If the Underlying Reference Index rises by 10% or more during the trading day (which represents an approximately 70% loss after a 7 times inverse leverage), the Air Bag Mechanism is triggered and the Leveraged Index is adjusted intra-day. The Air Bag Mechanism reduces the impact on the Leveraged Index if the Underlying Reference Index rises further, but will also maintain a reduced exposure to the Underlying Reference Index in the event the Underlying Reference Index starts to fall after the Air Bag Mechanism is triggered, thereby reducing its ability to recoup losses. Trading of Certificates is suspended for at least 30 minutes after the Air Bag is triggered. Please refer to “Product Specific Risks” relating to the Air Bag Mechanism below and the “Description of Air Bag Mechanism” section of the Supplemental Listing Document for further information of the Air Bag Mechanism.</p>

#### D. PRODUCT SUITABILITY

##### WHO IS THIS PRODUCT SUITABLE FOR?

- This product is only suitable for investors who believe that the level of the Underlying Reference Index will fall and are seeking short-term leveraged inverse exposure to the Underlying Reference Index. The Certificates are classified as Specified Investment Products (SIPs) and can only be sold to retail investors with enhanced safeguards, including an assessment of such investors' investment knowledge or experience.
- This product should be only considered for intraday trading and short term investment periods due to its leveraged inverse exposure and the daily compounding, which may lead to a performance different from 7 times the inverse performance of the Underlying Reference Index over a period longer than one day.

You should consider carefully whether the Certificates are suitable for you in light of your experience, objectives, financial position and other relevant circumstances. The Certificates are not suitable for inexperienced investors.

#### Key Product Features

##### WHAT ARE YOU INVESTING IN?

- You are investing in the daily leveraged certificates, which are in the form of a zero-strike warrant, that provides you with a fixed leveraged return on the daily inverse performance of the Underlying Reference Index, plus any costs or fees that may apply.
- The Certificates track the performance of the Leveraged Index, which is calculated by an independent index calculation agent. The Leveraged Index provides a return based on an inverse fixed daily leveraged return of the Underlying Reference Index.
- As an example, the performance of the Certificates will provide 7 times the daily inverse performance of the Underlying Reference Index (excluding costs). If the Underlying Reference Index falls by 1% compared to the previous closing level, the value of the Certificate will rise by 7% (excluding costs). If the Underlying Reference Index rises by 1% compared to the previous closing level, the value of the Certificate will fall by 7% (excluding costs).

##### Floor level of the Leveraged Index

- The Leveraged Index is floored at 0 and the Certificates cannot be valued below zero.

##### Leveraged Index Mechanism

- The leverage mechanism is designed to provide 7 times the daily inverse performance of the Underlying

##### Further Information

Please refer to the "Information relating to the Leveraged Index" section in the Supplemental Listing Document, and the Issuer's website at [dlc.socgen.com](http://dlc.socgen.com).

Reference Index (excluding costs). The inverse exposure is obtained by a process equivalent to selling 7 times the Index and lending 8 times the cash (comprising the initial investment and 7 times the inverse exposure) at a rate determined according to the formula of the Leveraged Index.	
<b>Calculation of the Cash Settlement Amount</b>	
In respect of each Certificate, shall be an amount (if positive) payable in the Settlement Currency equal to: the Notional Amount per Certificate times the Closing Level.	
<b>WHAT WOULD YOU GAIN OR LOSE IN DIFFERENT SITUATIONS?</b>	
<ul style="list-style-type: none"> <li>• <b>Best case scenario:</b> The level of the Underlying Reference Index falls substantially resulting in a significant increase in the price of the Certificates. You would then sell the Certificates and realise a profit. The DMM is required to provide liquidity in the Certificates to ensure that there will generally be a market price available for the purchase and sale of the Certificates.</li> <li>• <b>Worst case scenario:</b> If you buy the Certificates and the level of the Underlying Reference Index increases sharply, the value of the Certificates will decrease by a multiple of the aforementioned increase in the level of the Underlying Reference Index, and you may lose your entire investment. Please refer to Appendix I below for an illustration on how returns and losses can occur under different scenarios.</li> </ul>	
<b>E. KEY RISKS</b>	
<b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b> <ul style="list-style-type: none"> <li>• Investment in the Certificates involves substantial risks including market risk, liquidity risk and the risk that the Issuer and/or the Guarantor will be unable to satisfy its/their obligations under the Certificates. Investors should ensure that they understand the nature of all these risks before making a decision to invest in the Certificates.</li> </ul> <b>PLEASE REFER TO THE LISTING DOCUMENTS FOR A COMPLETE LIST OF RISKS</b> <ul style="list-style-type: none"> <li>• The Risk Factors below are a summary of the Risk Factors set out in the Base Listing Document and the Supplemental Listing Document.</li> </ul>	<b>Further Information</b> Please refer to the "Risk Factors" section set out in the Base Listing Document and in the Supplemental Listing Document for a complete list of risks and details of the risks.
<b>Market Risks</b>	
<ul style="list-style-type: none"> <li>• <b>Market price of the Certificates may be affected by many factors</b> Due to their nature, Certificates can be volatile instruments and may be subject to considerable fluctuations in value due to, including but not limited to, variations in the frequency and magnitude of the changes in the level of the Underlying Reference Index, the time remaining to expiry, the currency exchange rates and the creditworthiness of the Issuer and the Guarantor.</li> <li>• <b>You may lose your entire investment</b> Certain events relating to the Underlying Reference Index or Underlying Reference Index components may cause adverse movements in the value and the level of the Underlying Reference Index or Underlying Reference Index components, as a result of which, you may, in extreme circumstances, sustain a significant loss of your investment if the level of the Underlying Reference Index has risen sharply on the Expiry Date.</li> </ul>	
<b>Liquidity Risks</b>	
<ul style="list-style-type: none"> <li>• <b>The secondary market may be illiquid</b> The Issuer acting through its DMM may be the only market participant buying and selling the Certificates. Therefore, the secondary market for the Certificates may be limited and you may not be able to realise the value of the Certificates. Do note that the bid-ask spread increases with illiquidity.</li> </ul>	
<b>Product Specific Risks</b>	
<ul style="list-style-type: none"> <li>• <b>Certificates only exercisable on the Expiry Date</b> The Certificates are only exercisable on the Expiry Date and you may not exercise the Certificates prior to such date. Accordingly, if on the Expiry Date the Cash Settlement Amount is zero or close to zero, you will lose your entire investment in the Certificates.</li> <li>• The total return on an investment in any Certificate will be affected by the Hedging Fee Factor, Management Fee and Gap Premium.</li> <li>• <b>Trading in the Certificates may be suspended</b> You should note that if trading in the securities or derivatives relating to or constituting the Underlying Reference Index is suspended, trading of options or futures relating to the Underlying Reference Index on any options or futures exchanges is suspended, or options or futures generally on any options and/or futures exchanges on which options or futures relating to the Underlying Reference Index are traded is suspended, or if the Underlying Reference Index or the Leveraged Index for whatever reason is not calculated, trading in the relevant Certificates will be suspended for a similar period.</li> <li>• <b>The value of certain index constituents may not be included in the closing level of the Underlying Reference Index</b> The closing level of the Underlying Reference Index may be the settlement price for settling the relevant index futures and options contracts as determined by the Relevant Stock Exchange. Thus, if it occurs at a time when one or more securities or derivatives comprised in the Underlying Reference Index are not trading and there is no Market Disruption Event under the terms of the Certificates then the value of such securities or derivatives will not be included in the closing level of the Underlying Reference Index.</li> <li>• <b>Issuer may make adjustments to the terms and conditions of the Certificates</b> Certain events relating to the Leveraged Index, the Underlying Reference Index, or Underlying Reference Index components permit the Issuer to make certain determinations in respect of the Leveraged Index, the Underlying Reference Index or Underlying Reference Index components, such as an adjustment to the Cash Settlement Amount necessary to take account of any material</li> </ul>	

change in the method of calculation of the Leveraged Index or the Underlying Reference Index.

- **You will be exposed to leveraged risks**

If the investment results in a loss, any such loss will be increased by the leverage factor of the Leveraged Index. Consequently you could lose more than you would if you invested directly in the Underlying Reference Index, or securities or derivatives comprised in the Underlying Reference Index.

- **Product performance may differ from 7 times the inverse performance of the Underlying Reference Index over a period longer than one day**

When held for longer than a day, product performance could be more or less than the leverage factor that is embedded within the Leveraged Index. The performance each day is locked in, and any subsequent returns are based on what was achieved the previous day. This process, referred to as compounding, may lead to a performance difference from 7 times the inverse performance of the securities or derivatives comprised in the Underlying Reference Index over a period longer than one day. This difference may be amplified in a volatile market with a sideways trend, where market movements are not clear in direction, whereby investors may sustain substantial losses.

- **When triggered, the Air Bag Mechanism may reduce the ability for the product to recoup losses**

Investors should note that the Air Bag Mechanism reduces the impact on the Leveraged Index if the Underlying Reference Index rises further, but will also maintain a reduced exposure to the Underlying Reference Index in the event the Underlying Reference Index starts to fall after the Air Bag Mechanism is triggered, thereby reducing its ability to recoup losses. Investors should note that the performance of the Leveraged Index will be the inverse of the Underlying Reference Index. Illustrative examples of the Air Bag Mechanism are set out below.

#### Scenario 1 – Downward Trend after Air Bag trigger

#### Scenario 2 – Upward Trend after Air Bag trigger

- **There is no assurance that the Air Bag Mechanism will prevent investors from losing the entire value of their investment.** There is no assurance that the Air Bag Mechanism will prevent the investor from losing the entire value of their investment, in the event of (i) an overnight increase in the Underlying Reference Index, where there is an approximately 14% or greater gap between the previous day closing level and the opening level of the Underlying Reference Index the following day, as the Air Bag

Mechanism will only be triggered when market opens the following day or (ii) a sharp intraday increase in the Underlying Reference Index of approximately 14% or greater (comparative to the previous closing level of the Underlying Reference Index or the previous observed level in case of an air bag previously on the same day) during the Observation Period.

- **The Certificates may be cancelled by the Issuer**

The Certificates may be cancelled at the discretion of the Issuer under certain circumstances, on giving notice to investors in accordance with the terms and conditions of the Certificates. Any money received by an investor on cancellation of the Certificates, which will be at the mark to market price, may be less than the capital initially invested by the investor, resulting in a loss to the investor.

#### Issuer Related Risks

- **You are exposed to the credit risk of the Issuer and the Guarantor**

The Certificates constitute general and unsecured obligations of the Issuer and of no other person, and the guarantee provided by the Guarantor constitutes general unsecured obligations of the Guarantor and of no other person. If you purchase the Certificates, you are relying upon the creditworthiness of the Issuer and the Guarantor and have no rights under the Certificates against any other person. You should note that the Issuer issues a large number of financial instruments, including Certificates, on a global basis and at any given time, the financial instruments outstanding may be substantial.

- **Conflicts of interest may arise from the overall activities of the Issuer, the Guarantor and their subsidiaries or affiliates**

The Issuer, the Guarantor and any of their subsidiaries and affiliates are diversified financial institutions that engage in a wide range of commercial and investment banking, brokerage, funds management, hedging transactions and investment and other activities for their own account or the account of others. In addition, the Issuer, the Guarantor and any of their subsidiaries and/or affiliates, in connection with their other business activities, may possess or acquire material information about the securities or derivatives related to the Underlying Reference Index, the Underlying Reference Index, and/or the Leveraged Index. Such activities and information may involve or otherwise affect issuers of securities or derivatives related to the Underlying Reference Index, the Underlying Reference Index, and/or the Leveraged Index in a manner that may cause consequences adverse to investors in the Certificates or otherwise create conflicts of interests in connection with the issue of Certificates by the Issuer.

- **Hedging or market-making activities by the Issuer, the Guarantor and their subsidiaries or affiliates may affect the Certificates**

In connection with hedging or market-making activities or with respect to proprietary or other trading activities by the Issuer, the Guarantor and any of their respective subsidiaries and affiliates, the Issuer, the Guarantor and any of their respective subsidiaries and affiliates may enter into transactions in the components of the Underlying Reference Index or related securities or derivatives which may affect the market price, liquidity or value of the Certificates and which may affect the interests of investors in the Certificates.

#### F. FEES AND CHARGES

##### WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?

- Normal transaction and brokerage fees apply, similar to fees that you would pay for other transactions on SGX-ST.
- Investors holding their position overnight will also incur the annualised cost (which consists of the Management Fee and Gap Premium, which are calculated daily and applied to the value of the product, as well as certain costs embedded within the Leveraged Index including the Stock Borrowing Cost and Rebalancing Cost). The Management Fee and Gap Premium will be published on the website at [dlc.socgen.com](http://dlc.socgen.com) and updated daily.

The roles of the different teams involved within Société Générale in creating, structuring and maintaining, or replicating the Leveraged Index have been strictly defined. However, these teams all depend on the same global market business division. Société Générale may engage in trading in the Leveraged Index or underlyings referenced by the Leveraged Index (for hedging reasons, on behalf of third party clients or on own account) which may adversely affect the level of the Leveraged Index.

Additional conflicts of interests may arise due to Société Générale and/or any of its affiliates acting as issuer and calculation agent of the product on one hand, and sponsor of the Leveraged Index on the other hand. Although Société Générale strictly defined the responsibilities of the different teams involved within Société Générale and its affiliates, such conflicts of interests may trigger negative consequences for investors.
