans at the outset of the Covid-19 crisis. In January 2021, the ECB decided to extend the additional temporary bonus over the period from 24 June 2021 to 23 June 2022 subject to performance in terms of number of granted loans observed over a new reference period from 1 October 2020 to 31 December 2021.

The Group, *via* Societe Generale and Crédit du Nord, subscribed to TLTRO III loans through quarterly drawdowns staggered between December 2019 and December 2021. The residual amount of TLTRO loans on the liability side of the balance sheet is 24 billion euros as at 31 December 2023, following the early repayments made in the 2023 financial year for an amount of 28.7 billion euros.

As at 31 December 2021, the Group had already achieved the stability objectives for outstanding loans allowing it to benefit from the reduced interest rate as well as from the two temporary additional bonuses applied respectively over the periods from 24 June 2020 to 23 June 2021 and from 24 June 2021 to 23 June 2022. The additional bonuses were qualified for accounting purposes as subsidies according to IAS 20 and the loans as liabilities at adjustable rates under IFRS 9.

On 27 October 2022, the ECB changed the methods for calculating the interest rate relating to the last period of TLTRO III. These new calculation methods have been applied since 23 November 2022.

As at 31 December 2023, the total cost of TLTRO borrowings including interest and bonuses is therefore between 1.40% and 3.10% depending on the drawdown dates. For the financial year 2023, the total amount of interests and bonuses on the TLTRO borrowings recorded under Interest and similar expense is EUR 1.2 billion.

**NOTE 3.7 Interest income and expense**

Interest is compensation for a financial service, consisting in a lender making a certain amount of cash available to a borrower for an agreed period of time. Such compensated financing arrangements can be loans, deposits or securities (bonds, negotiable debt securities...).

This compensation is a consideration for the time value of money, and additionally for credit risk, liquidity risk and administrative costs, all borne by the lender for the duration of the financing agreement. The interest can also include a margin used by the lending bank to remunerate equity instruments (such as ordinary shares) that are required by prudential regulation to be issued in relation to the amount of financing granted, so as to guarantee its own solvency.

Interest is recognised as expense or income over the life of the financing service granted or received, proportionally to the principal amount outstanding.

**ACCOUNTING PRINCIPLES**

Interest income and expense are recorded in the income statement under Interest and similar income and Interest and similar expense for all financial instruments measured using the effective interest method (instruments at amortised cost and debt instruments at fair value through other comprehensive income) and for all financial instruments mandatorily measured at fair value through profit and loss and interest rate risk hedging derivatives for the portion of income or expenses representative of the effective interest rate. Negative interest incomes on financial assets are recorded under Interest and similar expense; negative interest expenses on financial liabilities are recorded under Interest and similar income.

The effective interest rate is taken to be the rate used to net discount future cash inflows and outflows over the expected life of the instrument in order to establish the net book value of the financial asset or liability. The calculation of this rate considers the future cash flows estimated on the basis of the contractual provisions of the financial instrument without taking account of possible future credit losses and also includes commissions paid or received between the parties where these may be assimilated to interest, directly linked transaction costs, and all types of premiums and discounts.

Where a financial asset is classified in Stage 3 for impairment, subsequent interest income is recognised in profit or loss by applying the effective interest rate to the net carrying amount of the financial asset with an offsetting entry equal to the outstanding financial asset before impairment.

Moreover, except for those related to employee benefits, provisions recognised as balance sheet liabilities generate interest expenses which are calculated using the same risk-free interest rate as that used to discount the expected outflow of resources as soon as the effects of this update are significant.

**SPECIFIC TREATMENT RELATED TO THE REPLACEMENT OF A REFERENCE INTEREST RATE BY AN ALTERNATIVE REFERENCE INTEREST RATE (POSSIBLY INCLUDING A FINANCIAL COMPENSATION) – IBOR REFORM**

The replacement of a reference interest rate by an alternative reference interest rate (possibly including a financial compensation in the form of a margin adjustment expressed in basis points and/or a cash amount) is liable to change the basis for determining the contractual cash flows of a financial asset or liability (*i.e.*, the method for calculating the return on it).

The effective interest rate is then modified prospectively to reflect the change from the current reference interest rate to an alternative reference interest rate. This last is adjusted for the new margin expressed in basis points and, if needed, for the amortisation over the remaining term of the contract, of the cash amount paid at the time of the modification.

(1) In 2022, the interest, then negative, on TLTRO loans was recorded among the products of Loans/borrowings from credit institutions. In 2023, interest on TLTRO loans is recorded among the expenses of Due from/to banks. (see Note 3.6).

(2) Including EUR 1,237 million for insurance subsidiaries in 2023 (EUR 1,411 million in 2022). This amount must be read together with the financial income and expenses of insurance contracts (see Note 4.3, Detail of performance of insurance activities).

These interest expenses include the refinancing cost of financial instruments at fair value through profit or loss, the results of which are classified in net gains or losses on these instruments (see Note 3.1). Given that income and expenses booked in the income statement are

classified by type of instrument rather than by purpose, the net income generated by activities in financial instruments at fair value through profit or loss must be assessed as a whole.

<b>TOTAL</b>	<b>17,931</b>	<b>12,172</b>

**NOTE 3.8 Impairment and provisions**

Some financial assets (loans, debt securities) involve credit risk which exposes the Group to a potential loss if the counterparty or the securities issuer were to be unable to respect their financial commitments. To compensate for this risk, the Bank receives a portion of the contractual interest on those assets, called credit margin, compensates it.

For loans, receivables and debt securities measured at amortised cost or fair value through other comprehensive income, this potential loss, or expected credit loss, as estimated by the Group, is recognised in profit or loss without waiting for a payment default individually impacting the counterparty; the expenses partly offset the interest income and thus avoid overestimating the income during the periods prior to the counterparty default. On balance sheet, this potential loss is recognised as an impairment that reduces the carrying amount of assets measured at amortised cost. Impairment are written-back in case of a subsequent decrease of credit risk.

Potential losses recognised in the income statement represent initially the credit losses expected by the Group over the year to come. Subsequently, the amount is increased by the expected loss at maturity of the instrument in case of significant increase of risk.

For financial assets measured at fair value through profit or loss (including instruments held by global markets activities), their fair value includes already the expected credit loss, as assessed by the market participants, on the residual lifetime of the instrument.

## ACCOUNTING PRINCIPLES

### Recognition of expected credit losses

Debt instruments (loans, debt securities and bonds and similar) classified as financial assets at amortised cost or as financial assets at fair value through other comprehensive income, operating lease receivables, customer receivables and income to be received included amongst Other assets, as well as loan commitments granted and guarantee commitments issued, are systematically subject to impairment or provisions for expected credit losses. These impairments and provisions are recognised as the loans are granted, the commitments undertaken, or the debt securities purchased, without waiting for the occurrence of an objective evidence of impairment.

To determine the amount of impairment or provision to be recorded at each reporting date, these exposures are split among three categories based on the increase in credit risk observed since initial recognition. An impairment or provision shall be recognised for the exposures in each category as follows:

Credit risk category	Observed deterioration in credit risk since initial recognition of the financial asset 		
	Stage 1 Performing assets	Stage 2 Under-performing or downgraded assets	Stage 3 Credit-impaired or defaulted assets
Transfer criteria	Initial recognition of the instrument in stage 1 ► <i>Maintained if the credit risk has not increased significantly</i>	Credit risk on the instrument has increased significantly since initial recognition / 30 days past due	Evidence that the instrument is become credit-impaired / 90 days past due
Measurement of credit risk	12-month expected credit losses	Lifetime expected credit losses	Lifetime expected credit losses
Interest income recognition basis	Gross carrying amount of the asset before impairment	Gross carrying amount of the asset before impairment	Net carrying amount of the asset after impairment

### Exposures classified in Stage 1

At the initial recognition date, the exposures are systematically classified in Stage 1, unless they are purchased or originated credit-impaired instruments.

### Exposures classified in Stage 2

To identify Stage 2 exposures, the significant increase in credit risk compared to the date of initial recognition is assessed by the Group using all available past and forward-looking data (behavioural scores, loan to value indicators, macroeconomic forecast scenarios, sector analyses, cash flow projections for some counterparties, etc.).

The three criteria used to assess the significant changes in credit risk are detailed below. Once only one of these three criteria is met, the relevant outstanding is transferred from Stage 1 to Stage 2 and related impairment or provisions are adjusted accordingly. Furthermore, the Group does not apply the exemption for low credit risk; it thus carries out an assessment of a significant increase in credit risk for all loans and debt securities.

#### CRITERIA 1: THE CLASSIFICATION OF THE COUNTERPARTY IN "SENSITIVE"

To determine the classification of the counterparty as "sensitive" (notion of watch list), the Group analyses:

- the counterparty's credit rating (where it is the subject of an internal analysis); and
- the changes in its operating sector, in macroeconomic conditions and in the behaviours of the counterparty which may also be indicative of a deterioration in credit risk.

If, after a review, a counterparty is deemed "sensitive", all existing contracts between the Group and this counterparty are transferred into Stage 2 (to the extent that this approach does not lead to a distortion compared with an analysis of the credit quality at the time of granting of each financial instrument) and the related impairment and provisions are increased up to the lifetime expected credit losses.

Once a counterparty has been placed on a watch list, all new transactions originated with that counterparty are recorded in Stage 1.

#### CRITERIA 2: THE MAGNITUDE OF THE CHANGE IN A COUNTERPARTY'S CREDIT RATING SINCE THE INITIAL RECOGNITION

This magnitude is assessed from contract to contract, from the date of their initial recognition to the balance sheet date.

To determine whether a deterioration or improvement in the credit rating between the date of initial recognition and the balance sheet date is significant enough to prompt a change in the impairment Stage, thresholds are set once a year by the Risk Division. These transfer thresholds between Stage 1 and Stage 2 are determined for each homogeneous portfolio of contracts (notion of risk segment based on the customer typology and the credit quality) and are calculated based on their specific probability-of-default curves. These thresholds may be expressed as an absolute or relative increase in the probability of default. For example, the threshold is set at +50 bp for sovereign debt, +100 bp for the Very Large Enterprises (turnover exceeding EUR 500 million), +200 bp for SME and +10 bp for the French mortgages of the Societe Generale retail network.

In addition and in line with the recommendations issued by the EBA and the ECB, loans for which the probability of default has been multiplied by three between the date of first recognition and the balance sheet date are transferred to Stage 2.

#### CRITERIA 3: THE EXISTENCE OF PAYMENTS MORE THAN 30 DAYS PAST DUE

There is a (rebuttable) presumption of a significant deterioration in credit risk when a payment on an asset is more than 30 days past due.

The three criteria are symmetrical: thus, a removal from the watch list of sensitive counterparties, a sufficient improvement in the debtor's credit rating or a settlement of payments more than 30 days overdue results in a return to Stage 1, without any probation period in Stage 2.

#### PARTICULAR CASE OF EXPOSURES WITHOUT CREDIT RATING

For exposures to counterparties for which no credit rating is available (retail customers and a limited portion of the "small- and medium- sized companies" segment), the transfer into Stage 2 is based on:

- the Basel behavioural score or the existence of payments more than 30 days past due for retail customers;
- the placement on the watch list or the existence of payments more than 30 days past due for Corporate.

#### Exposures classified in Stage 3

To identify Stage 3 exposures (doubtful exposures), the Group has been applying to most of its entities, since July 2020, the new definition of default as detailed in the guidelines published by the European Banking Authority (EBA). This definition leads to applying the following criteria to classify exposures as Stage 3:

- one or more unpaid payments of over 100 euros for Retail (500 euros for Non-retail) during 90 consecutive days, representing at least 1% of the total exposure of the customer. This unpaid amount may or may not be accompanied by a recovery procedure except for restructured loans classified into Stage 1 or 2 which are retransferred into Stage 3 from the first amount unpaid after 30 days during the two-year probation period. In addition, only missed payments related to business litigations, specific contractual features or IT failures may avoid automatic transfer into Stage 3 after 90 days;
- identification of other criteria that evidence, even in the absence of missed payments, that this is unlikely that the counterparty could meet all its financial obligations:
  - a significant deterioration in the counterparty's financial situation creates a strong probability that it will not be able to meet all of its commitments and thus represents a risk of loss for the Group,
  - the granting of concessions to the clauses of the loan agreement, which would not have been granted if the counterparty wasn't experiencing financial difficulties (restructured loans) and which result in a decrease in the present value of the loan cash flows of more than 1% of its initial value,
  - the existence of litigious proceedings (*ad hoc* mandate, bankruptcy protection, court-ordered settlement or compulsory liquidation or other similar proceedings in local jurisdictions).

The Group applies the impairment contagion principle to all of the defaulting counterparty's exposures. When a debtor belongs to a group, the impairment contagion principle may also be applied to all of the Group's exposures.

The classification in Stage 3 is kept during the 3-month probation period after the disappearance of all default indicators described above. The probation period in Stage 3 is extended to one year for the restructured loans that have been transferred in Stage 3.

In the case of a return to Stage 2, the exposures are kept in Stage 2 during a probation period before assessing whether they could be transferred to Stage 1. This probation period in Stage 2 is from six months to two years according to the nature of the risk portfolio to which the exposures belong.

#### Measurement of depreciation and provision

Stage 1 exposures are impaired for the amount of credit losses that the Group expects to incur within 12 months (12-month expected credit losses), based on past data and the current situation. Accordingly, the amount of impairment is the difference between the gross carrying amount of the asset and the present value of future cash flows deemed to be recoverable, taking into account the impact of collateral called up or liable to be called up and the probability of a default event occurring within the next 12 months.

Stage 2 and 3 exposures are impaired for the amount of credit losses that the Group expects to incur over the life of the exposures taking into consideration past data, the present situation and reasonable forecast changes in economic conditions, and relevant macroeconomic factors through to maturity. Accordingly, the amount of impairment is the difference between the gross carrying amount of the asset and the present value of future cash flows deemed to be recoverable, taking into account the impact of collateral called up or liable to be called up and the probability of a default event occurring through to the instrument's maturity.

Financial guarantees are taken into account in the estimation of the recoverable cash flows when they are integral part of the contractual characteristics of the related loans and they are not recognised separately.

If the financial guarantees don't meet these criteria and as a consequence their effects cannot be taken into account in the calculation of impairment, a separate asset is recorded in the balance sheet under Other Assets. The book value of this asset is representative of the expected credit losses, recorded in the balance sheet within the impairment of assets, for which the Group is almost certain to receive a compensation. Changes in the carrying amount of this asset are recorded in the income statement under "Cost of credit risk".

Irrespective of the Stage in which the exposures are classified, cash flows are discounted using the initial effective interest rate of the financial asset. The amount of impairment is included in the net carrying amount of the credit impaired financial asset. Impairment allocations/reversals are recorded in the income statement under Cost of credit risk.

The expected credit losses on the financing commitments and financial collateral given are determined using a similar approach applied to the estimated amount of Group exposure in case of default (amount drawn from the financing commitment as at the default date, amount of collateral called up as at the default date). The credit loss amounts thus calculated at one year (Stage 1) or over the life of the commitments (Stages 2 and 3) are recognised as liabilities on the balance sheet under Provisions.

For operating leases and trade receivables, the Group uses the "simplified" approach, under which impairments are calculated as lifetime expected credit losses since their initial recognition, regardless of any subsequent changes in the counterparty's credit risk. The assessment of depreciation is mainly based on historical data on default rates and incurred losses in the event of default. Adjustments to take into account forward-looking information on economic conditions and macroeconomic factors are determined by an expert.

### **Restructured loans**

Loans issued or acquired by the Group may be restructured due to financial difficulties. This takes the shape of a contractual modification of the initial terms of the loan (e.g. lower interest rates, rescheduled loan payments, partial debt forgiveness, or additional collateral). This adjustment of the contractual terms is strictly linked to the borrower's financial difficulties and/or insolvency (whether they have already become insolvent or are certain to do so if the loan is not restructured).

Where they still pass the SPPI test, restructured loans are still recognised in the balance sheet and their amortised cost before credit risk allowance is adjusted for a discount representing the restructuring loss. This discount is equal to the difference between the present value of the new contractual cash flows resulting from the restructuring of the loan and the amortised cost before credit risk allowance less any partial debt forgiveness; it is booked to Cost of credit risk in the income statement. As a result, the amount of interest income subsequently recognised into income is still computed using the initial effective interest rate of the loan and based on the net carrying amount of the asset after impairment during at least the first year following the restructuring.

Post-restructuring, these financial assets are classified in Stage 3 (credit-impaired exposures) whether the present value of modified cash flows decreases by more than 1% compared with the carrying amount of financial instruments before the restructuring or there is a high probability that the counterparty cannot meet all its commitments involving a risk of loss for the Group. In these two cases, the restructuring of financial assets leads to default. Stage 3 classification is maintained for at least one year, or longer if the Group is uncertain that the borrowers will be able to meet their commitments. Once the loan is no longer classified in Stage 3 or the loans which the present value does not decrease more than 1%, the assessment of the significant increase of credit risk will be performed by comparing the characteristics of the instrument at the closing date and the characteristics at the initial recognition date of the loan before restructuring, applying the transfer rules to Stage 1 and 2 previously mentioned in this note with specific conditions during the probation period (during the first two-years following the restructuring, loans are retransferred into Stage 3 as of payments more than 30 days past due).

The criteria to return to Stage 1 for the restructured loans are similar to those of all the other exposures, after a probation period in Stage 3 of a minimum of one year.

Given the new contractual terms arising from the restructuring where they no longer pass the SPPI test, restructured loans are derecognised and replaced by new loans recognised according to the restructured terms and conditions. These new assets are recognised as Financial assets measured at fair value through profit or loss; On the date of recognition, the difference between the present value of the new cash flows and the net carrying amount of the initial asset is recorded under Cost of credit Risk in the income statement. These new loans are then classified as Financial assets measured at fair value through profit or loss.

Restructured loans do not include loans and receivables subject to commercial renegotiations that are loans to customers for which the Group has agreed to renegotiate the debt with the aim of maintaining or developing a commercial relationship, in accordance with the credit approval procedures in force and without relinquishing any principal or accrued interest. The accounting treatment of renegotiations is detailed in Note 3.5.

### **Total or partial recovery by activating the guarantee**

A claim may be recovered in the form of an asset (financial or tangible) that passes into the ownership of the Group as a result of the activation of a guarantee. This asset substitutes for the guaranteed claim on the date when the Group becomes its owner and is initially recognised at fair value as an asset on the balance sheet. Its classification and subsequent valuation method depend on the management intent.

## METHOD FOR ESTIMATING EXPECTED CREDIT LOSSES

The calculation method for the impairments and provisions for expected credit losses in Stage 1 and Stage 2 was developed in the Basel framework which served as a basis for selecting the assessment methods for the calculation parameters (probability of default and credit loss rate on the outstanding loans under an advanced Basel approach – IRBA and IRBF – and provisioning rate for the outstanding loans under the standardised Basel approach).

The Group's portfolios have been segmented in order to ensure homogeneity of the risk characteristics and a better correlation with the macroeconomic variables, both global and local. This segmentation allows for all the specificities of the Group to be addressed. It is consistent with or similar to the one specified in the Basel framework in order to ensure the uniqueness of the historical records of defaults and losses.

The nature of the variables used in the expected credit loss assessment models is presented in Chapter 4 of the present Universal Registration Document. The measurement of expected credit losses is performed based on the parameters mentioned below, supplemented with the internal analyses relating to the credit quality of each counterparty, individually or statistically.

## GEOPOLITICAL CRISES AND MACROECONOMIC CONTEXT

In 2023, the Group revised the parameters used in the models based on the updated macroeconomic scenarios which take account of the recent economic developments and macroeconomic impacts related to the current geopolitical environment (see Note 1).

To account for the uncertainties related to the macroeconomic and geopolitical environment, the Group updated the model and post-model adjustments in 2023.

The effects of these adjustments in the determination of expected credit losses are described hereinafter.

### Update of the models and impact on the estimation of expected credit losses

As at 31 December 2023, the updates of macroeconomic variables and probabilities of default as well as the updated weighting of the scenarios have resulted in a EUR 77 million decrease in the amount of impairment and provisions for credit risk:

- the impact of the revision of the macroeconomic variables and probabilities of default is a EUR 62 million decrease;
- the impact of the updated weighting of the macroeconomic scenarios described in Note 1 is a EUR 15 million decrease.

Furthermore, owing to the geopolitical context related to the war in Ukraine, all our Russian counterparties including residual exposures on Rosbank (EUR 2.1 billion as at 31 December 2022) have been classified as “sensitive” (concept of watch list) from the beginning of the conflict and the associated outstanding loans have been transferred to Stage 2. As at 31 December 2023, they amount to EUR 1.1 billion. Further analysis has resulted in the identification amidst this population of the outstanding loans that have to be transferred to Stage 3, and this from the beginning of the war in Ukraine (EUR 0.3 billion for 2023). The impact of these transfers on the calculation of the expected credit losses amounts to EUR 167 million as at 31 December 2023 (including the additional adjustment detailed in the “Other adjustments” sub-section).

### Adjustments supplementing the application of the models

As at 31 December 2023, the adjustment regarding the additional criterion for classification in Stage 2 set in 2020 following the Covid-19 crisis, has been removed (EUR 17 million as at 31 December 2022).

## Sectoral adjustments

The Group may supplement the models with sectoral adjustments relating to the possible revision of the expected credit loss estimates (with no impact on the classification of the outstanding loans) for some sectors.

These adjustments allow for better anticipation of the default/recovery cycle in some sectors that have a cyclical business, have been subject to peaks of default in the past or are most exposed to the current crises and on which the Group's exposure exceeds a threshold that is annually reviewed and set by the Risk Division.

These sectoral adjustments are examined and updated quarterly by the Risk Division and validated according to materiality thresholds by the General Management.

Along the revision of these adjustments, whenever compatible with the provisioning horizon, a qualitative analysis of the possible impact of climate risks on the calculation of expected credit losses has been introduced (see the “Incorporating the environment in the risk management framework” section of Chapter 4 in the Universal Registration Document).

The main sectors concerned as at 31 December 2023 are commercial real-estate, non-food retail, construction and the hotel, restaurant and leisure industry.

The total sectoral adjustments (excluding the additional sectoral adjustments described in the “Other adjustments” paragraph below) thus amount to EUR 667 million as at 31 December 2023 (EUR 570 million as at 31 December 2022). This increase is mainly due to an increase on the commercial real-estate and non-food retail sectors, the future circumstances of which are deteriorating owing to multiple factors, such as the difficult situation on the real estate market, the effects of inflation and the changes in purchasing behaviours. An increase of lesser magnitude has been observed on the construction sector. These increases are partly offset by a decrease on the oil and gas sector, and to a lesser extent on the hotel sector the situation of which has improved.

## Other adjustments

Adjustments based on expert opinion and with no impact on the classification, have also been made to reflect the deterioration in credit risk on some portfolios when this deterioration has not been observed through a line-by-line analysis of the outstanding stock:

- for the scope of entities that have not developed models enabling them to estimate the correlations between macroeconomic variables and default rate; and
- for the scopes on which models have been developed but cannot reflect future risks not observed in the past.

These adjustments amount to EUR 699 million as at 31 December 2023 (EUR 967 million as at 31 December 2022). This change results from the account taken of:

- the specific risk on the portfolio of offshore loans to Russian corporate customers resulting from the geopolitical situation; this adjustment is estimated by applying to the expected credit losses of this portfolio degraded scenarios (weighted by a probability of occurrence) for which probabilities of default and recovery prospects take account of the uncertainty relating to this environment;
- the risks arising from the specific economic environment, such as the higher inflation and interest rates, regarding fragile customers and the more specifically exposed portfolios, as such risks are not taken into account in the models.

The Group uses two main methods to estimate these adjustments:

- application, to the parameters of the expected credit loss models, of more severe probabilities of default reflecting the economic shock expected according to the Group's economic scenarios;
- application of sectoral adjustments according to the methodology described above to the sectors identified by the Group's Department of Economic and sectoral studies as particularly exposed in case of occurrence of a lasting stagflation scenario.

### NOTE 3.8.1 OVERVIEW

In accordance with the application of IFRS 9 "Financial instruments" by the insurance subsidiaries (see Note 1), the impairments and provisions of these subsidiaries are included in the tables below.

(1) Including Central Banks for EUR 220,725 million as at 31 December 2023 (versus EUR 204,553 million as at 31 December 2022).

In order to disclose its exposure to credit risk, the Group has decided to tabulate its assets outstanding and impairment by stage of impairment of the financial assets at amortised cost by Basel category, by geographical area, and by rating of the counterparty. Due to the

absence of significant exposure to credit risk for insurance activities, assets measured at fair value through other comprehensive income as well as for financing and guarantee commitments, this information is not presented below.

(1) Amounts restated compared to the financial statements published for 2022.

The financial assets measured at fair value through other comprehensive income mainly correspond to cash management for own account and to the management of the portfolio of HQLA (High Quality Liquid Assets) securities included in the liquidity reserves. These assets mainly correspond to Sovereigns classified in Stage 1.

The financing and guarantee commitments mainly correspond to outstanding amounts not drawn by corporate customers. These assets are mainly classified in Stage 1.

### GROUP ASSETS AT AMORTISED COST WITHOUT INSURANCE ACTIVITIES: OUTSTANDING AMOUNTS AND IMPAIRMENTS BY GEOGRAPHICAL ZONE

### GROUP ASSETS AT AMORTISED COST WITHOUT INSURANCE ACTIVITIES: SUBJECT TO IMPAIRMENT AND PROVISIONS BY RATING OF COUNTERPARTY<sup>(1)</sup>

Classification in Stage 1 or Stage 2 does not depend on the absolute probability of default but on the elements that make it possible to assess the significant increase in credit risk (see accounting principles), including the relative change in the probability of default

since initial recognition. Therefore, there is no direct relationship between the counterparty rating, presented in the table below, and the classification by stage of impairment.

(In EURm)	31.12.2023							
	Assets at amortised cost				Impairment			
	Stage 1	Stage 2	Stage 3	Total	Stage 1	Stage 2	Stage 3	Total

### ASSETS AT AMORTISED COST (INSURANCE ACTIVITIES EXCLUDED): SECTORAL BREAKDOWN OF CORPORATE EXPOSURES ON THE TOTAL GROUP EXPOSURE OF FINANCIAL ASSETS AT AMORTISED COST (ALL BASEL CATEGORIES)

The graphs below show the sectoral breakdown of the "Corporate" Basel portfolio (see Tables "Group assets at amortised cost without insurance activities: outstanding amounts and impairments by Basel portfolio" presented above). The percentages presented correspond to the net amounts (gross amounts reduced by the corresponding impairment).

### SECTOR BREAKDOWN OF GROUP CORPORATE NET EXPOSURE OVER TOTAL NET EXPOSURE OF FINANCIAL ASSETS AT AMORTISED COST AS AT 31 DECEMBER 2023

### SECTOR BREAKDOWN OF GROUP CORPORATE NET EXPOSURE OVER TOTAL NET EXPOSURE OF FINANCIAL ASSETS AT AMORTISED COST AS AT 31 DECEMBER 2022

## NOTE 3.8.2 IMPAIRMENT OF FINANCIAL ASSETS

## BREAKDOWN

In accordance with the application of IFRS 9 “Financial instruments” by the insurance subsidiaries (see Note 1), the impairment booked in these subsidiaries is presented below.

(In EURm)	Amount as at 31.12.2022 R	Allocations	Write-backs available	Net impairment losses	Write-backs used	Currency and scope effects	Amount as at 31.12.2023

<b>Amount as at 31.12.2023</b>	<b>1,048</b>	<b>127</b>	<b>1,973</b>	<b>163</b>	<b>7,484</b>	<b>593</b>	<b>10,505</b>

(1) The amounts of impairment presented in the line Production and Acquisition in Stage 2/Stage 3 could include contracts originated in Stage 1 and reclassified in Stage 2/Stage 3 during the period.

(2) Including repayments, disposals and debt waivers.

(3) The amounts presented in the transfers include variations due to amortisation. Transfers to Stage 3 correspond to outstanding amounts initially classified as Stage 1 which, during the period, were downgraded directly to Stage 3, or to Stage 2 and later to Stage 3.

### BREAKDOWN OF TRANSFERS BETWEEN STAGES FOR FINANCIAL ASSETS AT AMORTISED COST OF THE GROUP WITHOUT INSURANCE ACTIVITIES AS AT 30 JUNE 2023

The amounts presented in the transfers below include variations due to amortisation and new drawdowns on the contracts active during the financial year.

To describe the transfers between steps:

- the starting stage corresponds to the stage of the outstanding balance as at 31 December of the previous year;
- the end stage corresponds to the stage of the outstanding balance at the end of the financial year (even in the event of several changes during the financial year).

(In EURm)	Stage 1		Stage 2		Stage 3		Stock of outstanding amounts transferred as at 31 December	Stock of impairment associated with transferred outstanding amounts
	Outstanding amounts	Impairment	Outstanding amounts	Impairment	Outstanding amounts	Impairment

<b>Amount as at 31.12.2023</b>	<b>154</b>	<b>235</b>	<b>58</b>	<b>447</b>	<b>59</b>	<b>84</b>	<b>229</b>	<b>372</b>	<b>819</b>

(1) The amounts of impairment presented in the Production and Acquisition line in Stage 2/Stage 3 May include originated contracts in Stage 1 reclassified in Stage 2/Stage 3 during the period.

(2) Including repayments, disposals and debt waivers.

(3) The amounts presented in transfers include variations due to amortisation. Transfers to Stage 3 correspond to outstanding amounts initially classified as Stage 1 which, during the period, were downgraded directly to Stage 3, or to Stage 2 and later to Stage 3.

### DETAILS OF TRANSFERS BETWEEN STAGES FOR THE GROUP'S OFF-BALANCE SHEET COMMITMENTS EXCLUDING INSURANCE ACTIVITIES FOR THE PERIOD

The amounts presented in the transfers hereinafter include the variations due to amortisation and new drawdowns on the contracts active during the financial year.

To describe the transfers between steps:

- the starting stage corresponds to the stage of the outstanding balance as on 31 December of the previous year;
- the end stage corresponds to the stage of the outstanding balance at the end of the financial year (even in the event of several changes during the financial year).

	Financing commitments						Stock of outstanding commitments transferred as at 31 December	Stock of provisions associated with transferred outstanding amounts

**NOTE 3.8.4 QUALITATIVE INFORMATION OF CHANGES IN IMPAIRMENT/PROVISIONS ON CREDIT RISK**

The variation in credit risk impairment and provisions since 31 December 2022 is mainly linked to:

- covered losses on Stage 3 loans (EUR 1,181 million) included in the line derecognition.

This is in line with the Group's strategy for managing non-performing loans (NPL), through write-offs and disposals of its defaulted exposure portfolios.

Uncovered losses amount to EUR 333 million;

- transfer of loans to Stage 3 due to default for EUR 4.3 billion of outstanding amounts. This transfer resulted in an increase in impairment and provisions of EUR 840 million.

Particularly, this variation concerns:

- EUR 2.3 billion of outstanding amounts for which the impairment and provisions amount to EUR 553 million as at 31 December 2023. These contracts were in Stage 1 as at 31 December 2022;
- EUR 2.0 billion of outstanding amounts for which the impairment and provisions amount to EUR 287 million as at 31 December 2023. These contracts were in Stage 2 as at 31 December 2022;
- transfer of loans to Stage 2 due to downgraded ratings, transfer to "sensitive" or 30 days overdue for EUR 16.1 billion. This transfer resulted in an increase in impairment and provisions of EUR 530 million;
- the acquisition of LeasePlan resulted an increase in impairment and provisions of EUR 51 million, included in the line Scope effect;
- IFRS 5 entities classified as held for sale. This classification resulted a decrease in impairment and provisions of EUR 346 million, included in the line Scope effect.

**NOTE 3.8.5 COST OF RISK****ACCOUNTING PRINCIPLES**

Cost of credit risk only includes net reversals of impairments and loss allowances for credit risk, losses on irrecoverable loans and amounts recovered on amortised receivables.

The Group proceed to a write off by recognising a loss on the bad loan and a reversal of impairment in Cost of credit risk when a debt is forgiven or when there are no longer any hopes of future recovery. The lack of future hopes of recovery is documented when a certificate issued as proof that the debt is uncollectible is delivered by the relevant authority or when strong circumstantial evidences are identified (years in default, provisions at 100%, lack of recent recoveries, specificities of the case).

However, a write-off in accounting terms does not imply debt forgiveness in the legal sense as recovery actions on cash due by the counterparty are pursued particularly if the latter's fortune improve. In case of recoveries on an exposure previously written-off, such recoveries are recognised as Amounts recovered on irrecoverables loans on the year of collection.

**SYNTHESIS**

<i>o/w cost of risk on doubtful loans classified in Stage 3</i>	(1,194)	(970)

### NOTE 3.9 Fair value of financial instruments measured at amortised cost

#### ACCOUNTING PRINCIPLES

##### Definition of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

In the absence of observable prices for identical assets or liabilities, the fair value of financial instruments is determined using another measurement technique that maximises the use of observable market inputs based on assumptions that market operators would use to set the price of the instrument in question.

The fair value of financial instruments includes accrued interest if applicable.

For financial instruments that are not recognised at fair value on the balance sheet, the figures disclosed in this note are estimates of their fair value broken down according to the fair value hierarchy as described in Note 3.4.

These estimates are disclosed for information purpose only, they are not used for the management of the Group’s activities, and should not be taken as an estimate of the amount that would be realised if all such financial instruments were to be settled immediately.

### NOTE 3.9.1 FINANCIAL ASSETS MEASURED AT AMORTISED COST

<i>(In EURm)</i>	<b>31.12.2023</b>				
	<b>Carrying amount<sup>(2)</sup></b>	<b>Fair value</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>

<b>TOTAL</b>	<b>835,924</b>	<b>832,828</b>	<b>32,793</b>	<b>778,179</b>	<b>21,856</b>

(1) Carrying amount consists of EUR 148,887 million of liabilities floating rate and EUR 392,790 million of liabilities fixed rate (including EUR 359,618 million fixed rate less than one year).

(2) Carrying amount does not include the revaluation differences on portfolios hedged against interest rate risk for an amount of EUR -5,857 million.

## 31.12.2022 R

(In EURm)	Carrying amount <sup>(2)</sup>	Fair value	Level 1	Level 2	Level 3
Due to banks	133,011	133,009	255	118,331	14,423
Customer deposits <sup>(1)</sup>	530,764	529,099	-	457,003	72,096
Debt securities issued	133,176	131,290	22,838	106,619	1,833
Subordinated debt	15,948	15,949	-	15,949	-
<b>TOTAL</b>	<b>812,899</b>	<b>809,347</b>	<b>23,093</b>	<b>697,902</b>	<b>88,352</b>

(1) Carrying amount consists of EUR 188,638 million of liabilities floating rate and EUR 342,126 million of liabilities fixed rate (including EUR 304,070 million fixed rate less than one year).

(2) Carrying amount does not include the revaluation differences on portfolios hedged against interest rate risk for an amount of EUR -9,659 million.

In a context of rising interest rates, financial assets, unlike financial liabilities, have a fair value significantly lower than their book value. This asymmetry can be explained in particular by the fact that debts to customers are mainly composed of demand deposits whose fair value is equal to their nominal value due to their immediate contractual maturity. This asymmetry is partially reduced by taking into account the interest rate hedges applicable to these deposits.

Since the contractual maturity of these deposits is immediate, the discounting effect is nil and their fair value is equal to their nominal amount.

**NOTE 3.9.3 VALUATION METHODS OF FINANCIAL INSTRUMENTS MEASURED AT AMORTISED COST****LOANS, RECEIVABLES AND LEASE FINANCING AGREEMENTS**

The fair value of loans, receivables and lease financing transactions for large corporates and banks is calculated, in the absence of an actively traded market for these loans, by discounting expected cash flows to present value based on the market rates (the benchmark actuarial rate published by Banque de France and the zero-coupon yield) prevailing on the balance sheet date for loans with broadly similar terms and maturities. These discount rates are adjusted for borrower credit risk.

The fair value of loans, receivables and lease financing transactions for retail banking customers, essentially comprised of individuals and small or medium-sized companies, is determined, in the absence of an actively traded market for these loans, by discounting the associated expected cash flows to present value at the market rates prevailing on the balance sheet date for similar types of loans with similar maturities.

For fixed-rate loans with an initial maturity less than or equal to one year and for variable-rate financial assets (loans, receivables, finance lease agreements), the fair value is assumed equal to the net book value of the impairments, assuming there has been no significant change in credit spreads on the counterparties in question since they were recognised in the balance sheet.

**DEBTS**

In the absence of an active debt market, the fair value of debts is assumed to be equal to the value of the future flows discounted according to the available market rates applicable to the product concerned on the closing date.

When the debt is a listed instrument, its fair value is its market value.

For debts with a floating-rate and debts with an initial maturity of less than or equal to one year, fair value is taken to be the same as the carrying amount. Similarly, the individual fair value of demand deposit accounts is equal to their carrying amount.

**SECURITIES**

Provided that the security is an instrument traded on an active market, its fair value is equal to the market price.

In the absence of an active market, the fair value of the securities is calculated taking into account the value of future cash flows discounted according to the interest rate parameters available on the market and applicable to the product concerned as at closing date. For variable-rate debt securities and fixed-rate debt securities with an agreed duration of up to one year, the fair value is assumed to be the gross carrying amount adjusted for any allowance provided there have been no significant change in credit spreads on the counterparties in question since they were recognised in the balance sheet.

**NOTE 3.10 Commitments and assets pledged and received as securities****ACCOUNTING PRINCIPLES****Loan commitments**

The nominal amount of loan commitments is detailed in the table below. Loan commitments that are not considered as financial derivatives or that are not measured at fair value through profit or loss for trading purpose are initially recognised at fair value in the balance sheet. Thereafter, they are provisioned as necessary in accordance with the accounting principles for impairment and provisions (see Note 3.8).

**Guarantee commitments**

The nominal amount of guarantee commitments is detailed in the table below. When considered as non-derivative financial instruments, the financial guarantees issued by the Group are initially recognised in the balance sheet at fair value. Thereafter, they are measured at either the amount of the obligation or the amount initially recognised (whichever is higher) less, when appropriate, the cumulative amortisation of a guarantee commission. Where there is objective evidence of impairment, a provision for financial guarantees given is recognised on the liabilities side of the balance sheet (see Note 3.8).

**Securities commitments**

Securities bought and sold, which are booked to Financial assets at fair value through profit or loss, Financial assets at fair value through other comprehensive income and Financial assets at amortised cost are recognised on the balance sheet at the settlement-delivery date. Between the trade date and the settlement-delivery date, securities receivable or deliverable are not recognised on the balance sheet. Changes in the fair value of the securities measured at fair value through profit or loss and the securities measured at fair value through other comprehensive income between the trade date and the settlement-delivery date are booked to profit or loss or to equity, depending on the accounting classification of the securities in question.

**Assets pledged as and received as collateral**

The financial assets pledged as collateral are carried in the balance sheet whenever the Group has not transferred to the recipients of collateral the contractual rights to receive asset cash flows or substantially all the risks inherent to their ownership.

Likewise, the Group does not recognise on its balance sheet the assets received as collateral if the contractual rights to receive these asset cash flows and substantially all the risks and rewards inherent to their ownership have not been transferred to it.

## NOTE 3.10.1 COMMITMENTS

## COMMITMENTS GRANTED

(In EURm)	31.12.2023	31.12.2022 R
<b>Loan commitments</b>		
To banks	97,092	84,882

Other commitments <sup>(1)</sup>	199,747	178,486
<b>Securities commitments</b>		
Securities to be received	38,522	38,563

(1) These commitments include the guarantee granted by French government related to the State Guaranteed Loans (see Note 1.6).

## NOTE 3.10.2 FINANCIAL ASSETS PLEDGED AND RECEIVED AS SECURITY

## FINANCIAL ASSETS PLEDGED

(In EURm)	31.12.2023	31.12.2022 R
Book value of assets pledged as security for liabilities <sup>(1)</sup>	337,037	357,694
Book value of assets pledged as security for transactions in financial instruments <sup>(2)</sup>	69,447	85,717
Book value of assets pledged as security for off-balance sheet commitments	2,209	2,547
<b>TOTAL</b>	<b>408,693</b>	<b>445,958</b>

(1) Assets pledged as security for liabilities mainly include loans given as guarantees for liabilities (guarantees notably provided to the central banks).

(2) Assets pledged as security for transactions in financial instruments mainly include security deposit.

**FINANCIAL ASSETS RECEIVED AS SECURITY AND AVAILABLE FOR THE ENTITY**

<i>(In EURm)</i>	<b>31.12.2023</b>	<b>31.12.2022 R</b>
<b>Fair value of securities purchased under resale agreements</b>	<b>193,154</b>	<b>150,614</b>

The Group generally purchases securities under resale agreements under normal market terms and conditions. It may re-use the securities received under resale agreement by selling them outright, selling them under repurchase agreements or pledging them as security, provided that it returns these or equivalent securities to the

counterparty to the resale agreement at its term. Securities purchased under resale agreements are not recognised on the balance sheet. Their fair value, as shown above, includes securities sold or pledged as collateral.

**NOTE 3.11 Transferred financial assets****ACCOUNTING PRINCIPLES**

Transferred financial assets that are not derecognised include securities lending transactions and repurchase agreements as well as certain loans transferred to consolidated securitisation vehicles.

The tables below show securities lending and repurchase agreements that only concern securities recognised on the asset side of the balance sheet.

Securities involved in a repurchase agreement or securities lending transaction are held in their original position on the asset side of the Group's balance sheet. For repurchase agreements, the obligation to return the amounts deposited is recorded under Liabilities on the liabilities side of the balance sheet, with the exception of the transactions initiated under trading activities, which are recorded under Financial liabilities at fair value through profit or loss.

Securities involved in a reverse repurchase agreement or a securities borrowing transaction are not recorded in the Group's balance sheet. For securities received under a reverse repurchase agreement, the right to recover the amounts delivered by the Group is recorded under Customer Loans and receivables or Due from banks on the asset side of the balance sheet, with the exception of transactions initiated under trading activities which are recorded under Financial assets at fair value through profit or loss. If the borrowed securities are subsequently sold, a debt representing the return of these securities to their lender is recorded on the liabilities side of the Group's balance sheet, under Financial liabilities at fair value through profit or loss.

Securities lending and securities borrowing transactions that are fully matched by cash are assimilated to repurchase and reverse repurchase agreements and are recorded and recognised as such in the balance sheet.

With securities lending and repurchase agreements, the Group remains exposed to issuer default (credit risk) and to increases or decreases in the value of securities value (market risk). The underlying securities cannot simultaneously be used as collateral in other transactions.

**NOTE 3.11.1 TRANSFERRED FINANCIAL ASSETS NOT DERECOGNISED****REPURCHASE AGREEMENTS**

Fair value of associated liabilities (B)	6,872	4,188
<b>Net position (A)-(B)</b>	<b>1,985</b>	<b>562</b>

The Group remains exposed to the majority of the risks and rewards associated with these receivables; furthermore, these receivables may not be used as collateral or sold outright as part of another transaction.

**NOTE 3.11.2 TRANSFERRED FINANCIAL ASSETS PARTIALLY OR FULLY DERECOGNISED**

As at 31 December 2023, the Group carried out no material transactions resulting in the partial or full derecognition of financial assets leaving the Group with a continuing involvement in said assets.

**NOTE 3.12 Offsetting financial assets and financial liabilities****ACCOUNTING PRINCIPLES**

A financial asset and a financial liability are offset and the net amount presented on the balance sheet when the Group has a legally enforceable right to set off the recognised amounts and intends either to settle the asset and liability on a net basis, or to realise the asset and settle the liability simultaneously. The legal right to set off the recognised amounts must be enforceable in all circumstances, in both the normal course of business and in the event of default of one of the counterparties. In this respect, the Group recognises in its balance sheet the net amount of derivative financial instruments traded with certain clearing houses where they achieve net settlement through a daily cash margining process, or where their gross settlement system has features that eliminate or result in insignificant credit and liquidity risk, and that process receivables and payables in a single settlement process or cycle.

The following tables present the amounts of financial assets and financial liabilities set off on the Group's consolidated balance sheet. The gross outstanding amounts of these financial assets and financial liabilities are matched with the consolidated outstanding amounts presented in the balance sheet (net balance sheet amounts), after indicating the amounts set off on the balance sheet for these various instruments (amounts offset) and aggregating them with the outstanding amounts of other financial assets and financial liabilities not subject to a Master Netting Agreement or similar agreement (amounts of assets and liabilities not eligible for offsetting).

These tables also indicate the amounts which may be offset, as they are subject to a Master Netting Agreement or similar agreement, but whose characteristics make them ineligible for offsetting in the

consolidated financial statements under IFRS. This information is provided in comparison with the accounting treatment applied under US GAAP. This affects in particular financial instruments that may only be offset in the event of the default, insolvency or bankruptcy of one of the counterparties, as well as instruments pledged by cash or securities collateral. These mainly include over-the-counter interest rate options, interest rate swaps and securities purchased/sold under resale/repurchase agreements.

Net positions resulting from these various offsettings are not intended to represent the Group's actual exposure to counterparty risk through these financial instruments, insofar as counterparty risk management uses other risk mitigation strategies in addition to netting and collateral agreements.

(1) This line includes commitments relating to the purchase of vehicles and underlying equipment subject to an operating lease.

The flows presented in this note are based on contractual maturities. However, for certain elements of the balance sheet, assumptions could be applied.

When there are no contractual terms, as well as for trading financial instruments (e.g.: derivatives), maturities are presented in the first column (up to three months).

The guarantee commitments given are scheduled on the basis of the best possible estimate of flow; if not available, they are presented in the first column (up to three months).

## NOTE 4 OTHER ACTIVITIES

### NOTE 4.1 Fee income and expense

#### ACCOUNTING PRINCIPLES

Fee income and Fee expense combine fees on services rendered and received, as well as fees on commitments, that cannot be assimilated to interest. Fees that can be assimilated to interest are integrated into the effective interest rate on the associated financial instrument and are recorded under Interest and similar income and Interest and similar expense (see Note 3.7).

Transactions with customers include the fees from retail customers from the Group retail banking activities (in particular credit card fees, account management fees or application fees outside the effective interest rate).

Sundry services provided include the fees from customers from the other Group activities (in particular, interchange fees, funds management fees or fees on insurance products sold within the network).

The Group recognises fee income or expense for an amount equivalent to the remuneration for the service provided and depending on the progress transferring control of these services:

- fees for ongoing services, such as some payment services, custody fees, or digital service subscriptions are recognised as income over the life of the service;
- fees for one-off services, such as fund activity, finder's fees received, arbitrage fees, or penalties on payment incidents are recognised as income when the service is provided.

The amount equivalent to the remuneration for the service provided is composed of fixed and variable contractual compensation whether they are paid in kind or in cash, less any payments due to customers (for example, in case of promotional offers). The variable compensation (for example, discounts based on the provided services volume over a period of time or fees payable subject to the achievement of a performance target, etc.) are included in the amount equivalent to the remuneration for the service provided if and only if this compensation is highly probable not to be subsequently reduced significantly.

The possible mismatch between the payment date of the service provided and the date of execution of the service gives assets and liabilities depending on the type of contract and mismatch which are recognised under Other Assets and Other Liabilities (see Note 4.4):

- customer contracts generate trade receivables, accrued income or prepaid income;
- supplier contracts generate trade payables, accrued expenses or prepaid expenses.

In syndication deals, the effective interest rate for the share of the issuance retained on the Group's balance sheet is comparable to that applied to the other members of the syndicate including, when needed, a share of the underwriting fees and participation fees; the balance of these fees for services rendered is then recorded under Fee income at the end of the syndication period. Arrangement fees are recorded as income when the placement is legally complete.

**NOTE 4.2 Income and expense from other activities****ACCOUNTING PRINCIPLES****Leasing activities**

Leases granted by the Group which do not transfer to the lessee virtually all the risks and benefits associated with ownership of the leased asset are classified as operating leases.

Assets held under operating leases, including investment property, are recorded on the balance sheet under Tangible and intangible fixed assets at their acquisition cost, less depreciation and impairment (see Note 8.3).

Leased assets are depreciated, excluding residual value, over the life of the lease; the latter corresponds to the non-cancellable lease term adjusted for any option to extend the contract that the lessee is reasonably certain to exercise and any early termination options that the lessee is reasonably certain not to exercise (see Note 8.3). Lease payments are recognised as income according to the straight-line method over the term of the lease. Meanwhile, the purpose of the accounting treatment of the income from invoices for maintenance services related to operating leases is to reflect, over the term of the service agreement, a constant margin between this income and the expenses incurred in providing the service.

Income and expenses, and capital gains or losses on investment properties and leased assets, as well as income and expense on maintenance services related to operating lease activities, are recorded under Income and expenses from other activities on the Real estate leasing and Equipment leasing lines.

These lines also include the losses incurred in the event of a decline in the unguaranteed residual value of finance-lease transactions, and the capital gains or losses on disposal related to unleased assets once the lease finance agreements are terminated.

The leases granted by the Group entities may include the maintenance service of the leased equipment. In this case, the portion of rentals corresponding to this maintenance service is spread over the duration of the service (generally the lease contract duration) and, when necessary, considers the progress of the service provided when it is not linear.

**Real estate development activities**

As the sale of real estate off plan (housing, office property, retail areas, etc.) is an ongoing service, the margin of this activity is progressively recognised over the construction programme's duration until the delivery date to the customer. It is recognised under income when this margin is positive and under expenses when this margin is negative.

The margin recognised at each closing period reflects the programme's estimated margin forecast and its stage of completion at the end of the period which depends on the progress in terms of marketing and the project.

(In EURm)	2023			2022 R		
	Income	Expense	Net	Income	Expense	Net
Real estate development	60	(4)	56	69	-	69
Real estate leasing	87	(174)	(87)	80	(151)	(71)
Equipment leasing <sup>(1)</sup>	20,107	(15,992)	4,115	12,490	(9,466)	3,024
Other activities	751	(1,224)	(473)	662	(1,008)	(346)
<b>TOTAL</b>	<b>21,005</b>	<b>(17,394)</b>	<b>3,611</b>	<b>13,301</b>	<b>(10,625)</b>	<b>2,676</b>

(1) The amount recorded under this heading is mainly due to income and expenses related to long-term leasing and car fleet management businesses. Most of the Group's long-term lease agreements are 36-month to 48-month leases.

**NOTE 4.3 Insurance activities**

MAKING IT  
SIMPLE

Insurance activities (life insurance and non-life insurance) add to the range of products included in the banking services offered to Group customers.

These activities are carried out by dedicated subsidiaries, subject to regulations specific to the insurance sector.

The rules for measuring and accounting for risks associated with insurance contracts are specific to the Insurance sector. Based on a current estimate of the future cash flows from the insurance contracts issued (premiums, indemnification, benefits, associated costs...), the main objective of these rules is to recognise the expected profit progressively over the period during which the insurance services are provided.

**ACCOUNTING PRINCIPLES**

Insurance contracts subject to IFRS 17 “Insurance Contracts” are insurance contracts issued, reinsurance contracts issued (reinsurance assumed) or held (reinsurance ceded), as well as investment contracts issued including a discretionary participation clause provided that they are issued by an entity which also issues insurance contracts.

The accounting principles below do not apply to the insurance contracts for which the Group is the insured beneficiary except for the contracts identified as reinsurance treaties.

Investment contracts without discretionary participation features and with no insurance component (pure unit-linked contracts) do not meet the IFRS 17 definition of an insurance contract and are recognised as Financial liabilities measured at fair value through profit or loss (see Note 3.1 paragraph 3). These are financial liabilities indexed on the performance of underlying assets for which the Group has elected to exercise the option to measure the instruments at fair value without requiring the separation of the embedded derivatives.

**Grouping of contracts**

For their assessment, insurance contracts are grouped into homogeneous portfolios to take account of the pooling of risks specific to the insurance activity. These portfolios include insurance contracts that are exposed to similar risks and managed together.

Within each portfolio, three groups of contracts shall be distinguished on initial recognition of the later: onerous contracts, contracts with no significant possibility of becoming subsequently onerous, and other contracts.

Lastly, contracts issued more than one year apart cannot be included in the same group. Consequently, each group of contracts shall be subdivided into annual cohorts. However, while adopting IFRS 17, the European Union has provided European undertakings with an option not to implement this provision to contracts benefiting from an intergenerational mutualisation of returns on the underlying assets in countries where these undertakings market insurance contracts.

The Group uses this optional exemption on the life-insurance savings and retirement savings contracts issued (for instance, contracts invested in euro-denominated funds) as they include direct or discretionary profit-sharing items for which both risks and cashflows are shared between different generations of policyholders. These savings life-insurance contracts are also managed on an intergenerational basis in order to mitigate interest rate risk and longevity risk exposures.

The portfolios of contracts are determined by the Group, using (i) the product line to identify the insurance contracts exposed to similar risks and (ii) the country of issuance of the contract and/or the distribution entity.

When the materiality of the outstanding amounts of the contracts concerned is not significant in the context of the aggregates of the Group's consolidated balance sheet, some of these portfolios may be grouped together.

The major portfolios identified by the Group are as follows:

Scope of products	Product line
Savings	Life Insurance Savings with accumulation of capital paid out upon surrender or death (investments in euro funds, unit-linked funds, multivehicle contracts).
Retirement	Individual and group insurance contracts such as Retirement savings plans (French <i>Plan Épargne Retraite – PER</i> ) with payout in annuities and/or capital (single or multiple unit-linked investments).
Protection – Provident	Borrower insurance; Individual protection; Group protection; Individual health insurance; Group health insurance; Funeral insurance; Nursing care insurance.
Protection – Non-life insurance (property and casualty)	Personal injury accident; Insurance of the Means of payment; Multi-risk home insurance; Land motor vehicle insurance; Miscellaneous Risk Insurance.

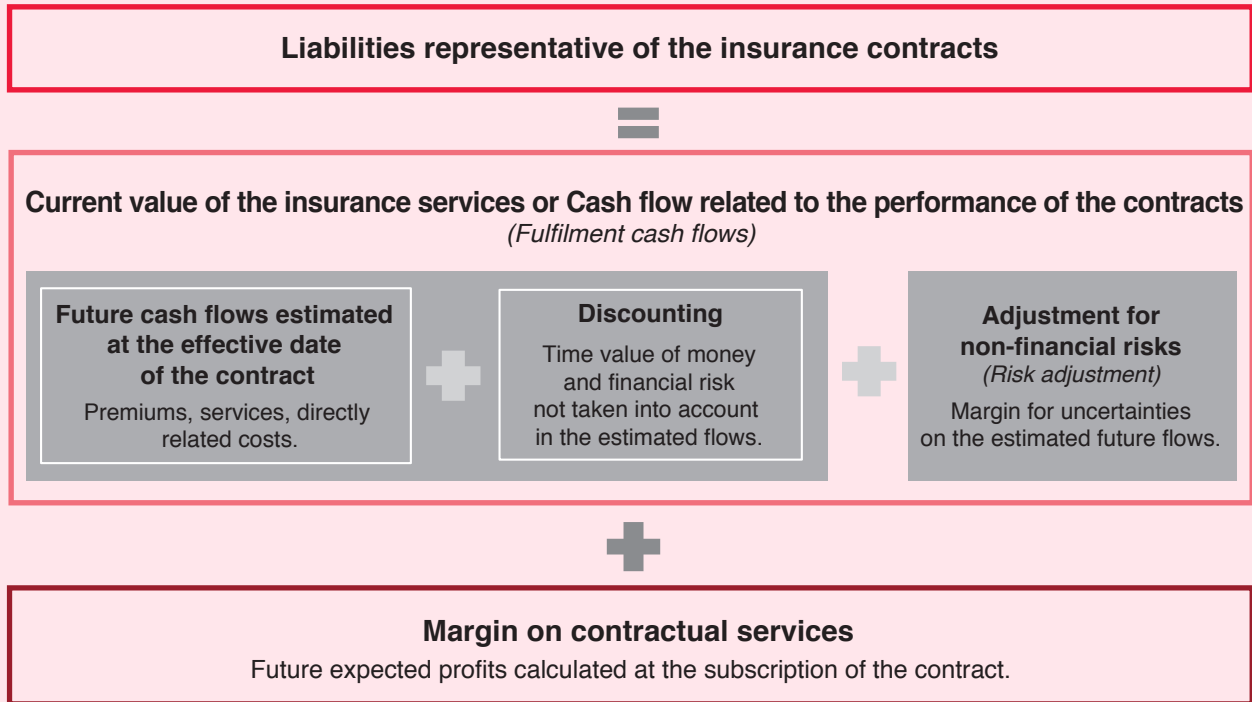

### Measurement models

Each group of insurance contracts is measured separately, and its value is presented in the balance sheet either under Insurance and reinsurance contract assets or under Insurance and reinsurance contract liabilities.

#### GENERAL MODEL APPLICABLE TO THE INSURANCE CONTRACTS ISSUED

##### Initial measurement

Upon initial recognition, the value of a group of insurance contracts issued corresponds to the sum of the following items:

##### Future estimated cash flows

These cash flows are the current estimates of all the amounts that the insurer expects to receive (for premiums...) or pay to the benefit of insurance policyholders (in relation to life insurance, claims to be compensated, guaranteed benefits and other directly attributable expenses) as part of the fulfilment of insurance contracts, until their settlement.

These amounts are adjusted to reflect:

- the present value of the future cash flows taking into account the time value of money and the financial risks related to the future cash flows (see Discounting);
- the uncertainties about the amount and frequency of the cash flows (see Adjustment for non-financial risk).

##### Discounting

The future cash flows estimated are discounted using a risk-free yield curve (swap rate curve) adjusted for an illiquidity premium to represent the differences in characteristics between the liquid, risk-free financial instruments and the financial instruments backed insurance contracts (bottom-up approach).

##### Adjustment for non-financial risk

The discounted cash flows are adjusted to reflect the uncertainties about the amount and frequency of the future cash flows. This adjustment for non-financial risks is determined using a quantile approach based on a confidence level of 80% for the Retirement Savings business. Thus, the technical provisions supplemented with this risk adjustment will allow these estimated future cash flows to be covered in 80% of probable cases, a level of caution deemed appropriate. For the Protection business, this quantile level is between 80% and 90%.

The calculation method of the adjustment for non-financial risks does not take into account the diversification effect between the different insurance activities and between the different entities; however, it includes a diversification by products.

##### Contractual service margin (CSM)

The contractual service margin (CSM) represents the unearned profit that the entity will recognise in the income statement as the insurance services are provided in the future. Its amount is determined at the time of initial recognition of the group of insurance contracts so that, at that date, neither income nor expense is recorded in the income statement. In the event of onerous contracts, the expected loss shall immediately be recognised in profit or loss. This initial loss will later be reversed in profit or loss to offset the expense for incurred claims.

### Subsequent measurement

On each closing date, the carrying amount in the balance sheet of the group of insurance contracts issued is remeasured. It is then equal to the sum of the following amounts:

- the liability for remaining coverage (LRC), for an amount equal to the reestimated value as at the date of the fulfilment cash flows related to future services (discounted value of the amounts receivable and payable related to the supply of insurance services on the remaining coverage period and the deposit components) and, when appropriate, the contractual service margin reestimated on the same date as described below;
- the liability for incurred claims (LIC), for an amount equal to the reestimated value as at the date of the fulfilment cash flows related to past services (discounted value of the amounts payable in relation to services on already incurred claims).

Income and expense are recognised for the changes in liabilities for remaining coverage and for incurred claims, as summarised below:

	Changes in liability for remaining coverage	Changes in liability for incurred claims
Insurance products	<ul style="list-style-type: none"> <li>■ Reversals related to the insurance services provided during the period</li> </ul>	
Insurance services expenses	<ul style="list-style-type: none"> <li>■ Losses recognised on onerous contracts and reversal of these losses</li> </ul>	<ul style="list-style-type: none"> <li>■ Allocations of liabilities for the incurred claims and the unfunded expenses incurred during the period</li> <li>■ Subsequent changes in the fulfilment cash flows relating to the incurred claims and the unfunded expenses incurred</li> </ul>
Insurance financial expenses and income	<ul style="list-style-type: none"> <li>■ Account taken of the impacts of the time value of money</li> </ul>	<ul style="list-style-type: none"> <li>■ Account taken of the impacts of the time value of money</li> </ul>

On this same closing date, the amount of contractual service margin is adjusted to take notably account, for all contracts, of:

- the impact of the new contracts added to the Group;
- the interest capitalised on the carrying amount of the margin at the discounting rate used to determine the initial margin value;
- the reestimate of the fulfilment cash flows (discounted value of the amounts receivable and payable related to the insurance services provided during the remaining coverage period, excl. estimated amounts to be paid for already incurred claims that are subject to separate measurement);
- the amount recognised as insurance revenue because of the transfer of insurance contract services in the period.

Moreover, the contractual service margin is recognised in profit or loss according to coverage units that reflect the amount of service provided and the expected coverage period for the contracts remaining in the group of contracts.

The contractual service margin is not adjusted for the following changes in cash flows as they are not related to future services:

- inclusion of the impacts (and changes in them) of the time value of money and the financial risk (for example, the impact of a change in the discounting rate);
- changes in estimates of the fulfilment cash flows of liabilities for incurred claims;
- adjustments related to experience (difference between the estimate of the amounts expected for the period and the actual cash flows of the period).

### Protection-Provident business

*The Group mainly applies the General Model to measure its Protection-Provident contracts (borrower insurance, funeral, dependency contracts...).*

*For the Protection – Provident business, the insured value (for example the outstanding capital of the loan in the context of a borrower contract) is used to measure the quantity of service (or coverage units) provided or to be provided, in order to recognise a portion of the contractual service margin in the net income of the period.*

### GENERAL MODEL ADAPTED TO THE INSURANCE CONTRACTS ISSUED WITH DIRECT PARTICIPATION FEATURES (VARIABLE FEE APPROACH)

Insurance contracts issued with direct participation features may be regarded as creating an obligation to pay to policyholders an amount equal to the fair value of the underlying items (for example, investments in units of funds), minus a variable fee for the service.

The variable fee:

- a) represents the counterparty that a company receives to provide investment services;
- b) is based on the portion of the performance of the underlying items that varies over time. Consequently, the variable fee reflects the performance of the underlying items and the other cash flows necessary for the fulfilment of the contracts.

The general accounting model is adapted to reflect that the consideration received for this type of contract is a variable fee (Variable Fee Approach – VFA).

This adaptation of the general accounting model is used to measure the groups of insurance contracts for which:

- the contractual clauses specify that the policy holder is entitled to a portion of a clearly defined portfolio of underlying items;
- the entity expects to pay to the policyholder an amount equal to a substantial share of the yield on the fair value of the underlying items; and
- the entity expects any change in the amounts payable to the shareholder to be attributable, substantially, to a change in fair value of the underlying items.

Eligibility to this measurement model is analysed on the issuance date of the contracts and may subsequently be reassessed only in case of changes in the contract.

This measurement model is in line with the general model with regards to the following items:

- the fulfilment cash flows are measured the same way;
- during the initial measurement, the contractual service margin is identical;
- the subsequent changes in the fulfilment cash flows associated with the future services adjust the contractual service margin while the other changes, related to the services provided during the period or before impact the net income.

There are however several differences:

	General model	Tailored General model – VFA
<i>Recognition of the changes in fulfilment cash flows in relation to the changes in discounting rates and other financial variables</i>	■ in full in the Statement of net income and unrealised or deferred gains and losses	■ as an adjustment of the contractual service margin for the portion of this change associated with the insurer's share of underlying items
<i>Determination of the interest expense for the capitalisation of interest on the contractual service margin</i>	■ explicitly applying the discount rate used during the initial measurement	■ implicitly when taking account of the insurer's share in the change in fair value of the underlying items for the determination of the contractual service margin

#### Savings and Retirement business

The Group determined that the majority of life savings insurance contracts and individual and collective retirement savings contracts issued by its insurance subsidiaries meet the definition of contracts with direct participation features. These contracts, which make up the Group's predominant insurance activity (some 99% of the discounted estimated cash flows), are measured using the adapted General model known as Variable Fee Approach (VFA). The other contracts in these categories are measured based on the General Model or under IFRS 9 if they meet the definition of an investment contract.

For the Savings and Retirement business, the quantity of service (or coverage units) used for the amortisation of the contractual service margin (CSM) is intended to reflect, from an economic standpoint, the asset management service provided by the insurer during the period. This quantity is determined based on the future cash flows estimated over the ongoing and future periods. An adjustment is made in order to recognise the CSM at an appropriate pace, taking account of the financial performance of the underlying assets.

## GENERAL MODEL ADAPTED TO THE REINSURANCE CONTRACTS HELD

Following the issuance of insurance contracts, some risks may be ceded to another insurance company through reinsurance contracts.

The general accounting model is adapted to take account of the specificities of the reinsurance contracts held. These reinsurance contracts held are booked under the General Model, modified on the following features:

Estimate of the fulfilment cash flows	The fulfilment cash flows take into account the risk of non-fulfilment by the issuer of the reinsurance contract ( <i>i.e.</i> the risk of not recovering the expected compensation in the event of default of the reinsurer).
<i>Measurement of the contractual service margin during initial recognition</i>	Any net cost or profit determined at initial recognition (determined based on the estimated amount of premiums payable, expenses to be paid and compensations to be received) is recognised as a contractual service margin.
<i>Measurement of the contractual service margin in the context of onerous underlying contracts</i>	The contractual service margin is adjusted and an income is recognised accordingly, when a loss is recognised at initial recognition of a group of onerous underlying insurance contracts or when onerous underlying insurance contracts are added to the Group.

## SIMPLIFIED MODEL (PREMIUM ALLOCATION APPROACH)

The standard also allows, under some conditions, for the application of a simplified accounting model for the contracts whose insurance coverage is lower or equal to 12 months, or for which the measurement of the Group's remaining coverage liabilities determined using this approach is not significantly different from the one that would result from the application of the general model.

The remaining coverage liabilities presented on the balance sheet corresponds to:

- the amount of premium received under the contract adjusted for the amounts recognised as insurance contracts income as the Company provides the insurance coverage;
- minus the remaining depreciable acquisition costs paid.

If a group of contracts is onerous, the remaining coverage liability is increased up to the estimated future fulfilment cash flows and a loss is recognised in the income statement.

The incurred claim liability is measured based on the general model. The Group does not discount the liability when it expects the claims to be settled within one year.

The simplified approach does not require:

- an explicit measurement of the contractual service margin;
- an update of the remaining coverage liability for the changes in discount rate and financial variables.

### Protection – non-life insurance activity

*The Group mostly applies the simplified approach to measure its non-life insurance contracts (personal injuries, means of payment, multi-risk home insurance...).*

## Presentation of the financial performance of insurance contracts

Expenses and income relating to insurance contracts are presented in the income statement, distinguishing between:

- the income arising from insurance services which includes:
  - income from insurance contracts issued,
  - insurance services expenses,
  - net income or expenses from the reinsurance contracts held;
- the financial result of the insurance and reinsurance contracts.

## INCOME FROM INSURANCE CONTRACTS ISSUED

The revenues from insurance contracts represent the consideration that the insurance subsidiary expects to receive (representative of the premium received) against the services provided under the contracts.

The revenues recognised for the period include the amount representative of the premium received as coverage of the insurance service expenses and the margin expected in relation to the services provided during the period.

Many insurance contracts providing investment services include a deposit component, which is an amount paid by the policyholder and repaid by the insurer even when the insured event does not take place. These deposit components are excluded from the income statement, as the collection and repayment of a deposit are not, respectively, an income and an expense.

**INSURANCE SERVICES EXPENSES**

Insurance services expenses reflect the costs incurred to provide services over the period, including those associated with the claims incurred, and excluding the deposit component.

The expenses recorded over the period include the insurance services expenses related to the services provided for the incurred claims during the current or past periods and other amounts such as the amortisation of the insurance acquisition costs, the costs on onerous contracts and their reversals.

**INCOME AND EXPENSES OF THE REINSURANCE CONTRACTS HELD.**

Income and expenses are representative of the amounts recovered from reinsurers and of the allocation of the premiums paid for this coverage.

**FINANCIAL INCOME AND EXPENSES OF INSURANCE CONTRACTS**

The fulfilment cash flows and contractual service margin are booked on a discounted basis reflecting the frequency of cash flows. Over time, the effect of the time value of money decreases, which is reflected in the income statement as an insurance financial expense (the present value of future disbursements increases). Indeed, the financing costs (financial expenses of the contracts) of insurance are similar to the interest paid by the insurer on an early payment (in the form of a premium) and reflect the fact that the insurer usually receives the premiums in advance and pays benefits at a later date.

Finance income or expenses from insurance also include the effects on the carrying amount of insurance contracts of some changes in financial assumptions (namely discount rate and other financial variables).

The effect of the changes in discount rates and other financial variables is recognised over the period during which the changes occurred. The Group has elected, for most of its groups of contracts, to present the effect of these changes in a disaggregated manner between the income statement and equity. The aim of this choice is to minimise accounting mismatch between the investments of the insurance activity (associated to the financial assets held to cover the insurance contracts) and the financial expenses of the insurance contracts. This choice is made for each group of insurance contracts.

The Group decided to present the Notes detailing the financial data of the insurance subsidiaries distinguishing between the data attributed to the insurance contracts within the scope of IFRS 17 (columns headed Insurance contracts) including the measurement of these contracts and the investments backing them. These data also distinguish between the insurance contracts issued with direct participation features measured using the VFA model and their underlying investments.

The financial data of the investment contracts without participation features and without insurance component (contracts within the scope of IFRS 9) as well as all financial instruments that are not backing insurance contracts within the scope of IFRS 17 (ex: financial

instruments negotiated in the context of the investment of equity) are presented separately from the other financial data in the Others column.

As a reminder, on the transition date of 1 January 2022, the Group applied a modified retrospective approach for the measurement of savings life insurance contracts and retirement savings contracts which represent the vast majority of its contracts. Damage Protection contracts were subject to a complete retrospective approach. For Personal protection contracts, a complete or modified retrospective approach has been implemented on a case-by-case basis.

The future cash flows of the assets and liabilities of the insurance contract assets and liabilities are discounted using a risk-free rate curve (swap rate curve) modified by an illiquidity premium per entity and per activity. The following table shows the average discount rates used:

Average discount rate for the euro	31.12.2023						31.12.2022 R					
	1 year	5 years	10 years	15 years	20 years	40 years	1 year	5 years	10 years	15 years	20 years	40 years

## NOTE 4.3.2 PERFORMANCE OF INSURANCE ACTIVITIES

The tables below show the details of the income and expenses recognised in the income statement or in the gains and losses directly recognised in equity by the Group's insurance subsidiaries for:

- the commercial performance of insurance services presented within the Net income of insurance services;
- the financial performance related to the management of contracts resulting from:
  - the financial income and expenses recognised on insurance contracts,
  - the financial income and expenses recognised on the investments backed on contracts;
- the financial performance of the other investments.

(1) The item Net income from other activities corresponds to Income from other activities and Expenses from other activities.

### NOTE 4.3.2 MONITORING OF THE AMOUNT OF THE GAINS AND LOSSES DIRECTLY RECOGNISED IN EQUITY FOR DEBTS INSTRUMENTS UNDERLYING PARTICIPATION CONTRACTS WITH DIRECT PARTICIPATION FEATURES PRESENT AS AT THE TRANSITION DATE

The Group elected, for the groups of contracts with direct participation features, to recognise in the Net income of the period the financial income or expenses that eliminate accounting mismatches with the income or expenses recognised in the Net income for the underlying items held. Consequently, insurance subsidiaries directly recognise in equity the difference between the total financial income or expenses to be booked for the period for the contracts with direct participation features and the amount recognised in the Net income to eliminate an accounting mismatch.

The table below shows the changes in cumulative amount of the financial income and expenses related to insurance activities recognised directly in equity in relation to the contracts with direct participation features identified as at 1 January 2022 (date of transition to the new measurement method of contracts provided by IFRS 17).

	2023	2022 R
	Cumulative amounts included in OCI for debt instruments underlying direct participation contracts present on the date of transition	Cumulative amounts included in OCI for debt instruments underlying direct participation contracts present on the date of transition
<b>Opening balance</b>	(4,308)	5,577
Unrealised or deferred gains and losses for the period and Unrealised or deferred gains and losses reclassified in profit or loss	1,942	(9,885)
<b>Closing balance</b>	(2,366)	(4,308)

### NOTE 4.3.3 DETAILS RELATING TO OUTSTANDING INSURANCE CONTRACTS

The Group elected not to show detailed information regarding the reinsurance contracts held owing to their low materiality Group-wide.

<b>TOTAL</b>	<b>3</b>	<b>-</b>	<b>6</b>	<b>-</b>

**NOTE 4.3.3.3 DETAILS ON THE PROJECTED ITEMS RELATING TO THE MEASUREMENT OF CONTRACTS****SCHEDULING OF THE CASH FLOWS RELATED TO THE INSURANCE AND REINSURANCE CONTRACTS LIABILITIES**

(In EURm)	Up to 3 months	3 months to 1 year	1 to 5 years	More than 5 years	31.12.2023
Insurance and reinsurance contracts liabilities	3,571	9,188	36,538	92,426	141,723

**EXPECTED RECOGNITION IN THE INCOME STATEMENT OF THE CONTRACTUAL SERVICE MARGIN DETERMINED AT THE END OF THE PERIOD<sup>(1)</sup>**

(In EURm)	31.12.2023	31.12.2022 R
<b>Expected years before recognising CSM in profit or loss</b>	<b>Insurance contracts issued</b>	<b>Insurance contracts issued</b>
1 to 5 years	3,901	3,520
6 to 10 years	1,913	1,973
> 10 years	3,554	2,759
<b>TOTAL</b>	<b>9,368</b>	<b>8,252</b>

(1) The contractual service margin determined at the end of the period does not include future new insurance contracts, and insurance contracts valued according to the simplified model. Furthermore, this contractual service margin includes the discounting effect and the adjustment taking into account the financial performance of the underlying assets.

#### NOTE 4.3.4 INSURANCE RISK MANAGEMENT

Insurance risk is the risk of loss inherent in the insurance business; the Group is exposed to it through its insurance subsidiaries. In addition to asset and liability risk management (interest rate, valuation, counterparty and exchange rate risk), this covers the risks related to premium pricing, mortality and increase in the number of claims.

##### NOTE 4.3.4.1 MANAGEMENT OF INSURANCE RISK

There are two main types of insurance risk:

- **technical risks**, and particularly underwriting risk in life insurance, individual personal protection and non-life insurance. These risks may be biometric: disability, longevity, mortality, or related to policyholders' behaviour (risk of surrender). To a lesser extent, in non-life and health insurance, such risks may also arise from claims pricing, selection and management, or from disaster risk;
- **risks associated with financial markets and asset-liability management**: the Insurance business line, mainly through life insurance on the French market, is exposed to hazards in financial markets (changes in interest rates and stock market fluctuations). These market hazards can be aggravated by policyholder behaviour (particularly in the case of surrender of savings life insurance policies) insofar as the amount of benefits on savings life insurance policies depends on the financial performance of the assets. This interaction between assets and liabilities is considered in the valuation of future cash flows.

The savings life insurance portfolio constitutes the majority of commitments for an amount of EUR 138,976 million as at 31 December 2023 recognised as Insurance contracts issued liabilities with direct participation features (EUR 133,795 million as at 31 December 2022). In addition, the commitments of the protection portfolio recognised in Insurance contracts issued liabilities excluding direct participation feature amounted to EUR 2,746 million as at 31 December 2023 (EUR 2,079 million as at 31 December 2022).

Managing these risks is at the core of the Insurance business line activity. It is carried out by qualified and experienced teams, with significant and appropriate IT resources. Risks are regularly monitored and reported within the framework of risk policies validated by the Board of Directors of the entities.

##### Technical risk management

Technical risk management are based on the following:

- heightened security for the risk acceptance process, with the aim of ensuring that the *ab initio* pricing matches the policyholder's risk profile and underwritten guarantees;
- regular monitoring of claim indicators in order to adjust some product parameters, such as the pricing or the level of coverage, if necessary;
- implementation of a reinsurance plan to protect the business line against major/serial claims;
- establishment of committees to monitor portfolio risks and decide on the launch of significant new products;
- implementation of the policies on subscription, provisioning and reinsurance risks.

#### RISK CONCENTRATION

The most material exposures in the portfolio are diversified on the French territory and do not show any specific concentration with regard to the French insurance market. The ALM and Risk Management Committee of the Insurance business line sets concentration limits per issuer and for certain sectors. This committee is regularly informed of the exposures and possible exceedances.

##### Risk management related to financial markets and asset-liability management

The management of the risks linked to the financial markets and asset-liability management is an integral part of the investment strategy just like long-term performance objectives. The optimisation of these two factors is highly influenced by the asset/liability balances. Liability commitments (guarantees offered to customers, policies length of detention), as well as the amounts booked under the major items on the accounting and prudential balance sheet (shareholders' equity, net income, provisions etc.) are analysed by the Finance, Investments and Risk Division of the Insurance business line.

The management of the risks related to financial markets (interest rate, credit and equity) and to asset-liability management is based on the following:

- monitoring short- and long-term cash flows (match between the duration of the liabilities and assets, liquidity risk management);
- particular monitoring of policyholder behaviour (surrender);
- close monitoring of financial markets;
- hedging against interest rate risks (both upside and downside);
- hedging against equity risk downside;
- determination of thresholds and limits per counterparty, per issuer rating and per asset class;
- performance of stress tests, the result of which are presented annually to the entities' Board of Directors, as part of the ORSA (*Own Risk and Solvency Assessment*), transferred to the ACPR after approval by the Board;
- organisation of committees to monitor the portfolio and to rule on investment decisions; implementation of the asset-liability management and investment risk policies.

##### CONCENTRATION OF MARKET RISK AND CREDIT RISK

The companies in the Insurance business line invest in the various types of financial products while respecting a prudent investment risk management policy. Within each type of securities, exposures are diversified in terms of geography, issuers and sectors. The implementation of this policy is characterised by the definition of thresholds, limits and constraints. The main concentrations are monitored within the framework of the ALM and Risk Management Committee. Similarly, the concentration of credit risk is subject to thresholds and limits. Any crossing of thresholds or limits is reported to the ALM and Risk Management Committee, an emanation of the Board of Directors.

##### Regulatory framework

The Sogecap group is subject to the European "Solvency 2" framework. The capital requirement is determined using the standard formula and the yield curve with the volatility adjustment provided by the European Insurance and Occupational Pensions Authority.

**NOTE 4.3.4.2 INSURANCE RISK MODELING**

In savings life insurance, the ALM stochastic model takes into account asset/liability interactions and integrates assumptions regarding policyholder behaviour (surrenders, death, arbitrage), the behaviour of the insurer (interest rate policy in line with the investment policy), the use of financial reserves, and the modelling of fees and commissions.

In protection, liabilities are projected based on adapted models that reflect the flows of premiums, claims and fees related to the management of these claims. They include assumptions and calculation parameters such as experience or mortality tables, fall or early repayment rates depending on the product, overhead rates, inflation, etc.

The models used in relation to Insurance activities are reviewed by the Risk and Actuarial Supervision Department, which is the second line of defence in the context of model risk management. The review work focuses on the theoretical robustness (evaluation of the quality of design and development) of the models, their use, the compliance of their implementation and the continuous monitoring of their relevance over time. The independent review process ends with (i) the publication of a report describing the scope of the review, tests performed, results, conclusions or recommendations and by (ii) Validation committees.

**NOTE 4.3.4.3 INSURANCE RISK EXPOSURES AND SENSITIVITY ANALYSES****Technical insurance risks**

In life insurance, the Insurance business line is mainly exposed to surrender risks due to the preponderance of euro-denominated contracts in life insurance and borrower' insurance, and to a lesser extent, to mortality risk. The risk of surrender in life insurance is mitigated by the loss absorption capacity of the technical reserves (ability to reduce the level of discretionary profit-sharing attributed to policyholders). The Group implements a reinsurance program mainly to mitigate the mortality risks carried in the borrowers' insurance, individual personal protection and term life insurance contracts.

**SENSITIVITY OF THE INSURANCE BUSINESS LINE TO UNDERWRITING RISK ON THE "SAVINGS" SCOPE (INSURANCE CONTRACTS WITH DIRECT PARTICIPATION FEATURES)**

Risk factors	Shock used	31.12.2023	
		Impact On the Net Income	Impact on the capital
Increase in surrender	5% of outstanding 2023 year end	(13)	(13)

In property and casualty insurance, the Group is exposed to underwriting risk, *i.e.* the risk of loss of capital resulting from the difference between the costs related to the claims expected when pricing and the actual costs resulting from unfavourable changes in one or more risk factors (deviation in the frequency, the average costs, occurrence of atypical events).

**Financial risks**

**Market risk:** Given the preponderance of savings life insurance among its insurance business line, the Group is mainly exposed to market risk,

defined as the risk of loss of capital on the value of financial instruments resulting from variations in market parameters, the volatility of these parameters and correlations between these parameters. The parameters concerned are, in particular exchange rates, interest rates, as well as the prices of securities (shares, bonds), financial derivatives, real estate assets or any other assets.

Sensitivities have been identified in relation to the main financial risk factors analysed either alone or in combination. They take into account policyholder behaviours (in particular surrender) and are net of tax and net of the participation allocated to policyholders.

**SENSITIVITY OF THE INSURANCE BUSINESS LINE TO MARKET RISKS IN THE SAVINGS SCOPE (INSURANCE CONTRACTS WITH DIRECT PARTICIPATION)**

Risk factors	Shock used	31.12.2023	
		Impact On the Net Income	Impact on the capital
Rising rates	+50 bps	(8)	(8)
Lower rates	-50 bps	11	11
Decline in equities	-10%	(17)	(17)

**Liquidity risk:** In the context of insurance operations, liquidity risk corresponds to the inability of the Insurance business line to meet its contractual obligations and settle reported claims (potential losses incurred in the event of forced sales of assets or when financial assets are invested in illiquid markets). Liquidity risk is governed by the investment risk management policy and the risk management policy of the Insurance business line; The rules for allocating asset portfolios lead to a diversification of these portfolios and a limitation of investments in low liquidity assets (private equity, real estate, etc.).

ALM studies on liquidity risk ensure that the investment structure of

the Insurance business line is consistent with its insurance commitments. The framework for strategic asset allocation also makes it possible to limit this risk.

**Credit risk:** The implementation of thresholds and limits per counterparty makes it possible to limit this risk on financial assets. Information on the credit risk of the financial assets of the insurance business is detailed in Note 3.8. In addition, the default risk of reinsurers (representative of the claims receivable net of premiums to be paid) is mitigated by collateral received from reinsurers, mainly in the form of high-quality securities or cash.

## NOTE 4.4 Other assets and liabilities

### NOTE 4.4.1 OTHER ASSETS

<i>(In EURm)</i>	<b>31.12.2023</b>	<b>31.12.2022 R</b>
Guarantee deposits paid <sup>(1)</sup>	51,611	67,768
Settlement accounts on securities transactions	2,835	3,895
<i>o/w due from clearing houses bearing credit risk</i>	163	262
Prepaid expenses	1,680	1,387
Miscellaneous receivables <sup>(2)</sup>	14,111	9,684
<i>o/w miscellaneous receivables bearing credit risk<sup>(3)</sup></i>	6,404	4,208
<b>GROSS AMOUNT</b>	<b>70,237</b>	<b>82,734</b>
Impairments	(472)	(419)
<i>Credit risk<sup>(3)</sup></i>	(328)	(295)
<i>Other risks</i>	(144)	(124)
<b>NET AMOUNT</b>	<b>69,765</b>	<b>82,315</b>

(1) *Mainly relates to guarantee deposits paid on financial instruments, their fair value is assumed to be the same as their book value net of impairment for credit risk.*

(2) *Miscellaneous receivables primarily include trade receivables, fee income and income from other activities to be received. The operating leases receivables equal to EUR 2,325 million as of 31 December 2023, compared to EUR 1,258 million as of 31 December 2022.*

(3) *Net value of miscellaneous receivables bearing credit risk amounts to EUR 6,076 million as of 31 December 2023, compared to EUR 3,913 million as of 31 December 2022 (see Note 3.8).*

### NOTE 4.4.2 OTHER LIABILITIES

<i>(In EURm)</i>	<b>31.12.2023</b>	<b>31.12.2022 R</b>
Guarantee deposits received <sup>(1)</sup>	53,253	74,306
Settlement accounts on securities transactions	3,576	4,759
Expenses payable on employee benefits	2,566	2,610
Lease liability	2,065	2,104
Deferred income	1,643	1,297
Miscellaneous payables <sup>(2)</sup>	30,555	22,239
<b>TOTAL</b>	<b>93,658</b>	<b>107,315</b>

(1) *Mainly relates to guarantee deposits received on financial instruments, their fair value is assumed to be the same as their book value.*

(2) *Miscellaneous payables primarily include trade payables, fee expense and expense from other activities to be paid.*

## NOTE 5 OTHER GENERAL OPERATING EXPENSES

(In EURm)		31.12.2023	31.12.2022 R
Personnel expenses <sup>(1)</sup>	Note 5.1	(10,645)	(10,052)
Other operating expenses <sup>(1)</sup>	Note 5.2	(6,887)	(7,009)
Other general operating expenses attributable to the insurance contracts <sup>(2)</sup>		683	636
<b>TOTAL</b>		<b>(16,849)</b>	<b>(16,425)</b>

(1) The amount of Personnel expenses and Other administrative expenses detailed in Note 5.1 and Note 5.2 are presented in the income statement before reallocation in the net banking income of the expenses attributable to insurance contracts.

(2) The Other general operating expenses attributable to insurance contracts are recognised during the period as service expenses relating to the insurance and reinsurance contracts issued, except for acquisition costs which are recorded in the balance sheet to be recognised in profit or loss in subsequent periods.

### Event after the reporting period

#### PLAN TO IMPLEMENT ORGANISATIONAL CHANGES IN SOCIETE GENERALE HEAD OFFICE IN FRANCE

On 5 February 2024, Societe Generale has announced a plan to implement organisational changes in its head office in France to simplify its operations and structurally improve its operational efficiency.

Several French head office entities are considering organisational changes that require specific social support measures. The objective is to group and pool certain activities and functions, remove hierarchical layers to streamline decision-making, and resize certain teams due to reviews of projects or processes.

This reorganisation project has been submitted for consultation with the staff representative bodies. Following the completion of the consultation scheduled for the second quarter of 2024, the implementation of these organisational changes would result in approximately 900 job cuts at head office without forced departures (i.e. approximately 5% of head office staff).

The cost of the social support measures that will be recorded as provision during the first quarter of 2024 is estimated to be around EUR 0.3 billion.

### NOTE 5.1 Personnel expenses and employee benefits

MAKING IT  
SIMPLE

Employee benefits correspond to the compensation granted by the Group to its employees in exchange for work carried out during the annual reporting period.

All forms of compensation for work rendered are recorded in the expenses:

- whether it be paid to employees or to outside social security agencies;
- whether it be paid during the annual reporting period or to be paid by the Group in the future as entitlements to employees (pension plans, retirement benefits...);
- whether it be paid in cash or in Societe Generale shares (free share plans, stock options).

Information related to the Group headcount is presented in the Chapter 5 of the Universal Registration Document (Corporate Social Responsibility).

**NOTE 5.1.1 PERSONNEL EXPENSES AND RELATED PARTY TRANSACTIONS****ACCOUNTING PRINCIPLES**

Personnel expenses include all expenses related to personnel, including employee benefits and expenses related to payments based on Societe Generale shares.

Short-term employee benefits are recorded under Personnel expenses during the period according to the services provided by the employee.

The accounting principles relating to post-employment benefits and other long-term benefits are described in Note 5.1.2.

Personnel expenses include related party transactions, within the meaning of IAS 24.

The Group has selected as related parties:

- directors, corporate officers (the Chairman, the Chief Executive Officer and the Deputy Chief Executive Officers) and spouses and children living in their households;
- the following subsidiaries: subsidiaries controlled exclusively or jointly and companies over which Societe Generale exercises significant influence;
- entities controlled exclusively or jointly by a related party that is an individual.

**NOTE 5.1.1.1 PERSONNEL EXPENSES**

(In EURm)

	2023	2022
Employee compensation	(7,708)	(7,244)
Social security charges and payroll taxes	(1,749)	(1,655)
Net pension expenses – defined contribution plans	(772)	(709)
Net pension expenses – defined benefit plans	(69)	(61)
Employee profit-sharing and incentives	(347)	(383)
<b>TOTAL</b>	<b>(10,645)</b>	<b>(10,052)</b>
<i>Including net expenses from share – based payments</i>	<i>(254)</i>	<i>(196)</i>

**NOTE 5.1.1.2 RELATED-PARTY TRANSACTIONS****Remuneration of the Group's managers**

This includes amounts effectively paid by the Group to Directors and corporate officers as remuneration (including employer contributions) and other benefits as indicated below according to the nomenclature of IAS 24 – paragraph 17.

(In EURm)

	2023	2022
Short-term benefits	13.2	10.0
Post-employment benefits	0.5	0.4
Long-term benefits	-	-
Termination benefits	-	-
Share-based payments	2.2	2.4
<b>TOTAL</b>	<b>15.9</b>	<b>12.8</b>

**Related-party transactions**

The transactions with members of the Board of Directors, Chief Executive Officers and members of their families included in this note only comprise loans and guarantees outstanding as at 31 December 2023 for a total amount of EUR 2.5 million. All other transactions with these individuals are insignificant.

**Total amounts provisioned or booked by the Societe Generale Group for the payment of pensions and other benefits**

The total amount provisioned or booked by the Societe Generale Group as at 31 December 2023 under IAS 19 for the payment of pensions and other benefits to Societe Generale's Chief Executive Officers (Mr. Krupa, Mr. Aymerich, Mr. Palmieri et Ms. Lebot and the three staff-elected Directors) is EUR 7.4 million.

**NOTE 5.1.2 EMPLOYEE BENEFITS****ACCOUNTING PRINCIPLES**

Employee benefits are divided into four categories:

- short-term employee benefits;
- post-employment benefits, including defined contributions plans and defined benefit plans such as pension plans and retirement benefits;
- others long-term employee benefits which are employee benefits not expected to be settled wholly before twelve months, such as defined variable compensation paid in cash and not indexed to the Societe Generale share, long service awards and time saving accounts;
- termination benefits.

**Short-term employee benefits**

Short-term employee benefits are recognised as Expenses payable on employee benefits. The settlement is expected to be settled wholly before twelve months after the end of the annual reporting period in which the employees render the related service, such as fixed and variable compensation, annual leave, taxes and social security contributions, mandatory employer contributions and profit-sharing.

**Post-employment benefits**

Post-employment benefits can be broken down into two categories: defined contribution pension plans or defined benefit pension plans.

**POST-EMPLOYMENT DEFINED CONTRIBUTION PLANS**

Defined contribution plans limit the Group's liability to the subscriptions paid into the plan but do not commit the Group to a specific level of future benefits. Contributions paid are recorded as an expense for the current year.

**POST-EMPLOYMENT DEFINED BENEFIT PLANS**

Defined benefit plans commit the Group, either formally or constructively, to pay a certain amount or level of future benefits and therefore bear the associated medium or long-term risk.

Provisions are recognised on the liabilities side of the balance sheet under Provisions, to cover the whole of these retirement obligations. These provisions are assessed regularly by independent actuaries using the projected unit credit method. This valuation technique incorporates assumptions about demographics, early retirement, salary rises and discount and inflation rates.

The Group can choose to finance defined benefit plans by assets held by a long-term employee benefit fund or by qualifying insurance policies. Funding assets, made by funds or insurance policies, are classified as plan assets if assets are held by an entity (fund) that is legally separate from the reporting entity and are available to be used only to pay employee benefits. When these plans are financed from external funds classified as plan assets, the fair value of these funds is subtracted from the provision to cover the obligations. When these plans are financed from funds not classified as plan assets, these funds, classified as separate assets, are displayed separately in the assets of the balance sheet under Financial assets at fair value through profit or loss.

Differences arising from changes in calculation assumptions (early retirements, discount rates, etc.) and differences between actuarial assumptions and real performance are recognised as actuarial gains and losses. Actuarial gains and losses, as well as the return on plan assets excluding amounts expensed as net interest on the net defined benefit liability (or asset) and any change in the effect of the asset ceiling are components used to re-measure the net defined benefit liability (or asset). These components are immediately and fully recognised in shareholder's equity among Unrealised or deferred gains and losses and they cannot be subsequently reclassified as income. These items cannot be subsequently reclassified as income and are presented under Retained earnings on the liabilities side of the balance sheet and on a separate line under the Statement of net income and unrealised or deferred gains and losses.

When a new or amended plan comes into force, past service cost is immediately recognised in profit or loss.

An annual charge is recorded under Personnel expenses for defined benefit plans consisting of the additional entitlements vested by each employee (current service cost), past service cost resulting from a plan amendment or a curtailment, the financial expense resulting from the discount rate and the interest income on plan assets (net interest on the net defined benefit liability or asset), plan settlements.

**Other long-term benefits**

Other long-term employee benefits are benefits other than post-employment and termination benefits, that are paid to employees more than twelve months after the end of the annual period in which they provided the related services.

Other long-term benefits are measured and recognised in the same way as post-employment benefits, with the exception of actuarial gains and losses, which are immediately recognised as profit or loss.

**Termination benefits**

Termination benefits refer to the benefits to be granted to an employee following the termination by the entity of the staff member's employment contract before the normal retirement age or the decision of the staff member to voluntarily leave in exchange for these benefits.

Termination benefits payable more than twelve months after the closing date shall be discounted.

**DETAIL OF PROVISIONS FOR EMPLOYEE BENEFITS**

(In EURm)	Provisions as at 31.12.2022	Allocations	Write- backs available	Net allocation	Write- backs used	Actuarial gains and losses	Currency and scope effects	Provisions as at 31.12.2023
Post-employment benefits	1,171	92	(26)	66	(78)	46	12	1,217
Other long-term benefits	604	162	(54)	108	(45)	-	(21)	646
Termination benefits <sup>(1)</sup>	227	129	(50)	79	(96)	(33)	33	210
<b>TOTAL<sup>(2)</sup></b>	<b>2,002</b>	<b>383</b>	<b>(130)</b>	<b>253</b>	<b>(219)</b>	<b>13</b>	<b>24</b>	<b>2,073</b>

(1) Termination benefits include mainly the expenses from the cost of voluntary redundancy related to the New French Retail Banking organisation project presented by the Group in the 4<sup>th</sup> quarter of 2021, which led to the legal merger of Crédit du Nord and Societe Generale on 1 January 2023. The accounting treatment of the expenses for these measures has been assimilated with the post-employment benefits.

(2) In France, the Group has taken into account the effects of the Amending Social Security Financing Act of 14 April 2023 to assess its employee retirement obligations (impact of EUR 13 million under Other general operating expenses).

A provision of EUR 12 million was recorded to take into account, in France, the judgments of the Court of Cassation regarding the acquisition of rights to paid leave in the event of absence due to illness; this provision was calculated with 3-year retroactivity.

**NOTE 5.1.2.1 EMPLOYMENT DEFINED CONTRIBUTION PLANS**

The main defined contribution plans provided to employees of the Group are located in France, in the United Kingdom and in the United States.

In France, they include state pension plans and other national pension plans such as AGIRC-ARRCO, as well as pension schemes put in place by certain Group entities whose only commitment is to pay annual contributions (PERCO).

In the United Kingdom, the employer pays contributions according to the age of the employees (from 2.5 to 10% of the salary) and can make extra contributions up to 4.5% for the voluntary additional employee contributions.

In the United States, employers fully match the first 8% of employee contributions, within the limit of USD 10,000.

**NOTE 5.1.2.2 POST-EMPLOYMENT DEFINED BENEFIT PLANS**

Post-employment pension plans include schemes offering annuities, plans offering retirement bonuses and mixed plans (cash balance). Benefits paid out in annuities supplement the pensions paid by the mandatory basic plans.

The main defined benefit plans are located in France, in Switzerland, in the United Kingdom and in the United States.

In France, the supplementary pension plan for executive managers, set up in 1991, allocates an annual allowance to beneficiaries covered by Societe Generale. This allowance depends in particular on the beneficiary's seniority within Societe Generale as described in the Chapter 3 "Corporate Governance" of the present Universal Registration Document. Since 4 July 2019, date of publication of the ordinance ending the so-called "random rights" defined benefit pension plans in application of the *Loi Pacte*, this plan is closed to new employees and the rights of beneficiaries were frozen on 31 December 2019.

In Switzerland, the plan is managed by a personal protection insurance institution (the Foundation), comprised of employer and employee representatives. The employer and its employees pay contributions to the Foundation. Pension benefits are revalued at a guaranteed rate of return and converted to annuities (or lump-sum payment) also at a guaranteed conversion rate ("cash balance" scheme). Because of this minimum guaranteed return, the plan is considered similar to a defined benefit plan.

In the United Kingdom, the defined benefit plan has been closed to new employees for nearly 20 years, and the benefits of the last beneficiaries were frozen in 2015. The plan is managed by an independent institution (Trustee).

Similarly, in the United States, defined benefit plans were closed to new employees in 2015 and the vesting of new benefits was frozen.

## RECONCILIATION OF ASSETS AND LIABILITIES RECORDED IN THE BALANCE SHEET

**INFORMATION AND TERMS REGARDING FUNDING ASSETS**

Funding assets include plan assets and separate assets.

Funding assets represent around 96% of Group obligations, with different rates depending on the country.

Accordingly defined benefit plan obligations in France and the United Kingdom are fully hedged and hedged at 97% for the United States, while they are not funded in Germany.

The breakdown of the fair value of plan assets is as follows: 63% bonds, 15% equities and 22% other investments. Directly held Societe Generale shares are not significant.

Funding assets excess is EUR 338 million.

Employer contributions to be paid to post-employment defined benefit plans for 2024 are estimated at EUR 17 million.

Plan hedging strategies are defined locally in connection with the Finance and Human Resources departments of the entities, by *ad hoc* structures (Trustees, Foundations, Joint structures etc.) if necessary. Besides, liability investment or financing strategies are monitored at Group level through a global governance system. Committee meetings, with the participation of representatives of the Human Resources Department, the Finance Department and the Risk Division, are organised in order to define Group guidelines for employee benefits investment and management, to validate decisions and to follow up the associated risks for the Group.

Depending on the duration of each plan and local regulations, funding assets are invested in equities and/or in fixed income products, whether guaranteed or not.

The actual returns on plan and separate assets can be broken down as follows:

(In EURm)	2023	2022
Plan assets	73	(437)
Separate assets	74	(325)

### MAIN ASSUMPTIONS DETAILED BY GEOGRAPHICAL AREA

	31.12.2023	31.12.2022
<b>Discount rate</b>		
France	3.19%	3.62%
United-Kingdom	4.52%	4.80%
Others	3.64%	4.07%
<b>Long-term inflation</b>		
France	2.21%	2.45%
United-Kingdom	3.10%	3.30%
Others	2.11%	2.01%
<b>Future salary increase</b>		
France	1.91%	2.20%
United-Kingdom	N/A	N/A
Others	1.50%	1.40%
<b>Average remaining working lifetime of employees (in years)</b>		
France	7.56	7.84
United-Kingdom	2.52	3.07
Others	8.46	8.83
<b>Duration (in years)</b>		
France	11.69	11.63
United-Kingdom	12.06	12.69
Others	11.44	11.94

Assumptions by geographical area are weighted average by the defined benefit obligations (DBO).

The discount yield curves used are AA corporate bonds yield curves (source: Merrill Lynch) observed at the end of October for USD, GBP and EUR, and corrected at the end of December if the change in discount rates had a significant impact.

Inflation rates used for EUR and GBP monetary areas are market rates observed at the end of October and corrected at the end of December if

the change had a significant impact. Inflation rates used for the other monetary areas are the long-term targets of the central banks.

The average remaining working lifetime of employees is calculated taking into account turnover assumptions.

The assumptions described above have been applied to post-employment benefit plans.

### SENSITIVITIES OF DEFINED BENEFIT OBLIGATIONS TO THE CHANGES IN MAIN ACTUARIAL ASSUMPTION

(Percentage of item measured)	31.12.2023	31.12.2022
<b>Variation in discount rate</b>		
Impact on the present value of defined benefit obligations at 31 December N	+0.5%	+0.5%
<b>Variation in long-term inflation</b>		
Impact on the present value of defined benefit obligations at 31 December N	-5%	-6%
<b>Variation in future salary increase</b>		
Impact on the present value of defined benefit obligations at 31 December N	+0.5%	+0.5%
	4%	4%
	1%	1%

Disclosed sensitivities are averages of the variations weighted by the present value of the defined benefit obligations.

**BREAKDOWN OF FUTURE PAYMENTS OF BENEFITS**

N+4	163	165
N+5	172	152
N+6 to N+10	855	853

**NOTE 5.1.3 SHARE-BASED PAYMENT PLANS****ACCOUNTING PRINCIPLES**

Societe Generale, and its subsidiaries, share-based payments include:

- payments in equity instruments;
- cash payments whose amount depends on the performance of equity instruments.

Share-based payments systematically give rise to an operating expense recognised as Personnel expenses in the amount of the fair value of the share-based payments granted to employees and according to their terms of settlement.

For equity-settled share-based payments (free shares, stock purchase or subscription options), the fair value of these instruments, measured at the vesting date, is spread over the vesting period and recorded in shareholders' equity under Issued common stocks and capital reserves. At each accounting date, the number of these instruments is revised in order to take into account performance and service conditions and adjust the overall cost of the plan as originally determined. Expenses recognised under Personnel expenses from the start of the plan are then adjusted accordingly.

For cash-settled share-based payments (compensation indexed on Societe Generale, or one of its subsidiaries, shares), the fair value of the amounts payable is recorded under Personnel expenses as an expense over the vesting period against a corresponding liabilities entry recognised in the balance sheet under Other liabilities – Expenses payable on employee benefits. This payables item is then remeasured to take into account performance and presence conditions, as well as changes in the value of the underlying shares. When the expense is hedged by an equity derivative instrument, the effective portion of the change in the fair value of the hedging derivative is recorded in the income statement under Personnel expenses, as well.

The Group may award some of its employees stock purchase or subscription options, free shares or rights to a future cash payment indexed to the Societe Generale, or one of its subsidiaries, share price.

The options are measured at their fair value when the employees are first notified, without waiting for the conditions that trigger the award to be met, or for the beneficiaries to exercise their options.

Group stock-option plans are measured using a binomial formula when the Group has adequate statistics to take into account the behaviour of the option beneficiaries. When such data are not available, the Black & Scholes model or *Monte-Carlo* model is used. Valuations are performed by independent actuaries.

The vesting conditions for beneficiaries of payments based on Societe Generale shares include conditions of presence and performance. The performance conditions may be indexed on the Group's financial

data (for instance, the Group's profitability, or the relative performance of the Societe Generale share) and/or on the Group's non-financial data (for instance, the achievement of the Group's objectives in terms of social and environmental responsibility – CSR).

**EXPENSES RECORDED IN THE INCOME STATEMENT**

(In EURm)	31.12.2023			31.12.2022 R		
	Cash settled plans	Equity settled plans	Total plans	Cash settled plans	Equity settled plans	Total plans
Net expenses from purchase plans, stock option and free share plans	139	115	254	104	92	196

The description of Societe Generale stock-options plans and free share plans, which supplements this note, is presented in Chapter 3 of the present Universal Registration Document.

**NOTE 5.2 Other operating expenses****ACCOUNTING PRINCIPLES**

The Group records operating expenses under expenses, according to the type of services to which they refer and the rate of use of said services.

"Rentals" include real estate and equipment leasing expenses, which do not result in a recognition of a lease liability and right-of-use asset (see Note 8.3).

Taxes and levies are only booked when the triggering event provided for by law occurs. If the obligation to pay the tax arises from the gradual operation of an activity, the expense must be spread out over the same period. Finally, if the obligation to pay is generated when a threshold is reached, the expense is only recorded once the threshold is reached.

Taxes and levies cover all contributions levied by a public authority and include the contributions paid to the Single Resolution Fund and the Deposit Insurance and Resolution Fund, the systemic risk tax, and contributions for ACPR control costs, which are recognised in profit or loss at the start of the financial year. The Company social solidarity contribution (C3S), based on income generated in previous financial year, is fully recognised in profit or loss as at 1 January of the current financial year.

"Other" mainly includes building maintenance and other costs, travel and business expenses, and advertising expenses.

### CONTRIBUTION TO BANK RESOLUTION MECHANISMS

The European regulatory framework designed to enhance financial stability was updated by the Directive 2014/59/UE of 15 May 2014 establishing a framework for the recovery and resolution of credit institutions and investment firms (Bank Recovery and Resolution Directive).

The European Regulation UE no806/2014 of 15 July 2014 then determined the financing means of resolution mechanisms within the European Banking Union through the establishment of a Single Resolution Fund (SRF). In addition to this instrument, the National Resolution Fund (NRF) exists for institutions subject to this resolution mechanisms, but that have no SRF.

The SRF, established in January 2016, shall receive annual contributions from the participating European financial institutions. By the end of 2023, the available financial means of the Fund shall reach at least 1% of the amount of covered deposits of all these participating financial institutions. A share of the annual contributions can be provided through irrevocable payment commitments.

In 2023, the Group's contributions to the SRF and the NRF were as follows:

- cash contributions (77.5%) for a total of EUR 658 million (versus EUR 863 million in 2022) of which EUR 603 million for the SRF and EUR 55 million for the NRF. These contributions are non-tax-deductible in France and have been recorded in the income statement in Other operating expenses, among Taxes and levies;

- irrevocable payment commitments (22.5%) backed by a cash collateral for EUR 175 million related to the SRF (versus EUR 142 million in 2022) recorded as an asset in the balance sheet, among Other assets.

As at 31 December 2023, the amount of cash collateral paid to the SRF and NRF and stated as balance sheet assets under "Other assets" are EUR 772 million and EUR 173 million respectively.

In its ruling of 25 October 2023, the General Court of the European Union dismissed the appeal of a French credit institution against the Single Resolution Board (SRB) following the rejection by the latter of the request for the return of collateral linked to *ex ante* contributions provided in the form of irrevocable payment commitments for the 2015 contribution period. The reimbursement of the collateral, requested by the institution after the withdrawal of its licence from the European Central Bank, had been refused by the SRB; the latter required, as a condition precedent to returning the collateral backing, the prior payment by the institution of an amount in cash corresponding to the amount committed under the irrevocable payment commitments entered into. The institution concerned decided to appeal to the European Court of Justice against the ruling of the General Court of the European Union. Societe Generale will keep informed of further developments in the matter and analyse the possible consequences for its financial statements.

## NOTE 6 INCOME TAX

MAKING IT  
SIMPLE

Income tax expenses are presented separately from other taxes which are classified among Other operating expenses. They are calculated according to the rates and tax regulations applicable in the countries where each consolidated entity is located.

Income tax presented in the income statement includes current taxes and deferred taxes:

- current taxes correspond to the amount of taxes due (or refundable) as calculated according to the taxable profit base for the reporting period;
- deferred taxes correspond to the amount of taxes resulting from past transactions and that will be payable (or refundable) in a future reporting period.

### ACCOUNTING PRINCIPLES

#### Current taxes

Current tax is based on the taxable profits of each consolidated taxable entity and determined in accordance with the rules established by the local taxation authorities, upon which income taxes are payable. This tax expense also includes net allowances for tax adjustments pertaining to income tax.

Tax credits arising in respect of interest from loans and income from securities are recorded in the relevant interest account as they are applied in settlement of income taxes for the year. The related tax charge is included under Income tax in the income statement.

#### Deferred taxes

Deferred taxes are recognised whenever the Group identifies a temporary difference between the book value and tax value of balance sheet assets and liabilities that will affect future tax payments.

Deferred tax assets and liabilities are measured in each consolidated taxable entity and in accordance with the rules established by the local taxation authorities, upon which their income taxes are payable. This amount is based on the tax rate enacted or substantively enacted which is expected to apply when the asset is realised or the liability settled. These deferred taxes are adjusted in the event of changes to tax rates. This amount is not discounted to present value.

Deferred tax assets can result from deductible temporary differences or from tax loss carry-forwards. These deferred tax assets are recorded only if the entity concerned is likely to recover these assets within a set time. These temporary differences or tax loss carry-forwards can also be used against future taxable profit.

Tax loss carry-forwards are subject to an annual review taking into account the tax system applicable to each relevant tax entity and a realistic projection of their tax income or expense: any previously unrecognised deferred tax assets are recorded in the balance sheet to the extent it has become probable that future taxable profit will allow the deferred tax asset to be recovered; however, the carrying value of deferred tax assets already recognised in the balance sheet is reduced where a risk of total or partial non-recovery occurs.

Current and deferred taxes are recognised in the consolidated income statement under Income tax. However, deferred taxes related to gains and losses recorded under Unrealised or deferred gains and losses are also recognised under the same heading in shareholders' equity.

#### Tax uncertainties

There may be uncertainty over the tax treatments applied by the Group. If it is probable that the tax Authority will not accept some tax treatments, these uncertainties shall be booked under tax expenses/income by the counterpart of Provisions for tax adjustments recorded among tax liabilities.

Information on the nature and the amount of the associated risks is not disclosed when the Group considers that such disclosure could seriously undermine its position in a dispute with other parties on the object of the provision.

**NOTE 6.1 Breakdown of the tax expense**

<i>(In EURm)</i>	<b>2023</b>	<b>2022 R</b>
Current taxes	(1,470)	(1,274)
Deferred taxes	(209)	(209)
<b>TOTAL</b>	<b>(1,679)</b>	<b>(1,483)</b>

**RECONCILIATION OF THE DIFFERENCE BETWEEN THE GROUP'S STANDARD TAX RATE AND ITS EFFECTIVE TAX RATE**

<i>(In EURm)</i>	<b>2023</b>		<b>2022 R</b>	
	%	EURm	%	EURm
<b>Income before tax, excluding net income from companies accounted for using the equity method and impairment losses on goodwill</b>		<b>5,442</b>		<b>4,224</b>
<b>Group effective tax rate</b>	<b>30.85%</b>		<b>35.11%</b>	
Permanent differences	0.58%	31	0.92%	39
Differential on securities with tax exemption or taxed at reduced rate	-0.24%	(13)	-14.04%	(593)
Tax rate differential on profits taxed outside France	1.33%	72	2.56%	108
Changes in the measurement of deferred tax assets/liabilities	-6.69%	(364)	1.28%	54
Normal tax rate applicable to French companies (including 3.3% national contribution)	25.83%		25.83%	

In compliance with the French tax provisions that define the ordinary corporate tax rate, the latter is set to 25% in 2023 (article 219 of the French Tax Code), plus the existing national contribution (CSB) of 3.3% (article 235 *ter* ZC of the French Tax Code), *i.e.* a compound tax rate of 25.83%.

Long-term capital gains on affiliates are exempt from this corporate tax, except for a 12% fee on the gross amount in a net long term capital gains situation (article 219 I a *quinquies* of the French Tax Code).

Furthermore, under the parent-subsidiary regime, dividends from companies in which Societe Generale's equity interest is at least 5% are tax exempt, subject to taxation of a portion of fees and expenses of 1% or 5% at the full statutory tax rate (article 216 of the French Tax Code).

**NOTE 6.2 Tax assets and liabilities****TAX ASSETS**

<i>(In EURm)</i>	<b>31.12.2023</b>	<b>31.12.2022 R</b>
Current tax assets	1,026	819
Deferred tax assets	3,691	3,665
<i>o/w deferred tax assets on tax loss carry-forwards</i>	1,832	1,662
<i>o/w deferred tax assets on temporary differences</i>	1,818	1,982
<i>o/w deferred tax on deferrable tax credits</i>	41	21
<b>TOTAL</b>	<b>4,717</b>	<b>4,484</b>

## TAX LIABILITIES

(In EURm)	31.12.2023	31.12.2022 R
Current tax liabilities	933	735
Provisions for tax adjustments	41	72
Deferred tax liabilities	1,428	838
<b>TOTAL</b>	<b>2,402</b>	<b>1,645</b>

The Group performs an annual review of its capacity to use tax loss carry-forwards, taking into account the tax system applicable to each tax entity (or tax group) concerned and a realistic forecast of its tax results. For this purpose, the tax results are determined based on the projected performance of the businesses. This performance corresponds to the estimated budget (scenario SG Central) over four years (from 2024 to 2027), extrapolated to 2028, which corresponds to a "normative" year.

These budgets notably take into account the impacts of the commitments to energy and environmental transition and regional development detailed in the Declaration of Non-Financial Performance.

The tax results also take into consideration the accounting and tax adjustments (including the reversal of the deferred tax assets and liabilities bases on temporary differences) applicable to the entities and jurisdictions concerned. These adjustments are determined on the

basis of historical tax results and on the Group's tax expertise. An extrapolation of the tax results is performed from 2028 on and over a timeframe considered reasonable and depending on the nature of the activities carried out within each tax entity.

On principle, the appreciation of the selected macroeconomic factors and the internal estimates used to determine the tax results involve risks and uncertainties about their materialisation over the estimated timeframe for the absorption of the losses. These risks and uncertainties are especially related to possible changes in the applicable tax rules (computation of the tax result, as well as allocation rules for tax loss carry-forwards) or materialisation of the assumptions selected. These uncertainties are mitigated by robustness checks of the budgetary and strategic assumptions.

As at 31 December 2023, discounted projections confirm the probability that the Group will be able to offset the tax losses covered by deferred tax assets against future profits.

### NOTE 6.3 Deferred tax assets recognised on tax loss carry-forwards and deferred tax assets not recognised

As at 31 December 2023, based on the tax system of each entity and a realistic projection of their tax income, the projected period for deferred tax assets recovery is indicated in the table below:

(In EURm)	31.12.2023	Statutory time limit on carry-forwards	Expected recovery period
<b>Total deferred tax assets relating to tax loss carry-forwards</b>	<b>1,832</b>	-	-
o/w French tax group	1,572	Unlimited <sup>(1)</sup>	8 years
o/w US tax group	88	20 years <sup>(2)</sup>	7 years
Others	172	-	-

(1) In accordance with the 2013 French Finance Act, the deduction of previous losses is limited to EUR 1 million plus 50% of the fraction of the taxable income for the fiscal year exceeding this limit. The non-deductible portion of losses may be carried forward to the following fiscal years with no time limit and under the same conditions.

(2) Tax losses generated before 31 December 2011.

The main deferred taxes not recognised as assets in the balance sheet by tax group are presented in the table below. They may be recognised in the balance sheet when it becomes probable that a future taxable profit will allow their recovery.

(In EURm)	31.12.2023	31.12.2022
French tax group	930	520
US tax groups	228	277
SG Singapore	80	82
SG de Banques en Guinée Équatoriale <sup>(1)</sup>	34	36

(1) Including EUR 10 million of tax carry forward and EUR 24 million temporary differences as at 31 December 2023, versus respectively EUR 10 million and EUR 26 million as at 31 December 2022.

The other deferred taxes on tax loss carryforwards and temporary differences not recognised as assets on the balance sheet amount, respectively, to EUR 122 million and EUR 1 million as at 31 December 2023.

For the France tax group, deferred tax assets of EUR 410 million could not be recognised at the end of December 2023, bringing the amount of unrecognised deferred tax assets in France to EUR 930 million. If tax projections improve, all or part of these deferred taxes may be recognised as deferred tax assets in future years.

In parallel, the unrecognised deferred tax assets of US tax groups decreased by EUR 49 million due to the recognition in the 2023 balance sheet of EUR 40 million deferred taxes and of EUR 9 million due to currency effects.

Regarding the tax treatment of the loss resulting from the actions of Jérôme Kerviel, Societe Generale considers that the judgment of the Versailles Court of Appeal of 23 September 2016 is not such as to call into question its validity in light of the 2011 opinion of the French Supreme Administrative Court (*Conseil d'État*) and its established case law. Consequently, Societe Generale considers that the related tax loss remains recoverable against future taxable income (see Note 9).

### **PILLAR 2: TAX REFORM – GLOBAL MINIMUM CORPORATE TAX RATE (“GLOBE” RULES)**

In October 2021, 137 of the 140 jurisdictions members of the OECD Inclusive Framework on Base Erosion and Profit Shifting (BEPS) committed to the principle of establishing a global minimum corporate income tax rate of 15%. A set rules, referred to as “Pillar 2”, published by the OECD on 20 December 2021, specifies the mechanism which will apply, in the states that will adopt it, to the profits by country of multinational groups with revenues exceeding EUR 750 million.

European Directive (EU) 2022/2523 incorporating the Pillar 2 rules was adopted and published in the Official Journal of the European Union on 22 December 2022.

Article 4 of the French Finance Act for 2024 incorporates the directive into French law. The minimum level of tax will take the form of an additional “top-up” tax determined according to rules compliant with the directive. Transitional Safe Harbour set out by the OECD for the first three fiscal years are also included in the law. These rules apply to the Group from 1 January 2024, in respect of any additional top-up tax due in France as well as of any qualified domestic top-up taxes implemented in jurisdictions where the Group operates.

Under the provisions introduced by the amendments to IAS 12, adopted by the European Union on 8 November 2023 with immediate and retrospective implementation (see Note 1), the Group applies, from 1 January 2023 on, the mandatory and temporary exception to the accounting recognition of the deferred taxes associated with the top-up taxes resulting from the Pillar 2 rules.

A project structure has been established at Group level to analyse the provisions of the Pillar 2 European directive and take the necessary measures to comply with them as soon as they enter into force. According to initial estimates based on the available data (in particular data from the country-by-country reports of years 2021 and 2022), the effective Pillar 2 tax rates would exceed 15% in most jurisdictions in which the Group operates. However, there is a limited number of jurisdictions in which a top-up tax would have to be paid. To date, the Group does not anticipate any material impact of this reform in respect of its current tax burden. Because of the calculation complexity resulting from these rules and the changes in the Group's consolidation scope, the effects of this reform are still being examined to refine the quantification in view of the first accounting recognition of any additional tax burden in the Group's consolidated accounts as at 30 June 2024.

## NOTE 7 SHAREHOLDERS' EQUITY

MAKING IT  
SIMPLE

Equity are the resources contributed to the Group by external shareholders as capital, as well as the cumulative and undistributed results (retained earnings). It also includes resources received when financial instruments are issued and for which the issuer has no contractual obligation to deliver cash to the holders of these instruments.

Equity has no contractual maturity, and when compensation is awarded to shareholders or holders of other equity instruments, it does not affect the income statement but directly reduces the retained earnings in the equity.

The statement "Changes in Shareholders' Equity" presents the various changes that affect the components of equity over the reporting period.

### NOTE 7.1 Treasury shares and shareholders' equity issued by the Group

#### ACCOUNTING PRINCIPLES

##### Treasury shares

Societe Generale shares held by the Group are deducted from consolidated equity irrespective of the purpose for which they are held. Income on these shares is recognised in Retained earnings.

Recognition of shares issued by Group subsidiaries, which are bought and sold by the Group, is described in Note 2.

##### Shareholders' equity issued by the Group

Financial instruments issued by the Group are booked in whole or in part to debt or to equity depending on whether or not they contractually oblige the issuer to deliver cash to the holders of the securities.

When they are classified as equity, securities issued by Societe Generale are recorded under Other equity instruments. If they are issued by Group subsidiaries, these securities are recognised under Non-controlling interests. External costs associated with issuing equity instruments are deducted directly from equity at their after-tax amount.

When they are classified as debt instruments, securities issued by the Group are recorded under Debt securities issued or Subordinated debt depending on their characteristics. They are accounted for in the same way as other financial liabilities measured at amortised cost (see Note 3.6).

**NOTE 7.1.1 ORDINARY SHARES AND CAPITAL RESERVES**

(In EURm)	<b>31.12.2023</b>	<b>31.12.2022</b>
Issued capital	1,004	1,062
Issuing premiums and capital reserves	20,412	21,377
Elimination of treasury stock	(230)	(1,191)
<b>TOTAL</b>	<b>21,186</b>	<b>21,248</b>

**ORDINARY SHARES ISSUED BY SOCIETE GENERALE SA**

(Number of shares)	<b>31.12.2023</b>	<b>31.12.2022</b>
Ordinary shares	802,979,942	849,883,778
<i>Including treasury stock with voting rights<sup>(1)</sup></i>	<i>6,736,010</i>	<i>48,737,016</i>
<i>Including shares held by employees</i>	<i>90,162,610</i>	<i>79,097,967</i>

(1) Excluding Societe Generale shares held for trading purposes or in respect of the liquidity contract.

As at 31 December 2022, 41,674,813 Societe Generale shares were acquired on the market at a cost price of EUR 914 million, for the purpose of cancellation, in accordance with the decision of the General Meeting of 17 May 2022. The capital reduction by cancellation of securities was carried out on 1 February 2023.

On 24 July 2023, a capital increase, reserved for Group employees and retirees as part of the Global Employee Share Ownership Plan open in 40 countries, was carried out for a total amount of EUR 221 million, resulting in the issuance of 12,548,674 new Societe Generale shares.

From 7 August 2023 to 22 September 2023, 17,777,697 Societe Generale shares were acquired on the market at a cost price of EUR 441 million, for the purpose of cancellation, in accordance with the decision of the General Meeting of 17 May 2022. The capital reduction by cancellation of securities was carried out on 17 November 2023.

As at 31 December 2023, Societe Generale SA's fully paid up capital amounted to EUR 1,003,724,927.50 and was made up of 802,979,942 shares with a nominal value of EUR 1.25.

**NOTE 7.1.2 TREASURY STOCK**

As at 31 December 2023, the Group held 4,425,083 of its own shares as treasury stock, for trading purposes or for the active management of shareholders' equity, representing 0.55% of the capital of Societe Generale SA.

The amount deducted by the Group from its equity for treasury shares (and related derivatives) came to EUR 230 million, including EUR 36 million in shares held for trading activities.

The change in treasury stock over 2023 breaks down as follows:

(In EURm)	<b>Liquidity contract</b>	<b>Trading activities</b>	<b>Treasury stock and active management of shareholders' equity</b>	<b>Total</b>
Disposals net of purchases	-	31	930	961
Capital gains net of tax on treasury stock and treasury share derivatives, booked under shareholders' equity	0	(10)	(52)	(62)

The variation of EUR 930 million in treasury shares and active capital management is mainly due to EUR 914 million relating to the capital reduction on 1 February 2023 by cancellation of 41,674,813 Societe Generale shares acquired in 2022.

**NOTE 7.1.3 SHAREHOLDERS' EQUITY ISSUED BY THE GROUP****PERPETUAL DEEPLY SUBORDINATED NOTES**

Given the discretionary nature of the decision to pay dividends to shareholders, the perpetual deeply subordinated notes have been classified as equity and recognised under Other equity instruments.

As at 31 December 2023, perpetual deeply subordinated notes issued by Societe Generale S.A. and recognised under Group shareholders'

equity in Other equity instruments totalled EUR 8,924 million, valued at historical rate.

The change in the amount of undated deeply subordinated notes issued by the Group is explained by two issuances and two redemptions at pair made over the year.

Issuance Date	Amount in local currency at 31.12.2022	Repurchases and redemptions in 2023	Amount in local currency at 31.12.2023	Amount in millions of euros at historical rate	Remuneration

16 April 2019	SGD 750m		SGD 750m	490	6.125%, from 16 April 2024 SGD 5-year Mid Swap rate +4.207%
12 September 2019	AUD 700m		AUD 700m	439	4.875%, from 12 September 2024 AUD 5-year Mid Swap rate +4.036%
18 November 2020	USD 1,500m		USD 1,500m	1,264	5.375%, from 18 November 2030 USD 5-year US Treasury rate +4.514%
26 May 2021	USD 1,000m		USD 1,000m	818	4.75%, from 26 May 2026 USD 5-year US Treasury rate +3.931%
15 July 2022	SGD 200m		SGD 200m	141	8.25%, from 15 December 2027 SGD 5-year SGD OIS rate +5.6%
22 November 2022	USD 1,500m		USD 1,500m	1,460	9.3750%, from 22 May 2028 USD 5-year US Treasury rate +5.385%
18 January 2023			EUR 1,000m	1,000	7.875%, from 18 July 2029 EUR 5-year Mid Swap rate +5.228%
14 November 2023			USD 1,250m	1,166	10%, from 14 May 2029 USD 5-year US Treasury rate +5.448%

**OTHER EQUITY INSTRUMENTS ISSUED BY SUBSIDIARIES**

The perpetual subordinated notes that are issued by the Group's subsidiaries and include discretionary clauses relating to the payment of interest are classified as equity instruments.

As at 31 December 2023, the nominal of other equity instruments issued by the Group's subsidiaries and recognised under Non-controlling interests totalled EUR 1,300 million.

Issuance Date	Amount	Remuneration
18 December 2014 (step-up clause after 12 years)	EUR 800m	4.125%, from 2026 5-year Mid Swap rate +4.150%
29 May 2019	EUR 500m	7.375%, from 2024 5-year Mid swap rate +7.556%

**SUMMARY OF CHANGES IN EQUITY INSTRUMENTS ISSUED**

Changes related to the perpetual subordinated notes and deeply subordinated notes included in Shareholder's equity, Group share are detailed below:

<i>(In EURm)</i>	2023			2022		
	Deeply subordinated notes	Perpetual subordinated notes	Total	Deeply subordinated notes	Perpetual subordinated notes	Total
Exchange rate effect on TSS/TSDI reimbursement	(404)	-	(404)	-	-	-
Remuneration paid booked under reserves	(734)	-	(734)	(581)	-	(581)
Changes in nominal values	(212)	-	(212)	1,602	-	1,602
Tax savings on remuneration payable to shareholders and recorded under profit or loss	190	-	190	150	-	150
Issuance fees relating to subordinated notes	(5)	-	(5)	(9)	-	(9)

**NOTE 7.1.4 EFFECT OF THE CHANGES IN THE SCOPE OF CONSOLIDATION**

The impact of changes in the consolidation scope recognised in shareholders' equity (EUR -34 million in Group share and EUR 3,523 million in Non-controlling interests) is mainly explained by the acquisition of LeasePlan (see Note 2.1) with:

- the decrease in the ownership interest in ALD from 75.94% to 52.59% with EUR -4 million in Group share and EUR 3,003 million in Non-controlling interests;

- an impact of EUR 513 million on the Non-controlling interests linked to other equity instruments issued by LeasePlan.

**NOTE 7.2 Earnings per share and dividends****ACCOUNTING PRINCIPLES**

The earnings per share are measured by dividing the net income attributable to ordinary shareholders by the weighted average number of shares outstanding over the period, excluding treasury shares. The net earnings attributable to ordinary shareholders are adjusted for the preferred shareholders rights, such as holders of preferred shares, subordinated securities or deeply subordinated notes classified in equity. The diluted earnings per share take into account the potential dilution of shareholders' interests in the event where dilutive instruments (stock options or free share plans) are converted into ordinary shares. This dilutive effect is determined using the share buyback method.

**NOTE 7.2.1 EARNINGS PER SHARE**

<i>(In EURm)</i>	2023	2022 R
Net income, Group share	2,493	1,825
Attributable remuneration to subordinated and deeply subordinated notes	(753)	(587)
Premium and issuance fees related and deeply subordinated notes	(5)	(9)
<b>Net income attributable to ordinary shareholders</b>	<b>1,735</b>	<b>1,229</b>
Weighted average number of ordinary shares outstanding <sup>(1)</sup>	799,315,070	822,437,425
<b>Earnings per ordinary share (in euros)</b>	<b>2.17</b>	<b>1.50</b>

<b>TOTAL</b>	<b>798</b>	<b>(30)</b>	<b>768</b>	<b>945</b>	<b>(177)</b>

(1) Gains and losses presented in these items are transferred into Retained earnings for the next financial year opening.

(2) When a financial liability is derecognised, unrealised gains and losses are attributable to Group own credit risk are subject to transfer into Retained earnings for the next financial year opening.

(3) Including EUR -2,298 million for insurance sector subsidiaries as at 31 December 2023 (EUR -4,479 million as at 31 December 2022). This amount must be read together with the financial income and expenses recorded directly in equity as part of the measurement of the associated insurance contracts (see Note 4.3, Detail of performance of insurance activities).

## NOTE 8 ADDITIONAL DISCLOSURES

### NOTE 8.1 Segment reporting

#### NOTE 8.1.1 DEFINITION OF SEGMENT REPORTING

The Group is managed on a matrix basis that takes into account its different business lines and the geographical breakdown of its activities. Segment reporting information is therefore presented under both criteria.

The Group includes in the results of each sub-division all operating income and expenses directly related to its activity. Income for each sub-division, except for the Corporate Centre, also includes the return on equity allocated to it, based on the estimated rate of return on Group equity. The return on the sub-division's book equity is then reallocated to the Corporate Centre. Transactions between sub-divisions are carried out under the same terms and conditions as those applying to non-Group customers.

Following changes in the Group's governance during the second half of 2023, the Group's core businesses are now managed through the three following strategic pillars:

- French Retail Banking, Private Banking and Insurance which includes:
  - French Retail and Private Banking including Boursorama,
  - Insurance activities;
- International Retail, Mobility and Leasing Services, which consists of:
  - International Retail,
  - Mobility and Leasing Services which comprises Financial services to Corporates, operational vehicle leasing and fleet management, and consumer credit activities;
- Global Banking and Investor Solutions which comprises:
  - Global Markets and Investors Services,
  - Financing and Advisory.

In addition to the strategic pillars, the Corporate Centre acts as the Group's central funding department. As such, it recognises the carrying cost of equity investments in subsidiaries and related dividend payments, as well as income and expenses stemming from the Group's Asset and Liability Management (ALM) and income from the Group's management of its assets (management of its industrial and bank equity portfolio and of its real estate assets). Income or expenses that do not relate directly to the activity of the core businesses are also allocated to the Corporate Centre.

Segment income take intra-group transactions into account, while these transactions are eliminated from segment assets and liabilities.

The tax rate levied on each business line is based on the standard tax rate applicable in each country where the division makes profits. Any difference with respect to the Group's tax rate is allocated to the Corporate Centre.

For the purpose of segment reporting by geographical region, segment profit or loss and assets and liabilities are presented based on the location of the booking entities.

(1) Income and expenses, as well as assets and liabilities that are not directly related to business line activities are allocated to the Corporate Centre. Corporate Centre income includes, in particular, some consequences of the Group's centralised management of litigation and of transactions leading to changes in the consolidation scope. Management fees incurred by banking entities in connection with the distribution of insurance contracts are considered as costs directly related to the performance of the contracts and are therefore included in the valuation of the latter and presented under "Insurance services expense" (see Note 1); this restatement is allocated to the Corporate Centre.

(2) These amounts include Other operating expenses and Amortisation, depreciation and impairment of tangible and intangible fixed assets.

(3) Segment liabilities correspond to debts (i.e. total liabilities excluding equity).

(4) The Net income/expense from other assets items as at 31 December 2022, mainly includes the impacts of the sale of Rosbank and the Group's insurance subsidiaries in Russia.

2022 figures restated in compliance with IFRS 17 and IFRS 9 for insurance entities, and in accordance with changes in performance reporting.

NOTE 8.1.3 SEGMENT REPORTING BY GEOGRAPHICAL REGION

GEOGRAPHICAL BREAKDOWN OF NET BANKING INCOME (IN EURM)

As at 31 December 2023, the amount of net banking income is EUR 25,104 million compared to EUR 27,155 million as at 31 December 2022.

GEOGRAPHICAL BREAKDOWN OF BALANCE SHEET ITEMS (IN EURM)

ASSETS

As at 31 December 2023, the amount of assets is EUR 1,554,045 million compared to EUR 1,484,900 million as at 31 December 2022.

## LIABILITIES

As at 31 December 2023, the amount of liabilities (except shareholder equity) is EUR 1,477,798 million compared to EUR 1,411,574 million as at 31 December 2022.

Segment liabilities correspond to debts (total liabilities excluding equity).

## NOTE 8.2 Provisions

## ACCOUNTING PRINCIPLES

Under balance sheet liabilities, "Provisions" are comprised of provisions for financial instruments, disputes and employee benefits.

## OVERVIEW

(In EURm)	Provisions as at 31.12.2022	Allocations	Write-backs available	Net allocation	Write-backs used	Currency and others	Provisions as at 31.12.2023
Provisions for credit risk on off balance sheet commitments (see Note 3.8)	898	528	(585)	(57)	-	(22)	819

<b>TOTAL</b>	<b>4,579</b>	<b>1,271</b>	<b>(1,185)</b>	<b>86</b>	<b>(379)</b>	<b>(51)</b>	<b>4,235</b>

(1) Including provisions for legal disputes, fines, penalties and commercial disputes.

**NOTE 8.2.1 COMMITMENTS UNDER MORTGAGE SAVINGS AGREEMENTS****ACCOUNTING PRINCIPLES**

In France, *Comptes d'épargne-logement* (CEL or mortgage savings accounts) and *Plans d'épargne-logement* (PEL or mortgage savings plans) are special savings schemes for individual customers which are governed by Law 65-554 of 10 July 1965. These products combine an initial deposit phase in the form of an interest-earning savings account, followed by a lending phase where the deposits are used to provide mortgage loans. The lending phase is subject to the prior existence of the savings phase and is therefore inseparable from it. The savings deposits collected and loans granted are measured at amortised cost.

These instruments create two types of commitments for the Group: the obligation to pay interest on customer savings for an indeterminate future period at an interest rate established at the inception of the mortgage savings agreement, and the obligation to subsequently lend to the customer at an interest rate also established at the inception of the savings agreement.

If it is clear that commitments under the PEL/CEL agreements will have negative consequences for the Group, a provision is recorded on the liabilities side of the balance sheet. Any changes in these provisions are recognised as net banking income under net interest income. These provisions only relate to commitments arising from PEL/CEL that are outstanding at the date of calculation.

Provisions are calculated for each generation of mortgage savings plans (PEL), with no netting between different PEL generations, and for all mortgage saving accounts (CEL) making up a single generation.

During the deposit phase, the underlying commitment used to determine the amount to be provisioned is calculated as the difference between the average expected amount of deposits and the minimum expected amount. These two amounts are determined statistically on the basis of the historical observations of past customer behaviour.

During the lending phase, the underlying commitment to be provisioned includes loans already granted but not yet drawn at the date of calculation, and future loans that are considered statistically probable on the basis of deposits that are currently recognised in the balance sheet at the date of calculation and on the basis of historical observations of past customer behaviour.

A provision is recognised if the discounted value of expected future earnings for a given generation of PEL/CEL is negative. Earnings are estimated on the basis of interest rates available to individual customers for equivalent savings and loan products, with a similar estimated life and date of inception.

**OUTSTANDING DEPOSITS IN PEL/CEL ACCOUNTS**

The increase in interest rates (to which the level of provisioning is sensitive) explains the sharp decrease in the provisions for mortgage savings accounts and plans observed in 2023. These provisions are still mainly related to the commitment to remunerate cash deposits. The level of provisions amounts to 0.7% of the total outstanding stock as at 31 December 2023.

**METHODS USED TO ESTABLISH PROVISION VALUATION INPUTS**

The inputs used to estimate future customer behaviour are derived from historical observations of customer behaviour patterns over a long period (more than 10 years). The values of these inputs can be

adjusted whenever changes are made to regulations that may undermine the effectiveness of past data as an indicator of future customer behaviour.

The values of the different market inputs used, notably interest rates and margins, are calculated on the basis of observable data and constitute a best estimate by Societe Generale, at the date of valuation, of the future value of these items for the period in question, in line with the Retail Banking Division's policy of interest rate risk management.

The discount rates used are derived from the zero-coupon swaps versus Euribor yield curve at the valuation date, averaged over a 12-month period.

**NOTE 8.2.2 OTHER PROVISIONS**

Other provisions include provisions for restructuring (except staff costs), provisions for commercial litigation and provisions for future repayment of funds in connection with customer financing transactions.

The Group is subject to an extensive legal and regulatory framework in the countries where it operates. In this complex legal context, the Group and some of its former and current representatives may be involved in various legal actions, including civil, administrative and criminal proceedings. The vast majority of these proceedings are part of the Group's current business. In recent years, litigation with investors and the number of disputes involving financial intermediaries such as banks and investment advisors has increased, partly due to a difficult financial environment.

It is by nature difficult to foresee the outcome of disputes, regulatory proceedings and acts involving Group entities, particularly if they are initiated by various categories of complainants, if the amount of claims for damages is not specified or is indeterminate or if the proceedings have no precedent.

In preparing its financial statements, the Group assesses the consequences of the legal, regulatory or arbitration proceedings in which it is involved. A provision is booked when losses from these proceedings become probable and the amount can be estimated reliably.

To assess the probability of losses and the amount of these losses, and thus to determine the amount of provisions to book, estimations are important. Management makes these estimates by exercising its judgment and taking into account all information available when financial statements are prepared. In particular, the Group takes into account the nature of the dispute, the underlying facts, ongoing proceedings and court decisions already taken, as well as its experience and the experiences of other companies dealing with similar cases (assuming that the Group has knowledge thereof) and, where appropriate, the opinion and reports of experts and independent legal advisers.

Each quarter, the Group carries out a detailed examination of outstanding disputes that present a significant risk. The description of those disputes is presented in Note 9 "Information on risks and litigation".

**NOTE 8.3 Tangible and intangible fixed assets****ACCOUNTING PRINCIPLES****Tangible and intangible fixed assets**

Tangible and intangible fixed assets include operating and investment fixed assets. Equipment assets held for operating leases purpose are included in operating tangible assets, while buildings held for leasing purposes are included in investment property.

Tangible and intangible fixed assets are carried at their purchase price on the asset side of the balance sheet, less depreciation, amortisation and impairment, except investment property held by insurance entities to back insurance contracts measured at fair value. The purchase price of fixed assets includes borrowing costs incurred to fund a lengthy construction period for the fixed assets, along with all other directly attributable expenses. Investment subsidies received are deducted from the cost of the relevant assets. Software developed internally is recorded on the asset side of the balance sheet in the amount of the direct cost of development.

As soon as they are fit for use, fixed assets are depreciated or amortised using the component-based approach. Each component is depreciated or amortised over its own useful life. The Group has applied this approach to its operating properties, breaking down its assets into components with depreciation periods of 10 to 50 years. Depreciation periods for fixed assets other than buildings depend on their useful life, which is usually estimated at 3 to 20 years.

Any residual value of the asset is deducted from its depreciable amount. If there is a subsequent decrease or increase in this initial residual value, the depreciable amount of the asset is adjusted, leading to a prospective modification of the depreciation schedule.

Depreciation and amortisation are recorded in the income statement under Amortisation, depreciation and impairment of tangible and intangible fixed assets.

Fixed assets grouped into Cash Generating Units are tested for impairment whenever there is any indication that their value may have diminished. Allocations and reversals of provisions for impairment are recorded in profit or loss under Amortisation, depreciation and impairment of tangible and intangible fixed assets.

Realised capital gains and losses on operating fixed assets are recognised under Net income from other assets.

Investment properties, insurance activities excluded, are depreciated using the component-based method. Each component is depreciated over its own useful life, ranging from 10 to 50 years.

Investment property held by insurance entities to back the insurance contracts issued, are measured at fair value through profit or loss, once a year, based on valuation reports by an independent expert. The fair value of investment property is based on unobservable inputs, thus corresponding to the level 3 category of fair value measurement (see Note 3.4).

Profits or losses on operating lease assets and on investment property, including amortisation, depreciation and revaluation are recognised under "Income from other activities" and "Expense from other activities" (see Note 4.2).

**Operating lease assets**

The cars leased by the Group in the context of fleet management are depreciated on a straight-line basis over the lease term for an average of 3 to 5 years. The depreciable amount of these cars is their acquisition cost less their residual value.

The acquisition cost of rental cars includes their acquisition cost plus the direct initial costs necessary for making them available to rental customers. Their residual value is an estimate of its resale value at the end of the contract. The estimate is based on statistical data and is reviewed at least once a year to take into account of price developments in the second-end car market. In case of increase or decrease in the residual value compared to its initial estimate, this change in estimate leads to adjust, vehicle by vehicle, its remaining depreciable value in order to modify its depreciation plan prospectively.

Profits or losses on the operating lease assets, including depreciation and impairment, are recognised under Income from other activities and Expense from other activities (see Note 4.2).

## Rights-of-use for assets leased by the Group

### LEASE

#### Definition of the lease

A contract is, or contains, a lease if it conveys to the lessor the right to control the use of an identified asset for a period of time in exchange for consideration:

- control is conveyed when the customer has both the right to direct the identified asset's use, and to obtain substantially all the economic benefits from that use throughout the lease period;
- the existence of an identified asset will depend on the absence, for the lessor, of substantive substitution rights for the leased asset; this condition is measured with regard to the facts and circumstances existing at the commencement of the contract. If the lessor has the option of freely substituting the leased asset, the contract can not be qualified as a lease, since its purpose is the provision of a capacity and not an asset;
- a capacity portion of an asset is still an identified asset if it is physically distinct (e.g. a floor of a building). Conversely, a portion of the capacity or of an asset that is not physically distinct does not constitute an identified asset (e.g. the lease of co-working area within a unit with no pre-defined location inside that unit).

#### Separation of lease and non-lease components

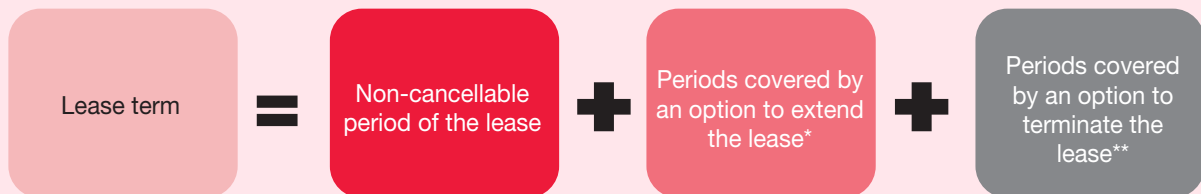

A contract may cover the lease of an asset by the lessor as well as the supply of additional services by that lessor. In this scenario, the lessee can separate the lease components from the non-lease components of the contract and treat them separately. The rental payments stipulated in the contract must be separated between the lease components and the non-lease components based on their individual prices (as directly indicated in the contract or estimated on the basis on all of the observable information). If the lessee cannot separate the lease components from the non-lease components (or services), the entire contract is treated as a lease.

### LEASE TERM

#### Definition of the lease term

The lease period to be applied in determining the rental payments to be discounted matches the non-cancellable period of the lease adjusted for:

- options to extend the contract that the lessee is reasonably certain to exercise;
- and early termination options that the lessee is reasonably certain not to exercise.

\* if the lessee is reasonably certain to exercise that option.

\*\* if the lessee is reasonably certain not to exercise that option.

The measurement of the reasonable certainty of exercising or not exercising the extension or early termination options shall take into account all the facts and circumstances that may create an economic incentive to exercise or not these options, specifically:

- the conditions for exercising these options (including measurement of the amount of the rental payments in case of an extension, or of the amount of penalties that may be imposed for early termination);
- substantial changes made to the leased premises (specific layouts, such as a bank vault);
- the costs associated with terminating the contract (negotiation costs, moving costs, research costs for a new asset that meets the lessee's requirements, etc.);
- the importance of the leased asset for the lessee, in view of its specific nature, its location, or the availability of substitute assets (specifically for branches located in commercially strategic sites, given their accessibility, expected traffic, or the prestige of the location);
- the history of renewals of similar contracts, as well as the strategy for the future use of the assets (based on the prospect of redeployment or rearrangement of a commercial branch network, for example).

When the lessee and the lessor each have the right to terminate the lease without the prior agreement of the other party and with no penalty other than a negligible one, the contract is no longer binding, and thus it no longer creates a lease liability.

In France, most property leases on premises occupied by branches are 9-year leases with an early-termination option at the end of 3 and 6-year term (leases referred to as "3/6/9"); at the end of the 9-year term, if no new agreement is signed, the initial lease is renewed by tacit agreement for a 5-year term. This 5-year term may be modified depending on the quality of the location, the completion of major investments, or the planned closure of a group of designated branches.

**Changing the lease term**

The term must be modified in case of a change of circumstances which lead the lessee to revise the exercise of the options included in the lease contract or in case of events which contractually oblige the lessee to exercise (or not) an option that had not been included (or is included) in the lease contract.

Following a change in the lease term, the lease obligation must be reassessed to reflect those changes by using a revised discount rate for the remaining estimated term of the contract.

**ACCOUNTING TREATMENT BY THE GROUP AS A LESSEE**

On the commencement date (on which the leased asset is made available for use), the lessee must record a lease liability on the liabilities side of the balance sheet and a right-of-use asset on the assets side of the balance sheet except for the exemptions described below.

In the income statement, the lessee must recognise an interest expense calculated on the lease liability under net banking income and a depreciation of the right-of-use under Amortisation, depreciation and impairment of tangible and intangible fixed assets.

The rental payments will partly reduce the lease liability and partly remunerate this liability in the form of interest expense.

**Exemptions and exclusions**

The Group does not apply the new lease treatment to contracts with a term of less than one year (including renewal options), nor to contracts on low-value items by applying the exemption threshold of USD 5,000 as indicated in the standard's Basis for Conclusions (the threshold should be measured against the replacement cost per unit of the leased asset).

**Rental payment amounts**

The payments to be considered for the measurement of the lease liability include fixed and variable rental payments based on an index (e.g. consumer price index or construction cost index), plus, where applicable, the funds that the lessee expects to pay the lessor for residual value guarantees, purchase options, or early termination penalties.

However, variable lease payments that are indexed on the use of the leased asset (indexed on revenue or mileage, for example) are excluded from the measurement of lease liability. This variable portion of the rental payments is recorded in the net income over time according to fluctuations in contractual indexes fluctuations.

Rental payments have to be considered based on their amount net of value-added tax. In addition, for building leases, occupancy taxes and property taxes passed on by lessors will be excluded from lease liabilities because their amount, as set by the competent public authorities, is variable.

**Recognition of the lease liability**

The liability initial amount is equal to the discounted value of the rental payments that will be payable over the lease period.

This lease liability is then measured at the amortised cost using the effective interest rate method: part of each rental payment will then be booked as interest expenses in the income statement, and part will be gradually deducted from the lease liability on the balance sheet.

After the commencement date, the amount of the lease liability may be adjusted if the lease is amended, the lease period is re-estimated, or to account for contractual changes in the rental payments related to the application of indices or rates.

As applicable, the lessee must also recognise a provision in its liabilities to cover the costs of restoring the leased asset that would be assumed when the lease ends.

**Recognition of the right-of-use**

On the availability date of the leased asset, the lessee must enter a right-of-use asset, on the assets side of the balance sheet, for an amount equal to the initial value of the lease liability, plus, as applicable, initial direct costs (e.g. issuance of an authenticated lease, registration fees, negotiation fees, front-end fee, leasehold right, lease premium, etc.), advance payments, and restoration costs.

This asset is then depreciated on a straight-line basis over the lease period that is applied for measuring the lease liability.

After the commencement date, the asset's value may be adjusted if the lease is amended, as it is the case for the lease liability.

Rights-of-use is presented on the lessee's balance sheet under the items of fixed assets where properties of the same type that are held in full ownership are entered. If the lease stipulates the initial payment of a leasehold right to the former tenant of the premises, the amount of that right is stated as a separate component of the right of use and presented under the same heading as the latter.

**Lease discount rates**

The Group uses the lessees' incremental borrowing rate to discount the rental payments as well as the amount of lease liabilities. For the entities which can directly refinance themselves on their local markets, the incremental borrowing rate is set at the lessee entity level, not at the Group level, in consideration of the borrowing terms and that entity's credit risk. For the entities which refinance themselves through the Group, the incremental borrowing rate is set by the Group.

The discount rates are set according to the currency, the country of the lessee entities and the maturity estimated of the contracts.

## INFORMATIONS RELATIVE TO LEASES ON TANGIBLE ASSETS USED BY THE GROUP

   	<p><b>Property Leases</b></p> <p>Most of the leases (more than 90%) involve building leases contracted for the lease of commercial and office space:</p> <ul style="list-style-type: none"> <li>the commercial spaces are branches in the Group's French and international retail banking networks. In France, the majority of property leases contracted are 9-year commercial leases with early termination options at 3 and 6 years (so-called "3/6/9" leases). If a new contract is not signed by the end of that 9-year period, the initial lease is automatically extended;</li> <li>the office buildings are leased for certain departments reporting to the Group's French headquarters or the local head offices of the main foreign subsidiaries, and for certain locations in the main international financial centres: London, New York, Hong Kong...</li> </ul> <p>Outside France, residual lease periods are generally below 10 years. In some countries, leases can be annual, with optional automatic renewal. In other locations, specifically London and New York, lease periods can be as long as 25 years.</p> <p><b>Equipment Leases</b></p> <p>Other leases (less than 10%) are mainly computer equipment leases and a very small percentage of vehicle leases.</p>

\* FULL: Full consolidation – JO: Joint Operation – EJV: Equity (Joint Venture) – ESI: Equity (significant influence) – EFS: Equity For Simplification (Entities controlled by the Group

that are consolidated using the equity method for simplification because are not significant).

- (1) Branches.
- (2) Entities wound up.
- (3) Removal from the scope.
- (4) Entities sold.
- (5) Merged.
- (6) Newly consolidated.

Additional information related to the consolidation scope and equity investments as required by the Regulation 2016-09 of the Autorité des Normes Comptables (ANC, the French Accounting standard setter), dated 2 December 2016 is available on Societe Generale Group website at: <https://investors.societegenerale.com/en/publications-documents>.

### NOTE 8.5 Fees paid to Statutory Auditors

The consolidated financial statements of the Societe Generale Group are jointly certified by Ernst & Young et Autres, represented by Micha Missakian and Vincent Roty, on the one hand, and Deloitte et Associés, represented by Jean-Marc Mickeler and Maud Monin, on the other.

On the proposal of the Board of Directors and following the recommendation of the Audit and Internal Control Committee (CACI) of Societe Generale, the General Meeting of 23 May 2018 renewed the mandates of Ernst & Young et Autres and Deloitte et Associés for a period of six years. Their terms of office will expire at the General Meeting approving the 2023 financial statements.

In accordance with European audit regulations, the CACI implements a specific policy for the approval of services other than the certification of accounts (SACC) provided by the Statutory Auditors and their networks in order to verify the compliance of the mission with these regulations prior to the launch of the mission.

A summary of the SACCs (approved or rejected) is presented at each meeting of the CACI.

Lastly, the Finance Departments of the entities or business lines make annual decisions on the quality of the audits of Deloitte et Associés and Ernst & Young et Autres. The findings of this investigation are also presented to the CACI.

The table below presents the fees invoiced by Ernst & Young et Autres, on the one hand, and Deloitte et Associés on the other hand, as well as by their respective networks, to Societe Generale S.A. and its subsidiaries.

		Ernst & Young et Autres		Deloitte et Associés		Total	
		2023	2022 R	2023	2022 R	2023	2022 R
<i>(In EURm excluded VAT)</i>							
Statutory audit, certification, examination of parent company and consolidated accounts	Issuer	5	4	4	4	9	8
	Fully consolidated subsidiaries	15	15	16	16	31	31
<b>SUB-TOTAL AUDIT</b>		<b>20</b>	<b>19</b>	<b>20</b>	<b>20</b>	<b>40</b>	<b>39</b>
Non-audit services (SACC)	Issuer	1	1	1	1	2	2
	Fully consolidated subsidiaries	1	2	3	2	4	4
<b>TOTAL</b>		<b>22</b>	<b>22</b>	<b>24</b>	<b>23</b>	<b>46</b>	<b>45</b>

Services other than the certification of accounts mainly consist of missions to review compliance with regulatory requirements, internal control reviews in the context of compliance with ISAE (International Standard on Assurance Engagements) standards and extended audit procedures (agreed procedures). They also include services expressly and exclusively entrusted to the Statutory Auditors for EUR 0.3 million.

## NOTE 9 INFORMATION ON RISKS AND LITIGATION

Every quarter, the Group reviews in detail the disputes presenting a significant risk. These disputes may lead to the recording of a provision if it becomes probable or certain that the Group will incur an outflow of resources for the benefit of a third party without receiving at least the equivalent value in exchange. These provisions for litigations are classified among the Other provisions included in the Provisions item in the liabilities of the balance-sheet.

No detailed information can be disclosed on either the recording or the amount of a specific provision given that such disclosure would likely seriously prejudice the outcome of the disputes in question.

- On 24 October 2012, the Court of Appeal of Paris confirmed the first judgment delivered on 5 October 2010, finding J. Kerviel guilty of breach of trust, fraudulent insertion of data into a computer system, forgery and use of forged documents. J. Kerviel was sentenced to serve a prison sentence of five years, two years of which are suspended, and was ordered to pay EUR 4.9 billion in damages to Societe Generale. On 19 March 2014, the Supreme Court confirmed the criminal liability of J. Kerviel. This decision puts an end to the criminal proceedings. On the civil front, on 23 September 2016, the Versailles Court of Appeal rejected J. Kerviel's request for an expert determination of the damage suffered by the Bank, and therefore confirmed that the net accounting losses suffered by the Bank as a result of his criminal conduct amount to EUR 4.9 billion. It also declared J. Kerviel partially responsible for the damage caused to Societe Generale and sentenced him to pay to Societe Generale EUR 1 million. Societe Generale and J. Kerviel did not appeal before the Supreme Court. Societe Generale considers that this decision has no impact on its tax situation. However, as indicated by the Minister of the Economy and Finance in September 2016, the tax authorities have examined the tax consequences of this book loss and indicated that they intended to call into question the deductibility of the loss caused by the actions of J. Kerviel, amounting to EUR 4.9 billion. This proposed tax rectification has no immediate effect and will possibly have to be confirmed by an adjustment notice sent by the tax authorities when Societe Generale will be in a position to deduct the tax loss carry forwards arising from the loss from its taxable income. Such a situation will not occur for several years according to the Bank's forecasts. In view of the 2011 opinion of the French Supreme Administrative Court (*Conseil d'État*) and its established case law which was recently confirmed again in this regard, Societe Generale considers that there is no need to provision the corresponding deferred tax assets. In the event that the authorities decide, in due course, to confirm their current position, Societe Generale group will not fail to assert its rights before the competent courts. By a decision handed down on 20 September 2018, the Investigation Committee of the reviewing and reassessment Criminal Court has furthermore declared inadmissible the request filed in May 2015 by J. Kerviel against his criminal sentence, confirming the absence of any new element or fact that could justify the reopening of the criminal file.
- Between 2003 and 2008, Societe Generale set up gold consignment lines with the Turkish group Goldas. In February 2008, Societe Generale was alerted to a risk of fraud and embezzlement of gold stocks held by Goldas. These suspicions were rapidly confirmed following the failure by Goldas to pay or refund gold worth EUR 466.4 million. Societe Generale brought civil proceedings against its insurers and various Goldas Group entities. Goldas launched various proceedings in Turkey and in the UK against Societe Generale. In the action brought by Societe Generale against Goldas in the UK, Goldas applied to have the action of Societe Generale struck-out and applied to the UK court for damages. On 3 April 2017, the UK court granted both applications and will, after an inquiry into damages, rule on the amount due to Goldas, if any. On 15 May 2018, the London Court of Appeal discharged entirely the inquiry into damages granted by the London High Court to Goldas but rejected Societe Generale's arguments relating to service of the claims issued against Goldas, which are therefore time-barred. On 18 December 2018, the Supreme Court refused permission to appeal to both Societe Generale and Goldas, which has therefore become definitive. On 16 February 2017, the Paris Commercial Court dismissed Societe Generale's claims against its insurers. Societe Generale filed an appeal against the Paris Commercial Court's decision. On 1 February 2023, the Paris Court of Appeals confirmed this decision. Societe Generale filed an appeal before the Supreme Court against this decision.
- In the early 2000s, the French banking industry decided to transition to a new digital system in order to streamline cheque clearing. To support this reform (known as EIC – *Échange d'Images Chèques*), which has contributed to the improvement of cheque payments security and to the fight against fraud, the Banks established several interbank fees (including the CEIC which was abolished in 2007). These fees were implemented under the aegis of the banking sector supervisory authorities, and to the knowledge of the public authorities.
- On 20 September 2010, the French competition authority ruled that the joint implementation and the setting of the amount of the CEIC and of two additional fees for related services were in breach of competition law. The authority fined all the participants to the agreement (including the *Banque de France*) a total of approximately EUR 385 million of penalties. On 2 December 2021, after several years of proceedings and two decisions of the Supreme Court, the Paris Court of Appeal overturned the decision of the French competition authority and ruled that (i) it was not proven that the establishment of the CEIC and the fees for related services on AOCT (cancellation of wrongly cleared transactions) as well as their collection had infringed the provisions of Article L. 420-1 of the French Commercial Code and of Article 101 of the Treaty on the Functioning of the European Union and, (ii) that its decision was giving rise to a right of restitution of the sums paid in execution of the overturned decision, namely approximately EUR 53.5 million for Societe Generale and approximately EUR 7 million for Crédit du Nord, together with interests at the legal rate. On 31 December 2021, the French competition authority filed an appeal before the Supreme court against this decision. The Supreme Court dismissed this appeal by a decision of 28 June 2023, putting a definitive end to this litigation.
- On 3 January 2023, Societe Generale Private Banking (Switzerland) ("SGPBS") entered into an agreement to settle litigation in the United States stemming from the Ponzi scheme of Robert Allen Stanford and his affiliates. On 21 February 2023, the US Receiver and the Official Stanford Investors Committee ("OSIC") filed a motion in US District Court for the Northern District of Texas seeking approval of the settlement. The settlement provides for the payment by SGPBS of USD 157 million in exchange for the release of all claims. During the 7 June 2023 hearing, the Court granted the US Receiver's motion to approve the settlement. This order is now subject to an appeal. The settlement amount that SGPBS must pay is fully covered by reserves in the accounts of Societe Generale SA following a financial guarantee provided by Societe Generale S.A. to SGPBS. Each of the other defendant banks in this litigation also announced settlements in the first quarter of 2023 with the US Receiver and OSIC resolving their claims. These settlements were reached in advance of a jury trial that had been scheduled to start on 27 February 2023 (which ultimately did not take place).

In the same matter, a pre-contentious claim (*requête en conciliation*) was initiated in Geneva in November 2022 by the Joint Liquidators of Stanford International Bank Limited (“SIBL”), appointed by the courts in Antigua, representing the same investors as those represented by the US plaintiffs. SGPBS was served with the statement of claim on 20 June 2023 and will defend itself against the claims in this proceeding.

- Notwithstanding the agreements reached in 2018 with the US authorities regarding certain London Interbank Offered Rates and the Euro Interbank Offered Rate (“the IBOR matter”) and the dismissal on 30 November 2021 of the legal proceedings brought by the DOJ in this matter (see Chapter 4 of the present Universal Registration Document), the Bank continues to defend civil proceedings in the United States (as described below) and has responded to information requests received from other authorities, including the Attorneys General of various States of the United States and the New York Department of Financial Services.

In the United States, Societe Generale, along with other financial institutions, has been named as a defendant in putative class actions involving the setting of US Dollar Libor, Japanese Yen Libor, and Euribor rates and trading in instruments indexed to those rates. Societe Generale has also been named in several individual (non-class) actions concerning the US Dollar Libor rate. All of these actions are pending in the US District Court in Manhattan (the “District Court”).

As to US Dollar Libor, all claims against Societe Generale were dismissed by the District Court or voluntarily dismissed by the plaintiffs, except in two putative class actions and one individual action that were effectively stayed. The class plaintiffs and a number of individual plaintiffs appealed the dismissal of their antitrust claims to the United States Court of Appeals for the Second Circuit (“Second Circuit”). On 30 December 2021, the Second Circuit reversed the dismissal and reinstated the antitrust claims. These reinstated claims which have been returned to the District Court include those asserted by a proposed class of over-the-counter (OTC) plaintiffs and by OTC plaintiffs that have filed individual actions. On 21 June 2022, the U.S. Supreme Court denied a petition filed by Societe Generale and other defendants that sought review of the Second Circuit’s ruling. Discovery is ongoing. The stayed putative class actions were voluntarily dismissed by plaintiffs on 10 August 2022 and 26 October 2023. On 9 January 2023, the claims against Societe Generale by one of the individual plaintiffs, National Credit Union Administration (as Liquidating Agent for certain credit unions) which included the stayed individual action referred to above, were voluntarily dismissed with prejudice. On 12 May 2023, Societe Generale and two other financial institutions entered into a settlement agreement to resolve the OTC class action for a combined USD 90 million. Societe Generale’s portion of this settlement was fully covered by reserves. On 17 October 2023, the District Court granted final settlement approval.

As to Japanese Yen Libor, the District Court dismissed the complaint brought by purchasers of Euroyen over-the-counter derivative products. On 1 April 2020, the Second Circuit reversed the dismissal and reinstated the claims. On 30 September 2021, the District Court dismissed certain plaintiffs and all Racketeer Influenced and Corrupt Organizations Act claims but upheld certain federal antitrust and New York state law claims against Societe Generale. On 16 February 2024, plaintiffs and Societe Generale entered into a settlement agreement, which is covered by reserves. The settlement received preliminary approval from the Court on 20 February 2024. Discovery in that action is ongoing. In the other action, brought by purchasers

or sellers of Euroyen derivative contracts on the Chicago Mercantile Exchange on 27 September 2019, plaintiff filed a motion for class certification. On 25 September 2020, the District Court granted defendants’ motion for judgment on the pleadings and dismissed plaintiff’s remaining claims. Plaintiff appealed to the Second Circuit. On 18 October 2022, as amended on 8 December 2022, the Second Circuit affirmed the District Court’s dismissal of plaintiff’s claims. On 2 October 2023, the U.S. Supreme Court denied a petition filed by plaintiff that sought review of the Second Circuit’s ruling. As a result, the action is now concluded.

As to Euribor, the District Court dismissed all claims against Societe Generale in the putative class action and denied the plaintiffs’ motion to file a proposed amended complaint. Plaintiffs have appealed those rulings to the Second Circuit. Societe Generale reached a settlement of this action in an amount covered by reserves. Shortly thereafter, on 21 November 2022, the Second Circuit stayed plaintiffs’ appeal as to Societe Generale and remanded that portion of the case to the District Court for consideration of the proposed settlement. On 31 October 2023, the District Court granted final settlement approval. As a result, this action is now concluded.

In Argentina, Societe Generale, along with other financial institutions, has been named as a defendant in litigation brought by a consumer association on behalf of Argentine consumers who held government bonds or other specified instruments that paid interest tied to US Dollar Libor. The allegations concern violations of Argentine consumer protection law in connection with alleged manipulation of the US Dollar Libor rate. Societe Generale has not yet been served with the complaint in this matter.

- Societe Generale, along with several other financial institutions, was named as a defendant in a putative class action alleging violations of US antitrust laws and the Commodities Exchange Act (CEA) in connection with foreign exchange spot and derivatives trading. The action was brought by persons or entities that transacted in certain over-the-counter and exchange-traded foreign exchange instruments. Societe Generale reached a settlement of USD 18 million, which was approved by the Court on 6 August 2018. On 7 November 2018, a group of individual entities that elected to opt out of the settlement filed a lawsuit against Societe Generale, SG Americas Securities, LLC and several other financial institutions. SG Americas Securities, LLC was dismissed by order dated 28 May 2020.

On 11 November 2020, Societe Generale was named, along with several other banks, in a UK action alleging collusion in the market for FX instruments. The action was subsequently transferred to the Competition Appeal Tribunal. By orders dated 17 May 2023 and 23 May 2023 respectively, the US and UK actions were dismissed. These actions are now concluded.

- On 10 December 2012, the French Supreme Administrative Court (*Conseil d’État*) rendered two decisions confirming that the “*précompte tax*” which used to be levied on corporations in France does not comply with EU law and defined a methodology for the reimbursement of the amounts levied by the tax authorities. However, such methodology considerably reduces the amount to be reimbursed. Societe Generale purchased in 2005 the “*précompte tax*” claims of two companies (Rhodia and Suez, now Engie) with a limited recourse on the selling companies. One of the above decisions of the French Supreme Administrative Court relates to Rhodia. Societe Generale has brought proceedings before the French administrative courts.

- Several French companies applied to the European Commission, which considered that the decisions handed down by the *Conseil d'État* on 10 December 2012, which were supposed to implement the decision rendered by the European Union Court of Justice (EUCJ) on 15 September 2011, breached a number of principles of European law. The European Commission subsequently brought infringement proceedings against the French Republic in November 2014, and since then confirmed its position by referring the matter to the EUCJ on 8 December 2016. The EUCJ rendered its judgement on 4 October 2018 and sentenced France on the basis that the *Conseil d'État* disregarded the tax on EU sub-subsidiaries in order to secure the *précompte* paid erroneously and failed to raise a preliminary question before the EUCJ. With regard to the practical implementation of the decision, Societe Generale has continued to assert its rights with the competent courts and the tax authorities. On 23 June 2020, the Administrative Court of Appeal of Versailles issued a ruling in favour of Engie on our 2002 and 2003 Suez claims, and ordered a financial enforcement in our favour. The Court held that the advance payment (*précompte*) did not comply with the Parent-Subsidiary Directive. Further to proceedings brought before the *Conseil d'État*, the latter ruled that a question should be raised before the EUCJ in order to obtain a preliminary ruling on this issue. The EUCJ has confirmed on 12 May 2022 that the *précompte* did not comply with the Parent-Subsidiary Directive. The *Conseil d'État*, by an Engie judgment of 30 June 2023 took note of this incompatibility and confirmed the decision held by the Administrative Court of Appeal of Versailles with respect to the 2002 year, but referred the examination of the 2003 year to this same Court, which confirmed on 9 January 2024 the partial relief granted by the administration in the course of the proceedings. In parallel, a compensation litigation in relation to the Rhodia claim and the Suez claims (between 1999 and 2001) was brought in March 2023 before the European Commission and the Paris Administrative Court of Appeal, further to the negative judgements issued by the *Conseil d'État* in 2012 (Rhodia) and 2016 (Suez).
  - Societe Generale, along with other financial institutions, was named as a defendant in a putative class action alleging violations of US antitrust laws and the CEA in connection with its involvement in the London Gold Market Fixing. The action is brought on behalf of persons or entities that sold physical gold, sold gold futures contracts traded on the CME, sold shares in gold ETFs, sold gold call options traded on CME, bought gold put options traded on CME, sold over-the-counter gold spot or forward contracts or gold call options, or bought over-the-counter gold put options. Societe Generale, along with three other defendants, has reached a settlement to resolve this action for USD 50 million. By order dated 13 January 2022, the Court granted preliminary approval of the settlement. The final fairness hearing was held on 5 August 2022, and the settlement received final approval by order dated 8 August 2022. This matter is now concluded. Although Societe Generale's share of the settlement is not public, it was not material from a financial perspective. Societe Generale, along with other financial institutions, is also named as a defendant in two putative class actions in Canada (in the Ontario Superior Court in Toronto and Quebec Superior Court in Quebec City) involving similar claims. Societe Generale is defending the claims.
  - Since August 2015, various former and current employees of the Societe Generale Group have been under investigation by German criminal prosecution and tax authorities for their alleged participation in the so called "CumEx" patterns in connection with withholding tax on dividends on German shares. These investigations relate *inter alia* to a fund administered by SGSS GmbH proprietary trading activities and transactions carried out on behalf of clients. The Group entities respond to the requests of the German authorities.
- Societe Generale Group entities may also be exposed to claims by third parties, including German tax offices, and become party to legal disputes initiated by clients involved in proceedings against the German tax administration.
- In May 2019, SGAS was named, along with other financial institutions, as a defendant in a putative class action in the US alleging anticompetitive behaviour in the pricing of "agency bonds" issued by US Government Sponsored Enterprises (GSEs), including Federal Home Loan Bank (FHLB), Federal Home Loan Mortgage Corporation (Freddie Mac), and Federal National Mortgage Association (Fannie Mae). On 16 June 2020, SGAS and twelve other bank defendants reached a final settlement with plaintiffs. Although SGAS's share of the settlement is not public, the amount was not material from a financial statement perspective. SGAS was also named in four separate individual opt-out litigations by the following plaintiffs: the State of Louisiana (filed September 2019), the City of Baton Rouge/East Baton Rouge Parish and related entities (October 2019), Louisiana Asset Management Pool (April 2020), and the City of New Orleans and related entities (September 2020). These suits also asserted antitrust claims (and in some cases other related claims) against SGAS and multiple other bank defendants based on these plaintiffs' purchases of GSE bonds. As to the opt-out litigations, a settlement was reached involving all defendants in June 2021, of which SGAS's share was immaterial, and these actions have been dismissed. SGAS also received a subpoena from the US Department of Justice (DOJ) in connection with its US agency bond business. SGAS responded to these requests and is cooperating with the DOJ investigation.
  - Societe Generale and certain of its subsidiaries are defendants in an action pending in the US Bankruptcy Court in Manhattan brought by the Trustee appointed for the liquidation of Bernard L. Madoff Investment Securities LLC (BLMIS). The action is similar to those brought by the BLMIS Trustee against numerous institutions and seeks recovery of amounts allegedly received by the Societe Generale entities indirectly from BLMIS through so-called "feeder funds" that were invested in BLMIS and from which the Societe Generale entities received redemptions. The suit alleges that the amounts that the Societe Generale entities received are avoidable and recoverable under the US Bankruptcy Code and New York state law. The BLMIS Trustee seeks to recover, in the aggregate, approximately USD 150 million from the Societe Generale entities. The Societe Generale entities are defending the action. In decisions dated 22 November 2016 and 3 October 2018, the Court rejected most of the claims brought by the BLMIS Trustee. The Trustee appealed to the US Court of Appeals for the Second Circuit. By order dated 25 February 2019, the Second Circuit vacated the judgements and remanded for further proceedings. On 1 June 2020, the United States Supreme Court denied Defendant-Appellees' petition for a writ of certiorari. The case is now before the Bankruptcy Court for further proceedings. The Societe Generale defendants filed a motion to dismiss on 29 April 2022. The motion was denied by order dated 7 October 2022. Discovery is proceeding.
  - On 10 July 2019, Societe Generale was named as a defendant in a litigation filed in the US District Court in Miami by plaintiffs seeking compensation under the Cuban Liberty and Democratic Solidarity (Libertad) Act of 1996 (known as the Helms-Burton Act) stemming from the expropriation by the Cuban government in 1960 of Banco Nunez in which they are alleged to have held an interest. Plaintiff claims damages from Societe Generale under the terms of this statute. Plaintiff filed an amended complaint on 24 September 2019 adding three other banks as defendants and adding several new factual allegations as to Societe Generale.

Societe Generale filed a motion to dismiss, which was fully briefed as of 10 January 2020. While the motion to dismiss was pending, plaintiffs filed an unopposed motion on 29 January 2020, to transfer the case to federal court in Manhattan, which the court granted on 30 January 2020. Plaintiffs filed a second amended complaint on 11 September 2020, in which it dropped the three other banks as defendants, added a different bank as an additional defendant, and added as additional plaintiffs who purport to be heirs of the founders of Banco Nunez. The court granted Societe Generale's motion to dismiss on 22 December 2021 but permitted plaintiffs to replead their claims. On 25 February 2022, plaintiffs filed an amended complaint, and on 11 April 2022, Societe Generale filed its motion to dismiss. By order entered 30 March 2023, the court granted Societe Generale's motion to dismiss. Plaintiffs have appealed.

- On 9 November 2020, Societe Generale was named as a defendant, together with another bank, in a similar Helms-Burton litigation filed in the US District Court in Manhattan (Pujol I) by the purported heirs of former owners, and personal representatives of estates of heirs or former owners, of Banco Pujol, a Cuban bank alleged to have been confiscated by the Cuban government in 1960. On 27 January 2021, Societe Generale filed a motion to dismiss. In response, as permitted by the judge's rules, plaintiffs chose to file an amended complaint and did so on 26 February 2021. Societe Generale filed a motion to dismiss the amended complaint on 19 March 2021, which was granted by the court on 24 November 2021. The court permitted plaintiffs to replead their claims. On 4 February 2022, plaintiffs filed an amended complaint, and on 14 March 2022, Societe Generale filed its motion to dismiss, which was granted by the court on 23 January 2023. Plaintiffs have appealed.

On 16 March 2021, Societe Generale was named as a defendant, together with another bank, in a nearly identical Helms-Burton litigation filed in the US District Court in Manhattan (Pujol II) by the personal representative of one of the purported heirs to Banco Pujol who is also a plaintiff in Pujol I. The case was stayed pending developments in Pujol I. At the parties' request, following dismissal of Pujol I, the court lifted the stay on Pujol II and entered an order dismissing the case for the same reasons it dismissed Pujol I. Plaintiff has appealed.

- In the context of the sale of its Polish subsidiary Euro Bank to Bank Millennium on 31 May 2019 and of the indemnity granted to the latter against certain risks, Societe Generale continues to monitor the evolution of court cases related to CHF-denominated or CHF-indexed loans issued by Euro Bank. The reserve in this matter in Societe Generale SA's accounts takes into consideration the increase in the number of court cases regarding the loans subject of the sale and the substance of the decisions handed down by Polish courts.

- Like other financial institutions, Societe Generale is subject to audits by the tax authorities regarding its securities lending/borrowing activities as well as equity and index derivatives activities. The 2017, 2018, 2019 and 2020 audited years are subject to notifications of proposals of tax adjustments in respect of the application of a withholding tax. These proposals are contested by the Group. Given the significance of the matter, on 30 March 2023, the French Banking Federation has brought proceedings against the tax administration's doctrine. In this respect, on 8 December 2023, the French *Conseil d'État* ruled that the tax authorities may not extend the dividend withholding tax beyond its statutory scope, except if taxpayers engaged in an abusive behavior (*abus de droit*), thereby characterising the tax administration's position based on the concept of beneficial owner as illegal. In addition, further to raids conducted by the "*parquet national financier*" at the end of March 2023 at the premises of five banks in Paris, among which Societe Generale, the latter has been informed that it was subject to a preliminary investigation pertaining to the same issue. Societe Generale is defending the action.
- On 19 August 2022, a Russian fertiliser company, EuroChem North West-2 ("EuroChem"), a wholly owned subsidiary of EuroChem AG, filed a claim against Societe Generale SA and its Milan branch ("Societe Generale") before English courts. This claim relates to five on-demand bonds that Societe Generale issued to EuroChem in connection with a construction project in Kingisepp, Russia. On 4 August 2022, EuroChem made demands under the guarantees. Societe Generale explained it was unable to honour the claims due to international sanctions directly impacting the transactions, an assessment which EuroChem disputes. Societe Generale filed its defence submissions on 1 November 2022, to which EuroChem replied on 19 December 2022. A case management conference ("CMC") was held on 26 September 2023, in the course of which the court set the procedural timetable. As of the date of this update, the Parties' disclosures are due by the end of April 2024 and the trial (if any) is expected to take place in June 2025.
- SG Americas Securities, LLC ("SGAS") received a request for information in December 2022 from the US Securities and Exchange Commission ("SEC") focused on compliance with record-keeping requirements in connection with business-related communications on messaging platforms that were not approved by the firm. On 28 March 2023, SGAS and Societe Generale received a similar request from the US Commodity Futures Trading Commission ("CFTC"). These inquiries follow a number of regulatory settlements in 2022 with other firms covering similar matters. SGAS reached a settlement with the SEC, announced on 8 August 2023, and agreed to pay a penalty of USD 35 million, take certain remedial actions, and engage an independent compliance consultant. Societe Generale and SGAS reached a settlement with the CFTC, also announced on 8 August 2023, and agreed to pay a penalty of USD 75 million and take certain remedial actions.

## 6.3 STATUTORY AUDITORS' REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS

*This is a translation into English of the statutory auditors' report on the consolidated financial statements issued in French and it is provided solely for the convenience of English-speaking users.*

*This statutory auditors' report includes information specifically required by European regulations and French law, such as information about the appointment of the statutory auditors or verification of the information concerning the Société Générale Group presented in the management report.*

*This report should be read in conjunction with, and construed in accordance with French law and professional auditing standards applicable in France.*

Year ended December 31, 2023

To the Annual General Meeting of Société Générale,

### Opinion

In compliance with the engagement entrusted to us by your Annual General Meeting, we have audited the accompanying consolidated financial statements of Société Générale for the year ended December 31, 2023.

In our opinion, the consolidated financial statements give a true and fair view of the results of operations of the Société Générale Group for the year then ended and of its financial position and of its assets and liabilities as at December 31, 2023 in accordance with International Financial Reporting Standards as adopted by the European Union.

The audit opinion expressed above is consistent with our report to the Audit and Internal Control Committee.

### Basis for opinion

#### AUDIT FRAMEWORK

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the "Statutory Auditors' Responsibilities for the Audit of the Consolidated Financial Statements" section of our report.

### INDEPENDENCE

We conducted our audit engagement in compliance with independence requirements of the French Commercial Code (*Code de commerce*) and the French Code of Ethics for statutory auditors (*Code de déontologie de la profession de commissaire aux comptes*) for the period from January 1, 2023 to the date of our report and specifically we did not provide any prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No. 537/2014.

### EMPHASIS OF MATTER

Without qualifying the above opinion, we draw your attention to paragraph 4 of Notes 1 "Main valuation and presentation rules for the consolidated financial statements" and 4.3 "Insurance activities" to the consolidated financial statements, which outline the impacts relating to the first-time application of IFRS 17 "Insurance contracts" and IFRS 9 "Financial instruments" by insurance sector subsidiaries.

### Justification of Assessments - Key Audit Matters

In accordance with the requirements of Articles L. 821-53 and R. 821-180 of the French Commercial Code relating to the justification of our assessments, we inform you of the key audit matters relating to risks of material misstatement that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period, as well as how we addressed those risks.

These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on specific items of the consolidated financial statements.

## ASSESSMENT OF THE IMPAIRMENT OF CUSTOMER LOANS

**Risk identified**

Customer loans and receivables carry a credit risk which exposes your Group to a potential loss if its client or counterparty is unable to meet its financial commitments. Your Group recognizes impairment to cover this risk.

Such impairment is calculated according to IFRS 9, "Financial instruments" and the expected credit loss principle.

The assessment of expected credit losses for customer loan portfolios requires the exercise of judgment by Management, particularly in the uncertain context due to the geopolitical and economic situation, notably to:

- prepare, in an uncertain environment, macro-economic projections which are embedded in the deterioration criteria and in the expected credit losses measurement;
- determine the loan classification criteria under stages 1, 2 or 3, taking account of the material increase in credit risk at loan portfolio level and the impact of measures to support the economy;
- estimate the amount of expected credit losses depending on the different stages;
- determine the adjustments to models and parameters, as well as the sector adjustments considered necessary to reflect the impact of economic scenarios on expected credit losses and anticipate the default or recovery cycle for certain sectors.

The information concerning in particular the procedures used to estimate and recognize expected credit losses are mainly described in Notes 3.5 "Loans, receivables and securities at amortized cost" and 3.8 "Impairment and provisions" to the consolidated financial statements.

As at December 31, 2023, total customer loan outstandings exposed to credit risk totaled M€ 485,449; impairment totaled M€ 10,070.

We consider the assessment of the impairment of customer loans to be a key audit matter as they require Management to exercise judgment and make estimates, particularly concerning the economic sectors and geographic areas most affected by the crisis.

**Our response**

Our work focused on the most significant loans and customer loan portfolios, as well as the most vulnerable economic sectors and geographical areas, in particular, loans linked to Russia and sectors weakened by inflation and rising interest rates.

After including credit risk modeling specialists in our audit team, our audit work notably consisted in:

- obtaining an understanding of your Group's governance and internal control system relating to credit risk assessment and the measurement of expected losses, and testing key manual and IT controls;
- examining the compliance of policies implemented by the Group and the methodologies broken down in the different business units with IFRS 9 "Financial instruments";
- assessing, with the help of economists from our firms, the relevance of the macro-economic projections and the scenario weightings applied by your Group;
- examining the main parameters adopted by your Group to classify the loans and assess impairment in stages 1, 2 and 3 as at December 31, 2023;
- assessing the ability of adjustments to models and parameters, as well as sector adjustments to provide adequate coverage of the level of credit risk in the context of the economic crisis;
- assessing, using data analysis tools, the valuation of expected credit losses for a sample of stage 1 and 2 loan portfolios;
- testing for a selection of the most significant loans to corporate clients, the main criteria used to classify loans in stage 3, as well as the assumptions underlying the estimation of the related individual impairment.

We also analyzed the disclosures in Notes 1.5 "Use of estimates and judgment", 3.5 "Loans, receivables and securities at amortized cost", 3.8 "Impairment and provisions" and 10.3 "Credit and counterparty risk" to the consolidated financial statements relating to credit risk and, in particular, the information required by IFRS 7, Financial instruments: Disclosures, on credit risk.

## RECOVERABILITY OF DEFERRED TAX ASSETS IN FRANCE

### Risk identified

As at December 31, 2023, deferred tax assets on loss carryforwards were recorded in the amount of M€ 1,832, including M€ 1,572 for the tax group in France.

As stated in Note 6 "Income taxes" to the consolidated financial statements, your Group calculates deferred taxes at the level of each tax entity and recognizes deferred tax assets when it is considered probable that the tax entity concerned will have future taxable profits against which temporary differences and tax loss carryforwards can be offset, within a given timeframe. As at December 31, 2023, this timeframe is eight years for the tax group in France.

In addition, as stated in Notes 6 "Income taxes" and 9 "Information on risks and litigation" to the consolidated financial statements, certain tax loss carryforwards are challenged by the French tax authorities and are therefore liable to be called into question.

Given the importance of the assumptions used to assess the recoverability of the deferred tax assets in France, notably on future taxable profits, and of the judgment exercised by Management in this respect, we considered this issue to be a key audit matter.

### Our response

Our audit approach consisted in assessing the probability that your Group will be able to use in the future its tax loss carryforwards generated to date, in particular with regard to its ability to generate future taxable profits in France.

After including tax experts in our audit team, our work notably consisted in:

- comparing the projected results of the previous years with the actual results of the corresponding fiscal years, to assess the reliability of the tax business plan preparation process;
- obtaining an understanding of the 2024 budget drawn up by Management and approved by the Board of Directors, as well as of the assumptions underlying projections for the 2024-2027 period, which take into account the expected impacts of operations known at the closing;
- assessing the relevance of tax profit extrapolation methods after the 2024-2027 period;
- reviewing the assumptions underlying sensitivity tests in the event of adverse scenarios defined by your Group;
- analyzing the sensitivity of the tax loss recovery period under a range of assumptions determined by us;
- analyzing the situation of your Group, notably by taking note of the opinions of its external tax advisers regarding its tax loss carryforwards in France, partly challenged by the tax authorities.

We have also examined the information provided by your Group concerning deferred tax assets disclosed in Notes 1.5 "Use of estimates and judgment", 6 "Income tax" and 9 "Information on risks and litigation" to the consolidated financial statements.

## PORTFOLIO-BASED INTEREST RATE RISK FAIR VALUE HEDGING OF OUTSTANDINGS OF THE RETAIL BANKING NETWORKS IN FRANCE

### Risk identified

To manage the interest rate risk generated by its retail banking activities in France in particular, your Group manages a portfolio of internal derivatives classified as hedges.

These internal transactions are classified as portfolio-based interest rate risk fair value hedging transactions ("macro-hedging") in accordance with IAS 39 as adopted in the European Union, as presented in Note 3.2 "Financial derivatives" to the consolidated financial statements.

Hedge accounting is only possible if certain criteria are met, in particular:

- designation and documentation at inception of the hedging relationship;
- eligibility of hedging and hedged instruments;
- demonstration of the hedge effectiveness;
- measurement of effectiveness;
- demonstration of the reversal of internal transactions at Group level.

The "macro-hedge" accounting of retail banking transactions in France requires Management to exercise judgment regarding in particular:

- the identification of eligible hedging and hedged items;
- determining the criteria adopted to schedule the outstandings' maturities by including behavioral criteria;
- the conduct of tests on over-hedging, the disappearance of hedged items, efficiency and the external reversal of hedging transactions entered into with internal Group counterparties.

As at December 31, 2023, the amount of hedged portfolio remeasurement differences was -M€ 443 in assets and -M€ 5,857 in liabilities. The fair value of the corresponding financial instruments is included under "Hedging derivative instruments" in assets and liabilities.

Given the documentation requirements for "macro-hedging" relationships, the volume of hedging derivative transactions and the use of Management judgment required, we consider the accounting treatment of portfolio-based interest rate risk fair value hedging of outstandings of the retail banking networks in France to be a key audit matter.

### Our response

Our audit procedures in response to the risk relating to the accounting treatment of portfolio-based interest rate risk fair value hedging of outstandings ("macro-hedging") consisted in obtaining an understanding of the procedures used to manage the structural interest rate risk, and reviewing the control environment set up by Management in particular for the documentation, identification and eligibility of hedged and hedging items, as well as for the performance of effectiveness tests.

After including financial modeling experts in our audit team, our work mainly consisted in:

- familiarizing ourselves with the accounting documentation of the hedging relationships;
- testing the eligibility of the financial assets and liabilities used by the Société Générale Group for the portfolio-based interest rate risk fair value hedge accounting, according to the terms and conditions defined by IAS 39 as adopted in the European Union;
- assessing the procedures used to prepare and control the criteria adopted to schedule the maturities of the hedged financial instruments, particularly with regard to the adopted maturities of the eligible financial liabilities;
- assessing the procedures used to determine the effectiveness of these hedging relationships, as well as the related governance;
- analyzing the market reversal system for hedges entered into with internal Group counterparties and the related documentation, and conducting tests on the matching of internal and external transactions;
- analyzing the results of tests on over-hedging, the disappearance of hedged items, efficiency and reversal required by applicable accounting standards.

We also assessed the information disclosed in Notes 1.5 "Use of estimates and judgment", 3.2 "Derivative financial instruments" and 3.4 "Fair value of financial instruments measured at fair value" and 10.5 "Structural interest rate and currency risks" to the consolidated financial statements and their compliance with IFRS 7 "Financial instruments: Disclosures" with regard to hedge accounting.

## VALUATION OF COMPLEX FINANCIAL INSTRUMENTS

### Risk identified

Within the scope of its market activities, your Group holds financial instruments for trading purposes. As at December 31, 2023, a total amount of M€ 305,200 is recognized in fair value levels 2 and 3 in assets and M€ 365,519 in liabilities on the Société Générale consolidated balance sheet, i.e. 51% and 93%, respectively, of financial assets and liabilities measured at fair value.

To determine the fair value of complex instruments, your Group uses techniques or in-house valuation models based on parameters and data, some of which are not observable in the market, which can defer the recognition of the margin for transactions in the income statement, as stated in point 7 of Note 3.4 "Fair value of financial instruments measured at fair value" to the consolidated financial statements. If necessary, these valuations include additional reserves or value adjustments.

The models and data used to value these instruments, and their classification under the fair value hierarchy, may be based for example on management's judgments and estimates, in the absence of available market data or a market valuation model.

Given the complexity of the modeling in determining the fair value, the multiplicity of models used, and the use of Management's judgment in determining these fair values, we consider the valuation of complex financial instruments to be a key audit matter.

### Our response

Our audit approach was based on a mixed approach using both tests on internal control processes relating to the valuation of complex financial instruments and substantive procedures.

After including financial instrument valuation specialists in our audit team, our procedures consisted in:

- obtaining an understanding of the procedure to authorize and validate new products and their valuation models, including the process for the entry of these models in the information systems;
- reviewing the governance of value adjustments and reserves;
- analyzing the valuation methodologies for certain categories of complex instruments and the related reserves or value adjustments;
- testing the key controls relating to the independent verification of the valuation parameters, and evaluating the reliability of the market parameters used to provide input for the valuation models with reference to external data;
- as regards the process used to explain the changes in fair value, obtaining an understanding of the bank's analysis principles and performing tests of controls on a sample basis;
- performing "analytical" IT procedures on the control data relating to certain activities;
- obtaining the quarterly results of the model independent validation process;
- obtaining the quarterly results of the valuation adjustment process based on external market data, and analyzing the differences in parameters with the market data in the event of a significant impact, and the accounting treatment of such differences. Where external data is absent, we assessed the existence of reserves or the non-materiality of the associated issues;
- performing counter-valuations of a selection of complex derivative financial instruments using our tools;
- analyzing the observability criteria, among others, used to determine the fair value hierarchy of such instruments, and to estimate deferred margin amounts and comparing the methods adopted by your Group to recognize these margins over time with the information presented in point 7 of Note 3.4 "Fair value of financial instruments measured at fair value" to the consolidated financial statements.

We also analyzed the compliance of the methods underlying the estimates with the principles described in Note 3.4 "Fair value of financial instruments measured at fair value" to the financial statements.

## IT RISK RELATING TO MARKET ACTIVITIES

### Risk identified

The Market Activities of the Global Banking & Investor Solutions division (GBIS) constitute an important activity, as illustrated by the significance of the financial instruments positions described in Note 3.4 "Fair value of financial instruments measured at fair value" to the consolidated financial statements.

This activity is highly complex given the nature of the financial instruments processed, the volume of transactions, and the use of numerous interfaced information systems. The risk of occurrence of a significant misstatement in the accounts related to an incident in the data processing chains used or the recording of transactions until their transfer into the accounting system may result from:

- changes made to management and financial information by unauthorized persons via the information systems or underlying databases;
- a failure in processing or in the transfer of data between systems;
- a service interruption or an operating incident which may or may not be related to internal or external fraud.

Furthermore, in a context of widespread home working, your Group is exposed to risks, relating to the opening up of information systems to allow remote access to transaction processing applications.

To ensure the reliability of the accounts, it is therefore essential for your Group to master the controls relating to the management of the information systems.

In this context, the IT risk relating to the Market Activities of the GBIS division constitutes a key audit matter.

### Our response

Our audit approach for this activity is based on the controls related to the management of the information systems set up by your Group. With the support of information system specialists included in the audit team, we tested the IT general controls of the applications that we considered to be key for this activity.

Our work mainly consisted in assessing:

- the controls set up by your Group on access rights, notably at sensitive periods in a professional career (recruitment, transfer, resignation, end of contract) with, where applicable, extended audit procedures in the event of ineffective control identified during the financial year;
- potential privileged access to applications and infrastructure;
- the management of changes made to applications, and more specifically the separation between development and business environments;
- security policies in general and their deployment in IT applications (for example, those related to passwords);
- the handling of IT incidents during the audit period;
- governance and the control environment on a sample of applications.

For these same applications, and in order to assess the transfer of information flows, we tested the key application controls relating to the automated interfaces between the systems.

In addition, our tests on the general IT and application controls were supplemented by data analytics procedures on certain IT applications.

We also evaluated the governance implemented by your Group to ensure the resilience of information systems faced with cyber risks. Our procedures consisted in discussions with the Société Générale Group's security teams and obtaining an understanding of the reports prepared by the cybersecurity committee meetings as well as any incidents during the year.

## ASSESSMENT OF THE LEGAL AND TAX RISK RELATING TO REGULATORY OR ARBITRATION PROCEEDINGS INVOLVING THE GROUP

### Risk identified

Your Group is a party to a number of legal or tax disputes and proceedings as indicated in Note 8.2.2 "Other provisions". Other provisions amounted to M€ 1,222 at December 31, 2023 and include provisions for litigation.

As indicated in Note 9 "Information on risks and disputes" to the consolidated financial statements, the situation and development of the various legal or administrative disputes and proceedings in progress are analyzed on a quarterly basis to assess the need to record provisions or adjust the amount of raised provisions.

Given the complexity of certain proceedings and the significant amount of management judgment in assessing the risks and financial repercussions for your Group, we consider the accounting treatment of disputes to be a key audit matter.

### Our response

After including tax experts in our audit team, our procedures consisted in:

- obtaining an understanding of the litigation provision assessment process set up by your Group to assess litigation provisions;
- conducting interviews with your Group's legal and tax departments and the functions affected by the ongoing proceedings to monitor the development of the main legal proceedings and ongoing investigations by legal and tax authorities and regulators;
- obtaining and analyzing available documentation such as: management's position and the memos of the Group's legal and tax advisors;
- requesting confirmation from the lawyers in charge of the most significant proceedings;
- assessing the reasonableness of the assumptions used to determine the need for and the amount of provisions raised, in particular on the basis of information gathered from your Group's external advisers involved in the relevant cases;
- assessing the suitability of the information provided in the notes to the consolidated financial statements.

**REASSESSMENT OF THE RESIDUAL VALUES OF VEHICLES LEASED BY YOUR GROUP****Risk identified**

Long-term rental fleet vehicles are depreciated on a straight-line basis as described in the "Operating lease assets" paragraph of Note 8.3 "Property, plant and equipment and intangible assets" to the consolidated financial statements. The depreciation period used is the lease term; the residual value corresponds to the estimated resale value of the vehicles on expiry of the lease. These residual values are determined for each vehicle at the beginning of the lease and are reviewed at least once annually. The methods of calculating these residual values are determined by the group.

The calculations are based on statistical data and are frequently reviewed to take into account changes in the market prices of used vehicles.

The residual value that is re-estimated during the fleet revaluation process may differ from the initial residual value. The difference, if any, represents a change in estimate and is amortized on a straight-line basis over the remaining lease term.

As of December 31, 2023, the total amount of depreciation determined for the fleet amounted to M€ 16,985, see table in Note 8.3 "Property, plant and equipment and intangible assets".

We consider the estimation of vehicle residual values to be a key audit matter since

- it results from a complex statistical approach;
- it incorporates assumptions and requires management judgment, particularly in the current context of the used vehicle market and uncertainties relating to the price of used electric vehicles, which represent a growing percentage of the fleet.

**Our response**

In response to this risk, we reviewed the residual value revaluation process set up by your Group. We analyzed the effectiveness of the key controls implemented by local and head office management, including those relating to the determination of assumptions and parameters that were used for this reassessment.

By integrating IT system experts into the team, we tested the general IT controls of the applications used in the fleet reassessment process.

Our work also consisted in:

- assessing the relevance of the statistical model adopted as well as the main parameters and assumptions used at the end of December 2023;
- conducting tests to ensure that data from the fleet management systems were correctly entered into the residual value calculation tool and testing key data security controls;
- comparing the data from the calculations with the amounts recorded in the accounts;
- checking, on a sampling basis, the accounting translation of changes in the estimation of residual values;
- checking that the estimates selected were based on documented methods that comply with the principles described in the notes to the consolidated financial statements.

## MEASUREMENT OF THE IMPACT OF THE FIRST-TIME APPLICATION OF IFRS 17 "INSURANCE CONTRACTS" ON OPENING BALANCES AND TECHNICAL PROVISIONS FOR RETIREMENT SAVINGS INSURANCE CONTRACTS

### Risk identified

The adoption of IFRS 17 "Insurance contracts" from January 1, 2023 gave rise to major changes in accounting policies and measurement rules for insurance contracts as well as financial statement presentation. It was adopted retrospectively as of January 1, 2022 for insurance contracts in effect on the transition date.

Note 1.4 to the consolidated financial statements presents in particular the required qualitative and quantitative information regarding the impact of IFRS 17 as well as the main accounting method choices applied to the transition. According to this note, the adoption of this new accounting standard increased consolidated equity by M€ 46 as of January 1, 2022 and generated an opening margin for contractual services in the pre-tax gross amount of M€ 8,386 as well as an adjustment for non-financial risks in the pre-tax gross amount of M€ 3,165.

Furthermore, as shown in table 4.3.F of Note 4.3 "Insurance activities" to the consolidated financial statements, your Group recognized as of December 31, 2023 liabilities relating to direct participating insurance contracts for M€ 138,976.

The application of IFRS 17 resulted in estimates requiring greater management judgment in choosing appropriate accounting and actuarial methods and determining key assumptions and criteria to reflect the most probable estimated future situation.

- On the transition date, this involved determining the transition approach applicable for each group of insurance contracts and the simplifying methodologies and assumptions used to calculate the opening margin for contractual services. In particular, its amount was mostly estimated using the modified retrospective approach for Savings and Retirement contracts, and on a case-by-case basis according to a full or modified retrospective approach for the scope of retirement benefits
- At the year-end, Savings and Retirement insurance contracts were measured using the Variable Fee Approach. As stated in Note 4.3 "Insurance activities" to the consolidated financial statements, this measurement accounting model draws on the following principles:
  - The best estimate of the discounted cash flows relating to the execution of contractual obligations for insured individuals determined using complex actuarial models involving data and assumptions relating to future periods, such as the determination of the discount rate, laws on the behavior of insured individuals and the future management decisions which may significantly affect the amount and schedule of future cash flows,
  - An adjustment for non-financial risks, intended to cover the uncertainty surrounding the amount and schedule of future cash flows as and when insurance contracts are fulfilled and whose level was estimated according to a level of confidence adopted by your Group taking into account risk diversification,
  - A contractual services margin representing the non-vested income that will be recognized as and when services are rendered and whose release to insurance revenue takes into account the difference between the actual return from underlying investments and the actuarial projection as a neutral risk.

The materiality of the changes in the measurement and recognition of insurance contract liabilities, the choice of accounting methods, the materiality of management's judgment to determine certain key valuation assumptions as well as the use of complex modeling techniques for retirement savings insurance contracts to assess the most probable estimated future situation led us to consider the impact of the first-time application of IFRS 17 on retirement savings insurance contract opening balances and liabilities to be a key audit matter.

### Our response

After including actuarial modeling specialists in our audit team, we conducted the following audit procedures:

- Obtaining an understanding of the procedure deployed by your Group to implement IFRS 17, particularly the processes defined by management to determine the impact of the adoption of IFRS 17 on the consolidated accounts as of January 1, 2022 as well as on the comparative financial statements for the year ended December 31, 2022;
- Measuring compliance with IFRS 17 for the first-time application of the actuarial principles and methodologies adopted for the opening balance sheet;
- Assessing the criteria and assumptions used in the transition methods applied to calculate the contractual services margin;
- Assessing the key methodologies and judgments used to define actuarial valuation models (mainly including those relating to the determination of the contractual services margin, the adjustment for non-financial risks and the key discount rate criteria adopted by management) with regard to IFRS 17;
- Performing tests, based on surveys and our risk assessment, on the key modeling data, assumptions and criteria and the adjustments made and used in calculating the opening balances and the comparative financial statements;
- Assessing the eligibility of "Retirement Savings" insurance contracts with the "variable fee" model and assessing the proper application by management of these Retirement Savings insurance contract valuation methods in accordance with IFRS 17;
- Performing work on the internal control environment of the information systems used to calculate the insurance assets and liabilities of the "Retirement Savings" activity;
- Assessing the new model governance process and testing the key controls in place;
- Testing, on a sampling basis, the main assumptions, data and criteria used to calculate the insurance assets and liabilities of the Retirement Savings activity and assessing the reasonableness of such estimates;
- Assessing the appropriateness of the disclosure in the notes to the consolidated financial statements relating to the transition to the new IFRS 17.

## Specific verifications

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by laws and regulations on the information presented in the Board of Directors' management report.

We have no matters to report as to its fair presentation and its consistency with the consolidated financial statements.

We attest that the consolidated non-financial performance statement required by Article L.225-102-1 of the French Commercial Code is included in Société Générale Group management report, it being specified that, in accordance with the provisions of Article L. 823-10 of said Code, we have verified neither the fair presentation nor the consistency with the consolidated financial statements of the information contained therein. This information should be reported on by an independent third party.

## Other Legal and Regulatory Verifications or Information

### FORMAT OF PRESENTATION OF THE CONSOLIDATED FINANCIAL STATEMENTS INCLUDED IN THE ANNUAL FINANCIAL REPORT

We have also verified, in accordance with the professional standard applicable in France relating to the procedures performed by the statutory auditor relating to the annual and consolidated financial statements presented in the European single electronic format, that the presentation of the consolidated financial statements included in the annual financial report mentioned in Article L. 451-1-2, I of the French Monetary and Financial Code (*Code monétaire et financier*), prepared under the responsibility of Chief Executive Officer, complies with the single electronic format defined in the European Delegated Regulation No. 2019/815 of December 17, 2018.

Based on the work we have performed, we conclude that the presentation of the consolidated financial statements included in the annual financial report complies, in all material respects, with the European single electronic format.

Due to the technical limits inherent to the macro-tagging of consolidated financial statements in accordance with the European single electronic format, it is possible that the content of certain tags in the notes to the consolidated financial statements are not presented in an identical manner to the accompanying consolidated financial statements.

### APPOINTMENT OF THE STATUTORY AUDITORS

We were appointed as statutory auditors of Société Générale by the Annual General Meeting held on April 18, 2003 for Deloitte & Associés and on May 22, 2012 for Ernst & Young et Autres.

As at December 31, 2023, Deloitte & Associés and Ernst & Young et Autres were in their twenty-first and twelfth year of total uninterrupted engagement, respectively.

Previously, Ernst & Young Audit was the statutory auditor of Société Générale from 2000 to 2011.

## Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards as adopted by the European Union, and for such internal control as Management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless it is expected to liquidate the Company or to cease operations.

The Audit and Internal Control Committee is responsible for monitoring the financial reporting process and the effectiveness of internal control and risks management systems and where applicable, its internal audit, regarding the accounting and financial reporting procedures.

The consolidated financial statements were approved by the Board of Directors.

## Statutory Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

### OBJECTIVE AND AUDIT APPROACH

Our role is to issue a report on the consolidated financial statements. Our objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As specified in Article L.821-55 of the French Commercial Code (*Code de commerce*), our statutory audit does not include assurance on the viability of the Company or the quality of management of the affairs of the Company.

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor exercises professional judgment throughout the audit and furthermore:

- identifies and assesses the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence considered to be sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control;

- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management in the consolidated financial statements;
- assesses the appropriateness of Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. This assessment is based on the audit evidence obtained up to the date of his audit report. However, future events or conditions may cause the Company to cease to continue as a going concern. If the statutory auditor concludes that a material uncertainty exists, there is a requirement to draw attention in the audit report to the related disclosures in the consolidated financial statements or, if such disclosures are not provided or inadequate, to modify the opinion expressed therein;
- evaluates the overall presentation of the consolidated financial statements and assesses whether these consolidated statements represent the underlying transactions and events in a manner that achieves fair presentation;
- obtains sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Société Générale Group to express an opinion on the consolidated financial statements. The statutory auditor is responsible for the direction, supervision and performance of the audit of the consolidated financial statements and for the opinion expressed on these consolidated financial statements.

## REPORT TO THE AUDIT AND INTERNAL CONTROL COMMITTEE

We submit to the Audit and Internal Control Committee a report which includes in particular a description of the scope of the audit and the audit program implemented, as well as the results of our audit. We also report, if any, significant deficiencies in internal control regarding the accounting and financial reporting procedures that we have identified.

Our report to the Audit and Internal Control Committee includes the risks of material misstatement that, in our professional judgment, were of most significance in the audit of the consolidated financial statements of the current period and which are therefore the key audit matters that we are required to describe in this report.

We also provide the Audit and Internal Control Committee with the declaration provided for in Article 6 of Regulation (EU) No. 537/2014, confirming our independence within the meaning of the rules applicable in France such as they are set in particular by Articles L. 821-27 to L. 821-34 of the French Commercial Code and in the French Code of Ethics for Statutory Auditors. Where appropriate, we discuss with the Audit and Internal Control Committee the risks that may reasonably be thought to bear on our independence, and the related safeguards.

(1) Including negotiable debt instruments.

(2) Including undated subordinated capital notes.

Prevailing uncertainty over inflation and monetary tightening exacerbated fears that developed economies would enter recession in 2023. However, the global economy proved resilient as energy and food prices normalised, supply chain pressures faded and household consumption held up. The US economy showed surprising vigour, beating expectations by recording 2.5% annual growth in 2023. The eurozone managed to dodge recession, but the economy put up a lacklustre performance with growth stagnating from the start of the year.

Central banks supported the economy and pursued their inflation-fighting policies. Both the Fed and the ECB lifted their key rates over the first three quarters. As inflation fell faster than expected in the fourth quarter, central banks held rates steady with no new rate hikes announced.

Societe Generale posted a solid performance and kept a tight rein on costs, risk and capital in a complex geopolitical and economic environment dogged by uncertainty.

At 31 December 2023, the balance sheet total stood at EUR 1,389 billion, up EUR 59 billion from the position at 31 December 2022.

The positive EUR 21.3 billion change in the Interbank and money market assets line was due in large part to the increase in central bank receivables for EUR 31.9 billion, of which EUR 30 billion from the French Central Bank (*Banque de France*) to meet regulatory requirements. Amounts due from banks declined to the tune of EUR 10.7 billion and were predominantly directed to Group subsidiaries.

Interbank and cash liabilities increased EUR 9.1 billion, driven in the main by higher issuance of euro medium-term notes (EMTN) debt securities for EUR 18.5 billion and lower borrowings from the *Banque de France*, in essence to repay a drawdown from the ECB's TLTRO support programme as a result of the central bank's key rate increases in 2023.

Loans to customers rose by EUR 10.1 billion. Stripping out the effect of the merger with *Crédit du Nord*, current accounts and cash credits fell. Mortgage loans were down EUR 8.8 billion on fewer loan approvals and an additional securitisation transaction for EUR 3.3 billion.

Client deposits increased by EUR 36.6 billion. Excluding the impact of the merger with *Crédit du Nord*, ordinary accounts payable declined by EUR 30.2 billion as clients switched their deposits to interest-bearing accounts. By contrast, term deposit accounts and regulated savings accounts increased by EUR 18.1 billion.

When rates are trending higher, securitised money market transactions offer more attractive liquidity conditions. Accordingly, securities purchased and sold under repurchase agreements rose by EUR 31 billion and EUR 26.8 billion, respectively. Other amounts due for securities increased EUR 18.9 billion. After their worst-ever year in 2022, bond markets rallied in 2023 to deliver sustained growth. Bonds and treasuries were up EUR 30.3 billion. By contrast, equity securities transactions contracted by EUR 3.6 billion and amounts payable for borrowed securities fell by EUR 10.6 million.

The decline in other bank assets, which are inherently volatile, on both the assets and liabilities side, stemmed from the valuation of derivatives and the fall in guarantee deposits paid and received on market transactions.

Societe Generale has a diversified range of funding sources and channels including:

- stable resources consisting of equity and subordinated debt (EUR 64 billion);
- customer deposits, up EUR 37 billion, which make up a significant share (34%) of total balance sheet resources;
- resources (EUR 222 billion) in the form of interbank deposits and borrowings;
- capital raised on the market through a proactive diversification policy, making use of various types of debt (secured and unsecured bonds, etc.), issuance vehicles (EMTNs, Certificates of Deposit), currencies and investor pools (EUR 141 billion);
- resources from securities sold under repurchase agreements to customers and banks (EUR 246 billion), which rose vs. 2022.

## INCOME STATEMENT ANALYSIS

(In EURm)	2023			2022			Changes 2023-2022 (%)		
	France	Outside France	Societe Generale	France	Outside France	Societe Generale	France	Outside France	Societe Generale

<b>Operating income before tax</b>	<b>2,469</b>	<b>928</b>	<b>3,397</b>	<b>(1,158)</b>	<b>816</b>	<b>(342)</b>	<b>n/s</b>	<b>14</b>	<b>n/s</b>
Income tax	372	(419)	(47)	390	(308)	82	(5)	36	(157)
<b>Net income attributable to ordinary shareholders</b>	<b>2,841</b>	<b>509</b>	<b>3,350</b>	<b>(768)</b>	<b>508</b>	<b>(260)</b>	<b>n/s</b>	<b>0</b>	<b>n/s</b>

In 2023, Societe Generale generated gross operating income of EUR 1 billion, down EUR 1.4 billion (or 59%) on 2022:

- **net banking income (NBI)** came to EUR 12.4 billion, down by a slight EUR 0.4 billion (-3%) compared to 2022:
  - **French Retail Banking's net banking income** grew by EUR 0.4 billion year-on-year, which can be attributed to the integration of Crédit du Nord's revenues since 1 January 2023.

In 2023, Retail Banking's revenues were dented by the impact of short-term hedging transactions executed before the period of interest rate hikes in 2022. Fee income adjusted for the perimeter effect contracted slightly relative to 2022.

- **income generated by Global Banking and Investor Solutions** continued to be solid, although it fell EUR 1.1 billion compared to the very robust activity in 2022:

- Equity and Equity Derivatives income fell 29% after an exceptional year in 2022,
- Fixed Income and Currencies rose 4% over the year, with good growth momentum amid rising rates and high volatility,
- Financing and Advisory income fell 48% from the record performance in 2022;
- **the Corporate Centre**, which includes management of the Group's investment portfolio, saw a EUR 0.3 billion increase in its net banking income year-on-year, essentially from a higher net interest margin and higher dividends received from subsidiaries, despite the fall in financial transaction income;

- **general operating expenses** increased EUR 1 billion (+10%) year-on-year:
  - **management overheads** came out at EUR 5.4 billion at 31 December 2023, an increase of EUR 0.4 billion (+7%) relative to 2022. The increase in this item in 2023 relates primarily to higher amortisation expenses on French Retail Banking's fixed assets (tied to the Crédit du Nord merger) for EUR 0.1 billion, as well as the reduction in internal re-invoicing income for EUR 0.3 billion, partially offset by the lower contribution to the Single Resolution Fund in the amount of EUR 0.2 billion,
  - **payroll expense** totalled EUR 6 billion, which is EUR 0.6 billion more (+12%) than in 2022. In 2023, payroll expenses included EUR 0.5 billion in costs for taking over the Crédit du Nord group's employees (fixed compensation and related social charges). Expenses relating to defined contribution pension plans increased EUR 0.1 billion;
- **the net cost of risk** totalled EUR 0.5 billion at 31 December 2022, a decrease of EUR 0.1 billion year-on-year, which can be attributed to a EUR 0.3 billion reduction in the charge of performing loans and offset by a EUR 0.2 billion rise in provisions for doubtful loans.

The combined effect of all these factors pushed down operating income by EUR 1.1 billion vs. 2022 to EUR 0.6 billion at 31 December 2023;

- **gains on fixed assets** came out at EUR 2.9 billion at 31 December 2023, an increase of EUR 5 billion, which stemmed from the recognition of a EUR 2.9 billion favourable merger variance after the tie-up between Societe Generale and Crédit du Nord's banking entities.

To recap, in 2022, Societe Generale posted a EUR 2.1 billion loss on fixed assets, primarily on the disposal of the Russian subsidiary Rosbank for EUR 1.8 billion and the EUR 0.3 billion impairment booked on the Societe Generale Securities Services SPA equity investment;

- **income tax** came to EUR -0.05 billion, reflecting the contrasted results posted between international subsidiaries and the result in France, excluding the favourable merger variance generated by the tie-up of banking entities belonging to the Crédit du Nord Group.

Net loss after tax was EUR 3.4 billion at end-2023 vs. a loss of EUR 0.3 billion at the 2022 year-end.

## TRADE PAYABLES PAYMENT SCHEDULE

(In EURm)	31.12.2023						31.12.2022					
	Payables not yet due						Payables not yet due					
	1-30 days	31-60 days	> 60 days	> 90 days	Payables due	Total	1-30 days	31-60 days	> 60 days	> 90 days	Payables due	Total
Trade Payables	30	67	-	-	-	97	41	90	-	-	-	131

The due dates are according to conditions calculated at 60 days from invoice date.

In France, Societe Generale's supplier invoices are for the most part processed centrally. The relevant department books and settles invoices for services requested by all Societe Generale France's Corporate and Business Divisions.

In accordance with the Group's internal control procedures, invoices are only paid after they have been approved by the departments that

signed for the services. Once approved, they are paid on average between three and seven days.

In accordance with Article D. 441-6 of the French Commercial Code, as worded pursuant to French Decree No. 2021-11 of 26 February 2021, the information on supplier payment times is given in the table below:

- the banking, insurance and financial services businesses (loans, financing and commissions) are excluded from the scope.

	31.12.2023					
	Payables due					Total (1 day and more)
	0 day (indicative)	1-30 days	31-60 days	61-90 days	91 days and more	
<b>(A) PAYMENT DELAY TRANCHES</b>

<input type="checkbox"/> Contractual payment terms						

## Payment terms on accounts receivable

The payment schedules for accounts receivable are set by contract in respect of financing granted or services invoiced. The initial payment terms set for loan repayments may be amended by means of contractual options (such as prepayment or payment deferral options). Compliance with contractual payment terms is monitored as part of the Bank's risk management process (see Chapter 4 of this URD: "Risks and Capital Adequacy"), particularly in respect of credit risk, structural

interest rate risk, and liquidity risk. The residual maturities of accounts receivable are indicated in Note 7.3 to the parent company financial statements.

The due dates are according to conditions calculated at 60 days from invoice date.

	31.12.2023					
	Receivables due					Total (1 day and more)
	0 day (indicative)	1-30 days	31-60 days	61-90 days	91 days and more

(1) Ownership in the French entities, in accordance with Article L. 233.6 of the French Commercial Code.

## 6.4.1 INFORMATION REQUIRED PURSUANT TO ARTICLE L. 511-4 OF THE FRENCH MONETARY AND FINANCIAL CODE RELATED TO SOCIETE GENERALE SA

As part of its long-established presence in the commodities markets, Societe Generale offers agricultural commodity derivatives. These products meet a range of customer needs, including the risk management needs of business customers (producers, consumers), and provide exposure to the commodities markets for investors (asset managers, funds and insurance companies).

Societe Generale's offering covers a broad range of underlyings, including sugar, cocoa, coffee, cotton, orange juice, corn, wheat, rapeseed, soybean, oats, cattle, lean hogs, milk and rice. Within this scope, Societe Generale offers vanilla products on organised markets and in index-based products. Exposure to agricultural commodities can be provided through a single-commodity product or through multi-commodity products. Multi-commodity products are primarily used by investor clients through index-based products.

Societe Generale manages the risks associated with these positions on organised markets, for example:

- NYSE LIFFE (including Euronext Paris) for cocoa, corn, wheat, rapeseed oil, sugar and coffee;
- ICE FUTURES US for cocoa, coffee, cotton, orange juice, sugar and wheat, le Canola;
- CME group for corn, soybean, soybean oil, soybean meal, wheat, oats, cattle, lean hogs, milk and rice;
- SGX for rubber.

This list is subject to change.

A number of measures are in place to prevent or detect any material impact on the price of agricultural commodities as a result of Societe Generale's activities described above:

- the trading activity is governed by the MiFID II regulatory framework in Europe, in force since 3 January 2018: it sets limits for positions on certain agricultural commodities, introduces the obligation to report on positions to the trading platform, as well as systematic reporting of all transactions to the appropriate regulatory body; the business also operates within internal limits, set by teams tracking risks independently of the operators;
- these teams constantly monitor compliance with these various limits;
- moreover, Societe Generale's trading activity on organised markets follows limits set by the Societe Generale clearing broker;
- to prevent any inappropriate behaviour, mandates and manuals setting out their scope are provided to Societe Generale traders;
- they also attend regular training on business standards and market conduct;
- daily controls are run to detect any inappropriate trading. These controls include monitoring compliance with the US Commodity Futures Trading Commission (CFTC) and market rules on position limits, designed to ensure that no operator can adopt a market position that poses a danger to market equilibrium.

## 6.4.2 DISCLOSURE ON DORMANT ACCOUNTS

All credit institutions are required to publish information on dormant bank accounts on an annual basis under Articles L. 312-19 and L.312-20 of the French Monetary and Financial Code, as introduced by French Act No. 2014-617 of 13 June 2014 on dormant bank accounts and unclaimed life insurance accounts. Also known as the Eckert Act, it entered into force on 1 January 2016.

In 2023, 25,719 dormant bank accounts were closed. The total amount deposited with the *Caisse des Dépôts et Consignations* was EUR 44,268,707.

Some 471,264 bank accounts were identified as dormant at the end of December 2023, representing an estimated total of EUR 837,222,933.

Information about fees paid to Statutory Auditors is disclosed in the notes to the consolidated financial statements of Societe Generale Group; consequently, this information is not provided in the notes to the parent company financial statements of Societe Generale.

## 6.6 NOTES TO THE PARENT COMPANY FINANCIAL STATEMENTS

The parent company financial statements were approved by the Board of Directors on 7 February 2024.

### NOTE 1 SIGNIFICANT ACCOUNTING PRINCIPLES

#### 1. Introduction

The preparation and presentation of the parent company financial statements for Societe Generale comply with the provisions of Regulation 2014-07 of the French Accounting Standards Board (*Autorité des Normes Comptables*, ANC), relating to the annual accounts for the banking sector.

As the financial statements of foreign branches were prepared using accounting principles generally accepted in their respective countries, they have been adjusted to comply with the accounting principles applicable in France.

The disclosures provided in the notes to the parent company financial statements focus on information that is both relevant and material to the financial statements of Societe Generale, its activities and the circumstances in which it conducted its operations over the period. This information focuses on significant events and transactions to understand the changes in circumstances and financial performance of Societe Generale during the financial year 2023, in particular the impact of the merger with Crédit du Nord and its subsidiaries as of 1 January 2023.

#### 2. Accounting policies and valuation methods

In accordance with the accounting principles applicable to French credit institutions, the majority of transactions are recorded using valuation methods that take account of the purpose for which they were completed.

In financial intermediation transactions, assets and liabilities are generally maintained at their historical cost and impairment is recognised where counterparty risk arises. Revenues and expenses arising from these transactions are recorded *prorata temporis* over the life of the transaction in accordance with the accounting cut-off principle. The same applies for transactions on forward financial instruments carried out for hedging purposes or to manage the Bank's overall interest rate risk.

Transactions performed in the Global Markets activity are generally marked to market at year-end, except for loans, borrowings and short-term investment securities which are recorded at nominal value. When these financial instruments are not quoted in an active market, the market value used is adjusted to take into account the liquidity risk, future management fees and, if any, the counterparty risk.

#### 3. Translation of foreign currency financial statement

The on- and off-balance sheet items of branches reporting in foreign currencies are translated at the official exchange rate prevailing at year-end. The income statement items of these branches are translated at the average quarter-end exchange rate. Translation gains and losses arising from the translation of the capital contribution, reserves, retained earnings and net income of foreign branches, which result from changes in exchange rates, are included in the balance sheet under "Accruals, other accounts payable/receivable and other liabilities/assets".

#### 4. Use of estimates and judgment

In compliance with the accounting principles and methods applicable to the preparation of the financial statements and stated in the notes to the present document, the Management makes assumptions and estimates that may have an impact on the figures recorded in the income statement, the valuation of assets and liabilities on the balance sheet, and the information disclosed in the notes to the parent company financial statements.

In order to make these assumptions and estimates, the Management uses the information available as at the date of preparation of the financial statements and can exercise its own judgment. By nature, valuations based on these estimates involve risks and uncertainties about their materialization in the future. Consequently, the actual future results may differ from these estimates and may then have a significant impact on the financial statements.

The assumptions and estimates made in preparing these annual financial statements take account of the uncertainties related to the economic consequences of geopolitics crisis and of the current macroeconomic context. The impacts of these events on the assumptions and estimates used are detailed in part 5 of the present note.

The use of estimates mainly concerns the following accounting topics:

- fair value in the balance sheet of financial instruments (securities portfolio and forward financial instruments) not quoted in an active market and held for trading activities (see Notes 2.1, 2.2 and 3.2);
- impairment of financial assets (see Note 2.6);
- provisions recognised as liabilities (see Notes 2.6, 4.2 and 5.2);
- deferred tax assets recognised in the balance sheet (see Note 5).

## CLIMATE RISK

Societe Generale continues its work to gradually integrate climate risk in the preparation of its statutory financial statements. Climate change-related risks are not a new risk category but rather an aggravating factor for categories already covered by the risk management system of Societe Generale. In this regard, the impact of transitional risk on the credit risk of the corporate customers of Societe Generale remains the primary climate risk for the Bank.

As at 31 December 2023, the determination of impairment and provisions for credit losses includes the possible impact of climate risks as taken into account in the assessment of individual risks and sectoral risks whenever it is compatible with the provisioning horizon. The impact of Societe Generale's commitments in favour of energy and environmental transition and the development of the territories are still taken into account in the budget trajectories used to assess the recoverability of the deferred tax assets.

## 5. Geopolitical crises and macroeconomic context

2023 was a year of cumulative uncertainties with, in particular, the continuing conflict in Ukraine but also tensions in the banking sector in the United States of America and Europe at the beginning of the year, as well as the situation in the Middle East at the end of the year. Monetary policies were clearly restrictive. Focusing on inflation control, central banks increased interest rates rapidly and significantly.

In the euro area:

- the slowdown in economic activity observed during the first half of 2023 continued and was accentuated during the second half of the year;
- inflation remained high in 2023; it is expected to drop down under 3% in 2024 and fall back to the target in the mid-term.

In the U.S.A., the economy performed better than expected by most forecasters. Warning signs point to a sharper slowdown already apparent towards the end of the year.

In this context, Societe Generale updated the macroeconomic scenarios chosen for the preparation of its statutory statements as at 31 December 2023. These macroeconomic scenarios are taken into account in the measurement models for credit risk impairment and provisions (see Note 2.6) and in tests regarding deferred tax assets recovery (see Note 5).

### MACROECONOMIC SCENARIOS AND WEIGHTING

As at 31 December 2023, Societe Generale has selected three macroeconomic scenarios to help understand the uncertainties related to the current macroeconomic context.

The assumptions selected to draw up the scenarios are listed below:

- the central scenario ("SG Central"), weighted at 62%, predicts a continued economic slowdown in the euro area in 2024, and only a modest rebound in 2025. A fall in inflation, down to 2.5% approximately, will be accompanied by an increase in unemployment rate. The ECB might lower its interest rates starting in Spring 2024, but would continue scaling down its balance sheet at least until 2025 (reducing its direct purchases on the market). In the U.S.A, in 2024, economic growth is expected to decelerate, interest rates will likely decrease, inflation should remain on a downward trend while the unemployment rate increases;
- the favourable scenario ("SG Favourable"), weighted at 10%, describes an accelerated economic growth compared to the trajectory projected in the central scenario; this growth may result from improved supply conditions owing to a positive shock on productivity or from unexpectedly improved demand conditions. In both cases, stronger growth will have a positive impact on employment and the profitability of companies;
- the stressed scenario ("SG Stress"), weighted at 28%, corresponds to a crisis situation leading to a negative deviation in GDP compared to the central scenario. This scenario may result from a financial crisis (2008 crisis, euro area crisis...), an exogenous crisis (Covid-19-like pandemic) or a combination of both.

These scenarios are developed by the Economic and Sector Research Department of Societe Generale based, in particular, on information published by statistical institutes.

Forecasts from institutions (IMF, Global Bank, ECB, OECD...) and the consensus among market economists serves as a reference to challenge Societe Generale's forecasts.

### COVID-19 CRISIS: STATE GUARANTEED LOANS (PGE)

Until 30 June 2022, Societe Generale offered to its crisis-impacted customers (professionals and corporate customers) the allocation of State Guaranteed Loan facilities (PGE) within the framework of the 2020 French Amending Finance Act and the conditions set by the French decree of 23 March 2020. These are financings granted at cost price and guaranteed by the government for a share of the borrowed amount between 70 to 90% depending on the size of the borrowing enterprise (with a waiting period of two months after disbursement at the end of which the guarantee period begins).

With a maximum amount corresponding, in the general case, to three months of turnover before tax, these loans came with a one-year repayment exemption. At the end of that year, the customer could either repay the loan or amortise it over one to five more years, with the possibility of extending the grace period for the repayment of principal for one year (in line with the announcements made by the French *Ministre de l'Économie, des Finances et de la Relance* on 14 January 2021) without extending the total duration of the loan.

The remuneration conditions of the guarantee have been set by the State and applied by all French banking institutions: the Bank keeps only a share of the guarantee premium paid by the borrower (the amount of which depends on the size of the Company and the maturity of the loan) remunerating the risk it bears, which corresponds to the part of the loan not guaranteed by the State (i.e., between 10% and 30% of the loan depending on the size of the borrowing company). A French decree published on 19 January 2022, amending the decree published on 23 March 2020, allows some companies to benefit, under certain conditions, from an extension of their PGE repayment deadlines from 6 to 10 years.

These State Guaranteed Loan facilities (PGE) have been recorded among Customer loans. The share of the guarantee premium received from the borrowers and kept by the Bank to compensate the share of risk not guaranteed by the French State is assimilated to interest income. It is spread and recognised over the effective lifetime of the loans in net income amongst Interest and similar income, along with the recording of the contractual interest.

At 31 December 2023, after the first repayments made in 2022 and in 2023 at the end of the moratorium period, the outstanding amount corresponding to the State Guaranteed Loans (PGE) granted by Societe Generale is approximately EUR 7.8 billion (including EUR 1.6 billion of underperforming loans and EUR 0.9 billion of doubtful loans). The State guarantee for these loans covers, on average, 90% of their amount. The amount of credit risk impairment and provisions recorded as at 31 December 2023 related to these State Guaranteed Loan facilities represents approximately EUR 171 million (including EUR 28 million of underperforming loans and EUR 124 million of doubtful loans).

### CONSEQUENCES OF THE WAR IN UKRAINE

Societe Generale holds assets on Russian counterparties (including the residual exposures on Rosbank) the volume of which dropped between 31 December 2022 and 31 December 2023 owing in particular to the disposal of assets but also to customer reimbursements completed without incident (EUR 0.8 billion against EUR 1.1 billion in 2022). As a result of an assessment of the changes in these credit exposures, Societe Generale has classified them from the very beginning of the conflict as “underperforming loans” or “doubtful loans” when necessary (see Note 2.6.2).

## 6. Merger of the retail banking network with Crédit du Nord and its subsidiaries

On 1 January 2023, Societe Generale achieved the legal merger of its two retail banking networks in France, Societe Generale and the Crédit du Nord group. SG is, from now on, the new retail bank of Societe Generale in France.

The legal merger was achieved in several stages:

- absorption by Crédit du Nord of its seven banking subsidiaries in France;

- merger of Crédit du Nord with Societe Generale SA;
- transfer of all the assets (French *Transmission Universelle de Patrimoine* (TUP) of Société de Banque de Monaco to Societe Generale SA.

During the first stage, Crédit du Nord recognised a merger bonus of EUR 544 million for the differences between the net assets absorbed and the book value of the derecognised interests (Banque Kolb, Banque Courtois, Banque Laydernier, Banque Nuger, Banque Rhône-Alpes, Banque Tarneaud), as well as a merger malus of EUR 397 million for the negative difference between the net assets absorbed and the book value of Société Marseillaise de Crédit. This amount is called a “technical malus” and has been allocated as follows:

- EUR 49 million to the revaluation of the buildings of Société Marseillaise de Crédit; and
- EUR 348 million to the recognition of a business goodwill.

After completion of this operation, the net book assets of Crédit du Nord used as a calculation basis for the merger bonus of the next stage increased by EUR 544 million.

During the second stage, Societe Generale SA recognised a merger bonus of EUR 2,848 million for the differences observed between the net assets absorbed and the book value of Crédit du Nord, after absorption of its seven subsidiaries. The amount of this merger bonus has been fully recognised under the “Net gains on other assets” of the financial year. Under the merger preferential treatment provided for in the provisions of Article 210 A of the French General Tax Code, this bonus is not taxable.

Lastly, during the transfer of all assets (TUP) of Société de Banque de Monaco, Societe Generale SA recognised a merger bonus of EUR 3.5 million.

After completion of these legal mergers, the total outstanding consumer loans from the Crédit du Nord group was transferred by Societe Generale SA to its Sogefinancement subsidiary. This transfer in kind was made in two stages (in March and in May 2023); it was paid for by the issuance of new shares through two capital increases of Sogefinancement amounting to EUR 1,429 million. In the financial statements of Societe Generale as at 31 December 2023, the sale of these outstanding loans amounts to a loss of EUR 71 million, recognised under “Net banking income”.

The impacts of these operations on the balance sheet and income statement items are shown in the tables below:

## BALANCE SHEET

The amounts which are negative in the “Effects of the merger” column result from the elimination of intra-group transactions between Societe Generale and Crédit du Nord which, after the merger, are considered in-house and thus derecognised from the balance sheet of Societe Generale.

## INCOME STATEMENT

The combined accounts below have been prepared in order to provide comparative information in respect of the main items of the income statement between the 2022 financial year and the 2023 financial year.

These combined accounts have been prepared on the basis of the Company financial statements published by Crédit du Nord and Societe Generale as at 31 December 2022.

The information shown below thus corresponds to the best possible estimate of the reconstitution, for the 2022 financial year, of the activities integrated at the time of the merger, taking into account the flows with Societe Generale SA. They have been adjusted for the main transactions between the two entities.

## 7. Acquisition of LeasePlan by ALD

The acquisition of 100% of LeasePlan by ALD, for which Societe Generale and ALD had signed two Memorandums of Understanding on 6 January 2022, was completed on 22 May 2023, following approval by the ALD Board of Directors and the relevant regulatory authorities.

As part of the financing of this acquisition, ALD completed in 2022 a EUR 1,212 million capital increase with shareholders' preferential subscription rights, subscribed for EUR 803 million by Societe Generale (66.26% of the capital increase). Societe Generale held 79.82% of ALD's share capital prior to this increase, and 75.94% after its completion on 31 December 2022, in accordance with its commitment to remain ALD's long-term majority shareholder.

In 2023, the cost of this acquisition, totalling EUR 4,897 million, was financed by ALD in cash and shares.

In this context, ALD carried out, in 2023, a capital increase in favour of LeasePlan shareholders. As a result, Societe Generale remains majority shareholder of the new combined entity, named Ayvens since 16 October 2023, with a controlling interest of 52.59%. This share may be reduced to 50.95% in case of exercise of the warrants attached to the shares ("ABSA" - *Actions à Bons de Souscription d'Actions*) attributed to LeasePlan shareholders to provide them with the means to increase their minority interest up to 32.91% of Ayvens' share capital.

## 8. Creation of a joint venture by Societe Generale and AllianceBernstein

On 6 February 2023, Societe Generale and AllianceBernstein signed a Memorandum of Understanding for the creation of a joint venture combining their cash equities and equity research businesses.

On the date of completion of the transaction, scheduled in the first half of 2024, the joint venture will be organised under two separate legal entities focusing on North America and Europe & Asia, respectively. Subject to the relevant regulatory approvals, some options might allow Societe Generale to eventually reach 100% ownership in both entities.

## 9. Event after the reporting period

### PLAN TO IMPLEMENT ORGANISATIONAL CHANGES IN SOCIETE GENERALE HEAD OFFICE IN FRANCE

On 5 February 2024, Societe Generale has announced a plan to implement organisational changes in its head office in France to simplify its operations and structurally improve its operational efficiency.

Several French head office entities are considering organisational changes that require specific social support measures. The objective is to group and pool certain activities and functions, remove hierarchical layers to streamline decision-making, and resize certain teams due to reviews of projects or processes.

This reorganisation project has been submitted for consultation with the staff representative bodies. Following the completion of the consultation scheduled for the second quarter of 2024, the implementation of these organisational changes would result in approximately 900 job cuts at head office without forced departures (i.e. approximately 5% of head office staff).

The cost of the social support measures that will be recorded as provision during the first quarter of 2024 is estimated to be around EUR 0.3 billion.

## NOTE 2 FINANCIAL INSTRUMENTS

### NOTE 2.1 Securities portfolio

#### ACCOUNTING PRINCIPLES

Securities are classified according to:

- their type: government securities (Treasury notes and similar securities), bonds and other debt securities (negotiable debt instruments, interbank securities), shares and other equity securities;
- the purpose for which they were acquired: trading, short-term and long-term investment, shares intended for portfolio activity, investments in non-consolidated subsidiaries and affiliates, and other long-term equity investments.

Purchases and sales of securities are recorded in the balance sheet at the date of settlement-delivery.

The classification and valuation rules applied for each portfolio category are as follows and the impairment rules applied are described in Note 2.6.5.

#### Trading Securities

Trading securities are securities acquired or incurred with the intention of selling or repurchasing them in the near term or held for the purpose of market-making activities. These securities are traded in active markets, and the available market price reflects actual and regularly occurring market transactions on an arm's length basis. Trading securities also include the securities covered by a sale commitment in the context of an arbitrage on a regulated market or similar, and the securities purchased or sold as part of the specialised management of a trading portfolio containing forward financial instruments, securities or other financial instruments that are managed together and for which there is evidence of a recent pattern of short-term profit-taking.

Trading securities are recognised in the balance sheet at acquisition price, excluding acquisition expenses.

They are marked to market at the end of the financial year.

The net unrealised gains or losses thus recognised, together with the net gains or losses on disposals, are recorded on the income statement under "Net income" from the trading portfolio, or, from short-term investment securities. The coupons received on the fixed-income securities in the trading portfolio are recorded on the income statement under "Net interest income" from bonds, or other debt securities.

The trading securities that are no longer held with the intention of selling them in the near term, or no longer held for the purpose of market-making activities, or held as part of the specialised management of a trading portfolio for which there is no longer evidence of a recent pattern of short-term profit-taking, may be reclassified into the Short-term investment securities category or into the Long-term investment securities category if:

- exceptional market situations generate a change in holding strategy; or
- if debt securities become no longer negotiable in an active market after their acquisition, and Societe Generale has the intention and ability to hold them for the foreseeable future or until maturity.

Securities which are then reclassified are recorded in their new category at their fair market value on the date of reclassification.

#### Long-Term Investment Securities

Long-term investment securities are debt securities acquired or reclassified from Trading securities and Short-term investment securities which Societe Generale intends and has the capacity to hold until maturity.

Societe Generale must therefore have, in particular, the necessary financing capacity to continue holding these securities until their expiry date. These long-term investment securities shall not be subject to any legal or other form of constraint that might call into question its intention to hold it until maturity.

Long-term investment securities also include trading and short-term investment securities which have been reclassified by Societe Generale following the particular conditions described here before (facing exceptional market situations or when debt securities are no longer negotiable in an active market). These reclassified securities are identified within the long-term investment securities portfolio.

Societe Generale may have to dispose of long-term investment securities or transfer them to another accounting category only in the specific following cases:

- the sale or transfer is made at a date close to the maturity of the security; or
- the sale or transfer is due to an isolated event independent of Societe Generale control.

These instruments may be designated as hedged items when forward financial instruments are used to hedge interest rate risk on identifiable items or groups of similar items.

Long-term investments securities are recorded in the balance sheet at their purchase cost excluding acquisition expenses.

### Affiliates, Investments in related parties and Other Long-Term Securities

This category of securities covers on the one hand affiliates and investments in related parties, when it is deemed useful to Societe Generale's business to hold said shares in the long term. This notably covers the investments that meet the following criteria:

- shares in fully integrated companies or issued by companies accounted for using the equity method;
- shares in companies that share Directors or senior managers with Societe Generale and where influence can be exercised over the company whose shares are held;
- shares in companies that belong to the same group controlled by individuals or legal entities, where the said persons or entities exercise control over the Group and ensure that decisions are taken in unison;
- shares representing more than 10% of the voting rights in the capital issued by a bank or a company whose business is directly linked to that of Societe Generale.

This category also includes the other long-term securities. These are equity investments made by Societe Generale with the aim of developing special professional relations with a company over the long term but without exercising any influence on its management due to the low proportion of attached voting rights.

Affiliates, investments in related parties and other long-term securities are recorded at their purchase price net of acquisition costs. Dividend income earned on these securities is recognised in the income statement under "Dividend income".

### Short-Term Investment Securities

Short-term investment securities are all the securities that are not classified as trading securities, long-term investment securities, or investments in consolidated subsidiaries and affiliates.

### SHARES AND OTHER EQUITY SECURITIES

Equity securities are initially recognised on the balance sheet at cost excluding acquisition expenses, or at contribution value. At year-end, cost is compared to realisable value. Only the unrealised losses are recorded with the recognition of a depreciation of the securities portfolio. Income from these securities is recorded in Dividend income.

### BONDS AND OTHER DEBT SECURITIES

These securities are initially recognised on the balance sheet at cost excluding the acquisition expenses, and excluding interest accrued not due at the date of purchase. The positive or negative differences between the cost and redemption values are recognised as premiums (if positive) or discounts (if negative) in the income statement over the life of the securities concerned and spread using the actuarial method. The accrued interest on bonds and other short-term investment securities is recorded as related receivables with a counterpart entry under "Interest and similar income" in the income statement.

Short-term investment securities may be reclassified into Long-term investment securities category provided that:

- exceptional market situations generate a change in holding strategy; or
- if after their acquisition debt securities become no longer negotiable in an active market and if Societe Generale has the intention and ability to hold them for the foreseeable future or until maturity.

<b>TOTAL</b>	<b>22,732</b>	<b>22,188</b>

All transactions with the related parties were concluded under normal market conditions.

On 1 January 2023, the merger of Crédit du Nord into Societe Generale Paris led to:

- the cancelation of shares of Crédit du Nord: EUR -1,410 million;
- the inclusion of shares held by Crédit du Nord in the category "Investments in related parties": EUR +475 million in net book value (o.w. Antarius for EUR +257 million, Société de Banque de Monaco for EUR +82 million, Etoile Capital for EUR +58 million and Starlease for EUR +55 million).

The merger was followed by:

- the asset contribution to Sogefinancement of the consumer loan portfolio recognised following the merger. The contributions were remunerated in shares by Sogefinancement *via* two capital increases leading to the increase in the share of Societe Generale in Sogefinancement's capital for EUR +1,430 million;

- the transfer of all the assets (*Tantmission Universelle de Patrimoine*) of Société de Banque de Monaco to the SG Monaco branch: EUR -82 million.

The other main changes are:

- the merger of Parel into Societe Generale Paris: EUR -61 million;
- the capital increase of Societe Generale Capital Canada Inc. with the restructuring of the Group's Canadian entities: EUR +135 million.

The main changes in the impairment are as follow:

- the impairment of SG Securities Singapore Pte Ltd.: EUR -15 million;
- the impairment recovery of Societe Generale Securities Services SPA (held by the SG Milan branch): EUR +51 million;
- the impairment recovery of SG Americas Inc.: EUR +32 million;
- the impairment recovery of Societe Generale Mauritania: EUR +20 million.

### NOTE 2.1.3 TREASURY STOCK

#### ACCOUNTING PRINCIPLES

Societe Generale's shares acquired for allocation to employees are recorded as Short-term investment securities and presented under "Treasury stock" on the assets side of the balance sheet.

Societe Generale's shares held with a view to underpinning the share price or as part of arbitrage transactions on the CAC 40 index are recorded as Trading securities and presented under "Treasury stock" on the assets side of the balance sheet.

Societe Generale's shares acquired with the intend to cancel them are recorded as Long-term equity investments and presented under "Treasury stock" on the assets side of the balance sheet.

(In EURm)	31.12.2023			31.12.2022

Reversal of impairment <sup>(2)</sup>	131	890
Subsidies granted to affiliates (subsidiaries)	-	-
Net income from long term investment (see Note 7.2)	2	14
<b>TOTAL</b>	<b>2,913</b>	<b>(2,079)</b>

(1) As at 31 December 2023, the main change is related to the merger of Crédit du Nord into Societe Generale Paris for EUR +2,848 million.

(2) Allocations and reversals mainly concern subsidiaries (See Note 2.1.2 - Investments in subsidiaries).

## NOTE 2.2 Transactions on forward financial instruments

### ACCOUNTING PRINCIPLES

Transactions on forward financial instruments on interest rates, foreign exchange rates or equities are used for trading or hedging purposes.

Nominal commitments on forward financial instruments are recorded as a separate off-balance sheet item. This amount represents the volume of current transactions and does not reflect the potential gain or loss associated with the market or counterparty risk on these transactions. Credit derivatives purchased to hedge credit risks on financial assets which are not valued at market value are classified and treated as guarantee commitments received.

The accounting treatment of income or expense on these forward financial instruments depends on the purpose of the transaction, as follows:

#### Hedging transactions

Income and expense on forward financial instruments used as hedge assigned from the beginning to an identifiable item or group of similar items are recognised in the income statement symmetrically to the income and expense on the hedged items. Income and expense on interest rate instruments are recorded as net interest income in the same interest income or expense account as the items hedged. Income and expense on other instruments such as equity instruments, stock market indexes or currencies are recognised under "Net income" from short-term investment securities.

Income and expense on forward financial instruments used to hedge or manage an overall interest rate risk are recognised in the income statement over the life of the instrument under "Net income" from the trading portfolio.

#### Market transactions

Market transactions include:

- the instruments traded on organised or similar markets and other instruments, such as credit derivatives and composite option products, which are included in the trading portfolio although they are traded over-the-counter on less liquid markets;
- some debt securities with a forward financial instrument component for which this classification in the accounts most appropriately reflects the results and associated risks.

These transactions are measured at their market value as at the closing date. When financial instruments are not quoted in an active market, this value is generally determined based on internal models. Where necessary, these valuations are adjusted for reasons of prudence by applying a discount (Reserve Policy). This discount is determined on the basis of the instruments concerned and the associated risks, and takes into account:

- a conservative valuation of all the instruments, regardless of the liquidity of the corresponding market;
- a reserve calculated based on the size of the exposure and intended to cover the risk that Societe Generale will be unable to liquidate the investment in one go due its size;
- an adjustment for the reduced liquidity of the instruments and for model risk in the case of complex products as well as transactions on less liquid markets (less liquid since they have been developed recently or are more specialised).

Furthermore, for over-the-counter transactions on forward interest rate instruments, these valuations also take into account counterparty risk and the present value of the future management fees.

The corresponding gains or losses are directly recognised as income or expense for the period, regardless of whether they are realised or unrealised. They are recognised in the income statement as Net income from the trading portfolio.

The gains or losses corresponding to the contracts concluded as part of the cash management activities managed by the trading room in order to benefit from any interest rate fluctuations, are recorded when these contracts are settled or *pro rata temporis* over the life of the contracts, depending on the type of instrument. Any unrealised losses are provisioned at year-end and the corresponding amounts are recorded under "Net income" from the trading portfolio.

## NOTE 2.3 Loans and receivables

### ACCOUNTING PRINCIPLES

Amounts due from banks and customer loans are classified according to their initial duration and type: demand deposits (current accounts and overnight transactions) and term deposits for credit institutions, commercial loans, overdrafts and other loans to customers. They also include the securities purchased from banks or customers under resale agreements, and the loans secured by notes and securities.

Only the amounts due and customer loans that meet the following criteria are offset on the balance sheet: those with the same counterparty, maturity, currency and accounting entity, and those for which an agreement exists with the counterparty allowing the Bank to combine the accounts and exercise the right of offset.

The interest accrued on these receivables is recorded as Related receivables and recognised in the income statement under “Interest income and expenses”.

The fees and commissions received and the incremental transaction costs related to the granting of a loan (finder’s and handling fees) are comparable to interest and spread over the effective life of the loan.

The loan commitments recorded on the off-balance sheet reflect transactions that have not yet resulted in cash flows, such as the irrevocable commitments for the undrawn portion of facilities made available to banks and customers or guarantees given on their behalf.

If a commitment bears a proven credit risk that makes it probable that Societe Generale will not recover all or part of the amounts due under the counterparty’s commitment in accordance with the original terms of the contract, the corresponding outstanding loan is classified as a doubtful loan, despite the existence of a guarantee. Moreover, any loan will be classified as doubtful if one or more repayments are more than three months overdue (six months for mortgage loans and nine months for loans to local authorities), or if, regardless of any missed payments, it can be assumed that there is a proven risk, or if legal proceedings have been started.

If a loan to a given debtor is classified as doubtful, all the outstanding loans and commitments to that debtor are reclassified as doubtful, regardless of whether or not they are backed by a guarantee.

Impairment for unrealised losses and for doubtful loans is recorded for the amount of probable loss (see Note 2.6).

### Restructuring of loans and receivables

When an asset recorded under “Due from banks” or “Customer loans” is restructured, contractual changes that would not have been considered in other circumstances are made to the amount, term or financial conditions of the initial transaction approved by Societe Generale, due to the financial difficulties or insolvency of the borrower (whether this insolvency is proven or will definitely occur unless the debt is restructured). The restructured financial assets are classified as impaired and the borrowers are considered to be in default.

These classifications are maintained for at least one year and for as long as some uncertainty remains for Societe Generale as to the borrowers’ ability to meet their commitments. At the restructuring date, the carrying amount of the restructured financial asset is decreased to the present amount of the estimated new future recoverable cash flows discounted using the initial effective interest rate. This loss is booked in the income statement under “Cost of risk”. The restructured financial assets do not include the loans and receivables subject to commercial renegotiations.

Loans and receivables may be subject to commercial renegotiations provided that the borrowing customer is not experiencing financial difficulties and is not insolvent. Such transactions thus involve customers whose debt Societe Generale is willing to renegotiate in the interest of maintaining or developing a commercial relationship, in accordance with the credit granting rules, and without relinquishing any principal or accrued interest.

These renegotiated loans and receivables are derecognised as at the renegotiation date and replaced as at the same date on the balance sheet by the new loans, contractualised under the renegotiated conditions. These new loans are subsequently measured at amortised cost, based on the effective interest rate arising from the new contractual conditions and taking into account the renegotiation fees billed to the customer.

Commitments granted are those granted to affiliates for EUR 84,803 million as at 31 December 2023 (EUR 85,489 million as at 31 December 2022).

### NOTE 2.3.4 SECURITISATION

#### ACCOUNTING PRINCIPLES

Loans and receivables transferred by Societe Generale to a securitisation undertaking (securitisation fund, securitisation vehicle or equivalent foreign undertaking) are derecognised and the gain or loss on sale calculated as the difference between the selling price and the carrying amount of the transferred loans or receivables is recognised in profit or loss.

If the transfer agreement contains an overcollateralisation clause, Societe Generale records on the assets side of its balance sheet, among the loans and receivables, a receivable for the part of the amount of transferred loans and receivables exceeding the selling price.

Ordinary units issued by a gaining securitisation undertaking and acquired or subscribed by Societe Generale are recorded as trading securities or as short-term investment securities according to their purpose.

Specific units, subordinated units and other financial instruments issued by the gaining securitisation undertaking and acquired or subscribed by Societe Generale as collateral for the benefit of the undertaking are recorded as short-term investment securities (see Note 2.1).

If Societe Generale makes a cash security deposit with the gaining securitisation undertaking to bear the losses resulting from the default of debtors of the loans and receivables transferred, it records such deposit on the assets side of its balance sheet under "Accruals"; other accounts receivable and other assets as a receivable from the securitisation undertaking, provided that the possible balance of the deposit will be allocated to it upon the liquidation of the securitisation undertaking.

If the guarantee granted by Societe Generale takes the form of a commitment by signature, it is recorded in the off-balance sheet as a guarantee commitment granted to customers or to banks, as the case may be.

On 24 February 2022, Societe Generale proceeded to a new securitization in order to substitute in the assets, housing loans against bonds which are eligible to the Euro system refinancing operations.

In this context, Societe Generale has transferred EUR 10,625 million of housing loans to a securitization mutual fund. To capitalize the acquisition, the fund has issued bonds which were fully subscribed by Societe Generale.

As at 27 January 2023, an additional purchase of bonds amounting to EUR 3,410 million has been performed.

As at 31 December 2023, the bonds are recognised in the assets on the balance sheet for a total amount of EUR 11,605 million as a result of the underlying housing loans partial amortization.

**NOTE 2.4 Debts****ACCOUNTING PRINCIPLES**

Amounts due to banks and customer deposits are classified according to their initial duration and type: demand debt (demand deposits, current accounts) and term deposits due to banks, regulated savings accounts and other deposits due to customers. They also include the securities sold to banks and customers under repurchase agreements.

The interest accrued on these deposits is recorded as related payables with a counterpart entry in the income statement.

**NOTE 2.4.1 DUE TO BANKS**

<i>(In EURm)</i>	<b>31.12.2023</b>	<b>31.12.2022</b>
<b>Demand deposits</b>	<b>26,541</b>	<b>24,327</b>
Demand deposits and current accounts	26,541	24,327
Borrowings secured by notes - overnight	-	-
<b>Term deposits</b>	<b>192,989</b>	<b>212,249</b>
Term deposits and borrowings	192,989	212,249
Borrowings secured by notes and securities	-	-
<b>Related payables</b>	<b>2,285</b>	<b>732</b>
Securities sold under repurchase agreements	113,860	103,440
<b>TOTAL</b>	<b>335,675</b>	<b>340,748</b>

Related parties payables amount to EUR 121,121 million as at 31 December 2023 (EUR 125,274 million as at 31 December 2022).

The European Central Bank (ECB) launched in 2019 a third series of Targeted Longer-Term Refinancing Operations – (TLTRO) with the aim of maintaining favourable credit conditions in the euro area. As with the two previous mechanisms, the level of remuneration of these borrowings depends on the performance of the borrowing banking institutions in granting credit facilities to their household customers (excl. real estate loans) and business customers (excl. financial institutions); depending on these performances, the borrowing institutions may benefit from a reduced interest rate and a temporary additional bonus applicable for the period from 24 June 2020 to 23 June 2021 (decrease by 50 basis points in the average interest rate of the deposit facility with a floor at -1%). These TLTRO III have been performed on a quarterly basis from September 2019 and December 2021, for a total of 10 potential draws. Each operation has a three-year term, with an early repayment option. Certain conditions have been modified in March 2020, in particular the loan production targets, interest rate conditions and drawdown limit, in order to further strengthen the support to credit granting at the time at the start of the Covid-19 crisis. In January 2021, the ECB decided to renew the temporary additional bonus for the period from 24 June 2021 to 23 June 2022 subject to the credit granting performance observed during a new reference period from 1 October 2020 to 31 December 2021.

Societe Generale subscribed to TLTRO III through quarterly drawdowns staggered between December 2019 and December 2021. As a result of the early repayments in the financial year 2023 amounting to EUR 28.7 billion, the residual amount of TLTRO loans on the liabilities side of the balance sheet amounted to EUR 24 billion at 31 December 2023, including EUR 4 billion provided by Crédit du Nord.

As at 31 December 2021, Societe Generale had already reached the objective of stability of the outstanding amount of eligible loans enabling it to benefit from the reduced interest rate as well as from two additional temporary bonuses applied respectively from 24 June 2020 to 23 June 2021 and from 24 June 2021 to 23 June 2022. The additional bonuses have been considered to determine the amount of interest recognised in the profit or loss for the TLTRO loans.

On 27 October 2022, the ECB modified the calculation method of the interest rate applying to the last period of TLTRO III. These new calculation procedures were applied as of 23 November 2022. As at 31 December 2023, the total cost of the TLTRO borrowings including interests and bonuses is between 1.40% and 3.10% depending on the draw dates. For the financial year 2023, the total amount of interests and bonuses on the TLTRO borrowings recorded as a deduction from Interest and similar expense amounts to EUR 1.2 billion.

Related parties due to customers amount EUR 125,533 million as at 31 December 2023 (EUR 137,465 million as at 31 December 2022).

## NOTE 2.4.3 LIABILITIES IN THE FORM OF SECURITIES ISSUED

**ACCOUNTING PRINCIPLES**

The liabilities in the form of securities issued are classified by type of security: loan notes, interbank market certificates and negotiable debt instruments, bonds and other debt securities, but exclude subordinated notes which are classified under "Subordinated debt".

The interest accrued is recorded as related payables with a counterpart entry in the income statement. Bond issuance and redemption premiums are amortised on a straight-line or actuarial basis over the life of the related borrowings. The resulting expense is recorded in the income statement under "Interest and similar expense".

Bond issuance costs accrued over the period are all recorded as expenses for the period under "Interest and similar expense" in the income statement.

Related parties commitments amount for EUR 8,042 million as at 31 December 2023 (EUR 10,517 million as at 31 December 2022).

**NOTE 2.5 Interest income and expenses****ACCOUNTING PRINCIPLES**

Interest income and expense are recognised in the income statement under “Interest and similar income” or “Interest and similar expense” for all the financial instruments measured at amortised cost using the effective interest rate method. The negative interest is deducted from the interest income and expense accounts related to these instruments.

The effective interest rate is the rate used to discount exactly the future cash inflows and outflows over the expected life of the instrument in order to establish the book value of the financial asset or liability. The calculation of this rate considers the future cash flows based on the contractual provisions of the financial instrument without taking account of possible future loan losses, and it also includes the commissions paid or received between the parties to the contract where they may be assimilated to interest, the directly linked transaction costs, and all types of premiums and discounts.

When a financial asset or group of similar financial assets has been impaired following an impairment loss, the subsequent interest income is recorded based on the effective interest rate used to discount the future cash flows when measuring the impairment loss.

Moreover, except for those related to employee benefits, the provisions recognised as balance sheet liabilities generate interest expenses that are calculated using the same interest rate used to discount the expected outflow of resources.

Other provisions on risks and expenses <sup>(1)</sup>	1,222	43	240	(530)	(8)	967
<b>TOTAL</b>	<b>10,205</b>	<b>514</b>	<b>3,384</b>	<b>(4,038)</b>	<b>(342)</b>	<b>9,723</b>

<sup>(1)</sup> Including provisions for legal disputes, fines, penalties and commercial disputes.

### NOTE 2.6.2 IMPAIRMENT AND PROVISIONS FOR CREDIT RISK

#### GEOPOLITICAL CRISIS AND MACROECONOMIC CONTEXT

In 2023, Societe Generale revised the parameters used in the models of determination of the impairment and provisions for credit risk, based on the updated macroeconomic scenarios which take account of the recent economic developments and macroeconomic impacts related to the current geopolitical environment (see Note 1). To account for the uncertainties related to the macroeconomic and geopolitical environment, Societe Générale updated the model and post-model adjustments in 2023.

Furthermore, owing to the geopolitical context related to the war in Ukraine, all Russian counterparties (EUR 1.1 billion as at 31 December 2022) have been classified as underperforming assets from the beginning of the conflict. As at 31 December 2023, they amount to EUR 0.8 billion. An additional analysis has also made it possible to identify within this population, and this has been the case since the beginning of the war in Ukraine, the outstanding amounts requiring a transfer to doubtful outstanding amounts (EUR 0.2 billion). The amount of provisions and impairments for credit risk on these outstanding amounts to EUR 131 million as at 31 December 2023, of which EUR 28 million on outstanding amounts transferred to doubtful loans (EUR 259 million as at 31 December 2022, of which EUR 73 million on outstanding amounts transferred to doubtful outstandings).

## ADJUSTMENTS SUPPLEMENTING THE APPLICATION OF MODELS

To better reflect the deterioration of credit risk on certain portfolios or business segments, Societe Generale has updated existing adjustments in addition to the application of the models, such as sector adjustments and adjustments when using simplified models.

Sectoral adjustments make it possible to better anticipate the default or recovery cycle of certain sectors whose activity is cyclical and which have been subject to default peaks in the past or which are particularly exposed to current crises and whose exposure to the Bank exceeds a threshold reviewed and set each year by the Risk Direction.

Along the revision of these adjustments, whenever compatible with the provisioning horizon, a qualitative analysis of the possible impact of climate risks on the determination of the impairment and provisions for credit risks has been integrated (see the “Incorporating the environment in the risk management framework” section of Chapter 4 in the Universal Registration Document).

As at 31 December 2023, the adjustment regarding the additional criterion for transfer to underperforming loans set in 2020 following the Covid-19 crisis, has been removed.

### NOTE 2.6.2.1 IMPAIRMENT FOR CREDIT RISK

#### ACCOUNTING PRINCIPLES

The value of impairment allowance for doubtful outstandings is equal to the difference between the gross carrying amount of the asset and the present value of the estimated future recoverable cash flows, taking into account any guarantees, discounted at the original effective interest rate. Furthermore, the amount of this impairment may not be less than the full amount of the interest not collected on the doubtful loan.

The effects of financial guarantees received to compensate losses on a portfolio of loans are recorded among assets impairment.

The impairment allowances, impairment reversals, losses on bad debts and recoveries of impaired debts are recognised under “Cost of risk”, along with write-backs of impairment linked to the passage of time.

Doubtful loans can be reclassified as performing loans once the proven credit risk has been definitively eliminated and regular payments have resumed according to the original terms of the contract. Similarly, the doubtful loans that have been restructured can be reclassified as performing loans. When a loan is restructured, any difference between the cash flows expected to be received under the initial terms of the contract and the present value of the future flows of capital and interest expected to be received under the new terms, is discounted at the original effective interest rate.

The amount deducted is recognised under “Cost of risk”. If the restructured loan is subsequently reclassified as a performing loan, this deduction is reincorporated into net interest income over the remaining term of the loan.

When a borrower’s solvency is such that after the loan has been classified as doubtful for a reasonable period, it is not foreseeable that it will be reclassified as a performing loan, this loan is identified as a non-performing loan. A loan is classified as non-performing once the Bank has formally demanded payment, or when the contract is terminated and in any case one year after it was classified as doubtful, except where the original terms of the contract have been respected or where the loan is covered by guarantees which ensure its recovery. Loans that have been restructured and for which the borrower has not respected the new conditions are also classified as non-performing.

(In EURm)	Amount as at 31.12.2022	Effect of the merger	Net cost of risk	Other income statement	Used Reversals	Change in scope and reclassifying	Amount as at 31.12.2023

(1) Of which impairment for non-performing loans: EUR 2,081 million.

**NOTE 2.6.2.2 PROVISIONS FOR CREDIT RISK****ACCOUNTING PRINCIPLES****Provisions for off-balance sheet commitments (provisions for commitments by signature)**

Provisions for off-balance sheet commitments represent the Societe Generale's probable losses incurred by Societe Generale following the identification of a proven credit risk on an off-balance sheet financing or guarantee commitment that would not be considered as a derivative instrument or designated as financial assets at fair value through profit or loss.

**Collective provisions for credit risk**

Without waiting for the incurred credit risk to individually affect one or more receivables or commitments and in order to provide a better information regarding its activity, a provision is recognised by Societe Generale for the amount of credit losses that are expected to incur on performing outstandings over the next year.

12-month expected credit losses are calculated taking into consideration past data and the current situation. Accordingly, the amount of impairment equals to the present value of the expected credit losses, taking into account the probability of a default event occurring within the next 12 months and if any, the impact of collateral called up or liable to be called up.

Moreover, identification, amongst homogeneous portfolios, of a significant deterioration of the credit risk leads to the recognition of a provision for the amount of credit losses that are expected to incur on those underperforming outstandings over the life of the exposures (lifetime expected credit loss).

Lifetime expected credit losses are calculated taking into consideration past data, the present situation and reasonable forecasts of changes in economic conditions and relevant macroeconomic factors through to maturity. Accordingly, the amount of impairment is equal to the present value of the expected credit losses, taking into account the probability of a default event occurring through to maturity, and, if need be, the impact of collateral called up or liable to be called up.

Changes in collective provisions for credit risk are recorded under "Cost of risk".

Comments related to the identification of the downgrading of credit risk:

To identify the exposures covered by the collective provision for credit risk, Societe Generale determines whether or not there is a significant increase in credit risk based on the available historical and prospective information (behaviour scoring, loan to value indicators, macroeconomic scenarios, etc.).

The assessment of changes in credit risk takes account of the following criteria:

- 1<sup>st</sup> criterion: changes in the counterparty's credit rating (where it is the subject of an internal analysis) as well as the changes in its operating sector, in macroeconomic conditions and in the behaviours of the counterparty that may be a sign of deteriorating credit risk;
- 2<sup>nd</sup> criterion: changes in the default probability contract by contract, from origination date to closing date;
- 3<sup>rd</sup> criterion: the existence of amounts past due of more than 30 days.

As soon as one of these criteria is met, the relative contract is impaired as described before.

(In EURm)	Amount as at 31.12.2022	Net cost of risk	Change in scope and reclassifying	Amount as at 31.12.2023
Provisions for off-balance sheet commitments to banks	7	(4)	-	3
Provisions for off-balance sheet commitments to customers	119	(25)	46	140

<b>TOTAL</b>	<b>1,864</b>	<b>(141)</b>	<b>295</b>	<b>2,018</b>

### NOTE 2.6.2.3 COST OF RISK

#### ACCOUNTING PRINCIPLES

Cost of risk includes allocations, net of reversals, to provisions and to impairment for credit risk, the bad debt losses and the amount of recoveries on loans written off.

(In EURm)	2023	2022
Net allocations to impairment and provisions for receivable and off-balance sheet commitments	(315)	(438)
Losses not covered and amounts of recoveries on loans written off	(166)	(161)
<b>TOTAL</b>	<b>(481)</b>	<b>(599)</b>
<i>of which gain on revaluation of currency hedge of provisions</i>	3	1

### NOTE 2.6.3 COMMITMENTS LINKED TO MORTGAGE SAVINGS AGREEMENTS/PLANS (CEL/PEL)

#### ACCOUNTING PRINCIPLES

*Comptes d'épargne-logement* (CEL or mortgage savings accounts) and *plans d'épargne-logement* (PEL or mortgage savings plans) are special savings schemes for individual customers under French Law 65-554 of 10<sup>th</sup> July 1965. These saving schemes combine an initial phase when deposits are made in specific interest-earning savings account, followed by a lending phase where the deposits are used to provide mortgage loans to the depositors, on regulated terms and conditions, both phases being inseparable. Both the savings deposits collected and the loans granted are recognised at amortised cost.

These instruments create two types of commitments for Societe Generale: the obligation to subsequently lend to the customer at an interest rate established at the inception of the savings agreement and the obligation to remunerate customer savings for an indeterminate future period at an interest rate also established at the inception of the mortgage savings agreement.

As if it is clear that commitments under the PEL/CEL agreements will have negative consequences for the Company: a provision is recorded on the liabilities side of the balance sheet. Any change in these provisions is recognised as net banking income under "Net interest income". These provisions only relate to commitments arising from PEL/CEL that are outstanding at the date of calculation.

Provisions are calculated for each generation of mortgage savings plans (PEL), with no netting between the different PEL generations, and for all mortgage saving accounts (CEL) which constitute a single generation.

During the deposits phase, the underlying commitment used to determine the amount to be provisioned is calculated as the difference between the average expected amount of deposits and the minimum expected amount. These two amounts are determined statistically on the basis of historical observed past customer behaviour.

During the lending phase, the underlying commitment to be provisioned includes loans already granted but not yet drawn at the date of calculation, and future loans that are considered statistically probable based on the amount of balance sheet deposits at the date of calculation on one side and on the historical observed past customer behaviour on the other.

A provision is recorded if the discounted value of the expected future earnings for a given generation of PEL/CEL is negative. Earnings are estimated based on the interest rates offered to individual customers for equivalent savings and loan instruments (with similar estimated life and date of inception).

**OUTSTANDING DEPOSITS IN MORTGAGE SAVINGS AGREEMENTS (PEL/CEL)**

<i>(In EURm)</i>	31.12.2023	31.12.2022
<b>Mortgage savings plans (PEL)</b>	<b>14,726</b>	<b>14,687</b>
Less than 4 years old	638	458
Between 4 and 10 years old	5,407	6,988
More than 10 years old	8,681	7,241
<b>Mortgage savings accounts (CEL)</b>	<b>1,542</b>	<b>1,248</b>
<b>TOTAL</b>	<b>16,268</b>	<b>15,935</b>

**OUTSTANDING HOUSING LOANS GRANTED WITH RESPECT TO MORTGAGE SAVINGS AGREEMENTS (PEL/CEL)**

<i>(In EURm)</i>	31.12.2023	31.12.2022
Less than 4 years old	3	-
Between 4 and 10 years old	-	1
More than 10 years old	3	4
<b>TOTAL</b>	<b>6</b>	<b>5</b>

**PROVISIONS FOR COMMITMENTS LINKED TO MORTGAGE SAVINGS AGREEMENTS (PEL/CEL)**

<i>(In EURm)</i>	31.12.2022	Allocations	Reversals	31.12.2023
<b>Mortgage savings plans (PEL)</b>	<b>73</b>	<b>8</b>	<b>(45)</b>	<b>36</b>
less than 4 years old	1	-	-	1
between 4 and 10 years old	2	8	-	10
more than 10 years old	70	-	(45)	25
<b>Mortgage savings accounts (CEL)</b>	<b>35</b>	<b>-</b>	<b>41</b>	<b>76</b>
<b>TOTAL</b>	<b>108</b>	<b>8</b>	<b>(4)</b>	<b>112</b>

The level of provisions is sensitive to the long-term interest rates. The provisions of PEL and CEL mortgage savings accounts are linked to the risks attached to the commitment to remunerate the deposits. Since the long-term rates were increasing during 2023, the provisioning of PEL/CEL decreased. The provisioning for PEL/CEL savings amounted to 0.7% of the total outstandings as at the 31 December 2023.

**METHODS USED TO ESTABLISH THE PARAMETERS FOR VALUING PROVISIONS**

The parameters used for estimating the future behaviour of customers are derived from historical observations of customer behaviour patterns over a long period (more than 10 years). The values of these parameters can be adjusted whenever changes are made to regulations that may undermine the effectiveness of past data as an indicator of future customer behaviour.

The values of the various market parameters used, notably interest rates and margins, are calculated on the basis of observable data and constitute a best estimate, at the date of valuation, of the future value of these items for the periods in question, in line with the Retail Banking Division's policy of interest rate risk management.

The discount rates used are derived from the zero coupon swaps vs. Euribor yield curve on valuation date, averaged over a 12-month period.

**NOTE 2.6.4 PROVISIONS FOR FORWARD FINANCIAL INSTRUMENTS****ACCOUNTING PRINCIPLES**

Provisions on forward financial instruments are related to the unrealised losses calculated on homogeneous sets of forward financial contracts recognised in the balance sheet as isolated open positions

They are determined as the difference between the market value estimated as at the balance sheet closing date and that determined as at the previous balance sheet closing date. They are recognised in the balance sheet as provisions for probable risks and expenses. The changes in provisions thus calculated are recorded in net income under "Net income" from the trading portfolio.

<i>(In EURm)</i>	Amount as at 31.12.2022	Net allocations	Reversals	Change in scope and reclassifying	Amount as at 31.12.2023
Provisions for forward financial instruments	5,282	1,594	(1,886)	(313)	4,677

**NOTE 2.6.5 IMPAIRMENT ON SECURITIES****ACCOUNTING PRINCIPLES****Short-term investment securities****SHARES AND OTHER EQUITY SECURITIES**

At year-end, cost is compared to realisable value. For listed securities, the realisable value is defined as the most recent market price. Unrealised capital gains are not recognised in the accounts but an impairment of portfolio securities is recorded to cover unrealised capital losses, without this impairment being offset against any unrealised capital gains.

**BONDS AND OTHER DEBT SECURITIES**

At year-end, cost is compared to realisable value or, in the case of listed securities, to their most recent market price. Unrealised capital gains are not recognised in the accounts but a impairment of portfolio securities is recorded to cover unrealised capital losses, after consideration of any gains made on any related hedging transactions.

Allocations to and reversals of impairment for losses on short-term investment securities together with gains and losses on sales of these securities are recorded under "Net income" from short-term investment securities in the income statement.

**Long-term investment securities**

At year-end, no impairment is made for unrealised losses, unless there is a strong probability that the securities will be sold in the short term, or unless there is a risk that the issuer will be unable to redeem them.

Allocations to and reversals of impairment for losses on long-term investment securities, together with gains and losses on sales of these securities, are recorded in the income statement under "Net income" from long-term investments.

**Affiliates, other long-term securities and investments in related parties**

At year-end, affiliates, other long-term securities and investments in related parties are valued at their value in use, namely the price the Company would accept to pay to obtain the said securities if it had to acquire them in view of its investment objective. This value is estimated on the basis of various criteria, such as shareholders' equity, profitability (based on the business plans defined by the entities), and the average share price over the last three months. Unrealised capital gains are not recognised in the accounts but an impairment on portfolio securities is recorded to cover unrealised capital losses. Allocations to and reversals of impairment as well as any capital gains or losses realised on the disposal of these securities, including any profit or loss generated when tendering these securities to public share exchange offers, are recognised under "Net income" from long-term investments.

<i>(In EURm)</i>	31.12.2023	31.12.2022
Short-term investment securities	507	607
Long-term investment securities	-	-
Affiliates and other long-term securities	119	105
Investments in related parties	3,050	3,142
<b>TOTAL</b>	<b>3,676</b>	<b>3,854</b>

**NOTE 2.6.6 OTHER PROVISIONS FOR RISKS AND EXPENSES****ACCOUNTING PRINCIPLES**

The other provisions for risks and expenses are defined as liabilities with no precisely defined amount or due date.

They are only recorded if the Company has an obligation to a third party that will probably or necessarily lead to a transfer of funds to this third party, without compensation for at least an equivalent amount being expected from it.

Net allocations to provisions are classified by type of risk in the corresponding sections of the income statement.

A description of the risks and disputes is provided in the Risk Management Report.

Information on the nature and the amount of the risks involved is not disclosed if Societe Generale estimates that such disclosure could seriously prejudice its position in a dispute with other parties on the subject matter of the provision.

Other provisions include provisions for restructuring (except staff costs), provisions for commercial litigation and provisions for future repayment of funds in connection with customer financing transactions.

Societe Generale is subject to an extensive legal and regulatory framework in the countries where it operates. In this complex legal context, Societe Generale and some of its former and current representatives may be involved in various legal actions, including civil, administrative and criminal proceedings. The vast majority of these proceedings are part of Societe Generale's current business. In recent years, litigation with investors and the number of disputes involving financial intermediaries such as banks and investment advisors has increased, partly due to a difficult financial environment.

It is by nature difficult to foresee the outcome of disputes, regulatory proceedings and acts involving Societe Generale entities, particularly if they are initiated by various categories of complainants, if the amount of claims for damages is not specified or is indeterminate or if the proceedings have no precedent.

In preparing its financial statements, Societe Generale assesses the consequences of the legal, regulatory or arbitration proceedings in which it is involved. A provision is booked when losses from these proceedings become probable and the amount can be estimated reliably.

To assess the probability of losses and the amount of these losses, and thus to determine the amount of provisions to book, estimations are important. Management makes these estimates by exercising its judgement and taking into account all information available when financial statements are prepared. In particular, Societe Generale takes into account the nature of the dispute, the underlying facts, ongoing proceedings and court rulings already handed down, as well as its experience and the experiences of other companies dealing with similar cases (assuming that Societe Generale has knowledge thereof) and, where appropriate, the opinion and reports of experts and independent legal advisers.

Each quarter, Societe Generale carries out a detailed examination of pending disputes that present a significant risk. These disputes are described in the Note 8 "Information on risks and litigation".

## NOTE 3 OTHER ACTIVITIES

### NOTE 3.1 Net fees for services

#### ACCOUNTING PRINCIPLES

Societe Generale recognises fee income and expense for services provided and received in different ways depending on the type of service.

Fees for ongoing services, such as some payment services, custody fees, or web-service subscriptions are recorded as income over the lifetime of the service. Fees for one-off services, such as fees on movements of fund, finder's fees received, arbitrage fees, or non-payment penalties are fully recognised in income when the service is provided.

In syndication deals, the effective interest rate for the portion of the funding retained on the asset side of the Societe Generale balance sheet is comparable to that applying to the other members of the syndicate including, when needed, a share of the underwriting fees and participation fees; the balance of these fees is recorded in the income statement at the end of the syndication period. Arrangement fees are recorded in income when the placement is legally complete.

(1) Including relent securities for EUR 31,465 million as at 31 December 2023 (EUR 39,358 million as at 31 December 2022).

## NOTE 4 EXPENSES AND EMPLOYEE BENEFITS

### NOTE 4.1 Personnel expenses and remuneration of members of the Board of Directors and Chief Executive Officers

#### ACCOUNTING PRINCIPLES

The Personnel expenses include all expenses related to the staff, notably the cost of the legal employee profit-sharing as well as the cost of internal restructuring plans.

Short-term employee benefits are recorded under "Personnel expenses" during the period according to the services provided by the employee.

The accounting principles relating to post-employment benefits and other long-term benefits are described in Note 4.2; those related to share-based payments are described in Note 4.3.

#### NOTE 4.1.1 PERSONNEL EXPENSES

(In EURm)	2023	2022
Employee compensation	4,020	3,616
Social security benefits and payroll taxes	1,772	1,522
Employer contribution, profit sharing and incentives	227	222
<b>TOTAL</b>	<b>6,019</b>	<b>5,360</b>
<b>Average staff</b>	<b>49,592</b>	<b>42,450</b>
In France	45,302	38,107
Outside France	4,290	4,343

A provision of 12 million euros was recorded to take into account, in France, the judgments of the Court of Cassation regarding the acquisition of rights to paid leave in the event of absence due to illness; this provision was calculated with three-year retroactivity.

In France, the Group has taken into account the effects of the Amending Social Security Financing Act of 14 April 2023 to assess its employee retirement obligations (impact of EUR 13 million under "Other general operating expenses").

Analysis of employer contribution, profit sharing and incentives for the last five years:

(In EURm)	2023	2022	2021	2020	2019
<b>Societe Generale</b>	<b>225</b>	<b>220</b>	<b>219</b>	<b>71</b>	<b>168</b>
Profit sharing	4	12	15	6	11
Incentives	146	144	163	22	99
Employer contribution	75	64	41	43	58
<b>Branches</b>	<b>2</b>	<b>2</b>	-	-	-
<b>TOTAL</b>	<b>227</b>	<b>222</b>	<b>219</b>	<b>71</b>	<b>168</b>

#### NOTE 4.1.2 REMUNERATION OF MEMBERS OF THE BOARD OF DIRECTORS AND CHIEF EXECUTIVE OFFICERS

Total attendance fees paid in 2023 to the Company's Directors amounted to EUR 1.7 million. The remuneration paid in 2023 to the senior management (Chairman of the Board, the Chief Executive Officer and his Deputies) amounted to EUR 8.8 million (including

EUR 3.6 million of variable pay paid in cash or in shares for 2016, and 2018 to 2021 fiscal years and EUR 0.44 million of long-term incentives paid in cash or in shares for 2017, 2019, 2020, 2021 and 2022 fiscal years).

**NOTE 4.2 Employee benefits****ACCOUNTING PRINCIPLES**

Employee benefits are divided into four categories:

- short-term employee benefits are employee benefits (other than termination benefits) that are expected to be settled within twelve months of the end of the annual reporting period in which the employees render the related service, such as fixed and variable compensation, annual leave, taxes and social security contributions, mandatory employer contributions and profit-sharing;
- post-employment benefits, including defined contributions plans and defined benefit plans such as pension plans and retirement benefits;
- other long-term employee benefits are employee benefits that are not expected to be fully settled within twelve months, such as deferred variable compensation paid in cash and not indexed, long service awards and time saving accounts;
- termination benefits.

**DETAIL OF PROVISIONS FOR EMPLOYEE BENEFITS**

<i>(In EURm)</i>	<b>Amount 31.12.2022</b>	<b>Effects of the merger</b>	<b>Net allowances</b>	<b>Used Reversals</b>	<b>Change at scope</b>	<b>Amount at 31 December 2023</b>
Post-employment benefits	841	46	96	(82)	7	908
Other long-term benefits	728	34	96	(1)	(2)	855
Termination benefits	148	46	65	(96)	13	176
<b>TOTAL</b>	<b>1,717</b>	<b>126</b>	<b>257</b>	<b>(179)</b>	<b>18</b>	<b>1,939</b>

**ACCOUNTING PRINCIPLES**

Pension plans may be defined contribution or defined benefit plans.

**Defined contribution plans**

Defined contribution plans limit the liability of Societe Generale to contributions paid into the plan but do not commit the bank to a specific level of future benefits. The contributions paid are recorded as an expense for the current year.

**Defined benefit plans**

Defined benefit plans commit Societe Generale, either formally or constructively, to pay a certain amount or level of future benefits and therefore bear the medium- or long-term risk. The present value of defined benefit obligations is valued by independent qualified actuaries.

Provisions are recognised on the liability side of the balance sheet under "Provisions" to cover all of these retirement obligations. They are regularly assessed by independent actuaries using the projected unit credit method. This valuation technique incorporates assumptions about demographics, early retirement, salary rises and discount and inflation rates.

Societe Generale can choose to finance defined benefit plans by assets held in a long-term employee benefit fund or by qualifying insurance policies.

Funding assets are classified as plan assets if these assets are held by an entity (a fund) that is legally separate from the reporting entity and are only intended to pay employee benefits.

When these plans are financed from external funds classified as plan assets, the fair value of these funds is subtracted from the provision to cover the benefit obligations.

When these plans are financed from funds not classified as plan assets, these funds, classified as separate assets, are displayed separately on the asset side of the balance sheet.

Differences arising from changes in calculation assumptions (early retirements, discount rates, etc.) or differences between actuarial assumptions and real performance (return on plan assets) are recognised as actuarial gains or losses. They are recorded immediately and in full in the income statement.

Where a new or amended plan comes into force the cost of past services is recorded immediately and in full in the income statement.

An annual expense is recorded under “Personnel expenses” for defined benefit plans, consisting of:

- the additional entitlements vested by each employee (current service cost);
- the financial expense resulting from the discount rate;
- the expected return on plan assets (gross return);
- the actuarial gains and losses and past service cost;
- the settlement or curtailment of plans.

#### Other long-term benefits

Other long-term employee benefits are those that are payable to employees for services rendered during their employment, but which are not expected to be settled wholly before twelve months after the end of the annual reporting period in which the employees render the related service. Other long-term benefits are measured in the same way as post-employment benefits.

#### NOTE 4.2.1 DEFINED CONTRIBUTION PLANS

Main defined contribution plans provided to employees of Societe Generale are located in France. They include state pension plans and other national pension plan such as AGIRC-ARRCO, as well as pension

schemes put in place by some branches of the Societe Generale for which the only commitment is to pay annual contributions (PERCO).

#### NOTE 4.2.2 POST-EMPLOYMENT BENEFIT PLANS (DEFINED BENEFIT PLANS)

Pension plans include pension benefit as annuities and end of career payments. Pension benefit annuities are paid in addition to pensions state plans.

In France, since 4 July 2019, date of publication of the ordinance ending the so-called “random rights” defined benefit pension plans in application of the *Loi Pacte*, the supplementary pension plan for executive managers, set up in 1991, is closed to new employees and the rights of beneficiaries were frozen on 31 December 2019.

### RECONCILIATION OF ASSETS AND LIABILITIES RECORDED IN THE BALANCE SHEET

<i>(En M EUR)</i>	<b>31.12.2023</b>	<b>31.12.2022</b>
A – Present value of defined benefit obligations	1,796	1,705
B – Fair value of plan assets	924	893
C – Fair value of separate assets	1,076	903
D – Change in assets ceiling	-	-
E – Unrecognised items	-	-
<b>A - B - C + D - E = Net balance</b>	<b>(204)</b>	<b>(91)</b>
On the liabilities side of the balance sheet	907	841
On the asset side of the balance sheet <sup>(1)</sup>	(1,111)	(932)

(1) This item includes excess in plan assets for EUR 35 million and separate assets for EUR 1,076 million as at 31 December 2023 against EUR 29 million and EUR 903 million as at 31 December 2022.

**NOTE 4.2.3 INFORMATION REGARDING PLAN ASSETS**

Funding assets include plan assets and separate assets.

The breakdown of the fair value of plan assets is as follows: 78% bonds, 10% equities and 12% other investments. Societe Generale's own financial instruments directly held are not significant.

Excess in funding assets amounted to EUR 333 million.

Employer contributions to be paid to post-employment defined benefit plans for 2024 are estimated at EUR 3.1 million.

**MAIN ASSUMPTIONS DETAILED BY GEOGRAPHICAL AREA**

<i>(In percentage)</i>	<b>31.12.2023</b>	<b>31.12.2022</b>
<b>Discount rate</b>		
France	3.15%	3.61%
United Kingdom	4.52%	4.80%
Other	3.85%	4.31%
<b>Long-term inflation</b>		
France	2.20%	2.45%
United Kingdom	3.10%	3.30%
Other	2.02%	2.07%
<b>Future salary increase net of inflation</b>		
France	1.93%	1.60%
United Kingdom	N/A	N/A
Other	1.15%	0.60%
<b>Average remaining working lifetime of employees <i>(in years)</i></b>		
France	7.26	7.09
United Kingdom	2.36	2.93
Other	7.51	7.90
<b>Duration <i>(in years)</i></b>		
France	11.64	11.70
United Kingdom	12.11	12.74
Other	12.58	13.52

The assumptions by geographical area are averages weighted by the present value of the Defined Benefit Obligation (DBO) with the exception of the expected returns on plan assets, which are averages weighted by the fair value of assets.

The yield curves used to discount the liabilities are corporate AA yield curves (source: Merrill Lynch) observed in the end of October for USD, GBP and EUR, and corrected at the end of December if the variation in discount rates had a significant impact.

Inflation rates used for EUR and GBP monetary areas are market rates observed in the end of October and corrected at the end of December if the variation had a significant impact. Inflation rates used for the other monetary areas are the long-term targets of the central banks.

The average remaining working lifetime of employees is calculated taking into account turn over assumptions.

The assumptions described above have been applied on post-employment benefit plans.

**NOTE 4.3 Free share plans****ACCOUNTING PRINCIPLES**

In the case of share purchase options and free shares plans granted to employees without issuance of new shares, a provision must be recorded for the loss that the entity expects to incur when it will deliver treasury shares to the employees.

This provision is recorded under “Personnel expenses” for an amount equal to the difference:

- between the closing market price of the treasury shares and the exercise price (zero in the case of free shares) if the entity has not already purchased its treasury shares in order to give them to the employees;
- between the acquisition cost of the treasury shares already held and the exercise price (zero in the case of free shares) if the entity has already purchased the treasury shares in order to be allocated to employees.

If vesting conditions such as service or performance conditions must be satisfied for Societe Generale employees to become entitled to shares, the expense shall be accounted for the services as they are rendered by the employees during the vesting period.

In the case of stock option plans, no expense shall be recorded for the treasury shares to be issued.

**NOTE 4.3.1 MAIN TERMS OF THE FREE SHARE PLANS OF THE YEAR**

The plans for employees for the year ended 31 December 2023 are briefly described below:

Issuer	Societe Generale
Year of grant	2023
Type of plan	Performance shares
Number of free shares granted	3,110,116
Shares delivered	445
Shares forfeited as at 31.12.2023	37,309
Shares outstanding as at 31.12.2023	3,072,362
Number of shares reserved as at 31.12.2023	3,072,362

The performance conditions are described in the “Corporate Governance” section of the present document.

**NOTE 4.3.2 AMOUNT OF THE DEBT RECORDED IN THE BALANCE SHEET AND THE EXPENSE OF THE YEAR**

The amount of the debt recorded in the balance sheet for on-going plans is EUR 171 million as at 31 December 2023, and yearly expense is EUR 61 million.

**NOTE 4.3.3 INFORMATION RELATED TO TREASURY SHARES FOR 2023 PLANS**

The number of treasury shares acquired in relation to the 2022 plans is 1,724,707 for a cost of EUR 45 million.

Plans 2023 were partially covered during the year. At the end of December 2023, 553,611 treasury shares were acquired out of a total of 3,518,416 treasury shares.

## NOTE 5 TAXES

### ACCOUNTING PRINCIPLES

#### Current taxes

In the financial year 1989, Societe Generale opted to apply a tax consolidation regime. As at 31 December 2023, 190 subsidiaries had signed a tax consolidation agreement with Societe Generale.

Each of the integrated companies shall record in its accounts the tax debt to Societe Generale, determined in accordance with the application of the tax consolidation agreement.

#### Deferred taxes

Societe Generale applies the option allowing it to recognise deferred taxes in its annual financial statements.

Deferred taxes are recognised whenever Societe Generale identifies a temporary difference between the book value and tax value of balance sheet assets and liabilities. They are calculated using the liability method, whereby the deferred taxes from previous years are adjusted to account for a change in tax rates. The impact of such change is recorded in the income statement under deferred taxes. Net deferred tax assets are recorded only if the entity concerned is likely to recover these assets within a set timeframe.

Deferred taxes are determined separately for each taxable entity (parent company and foreign branches) and are never discounted to present value.

### NOTE 5.1 Income tax

<i>(In EURm)</i>	<b>2023</b>	<b>2022</b>
Current taxes	(60)	224
Deferred taxes	13	(142)
<b>TOTAL</b>	<b>(47)</b>	<b>82</b>

In compliance with the French tax provisions that define the ordinary corporate tax rate, the latter is set to 25% in 2023 (article 219 of the French Tax Code) plus the existing national contribution (CSB) of 3.3% (article 235 *ter* ZC of French Tax Code), *i.e.*, a compound tax rate of 25,83%.

Long-term capital gains on affiliates are exempt from this corporate tax, except for a 12% fee on the gross amount in a net long term capital gains situation (article 219 I a *quinquies* of the French Tax Code).

Furthermore, under the parent-subsidiary regime, dividends from companies in which Societe Generale's equity interest is at least 5% are tax exempt, subject to the taxation of a portion of fees and expenses of 1% or 5% at the full statutory tax rate (article 216 of the French Tax Code).

**NOTE 5.2 Provisions for tax adjustments****ACCOUNTING PRINCIPLES**

Provisions for tax adjustment represent liabilities whose timing or amount cannot be determined precisely.

Provisions may be recorded only:

- when, by virtue of an obligation related to the corporate income tax toward a tax authority, Societe Generale will probably or certainly incur an outflow of resources to this third-party without receiving at least the equivalent value in exchange;
- and when the amount of probable outflow of resources can be reliably estimated.

The expected outflows are then discounted to present value to determine the amount of the provision, when this discounting has a significant impact. Charge to and reversals of provisions for tax adjustments are booked to current taxes in the income statement "Tax expenses/income".

Information on the nature and the amount of the associated risks is not disclosed when Societe Generale considers that such disclosure could seriously undermine its position in a dispute with other parties on the subject matter of the provision.

<i>(In EURm)</i>	Amount as at 31.12.2022	Net allocations	Used reversals	Change in scope and reclassifying	Amount as at 31.12.2023
<b>PROVISIONS FOR TAX ADJUSTMENTS</b>	<b>12</b>	-	(1)	-	<b>11</b>

**NOTE 5.3 Deferred tax assets**

<i>(In EURm)</i>	31.12.2023	31.12.2022
Tax loss carryforwards	1,676	1,603
Gains on sales of assets to companies included in the tax consolidation, in France	(83)	(120)
Other (primarily relating to other reserves)	1,487	1,486
<b>TOTAL</b>	<b>3,080</b>	<b>2,969</b>

Societe Generale performs an annual review of its capacity to use tax loss carry-forwards, taking into account the tax system applicable to each tax entity concerned and a realistic forecast of its tax results. For this purpose, the tax results are determined based on the projected performance of the businesses. This performance corresponds to the estimated budget (scenario SG Central) over three years (from 2024 to 2027) extrapolated to 2028, which corresponds to a "normative" year.

These budgets notably take into account the impacts of the commitments to energy and environmental transition and regional development which are detailed in the Declaration of Non-Financial Performance.

The tax results also take into consideration the accounting and tax adjustments (including the reversal of the deferred tax assets and liabilities bases on temporary differences) applicable to the entities and jurisdictions concerned. These adjustments are determined on the

basis of historical tax results and on the entity's tax expertise. An extrapolation of the tax result is performed from 2028 on and over a timeframe considered reasonable and depending on the nature of the activities carried out within each tax entity.

On principle, the appreciation of the macro-economic factors selected and the internal estimates used to determine the tax results involve risks and uncertainties about their materialization over the estimated timeframe for the absorption of the losses. These risks and uncertainties are in particular related to possible changes in applicable tax rules (computation of the tax result, as well as allocation rules for tax loss carry-forwards) or materialization of the assumptions selected. These uncertainties are mitigated by robustness checks of the budgetary and strategic assumptions.

At 31 December 2023, the updated projections confirm the probability that Societe Generale will be able to offset the tax losses subject to deferred tax assets against future profits.

## NOTE 5.4 Deferred tax assets recognised on tax loss carry-forwards and deferred tax assets not recognised

As at 31 December 2023, based on the tax system of each franchise and a realistic projection of their tax income, the projected period for deferred tax asset recovery is indicated in the table below:

(In EURm)	31.12.2023	Statutory time limit on carryforwards	Expected recovery period
Total deferred tax assets relating to tax loss carryforwards	1,676		
o.w. French tax group	1,572	Unlimited <sup>(1)</sup>	8 years
o.w. US tax group	88	20 years <sup>(2)</sup>	7 years
others	16		

(1) In accordance with the 2013 Finance Law, the deduction of previous losses is limited to EUR 1 million plus 50% of the fraction of the taxable income for the fiscal year exceeding this limit. The non-deductible portion of losses may be carried forward to the following fiscal years with no time limit and under the same conditions.

(2) Tax losses generated before December 2011.

As at 31 December 2023, deferred tax assets and liabilities not recognised on the asset side of the balance sheet concerned in particular:

(In EURm)	31.12.2023	31.12.2022
French tax group	930	520
Franchises in the United States of America	273	287
SG Singapore	80	82

For the France tax group, deferred tax assets of EUR 410 million could not be recognised at the end of December 2023, bringing the amount of unrecognised deferred tax assets in France to EUR 930 million. If tax projections improve, all or part of these deferred taxes may be recognised as deferred tax assets in future years.

In parallel, the unrecognised deferred tax assets of the US tax group decreased by EUR 49 million due to the recognition in the 2023 balance sheet of EUR 40 million deferred tax assets and a EUR -9 million foreign exchange effect.

With regard to the tax treatment of the loss caused by the actions of Jérôme Kerviel, Societe Generale considers that the judgment of the Versailles Court of Appeal of 23 September 2016 does not call into question its validity in light of the 2011 opinion of the French Supreme Administrative Court (*Conseil d'État*) and its established case law which was recently confirmed again in this regard. Consequently, Societe Generale considers that the related tax loss remains recoverable against the future taxable income (see Note 8).

“Pillar 2”: tax reform – global minimum corporate tax rate (“globe” rules)

In October 2021, 137 of the 140 jurisdictions members of the OECD Inclusive Framework on Base Erosion and Profit Shifting (BEPS) committed to the principle of establishing a global minimum corporate income tax rate of 15%. A set of rules, referred to as “Pillar 2” (or “globe rules”), published by the OECD on 20 December 2021, specifies the mechanism which will apply, in the states that will adopt it, to the profits by country of multinational groups with revenues exceeding EUR 750 million.

European Directive (EU) 2022/2523 incorporating the Pillar 2 rules was adopted and published in the Official Journal of the European Union on 22 December 2022. Article 4 of the French Finance act for 2024 incorporates the directive into French law. The minimum level of tax will take the form of an additional “top-up” tax determined according

to rules compliant with the directive. Transitional Safe Harbour set out by the OECD for the first three fiscal years are also included in the law. These rules apply from 1 January 2024 to Societe Generale, as parent company of the Societe Generale group, in respect of jurisdictions where the Group operates which would present an effective tax rate calculated according the rules of Pillar 2, lower than the minimum rate of 15%.

On 7 July 2023, the French Accounting Standards Board (*Autorité des Normes Comptables, ANC*), published Regulation No. 2023-02, approved by decree of 26 December 2023, amending ANC Regulation No. 2020-01 of 6 March 2020 relating to consolidated financial statements. This regulation, which is mandatory from 31 December 2023 with prospective effect, introduces an exemption from recognition of deferred tax assets and liabilities related to the application of the OECD Pillar 2 rules. For the preparation of its annual accounts at 31 December 2023, Societe Generale applies this exemption to the recognition of deferred taxes associated with additional taxes arising from Pillar 2 rules.

A project structure has been established to analyse the provisions of the Pillar 2 European Directive and take the necessary measures to comply with them as soon as they enter into force. According to initial estimates based on the available data (in particular data from the country-by-country reports of years 2021 and 2022), the effective Pillar 2 tax rates would exceed 15% in most jurisdictions in which the Societe Generale group operates. However, there is a limited number of jurisdictions in which a top-up tax would have to be paid. To date, Societe Generale does not anticipate any material impact of this reform. Because of the calculation complexity resulting from these rules and the changes in the Societe Generale group’s consolidation scope, the effects of this reform are still being examined to refine the quantification in view of the first accounting recognition of any additional tax burden in Societe Generale’s financial statements in 2024.

## NOTE 6 SHAREHOLDER'S EQUITY

### NOTE 6.1 Changes in shareholders' equity

(In EURm)	Capital Stock	Additional paid-in-capital	Legal reserve	Retained earnings			Net income of the period	Shareholders' equity
				Special reserves	Other reserves	Retained earnings		
<b>As at 31 December 2021</b>	<b>1,067</b>	<b>21,556</b>	<b>107</b>	<b>2,097</b>	<b>1,435</b>	<b>9,699</b>	<b>1,995</b>	<b>37,956</b>

Increase/Decrease in capital stock	(58)	(1,069)	(6)	-	-	-	-	(1,133)
Net income of the period	-	-	-	-	-	-	3,350	3,350
Dividends paid	-	-	-	-	-	(1,363)	-	(1,363)
Other movements	-	(1)	-	1	-	(1)	-	(1)
<b>As at 31 December 2023</b>	<b>1,004</b>	<b>20,260</b>	<b>99</b>	<b>2,098</b>	<b>1,435</b>	<b>8,699</b>	<b>3,350</b>	<b>36,35045</b>

During the first semester of 2023 Societe Generale proceeded a capital reduction of EUR 52 million by cancelling 41,674,813 shares, with an impact on the issue premium of EUR 858.4 million and on the legal reserve of EUR 3.6 million.

During the second semester of 2023 Societe Generale proceeded:

- a capital increase reserved for employees of EUR 15.7 million, with a EUR 205.6 million issuing premium;
- a capital reduction of EUR 22 million by cancelling 17,777,697 shares, with an impact on the issue premium of EUR 416 million and on the legal reserve of EUR 2.2 million.

As at 31 December 2023, Societe Generale's fully paid-up capital amounts to EUR 1,003,724,927.50 and comprises 802,979,942 shares with a nominal value of EUR 1.25.

The dividends distribution performed by Societe Generale in 2023 amounted to EUR 1,363 million after elimination of treasury stock dividend for EUR 11 million.

**NOTE 6.2 Proposed distribution of income**

At the Annual General Meeting of 22 May 2024, the Board of Directors will propose an allocation of income for the year ended 31 December 2023 and dividend distribution under the following terms:

<i>(In EURm)</i>	<b>2023</b>
Net income	3,350
Unappropriated retained earnings	8,699
<b>TOTAL INCOME TO BE APPROPRIATED</b>	<b>12,049</b>
Dividend	723
Retained earnings	11,326
<b>TOTAL APPROPRIATED INCOME</b>	<b>12,049</b>

The dividend corresponds to EUR 0.90 per share with a par value of EUR 1.25.

The amount of dividend of EUR 723 million to be paid to shareholders is calculated on the basis of an existing number of shares as at 31 December 2023.

**NOTE 6.3 Net earnings per share**

<i>(In EURm)</i>	<b>31.12.2023</b>	<b>31.12.2022</b>
<b>Net income attributable to ordinary shareholders</b>	<b>3,350</b>	<b>(260)</b>
Weighted average number of ordinary shares outstanding	799,315,070	822,437,425
<b>Earnings per ordinary share (in EUR)</b>	<b>4.19</b>	<b>(0.32)</b>
Average number of ordinary shares used in the dilution calculation <sup>(1)</sup>	-	-
Weighted average number of ordinary shares used in the calculation of diluted net earnings per share	799,315,070	822,437,425
Diluted earnings per ordinary share (in EUR)	4.37	(0.32)

<sup>(1)</sup> The number of shares used in the dilution calculation is computed using the "share buy-back" method and takes into account free shares issues and stock-option plans.

**NOTE 6.4 Subordinated debt****ACCOUNTING PRINCIPLES**

This item includes borrowings, whether or not in the form of securitised debt, with fixed-term or undetermined duration, which in the event of liquidation of the borrowing company may only be redeemed after all other creditors have been paid.

Any accrued interest payable in respect of subordinated debt is recorded as related payables and as an expense in the income statement.

(1) The Bank's global subordinated debt expense, net of tax and of the repurchase impact, amounted to EUR 1,441 million in 2023 (compared with EUR 1,326 million in 2022).

(2) Debt with related parties has been reimbursed as at 31 December 2023 (EUR 43 million as at 31 December 2022).

Societe Generale is entitled to cancel the remuneration of the perpetual subordinated debt issued.

As a general rule, subordinated debt may include an early repayment clause at the option of Societe Generale, which may take place no earlier than in its fifth year.

### NOTE 7.2 Tangible and intangible fixed assets

#### ACCOUNTING PRINCIPLES

Tangible or intangible fixed assets include operating premises, investment property, software, etc.

Tangible and intangible fixed assets are carried at their purchase price on the asset side of the balance sheet, less depreciation, amortization and impairment. The purchase price of fixed assets include borrowing costs incurred to fund a lengthy construction period, along with all other directly attributable expenses. Software created in-house is recognised for its direct cost of development, that includes external expenditure on hardware and services and personnel costs directly attributable to the production and the preparation of the asset for use.

As soon as they are ready for use, tangible assets are depreciated using a component-based approach. Each component is depreciated over its own useful life.

For operating premises and investment property, the depreciation periods of the different components are between 10 to 50 years.

Infrastructures	Major structures	50 years
	Doors and windows, roofing	20 years
	Façades	30 years
Technical installations	Elevators	10-30 years
	Electrical installations	
	Electrical generators	
	Air conditioning, extractors	10-30 years
	Technical wiring	
	Securities and surveillance installations	
Fixtures and fittings	Plumbing	
	Fire and safety equipment	
	Finishing, surroundings	10 years

For the other fixed assets, depreciation periods have been defined based on the useful life of the assets considered which is generally estimated between three to twenty years.

Plant and equipment	5 years
Transport	4 years
Furniture	10-20 years
Office equipment	5-10 years
IT equipment	3-5 years
Software, developed or acquired	3-8 years
Concessions, patents, licences, etc.	5-20 years

If any, the depreciable value of each asset or component is reduced for its residual value. In the event of a subsequent decrease or increase of the residual value initially retained, the adjustment of the depreciable base shall affect the depreciation or amortisation plan of the asset prospectively.

Depreciation or amortisation allowances are recognised in the income statement under “Impairment, amortisation and depreciation”.

Gains or losses on disposal of operating assets are recorded in Net gains or losses on other assets.

### NOTE 7.2.1 CHANGES IN TANGIBLE AND INTANGIBLE FIXED ASSETS

**NOTE 7.4 Transactions in foreign currencies****ACCOUNTING PRINCIPLES**

Gains and losses arising from ordinary activities in foreign currencies are recognised in the income statement. Outright forward foreign exchange transactions and those used to hedge other forward foreign exchange transactions are valued on the basis of the forward foreign exchange rate of the relevant currency for the remaining maturity. Spot and other forward foreign exchange positions are revalued on a monthly basis using official month-end spot rates. Unrealized gains and losses are recognised in the income statement. Premiums and discounts resulting from hedged forward foreign exchange transactions are amortized to the income statement on a straight-line basis over the remaining maturity of these transactions.

**NOTE 7.5 Establishments in non-cooperative states or territories**

Since 2013, Societe Generale has defined strict internal rules to prevent developing any establishment in an extended list of countries that could become non cooperative states or territories or generate a reputational risk. Any establishment or development of new activities as part of existing operations, may only be authorised by decision of the General Management after approval by the Corporate Secretariat and the Compliance and Risk Divisions.

Since 2010, Societe Generale has decided to close (and has therefore taken the necessary steps to do so) all the Societe Generale's operations in countries and territories deemed non-cooperative by France that do not meet the criteria of the strict policy regarding tax havens established in the tax Code of Conduct. The list was updated by the Ministerial order of 3 February 2023 (published on 5 February 2023).

As of 31 December 2023, Societe Generale did not directly or indirectly own any business in the States and territories concerned.

## NOTE 8 INFORMATION ON RISKS AND LITIGATION

Every quarter, Societe Generale reviews in detail the disputes presenting a significant risk. These disputes may lead to the recording of a provision if it becomes probable or certain that the Group will incur an outflow of resources for the benefit of a third party without receiving at least the equivalent value in exchange. These provisions for litigations are classified among the Other provisions included in the Provisions item in the liabilities of the balance-sheet.

No detailed information can be disclosed on either the recording or the amount of a specific provision given that such disclosure would likely seriously prejudice the outcome of the disputes in question.

- On 24 October 2012, the Court of Appeal of Paris confirmed the first judgment delivered on 5 October 2010, finding J. Kerviel guilty of breach of trust, fraudulent insertion of data into a computer system, forgery and use of forged documents. J. Kerviel was sentenced to serve a prison sentence of five years, two years of which are suspended, and was ordered to pay EUR 4.9 billion in damages to Societe Generale. On 19 March 2014, the Supreme Court confirmed the criminal liability of J. Kerviel. This decision puts an end to the criminal proceedings. On the civil front, on 23 September 2016, the Versailles Court of Appeal rejected J. Kerviel's request for an expert determination of the damage suffered by the Bank, and therefore confirmed that the net accounting losses suffered by the Bank as a result of his criminal conduct amount to EUR 4.9 billion. It also declared J. Kerviel partially responsible for the damage caused to Societe Generale and sentenced him to pay to Societe Generale EUR 1 million. Societe Generale and J. Kerviel did not appeal before the Supreme Court. Societe Generale considers that this decision has no impact on its tax situation. However, as indicated by the Minister of the Economy and Finance in September 2016, the tax authorities have examined the tax consequences of this book loss and indicated that they intended to call into question the deductibility of the loss caused by the actions of J. Kerviel, amounting to EUR 4.9 billion. This proposed tax rectification has no immediate effect and will possibly have to be confirmed by an adjustment notice sent by the tax authorities when Societe Generale will be in a position to deduct the tax loss carry forwards arising from the loss from its taxable income. Such a situation will not occur for several years according to the Bank's forecasts. In view of the 2011 opinion of the French Supreme Administrative Court (*Conseil d'État*) and its established case law which was recently confirmed again in this regard, Societe Generale considers that there is no need to provision the corresponding deferred tax assets. In the event that the authorities decide, in due course, to confirm their current position, Societe Generale will not fail to assert its rights before the competent courts. By a decision handed down on 20 September 2018, the Investigation Committee of the reviewing and reassessment Criminal Court has furthermore declared inadmissible the request filed in May 2015 by J. Kerviel against his criminal sentence, confirming the absence of any new element or fact that could justify the reopening of the criminal file.
- Between 2003 and 2008, Societe Generale set up gold consignment lines with the Turkish group Goldas. In February 2008, Societe Generale was alerted to a risk of fraud and embezzlement of gold stocks held by Goldas. These suspicions were rapidly confirmed following the failure by Goldas to pay or refund gold worth EUR 466.4 million. Societe Generale brought civil proceedings against its insurers and various Goldas Group entities. Goldas launched various proceedings in Turkey and in the UK against Societe Generale. In the action brought by Societe Generale against Goldas in the UK, Goldas applied to have the action of Societe Generale struck-out and applied to the UK court for damages. On 3 April 2017, the UK court granted both applications and will, after an inquiry into damages, rule on the amount due to Goldas, if any. On 15 May 2018, the London Court of Appeal discharged entirely the inquiry into damages granted by the London High Court to Goldas but rejected Societe Generale's arguments relating to service of the claims issued against Goldas, which are therefore time-barred. On 18 December 2018, the Supreme Court refused permission to appeal to both Societe Generale and Goldas, which has therefore become definitive. On 16 February 2017, the Paris Commercial Court dismissed Societe Generale's claims against its insurers. Societe Generale filed an appeal against the Paris Commercial Court's decision. On 1 February 2023, the Paris Court of Appeals confirmed this decision. Societe Generale filed an appeal before the Supreme Court against this decision.
- In the early 2000s, the French banking industry decided to transition to a new digital system in order to streamline cheque clearing. To support this reform (known as EIC – *Échange d'Images Chèques*), which has contributed to the improvement of cheque payments security and to the fight against fraud, the Banks established several interbank fees (including the CEIC which was abolished in 2007). These fees were implemented under the aegis of the banking sector supervisory authorities, and to the knowledge of the public authorities.
  - On 20 September 2010, the French competition authority ruled that the joint implementation and the setting of the amount of the CEIC and of two additional fees for related services were in breach of competition law. The authority fined all the participants to the agreement (including the Banque de France) a total of approximately EUR 385 million of penalties. On 2 December 2021, after several years of proceedings and two decisions of the Supreme Court, the Paris Court of Appeal overturned the decision of the French competition authority and ruled that (i) it was not proven that the establishment of the CEIC and the fees for related services on AOCT (cancellation of wrongly cleared transactions) as well as their collection had infringed the provisions of Article L. 420-1 of the French Commercial Code and of Article 101 of the Treaty on the Functioning of the European Union and, (ii) that its decision was giving rise to a right of restitution of the sums paid in execution of the overturned decision, namely approximately EUR 53.5 million for Societe Generale and approximately EUR 7 million for Crédit du Nord, together with interests at the legal rate. On 31 December 2021, the French competition authority filed an appeal before the Supreme court against this decision. The Supreme Court dismissed this appeal by a decision of 28 June 2023, putting a definitive end to this litigation.
  - On 3 January 2023, Societe Generale Private Banking (Switzerland) ("SGPBS") entered into an agreement to settle litigation in the United States stemming from the Ponzi scheme of Robert Allen Stanford and his affiliates. On 21 February 2023, the Receiver and the Official Stanford Investors Committee ("OSIC") filed a motion in US District Court for the Northern District of Texas seeking approval of the settlement. The settlement provides for the payment by SGPBS of USD 157 million in exchange for the release of all claims. During the 7 June 2023 hearing, the Court granted the Receiver's motion to approve the settlement. This order is now subject to an appeal. The settlement amount that SGPBS must pay is fully covered by reserves in the accounts of Societe Generale S.A. following a financial guarantee provided by Societe Generale S.A. to SGPBS. Each of the other defendant banks in this litigation also announced settlements in the first quarter of 2023 with the US Receiver and OSIC resolving their claims. These settlements were reached in advance of a jury trial that had been scheduled to start on 27 February 2023 (which ultimately did not take place).

In the same matter, a pre-contentious claim (*requête en conciliation*) was initiated in Geneva in November 2022 by the Joint Liquidators of Stanford International Bank Limited (“SIBL”), appointed by the courts in Antigua, representing the same investors as those represented by the US plaintiffs. SGPBS was served with the statement of claim on 20 June 2023 and will defend itself against the claims in this proceeding.

- Notwithstanding the agreements reached in 2018 with the US authorities regarding certain London Interbank Offered Rates and the Euro Interbank Offered Rate (“the IBOR matter”) and the dismissal on 30 November 2021 of the legal proceedings brought by the DOJ in this matter, the Bank continues to defend civil proceedings in the United States (as described below) and has responded to information requests received from other authorities, including the Attorneys General of various States of the United States and the New York Department of Financial Services.

In the United States, Societe Generale, along with other financial institutions, has been named as a defendant in putative class actions involving the setting of US Dollar Libor, Japanese Yen Libor, and Euribor rates and trading in instruments indexed to those rates. Societe Generale has also been named in several individual (non-class) actions concerning the US Dollar Libor rate. All of these actions are pending in the US District Court in Manhattan (the “District Court”).

As to US Dollar Libor, all claims against Societe Generale were dismissed by the District Court or voluntarily dismissed by the plaintiffs, except in two putative class actions and one individual action that were effectively stayed. The class plaintiffs and a number of individual plaintiffs appealed the dismissal of their antitrust claims to the United States Court of Appeals for the Second Circuit (“Second Circuit”). On 30 December 2021, the Second Circuit reversed the dismissal and reinstated the antitrust claims. These reinstated claims which have been returned to the District Court include those asserted by a proposed class of over-the-counter (OTC) plaintiffs and by OTC plaintiffs that have filed individual actions. On 21 June 2022, the US Supreme Court denied a petition filed by Societe Generale and other defendants that sought review of the Second Circuit’s ruling. Discovery is ongoing. The stayed putative class actions were voluntarily dismissed by plaintiffs on 10 August 2022 and 26 October 2023. On 9 January 2023, the claims against Societe Generale by one of the individual plaintiffs, National Credit Union Administration (as Liquidating Agent for certain credit unions) which included the stayed individual action referred to above, were voluntarily dismissed with prejudice. On 12 May 2023, Societe Generale and two other financial institutions entered into a settlement agreement to resolve the OTC class action for a combined USD 90 million. Societe Generale’s portion of this settlement was fully covered by reserves. On 17 October 2023, the District Court granted final settlement approval.

As to Japanese Yen Libor, the District Court dismissed the complaint brought by purchasers of Euroyen over-the-counter derivative products. On 1 April 2020, the Second Circuit reversed the dismissal and reinstated the claims. On 30 September 2021, the District Court

dismissed certain plaintiffs and all Racketeer Influenced and Corrupt Organizations Act claims but upheld certain federal antitrust and New York state law claims against Societe Generale. On 11 January 2024, plaintiffs and Societe Generale entered into a binding settlement term sheet. The settlement is covered by reserves. The settlement remains subject to Court approval. Discovery in that action is ongoing. In the other action, brought by purchasers or sellers of Euroyen derivative contracts on the Chicago Mercantile Exchange on 27 September 2019, plaintiff filed a motion for class certification. On 25 September 2020, the District Court granted defendants’ motion for judgment on the pleadings and dismissed plaintiff’s remaining claims. Plaintiff appealed to the Second Circuit. On 18 October 2022, as amended on 8 December 2022, the Second Circuit affirmed the District Court’s dismissal of plaintiff’s claims. On 2 October 2023, the US Supreme Court denied a petition filed by plaintiff that sought review of the Second Circuit’s ruling. As a result, the action is now concluded.

As to Euribor, the District Court dismissed all claims against Societe Generale in the putative class action and denied the plaintiffs’ motion to file a proposed amended complaint. Plaintiffs have appealed those rulings to the Second Circuit. Societe Generale reached a settlement of this action in an amount covered by reserves. Shortly thereafter, on 21 November 2022, the Second Circuit stayed plaintiffs’ appeal as to Societe Generale and remanded that portion of the case to the District Court for consideration of the proposed settlement. On 31 October 2023, the District Court granted final settlement approval. As a result, this action is now concluded.

In Argentina, Societe Generale, along with other financial institutions, has been named as a defendant in litigation brought by a consumer association on behalf of Argentine consumers who held government bonds or other specified instruments that paid interest tied to US Dollar Libor. The allegations concern violations of Argentine consumer protection law in connection with alleged manipulation of the US Dollar Libor rate. Societe Generale has not yet been served with the complaint in this matter.

- Societe Generale, along with several other financial institutions, was named as a defendant in a putative class action alleging violations of US antitrust laws and the Commodities Exchange Act (CEA) in connection with foreign exchange spot and derivatives trading. The action was brought by persons or entities that transacted in certain over-the-counter and exchange-traded foreign exchange instruments. Societe Generale reached a settlement of USD 18 million, which was approved by the Court on 6 August 2018. On 7 November 2018, a group of individual entities that elected to opt out of the settlement filed a lawsuit against Societe Generale, and several other financial institutions. The discovery phase is ongoing for Societe Generale and the remaining co-defendants. On 11 November 2020, Societe Generale was named, along with several other banks, in a UK action alleging collusion in the market for FX instruments. The action was subsequently transferred to the Competition Appeal Tribunal. By orders dated 17 May 2023 and 23 May 2023 respectively, the US and UK actions were dismissed. These actions are now concluded.

- On 10 December 2012, the French Supreme Administrative Court (*Conseil d'État*) rendered two decisions confirming that the “*précompte tax*” which used to be levied on corporations in France does not comply with EU law and defined a methodology for the reimbursement of the amounts levied by the tax authorities. However, such methodology considerably reduces the amount to be reimbursed. Societe Generale purchased in 2005 the “*précompte tax*” claims of two companies (Rhodia and Suez, now Engie) with a limited recourse on the selling companies. One of the above decisions of the French Supreme Administrative Court relates to Rhodia. Societe Generale has brought proceedings before the French administrative courts.
  - Several French companies applied to the European Commission, which considered that the decisions handed down by the *Conseil d'État* on 10 December 2012, which were supposed to implement the decision rendered by the European Union Court of Justice (EUCJ) on 15 September 2011, breached a number of principles of European law. The European Commission subsequently brought infringement proceedings against the French Republic in November 2014, and since then confirmed its position by referring the matter to the EUCJ on 8 December 2016. The EUCJ rendered its judgement on 4 October 2018 and sentenced France on the basis that the *Conseil d'État* disregarded the tax on EU sub-subsidiaries in order to secure the *précompte* paid erroneously and failed to raise a preliminary question before the EUCJ. With regard to the practical implementation of the decision, Societe Generale has continued to assert its rights with the competent courts and the tax authorities. On 23 June 2020, the Administrative Court of Appeal of Versailles issued a ruling in favour of Engie on our 2002 and 2003 Suez claims, and ordered a financial enforcement in our favour. The Court held that the advance payment (*précompte*) did not comply with the Parent-Subsidiary Directive. Further to proceedings brought before the *Conseil d'État*, the latter ruled that a question should be raised before the EUCJ in order to obtain a preliminary ruling on this issue. The EUCJ has confirmed on 12 May 2022 that the *précompte* did not comply with the Parent-Subsidiary Directive. The *Conseil d'État*, by an Engie judgment of 30 June 2023 took note of this incompatibility and confirmed the decision held by the Administrative Court of Appeal of Versailles with respect to the 2002 year, but referred the examination of the 2003 year to this same Court, which confirmed on 9 January 2024 the partial relief granted by the administration in the course of the proceedings. In parallel, a compensation litigation in relation to the Rhodia claim and the Suez claims (between 1999 and 2001) was brought in March 2023 before the European Commission and the Paris Administrative Court of Appeal, further to the negative judgements issued by the *Conseil d'État* in 2012 (Rhodia) and 2016 (Suez).
  - Societe Generale, along with other financial institutions, was named as a defendant in a putative class action alleging violations of US antitrust laws and the CEA in connection with its involvement in the London Gold Market Fixing. The action is brought on behalf of persons or entities that sold physical gold, sold gold futures contracts traded on the CME, sold shares in gold ETFs, sold gold call options traded on CME, bought gold put options traded on CME, sold over-the-counter gold spot or forward contracts or gold call options, or bought over-the-counter gold put options. Societe Generale, along with three other defendants, has reached a settlement to resolve this action for USD 50 million. By order dated 13 January 2022, the Court granted preliminary approval of the settlement. The final fairness hearing was held on 5 August 2022, and the settlement received final approval by order dated 8 August 2022. This matter is now concluded. Although Societe Generale's share of the settlement is not public, it was not material from a financial perspective. Societe Generale, along with other financial institutions, is also named as a defendant in two putative class actions in Canada (in the Ontario Superior Court in Toronto and Quebec Superior Court in Quebec City) involving similar claims. Societe Generale is defending the claims.
  - Since August 2015, various former and current employees of the Societe Generale Group have been under investigation by German criminal prosecution and tax authorities for their alleged participation in the so called “CumEx” patterns in connection with withholding tax on dividends on German shares. These investigations relate *inter alia* to a fund administered by SGSS GmbH proprietary trading activities and transactions carried out on behalf of clients. The Group entities respond to the requests of the German authorities.
- Societe Generale Group entities may also be exposed to claims by third parties, including German tax offices, and become party to legal disputes initiated by clients involved in proceedings against the German tax administration.
- Societe Generale and certain of its subsidiaries are defendants in an action pending in the US Bankruptcy Court in Manhattan brought by the Trustee appointed for the liquidation of Bernard L. Madoff Investment Securities LLC (BLMIS). The action is similar to those brought by the BLMIS Trustee against numerous institutions and seeks recovery of amounts allegedly received by the Societe Generale entities indirectly from BLMIS through so-called “feeder funds” that were invested in BLMIS and from which the Societe Generale entities received redemptions. The suit alleges that the amounts that the Societe Generale entities received are avoidable and recoverable under the US Bankruptcy Code and New York state law. The BLMIS Trustee seeks to recover, in the aggregate, approximately USD 150 million of which USD 55 million from Societe Generale. The Societe Generale entities are defending the action. In decisions dated 22 November 2016 and 3 October 2018, the Court rejected most of the claims brought by the BLMIS Trustee. The Trustee appealed to the US Court of Appeals for the Second Circuit. By order dated 25 February 2019, the Second Circuit vacated the judgements and remanded for further proceedings. On 1 June 2020, the United States Supreme Court denied Defendant-Appellees' petition for a writ of certiorari. The case is now before the Bankruptcy Court for further proceedings. The Societe Generale defendants filed a motion to dismiss on 29 April 2022. The motion was denied by order dated 7 October 2022. Discovery is proceeding.

- On 10 July 2019, Societe Generale was named as a defendant in a litigation filed in the US District Court in Miami by plaintiffs seeking compensation under the Cuban Liberty and Democratic Solidarity (Libertad) Act of 1996 (known as the Helms-Burton Act) stemming from the expropriation by the Cuban government in 1960 of Banco Nunez in which they are alleged to have held an interest. Plaintiff claims damages from Societe Generale under the terms of this statute. Plaintiff filed an amended complaint on 24 September 2019 adding three other banks as defendants and adding several new factual allegations as to Societe Generale. Societe Generale filed a motion to dismiss, which was fully briefed as of 10 January 2020. While the motion to dismiss was pending, plaintiffs filed an unopposed motion on 29 January 2020, to transfer the case to federal court in Manhattan, which the court granted on 30 January 2020. Plaintiffs filed a second amended complaint on 11 September 2020, in which it dropped the three other banks as defendants, added a different bank as an additional defendant, and added as additional plaintiffs who purport to be heirs of the founders of Banco Nunez. The court granted Societe Generale's motion to dismiss on 22 December 2021 but permitted plaintiffs to replead their claims. On 25 February 2022, plaintiffs filed an amended complaint, and on 11 April 2022, Societe Generale filed its motion to dismiss. By order entered 30 March 2023, the court granted Societe Generale's motion to dismiss. Plaintiffs have appealed.
- On 9 November 2020, Societe Generale was named as a defendant, together with another bank, in a similar Helms-Burton litigation filed in the US District Court in Manhattan (Pujol I) by the purported heirs of former owners, and personal representatives of estates of heirs or former owners, of Banco Pujol, a Cuban bank alleged to have been confiscated by the Cuban government in 1960. On 27 January 2021, Societe Generale filed a motion to dismiss. In response, as permitted by the judge's rules, plaintiffs chose to file an amended complaint and did so on 26 February 2021. Societe Generale filed a motion to dismiss the amended complaint on 19 March 2021, which was granted by the court on 24 November 2021. The court permitted plaintiffs to replead their claims. On 4 February 2022, plaintiffs filed an amended complaint, and on 14 March 2022, Societe Generale filed its motion to dismiss, which was granted by the court on 23 January 2023. Plaintiffs have appealed.

On 16 March 2021, Societe Generale was named as a defendant, together with another bank, in a nearly identical Helms-Burton litigation filed in the US District Court in Manhattan (Pujol II) by the personal representative of one of the purported heirs to Banco Pujol who is also a plaintiff in Pujol I. The case was stayed pending developments in Pujol I. At the parties' request, following dismissal of Pujol I, the court lifted the stay on Pujol II and entered an order dismissing the case for the same reasons it dismissed Pujol I. Plaintiff has appealed.
- In the context of the sale of its Polish subsidiary Euro Bank to Bank Millennium on 31 May 2019 and of the indemnity granted to the latter against certain risks, Societe Generale continues to monitor the evolution of court cases related to CHF-denominated or CHF-indexed loans issued by Euro Bank. The reserve in this matter in Societe Generale SA's accounts takes into consideration the increase in the number of court cases regarding the loans subject of the sale and the substance of the decisions handed down by Polish courts.
- Like other financial institutions, Societe Generale is subject to audits by the tax authorities regarding its securities lending/borrowing activities as well as equity and index derivatives activities. The 2017, 2018, 2019 and 2020 audited years are subject to notifications of proposals of tax adjustments in respect of the application of a withholding tax. These proposals are contested by the Group. Given the significance of the matter, on 30 March 2023, the French Banking Federation has brought proceedings against the tax administration's doctrine. In this respect, on 8 December 2023, the French *Conseil d'État* ruled that the tax authorities may not extend the dividend withholding tax beyond its statutory scope, except if taxpayers engaged in an abusive behavior (*abus de droit*), thereby characterizing the tax administration's position based on the concept of beneficial owner as illegal. In addition, further to raids conducted by the *parquet national financier* at the end of March 2023 at the premises of five banks in Paris, among which Societe Generale, the latter has been informed that it was subject to a preliminary investigation pertaining to the same issue. Societe Generale is defending the action.
- On 19 August 2022, a Russian fertiliser company, EuroChem North West-2 ("EuroChem"), a wholly owned subsidiary of EuroChem AG, filed a claim against Societe Generale S.A. and its Milan branch ("Societe Generale") before English courts. This claim relates to five on-demand bonds that Societe Generale issued to EuroChem in connection with a construction project in Kingisepp, Russia. On 4 August 2022, EuroChem made demands under the guarantees. Societe Generale explained it was unable to honour the claims due to international sanctions directly impacting the transactions, an assessment which EuroChem disputes. Societe Generale filed its defence submissions on 1 November 2022, to which EuroChem replied on 19 December 2022. A case management conference ("CMC") was held on 26 September 2023, in the course of which the court set the procedural timetable. As of the date of this update, the Parties' disclosures are due by the end of April 2024 and the trial (if any) is expected to take place in June 2025.
- SG Americas Securities, LLC ("SGAS") received a request for information in December 2022 from the US Securities and Exchange Commission ("SEC") focused on compliance with record-keeping requirements in connection with business-related communications on messaging platforms that were not approved by the firm. On 28 March 2023, SGAS and Societe Generale received a similar request from the US Commodity Futures Trading Commission ("CFTC"). These inquiries follow a number of regulatory settlements in 2022 with other firms covering similar matters. SGAS reached a settlement with the SEC, announced on 8 August 2023, and agreed to pay a penalty of USD 35 million, take certain remedial actions, and engage an independent compliance consultant. Societe Generale and SGAS reached a settlement with the CFTC, also announced on 8 August 2023, and agreed to pay a penalty of USD 75 million and take certain remedial actions.

## 6.7 STATUTORY AUDITORS' REPORT ON THE FINANCIAL STATEMENTS

*This is a translation into English of the statutory auditors' report on the financial statements issued in French and it is provided solely for the convenience of English speaking users.*

*This statutory auditors' report includes information required by French law, such as information about the appointment of the statutory auditors or verification of the management report and other documents provided to shareholders.*

*This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.*

Year ended December 31, 2023

To the Annual General Meeting of Société Générale,

### Opinion

In compliance with the engagement entrusted to us by your Annual General Meeting, we have audited the accompanying financial statements of Société Générale for the year ended December 31, 2023.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the Company as of December 31, 2023 and of the results of its operations for the year then ended in accordance with French accounting principles.

The audit opinion expressed above is consistent with our report to the Audit and Internal Control Committee.

### Basis for opinion

#### AUDIT FRAMEWORK

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the "Statutory Auditors' Responsibilities for the Audit of the Financial Statements" section of our report.

### INDEPENDENCE

We conducted our audit engagement in compliance with independence requirements of the French Commercial Code (*Code de commerce*) and the French Code of Ethics (*Code de déontologie*) for statutory auditors for the period from January 1, 2023 to the date of our report, and specifically we did not provide any prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No 537/2014.

### Justification of Assessments - Key Audit Matters

In accordance with the requirements of Articles L.821-53 and R. 821-180 of the French Commercial Code relating to the justification of our assessments, we inform you of the key audit matters relating to risks of material misstatement that, in our professional judgment, were of most significance in our audit of the financial statements of the current period, as well as how we addressed those risks.

These matters were addressed in the context of our audit of the annual financial statements as a whole, and in forming our opinion thereon and we do not provide a separate opinion on specific items of the financial statements.

## ASSESSMENT OF IMPAIRMENT AND PROVISIONS FOR CUSTOMER LOANS

### Risk identified

Customer loans and receivables carry a credit risk which exposes your company to a potential loss if its client or counterparty is unable to meet its financial commitments.

Your company recognizes impairment and provisions to cover this risk.

The accounting principles used for the measurement of individual impairment, on the one hand, and collective provisions, on the other, are set out in Note 2.6 "Impairment and provisions" to the financial statements.

The amount of the collective provisions for credit risk is calculated on the basis of non-downgraded performing loans and downgraded performing loans, respectively. These collective provisions are determined using statistical models requiring the exercise of judgment at the various stages in the calculation, particularly in the context of uncertainty relating to the geopolitical and economic situation.

In addition, your company uses judgment and makes accounting estimates to measure the level of individual impairment for doubtful loans.

As at December 31, 2023, outstanding loans to clients exposed to credit risk totaled M€ 376,146; total impairment amounted to M€ 2,556 and total provisions amounted to M€ 2,018.

We consider the measurement of impairment and provisions relating to customer loans to be a key audit matter as they require Management to exercise judgment and make estimates, particularly concerning the economic sectors and geographical areas most seriously weakened by the crisis.

### Our response

Our work focused on the most significant loans and customer loan portfolios, as well as the most vulnerable economic sectors and geographical areas, in particular, loans linked to Russia and sectors weakened by inflation and rising interest rates.

After including credit risk management experts in our audit team, our audit work included:

- obtaining an understanding of Société Générale's governance and internal control relating to the assessment of the credit risk and the measurement of the expected losses, and testing the key manual and automated controls;
- assessing, with the support of economists from our firms, the relevance of the macro-economic projections and the weighting of scenarios used by your company;
- analyzing the main parameters used by your company to measure the collective provisions as at December 31, 2023;
- assessing the capacity of model and parameter adjustments as well as sectoral adjustments to adequately cover the credit risk level in the context of the economic crisis;
- assessing, using data analysis tools, the measurement of the collective provisions on a sample of portfolios;
- testing, on a selection of the most significant loans to corporate clients, the main criteria used to classify loans as doubtful, as well as the assumptions used to estimate the related individual impairment.

We also analyzed the information on credit risk in the evolving context of the pandemic disclosed in Notes 1.4 "Use of estimates and judgment", 2.3 "Loans and receivables" and 2.6 "Impairment and provisions" to the financial statements.

## RECOVERABILITY OF DEFERRED TAX ASSETS IN FRANCE

### Risk identified

As at December 31, 2023, deferred tax assets on loss carryforwards were recorded in the amount of M€ 1,676, including M€ 1,572 for the tax group in France.

As stated in Note 5 "Taxes" to the financial statements, your company calculates deferred taxes at the level of each tax entity and recognizes deferred tax assets at the closing date when it is considered probable that the tax entity concerned will have future taxable profits against which temporary differences and tax loss carryforwards can be offset, within a given timeframe. As at December 31, 2023, this timeframe is eight years for the tax group in France.

In addition, as stated in Notes 5 "Taxes" and 8 "Information on risks and litigation" to the financial statements, certain tax loss carryforwards are challenged by the French tax authorities and are therefore liable to be called into question.

Given the importance of the assumptions used to assess the recoverability of the deferred tax assets in France, notably on future taxable profits, and of the judgment exercised by Management in this respect, we considered this issue to be a key audit matter.

### Our response

Our audit approach consisted in assessing the probability that your company will be able to use in the future its tax loss carryforwards generated to date, in particular in view of its ability to generate future taxable profits in France.

After including tax specialists in our audit team, our procedures mainly consisted in:

- comparing the projected results of the previous years with the actual results of the corresponding fiscal years, so as to assess the reliability of the tax business plan development process;
- obtaining an understanding of the budget for 2024 drawn up by Management and approved by the Board of Directors, as well as the assumptions underlying the projections over the 2024-2027 timeframe, which take into account the expected impacts of operations known at the closing date (in particular, the merger of the France networks or the acquisition of Leaseplan);
- assessing the relevance of the methods used to extrapolate the tax results after the 2024-2027 timeframe;
- assessing the assumptions used to analyze sensitivity in the event of adverse scenarios defined by the Société Générale group;
- analyzing the sensitivity of the recovery period for tax losses under different scenarios we created;
- analyzing the situation of your company, notably by taking note of the opinions of its external tax advisers regarding its tax loss carryforwards in France, partly challenged by the tax authorities.

We also analyzed the information provided by your company, concerning deferred tax assets, disclosed in Notes 1.4 "Use of estimates and judgment", 5 "Taxes" and 8 "Information on risks and litigation" to the financial statements.

## VALUATION OF COMPLEX FINANCIAL INSTRUMENTS

### Risk identified

Within the scope of its market activities, your company holds financial instruments for trading purposes. As at December 31, 2023, M€ 174,734 are recorded in this respect under assets on your company's balance sheet.

To determine the fair value of these instruments, your company uses techniques or in-house valuation models.

As stated in Note 2.2 "Operations on forward financial instruments" to the financial statements, if necessary, these valuations include discounts calculated according to the relevant instruments and associated risks. In the absence of available market data or market valuation models, the models and data used to value these instruments may, for example, be based on Management's judgment and estimates.

Given the complexity of the modelling in determining the fair value, the multiplicity of models used, and the use of Management's judgment in determining these fair values, we consider the valuation of complex financial instruments to be a key audit matter.

### Our response

Our audit approach is based on the key internal control processes related to the valuation of complex financial instruments.

After including financial instrument valuation specialists in our audit team, our procedures consisted in:

- obtaining an understanding of the procedure to authorize and validate new products and their valuation models, including the process for the entry of these models in the information systems;
- analyzing the governance set up by the Risk Department for the control of the valuation models;
- analyzing the valuation methodologies for certain categories of complex instruments and the related reserves or value adjustments;
- testing the key controls relating to the independent verification of the valuation parameters, and evaluating the reliability of the market parameters used to provide input for the valuation models with reference to external data;
- as regards the process used to explain the changes in fair value, obtaining an understanding of the bank's analysis principles and performing tests of controls on a sample basis. In addition, we performed "analytical" IT procedures on the control data relating to certain activities;
- obtaining the quarterly results of the model independent validation process;
- obtaining the quarterly results of the valuation adjustment process based on external market data, and analyzing the differences in parameters with the market data in the event of a significant impact, and the accounting treatment of such differences. Where external data is absent, we assessed the existence of reserves or the non-materiality of the associated issues;
- performing counter-valuations of a selection of complex derivative financial instruments using our tools.

We also analyzed the compliance of the methods underlying the estimates and the principles described in Note 2.2 "Operations on forward financial instruments" to the financial statements.

## IT RISK RELATING TO MARKET ACTIVITIES

### Risk identified

The Market Activities of the Global Banking & Investor Solutions division (GBIS) constitute an important activity, as illustrated by the significance of the financial instruments positions in Note 2.2 "Operations on forward financial instruments" to the financial statements.

This activity is highly complex given the nature of the financial instruments processed, the volume of transactions, and the use of numerous interfaced information systems.

The risk of occurrence of a significant misstatement in the accounts related to an incident in the data processing chains used or the recording of transactions until their transfer into the accounting system may result from:

- changes made to management and financial information by unauthorized persons via the information systems or underlying databases;
- a failure in processing or in the transfer of data between systems;
- a service interruption or an operating incident which may or may not be related to internal or external fraud.

Furthermore, in a context of widespread home working and an increasing number of malicious acts, your company is exposed to risks relating to the opening up of information systems to allow remote access to transaction processing applications.

To ensure the reliability of the accounts, it is therefore essential for your company to master the controls relating to the management of the information systems. In this context, the IT risk relating to the Market Activities of the GBIS division constitutes a key audit matter.

### Our response

Our audit approach for this activity is based on the controls related to the management of the information systems set up by your company.

After including information system specialists in our audit team, we tested the IT general controls of key applications that we considered to be key for this activity. Our work mainly consisted in assessing:

- the controls set up by your company on access rights, especially at sensitive periods in a professional career (recruitment, transfer, resignation, end of contract) with, where applicable, extended procedures in the event of anomalies identified during the financial year;
- potential privileged access to applications and infrastructure;
- change management relating to applications, and more specifically the separation between development and business environments;
- security policies in general and their deployment in IT applications (for example, those related to passwords);
- handling of IT incidents during the audit period;
- governance and the control environment on a sample of applications.

For these same applications, and in order to assess the transfer of information flows, we tested the key application controls relating to the automated interfaces between the systems.

In addition, our tests on the general IT and application controls were supplemented by data analysis procedures on certain IT applications.

We also evaluated the governance implemented by your company to ensure the resilience of the information systems faced with cyber risks. Our work consisted in interviewing the bank's security teams and studying the reports from the cybersecurity teams as well as any incidents occurring during the period.

## ASSESSMENT OF THE LEGAL OR TAX RISKS RELATING TO REGULATORY OR ARBITRATION PROCEEDINGS INVOLVING THE GROUP

### Risk identified

Société Générale is a party to various legal actions, particularly civil, administrative and criminal proceedings as indicated in Notes 2.6.6 "Other provisions for contingencies and losses" and 5.2 "Tax provisions" to the financial statements.

Other provisions for contingencies and losses amounted to M€ 967 and included in particular provisions for litigation and tax provisions which totaled M€ 11 as of December 31, 2023.

As indicated in Note 8 "Information on risks and litigation" to the financial statements, legal disputes presenting a material risk are analyzed on a quarterly basis to assess the need to record provisions or adjust the amount of raised provisions.

Given the complexity of certain proceedings, the significant amount of management judgment in assessing the risks and the financial repercussions for your Group, we consider the accounting treatment of legal disputes to be a key audit matter.

### Our response

After including tax experts in our audit team, our approach mainly consisted in:

- obtaining an understanding of the process set up by your company to assess provisions for litigation;
- conducting interviews with the group's legal and tax departments and the functions affected by the ongoing proceedings to monitor the development of the main legal proceedings and ongoing investigations conducted by legal and tax authorities and regulators;
- obtaining and analysing available documentation such as management's position and the memos of the Group's legal and tax advisors;
- requesting confirmation from the lawyers in charge of the most significant proceedings;
- assessing the assumptions used to determine the need for and the amount of provisions raised, in particular on the basis of information gathered from the group's external advisers involved in the relevant cases;
- assessing the appropriateness of the information provided in the notes to the financial statements.

## VALUATION OF EQUITY SECURITIES, OTHER LONG-TERM SECURITIES AND SHARES IN AFFILIATED COMPANIES

### Risk identified

Equity securities, shares in affiliated companies and other long-term securities are recognized in the balance sheet for a net carrying amount value of €24 billion (including €3.2 billion in impairment).

As stated in Note 2.1 "Securities portfolio" to the financial statements, securities are recognized at their purchase price excluding acquisition costs.

Your company must ascertain whether there is any indication that the securities may be impaired, and notably whether such impairment is taken into account in the forecasts made and the variables used to discount the resulting flows. The comparison of the net carrying amount of the securities with their recoverable amount is an essential factor in assessing the need for a potential impairment.

As stated in Note 2.6.5 "Impairment of securities" to the financial statements, the recoverable amount is assessed at the value in use determined, for each security, with reference to a valuation method based on available information such as equity, profitability or the average stock market price of the last three months (for listed securities).

Given the importance of the sensitivity of the models used to data variations and the assumptions on which the estimates are based, we consider the measurement of equity securities, other long-term securities and shares in affiliated companies to be a key audit matter.

### Our response

Our audit approach is based on gaining an understanding of the control procedures concerning (i) impairment testing of equity securities, other long-term securities and shares in affiliated companies and (ii) the drawing up of the business plans in place at the level of each entity to understand future changes in your company's structure and activities, and identify any indicators of impairment of these assets.

After including valuation specialists in our audit team, our work mainly consisted in:

- assessing, on a sample basis, the justification of the valuation methods and the figures used by Management to calculate values in use;
- analyzing the consistency of the business plans drawn up by the entities' finance departments on the basis of our understanding of the activities and projected results from previous financial years, in order to assess the reliability of the drawing-up of the business plans;
- critically analyzing the main assumptions and parameters used with regard to the available internal and external information (macro-economic scenarios, financial analyst consensus);
- evaluating the sensitivity analyses of the results to the key parameters, notably via comparison with multiples;
- testing, via sampling, the arithmetic accuracy of the value-in-use calculations used by your Company.

Lastly, we analyzed the information concerning equity securities, other long-term securities and shares in affiliated companies disclosed in Notes 1.4 "Use of estimates and judgment", 2.1 "Securities portfolio" and 2.6.5 "Impairment of securities" to the financial statements.

## Specific verifications

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by French law and regulations.

### INFORMATION GIVEN IN THE MANAGEMENT REPORT AND IN THE OTHER DOCUMENTS ADDRESSED TO SHAREHOLDERS WITH RESPECT TO THE FINANCIAL POSITION AND THE FINANCIAL STATEMENTS

We have no matters to report on the fair presentation and consistency with the financial statements of the information given in the Board of Directors' management report and in the other documents with respect to the financial position and the financial statements provided to shareholders except for the matter described below.

We have the following matter to report regarding the fair presentation and consistency with the financial statements of the information relating to payment deadlines referred to in Article D.441-6 of the French Commercial Code: as stated in the management report, this information does not include bank and other related operations as your Company considers that such operations fall outside the scope of disclosable information.

### REPORT ON CORPORATE GOVERNANCE

We attest that the Board of Directors' report on corporate governance sets out the information required by Articles L. 225-37-4, L. 22-10-10 and L. 22-10-9 of the French Commercial Code.

Concerning the information given in accordance with the requirements of Article L. 22-10-9 of the French Commercial Code relating to remunerations and benefits received by or allocated to the directors and any other commitments made in their favor, we have verified its consistency with the financial statements, or with the underlying information used to prepare these financial statements and, where applicable, with the information obtained by your Company from companies controlled thereby, included in the scope of consolidation. Based on these procedures, we attest the accuracy and fair presentation of this information.

With respect to the information relating to items that your Company considered likely to have an impact in the event of a takeover bid or exchange offer, provided pursuant to Article L. 22-10-11 of the French Commercial Code, we have agreed this information to the source documents communicated to us. Based on these procedures, we have no observations to make on this information.

### OTHER INFORMATION

In accordance with French law, we have verified that the required information concerning the purchase of investments and controlling interests, the identity of the shareholders and holders of the voting rights and the cross-shareholdings has been properly disclosed in the management report.

## Other Legal and Regulatory Verifications or Information

### FORMAT OF PRESENTATION OF THE FINANCIAL STATEMENTS INCLUDED IN THE ANNUAL FINANCIAL REPORT

We have also verified, in accordance with the professional standard applicable in France relating to the procedures performed by the statutory auditor relating to the annual and consolidated financial statements presented in the European single electronic format, that the presentation of the financial statements included in the annual financial report mentioned in Article L.451-1-2, I of the French Monetary and Financial Code (*Code monétaire et financier*), prepared under the responsibility of Chief Executive Officer, complies with the single electronic format defined in the European Delegated Regulation No. 2019/815 of December 17, 2018.

Based on the work we have performed, we conclude that the presentation of the financial statements included in the annual financial report complies, in all material respects, with the European single electronic format.

### APPOINTMENT OF THE STATUTORY AUDITORS

We were appointed as statutory auditors of Société Générale by your Annual General Meeting held on April 18, 2003 for Deloitte & Associés and on May 22, 2012 for Ernst & Young et Autres.

As of December 31, 2023, Deloitte & Associés and Ernst & Young et Autres were in their twenty-first year and twelfth year of total uninterrupted engagement, respectively.

Previously, Ernst & Young Audit had been statutory auditor of Société Générale from 2000 to 2011.

## Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with French accounting principles, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless it is expected to liquidate the Company or to cease its operations.

The Audit and Internal Control Committee is responsible for monitoring the financial reporting process and the effectiveness of internal control and risks management systems and where applicable, its internal audit, regarding the accounting and financial reporting procedures.

The financial statements were approved by the Board of Directors.

## Statutory Auditors' Responsibilities for the Audit of the Financial Statements

### OBJECTIVES AND AUDIT APPROACH

Our role is to issue a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As specified in Article L. 821-55 of the French Commercial Code, our statutory audit does not include assurance on the viability of the Company or the quality of management of the affairs of the Company.

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor exercises professional judgment throughout the audit and furthermore:

- identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence considered to be sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control;
- Evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements;
- Assesses the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. This assessment is based on the audit evidence obtained up to the date of his audit report. However, future events or conditions may cause the Company to cease to continue as a going concern. If the statutory auditor concludes that a material uncertainty exists, there is a requirement to draw attention in the audit report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to modify the opinion expressed therein;
- Evaluates the overall presentation of the financial statements and assesses whether these statements represent the underlying transactions and events in a manner that achieves fair presentation.

### REPORT TO THE AUDIT AND INTERNAL CONTROL COMMITTEE

We submit a report to the Audit and Internal Control Committee which includes in particular a description of the scope of the audit and the audit program implemented, as well as the results of our audit. We also report, if any, significant deficiencies in internal control regarding the accounting and financial reporting procedures that we have identified.

Our report to the Audit and Internal Control Committee includes the risks of material misstatement that, in our professional judgment, were of most significance in the audit of the financial statements of the current period and which are therefore the key audit matters that we are required to describe in this report.

We also provide the Audit and Internal Control Committee with the declaration provided for in Article 6 of Regulation (EU) No. 537/2014, confirming our independence within the meaning of the rules applicable in France such as they are set in particular by Articles L. 821-27 to L. 821-34 of the French Commercial Code (Code de commerce) and in the French Code of Ethics (Code de déontologie) for statutory auditors. Where appropriate, we discuss with the Audit and Internal Control Committee the risks that may reasonably be thought to bear on our independence, and the related safeguards.
